

small_CLD / homoscedastic / highly unbalanced

Disjoint partition: theoretical success; numerical failure (nested in theoretical failure); theoretical failure with a finite simplex. Icons: green success, red numerical failure, yellow theoretical failure.

small_CLD / heteroscedastic / moderately unbalanced

Disjoint partition: theoretical success; numerical failure (nested in theoretical failure); theoretical failure with a finite simplex. Icons: green success, red numerical failure, yellow theoretical failure.

small_CLD / heteroscedastic / highly unbalanced

Disjoint partition: theoretical success; numerical failure (nested in theoretical failure); theoretical failure with a finite simplex. Icons: green success, red numerical failure, yellow theoretical failure.

large_CLD / homoscedastic / moderately unbalanced

Disjoint partition: theoretical success; numerical failure (nested in theoretical failure); theoretical failure with a finite simplex. Icons: green success, red numerical failure, yellow theoretical failure.

large_CLD / homoscedastic / highly unbalanced

Disjoint partition: theoretical success; numerical failure (nested in theoretical failure); theoretical failure with a finite simplex. Icons: green success, red numerical failure, yellow theoretical failure.

large_CLD / heteroscedastic / moderately unbalanced

Disjoint partition: theoretical success; numerical failure (nested in theoretical failure); theoretical failure with a finite simplex. Icons: green success, red numerical failure, yellow theoretical failure.

large_CLD / heteroscedastic / highly unbalanced

Disjoint partition: theoretical success; numerical failure (nested in theoretical failure); theoretical failure with a finite simplex. Icons: green success, red numerical failure, yellow theoretical failure.
