Accuracy of every method: colour RMSE, size Aitchison distance

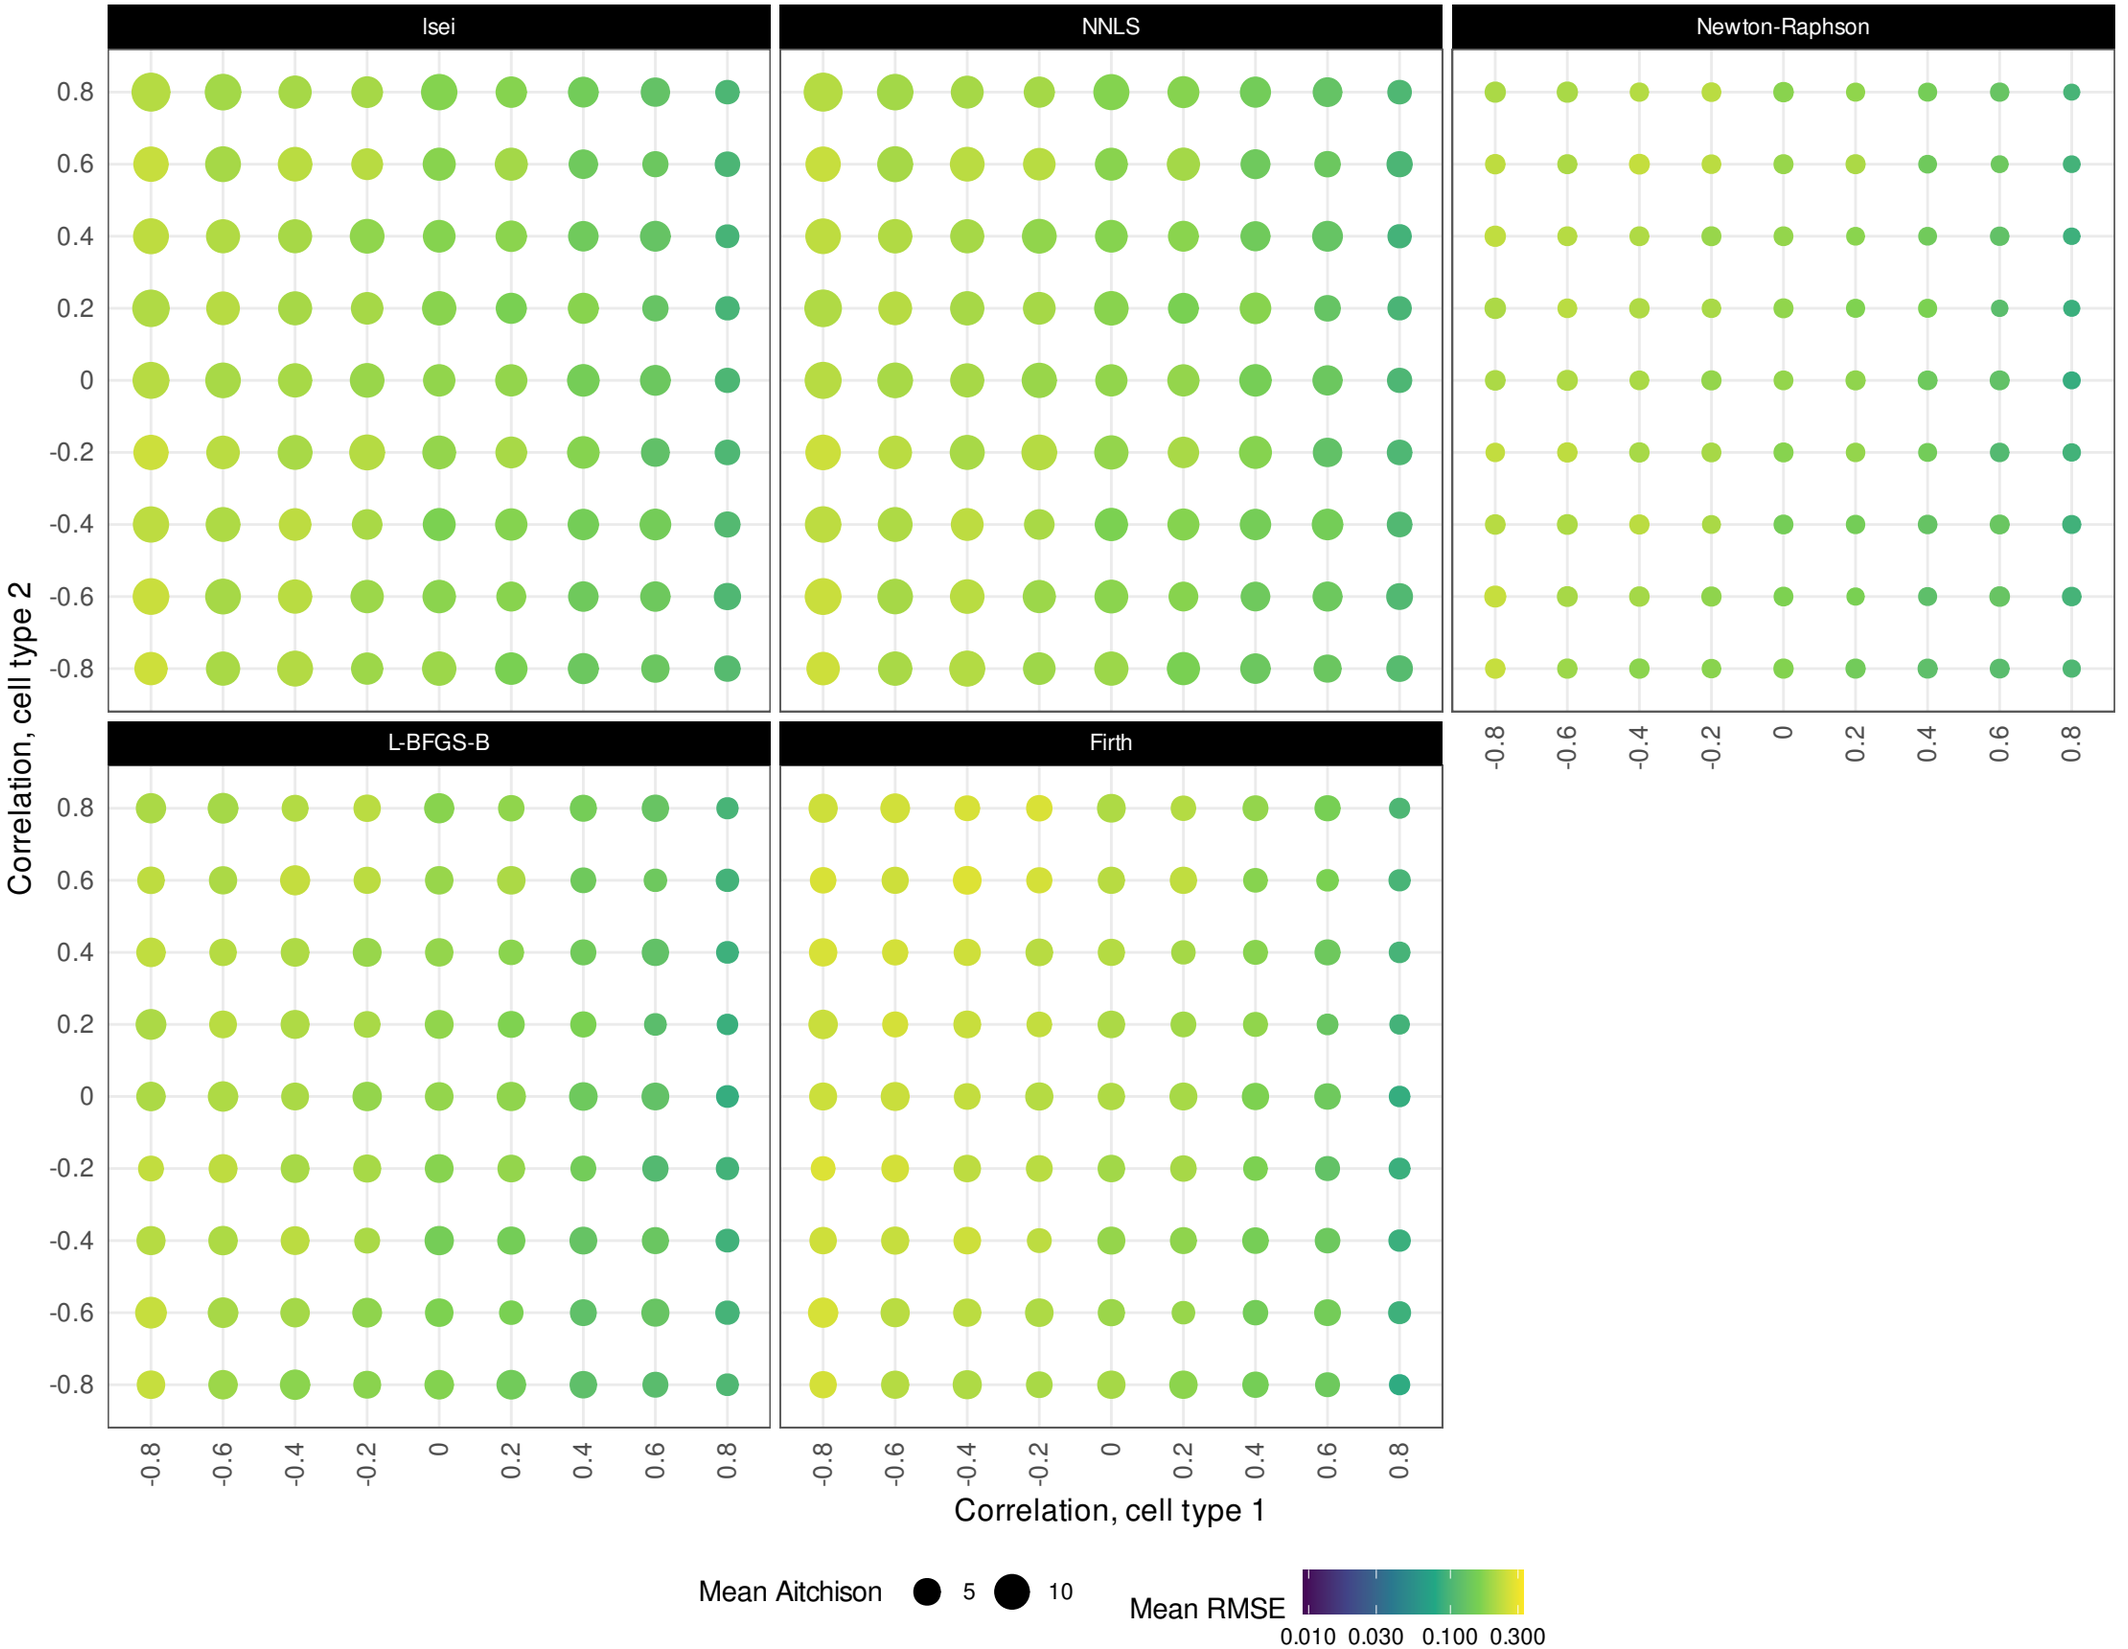

small centroid gap / homoscedastic / balanced

Means over the simulated bulks; colour and size scales shared by every page.
Cross: the method returned no finite estimate for any bulk of that scenario (solver failure).

Accuracy of every method: colour RMSE, size Aitchison distance

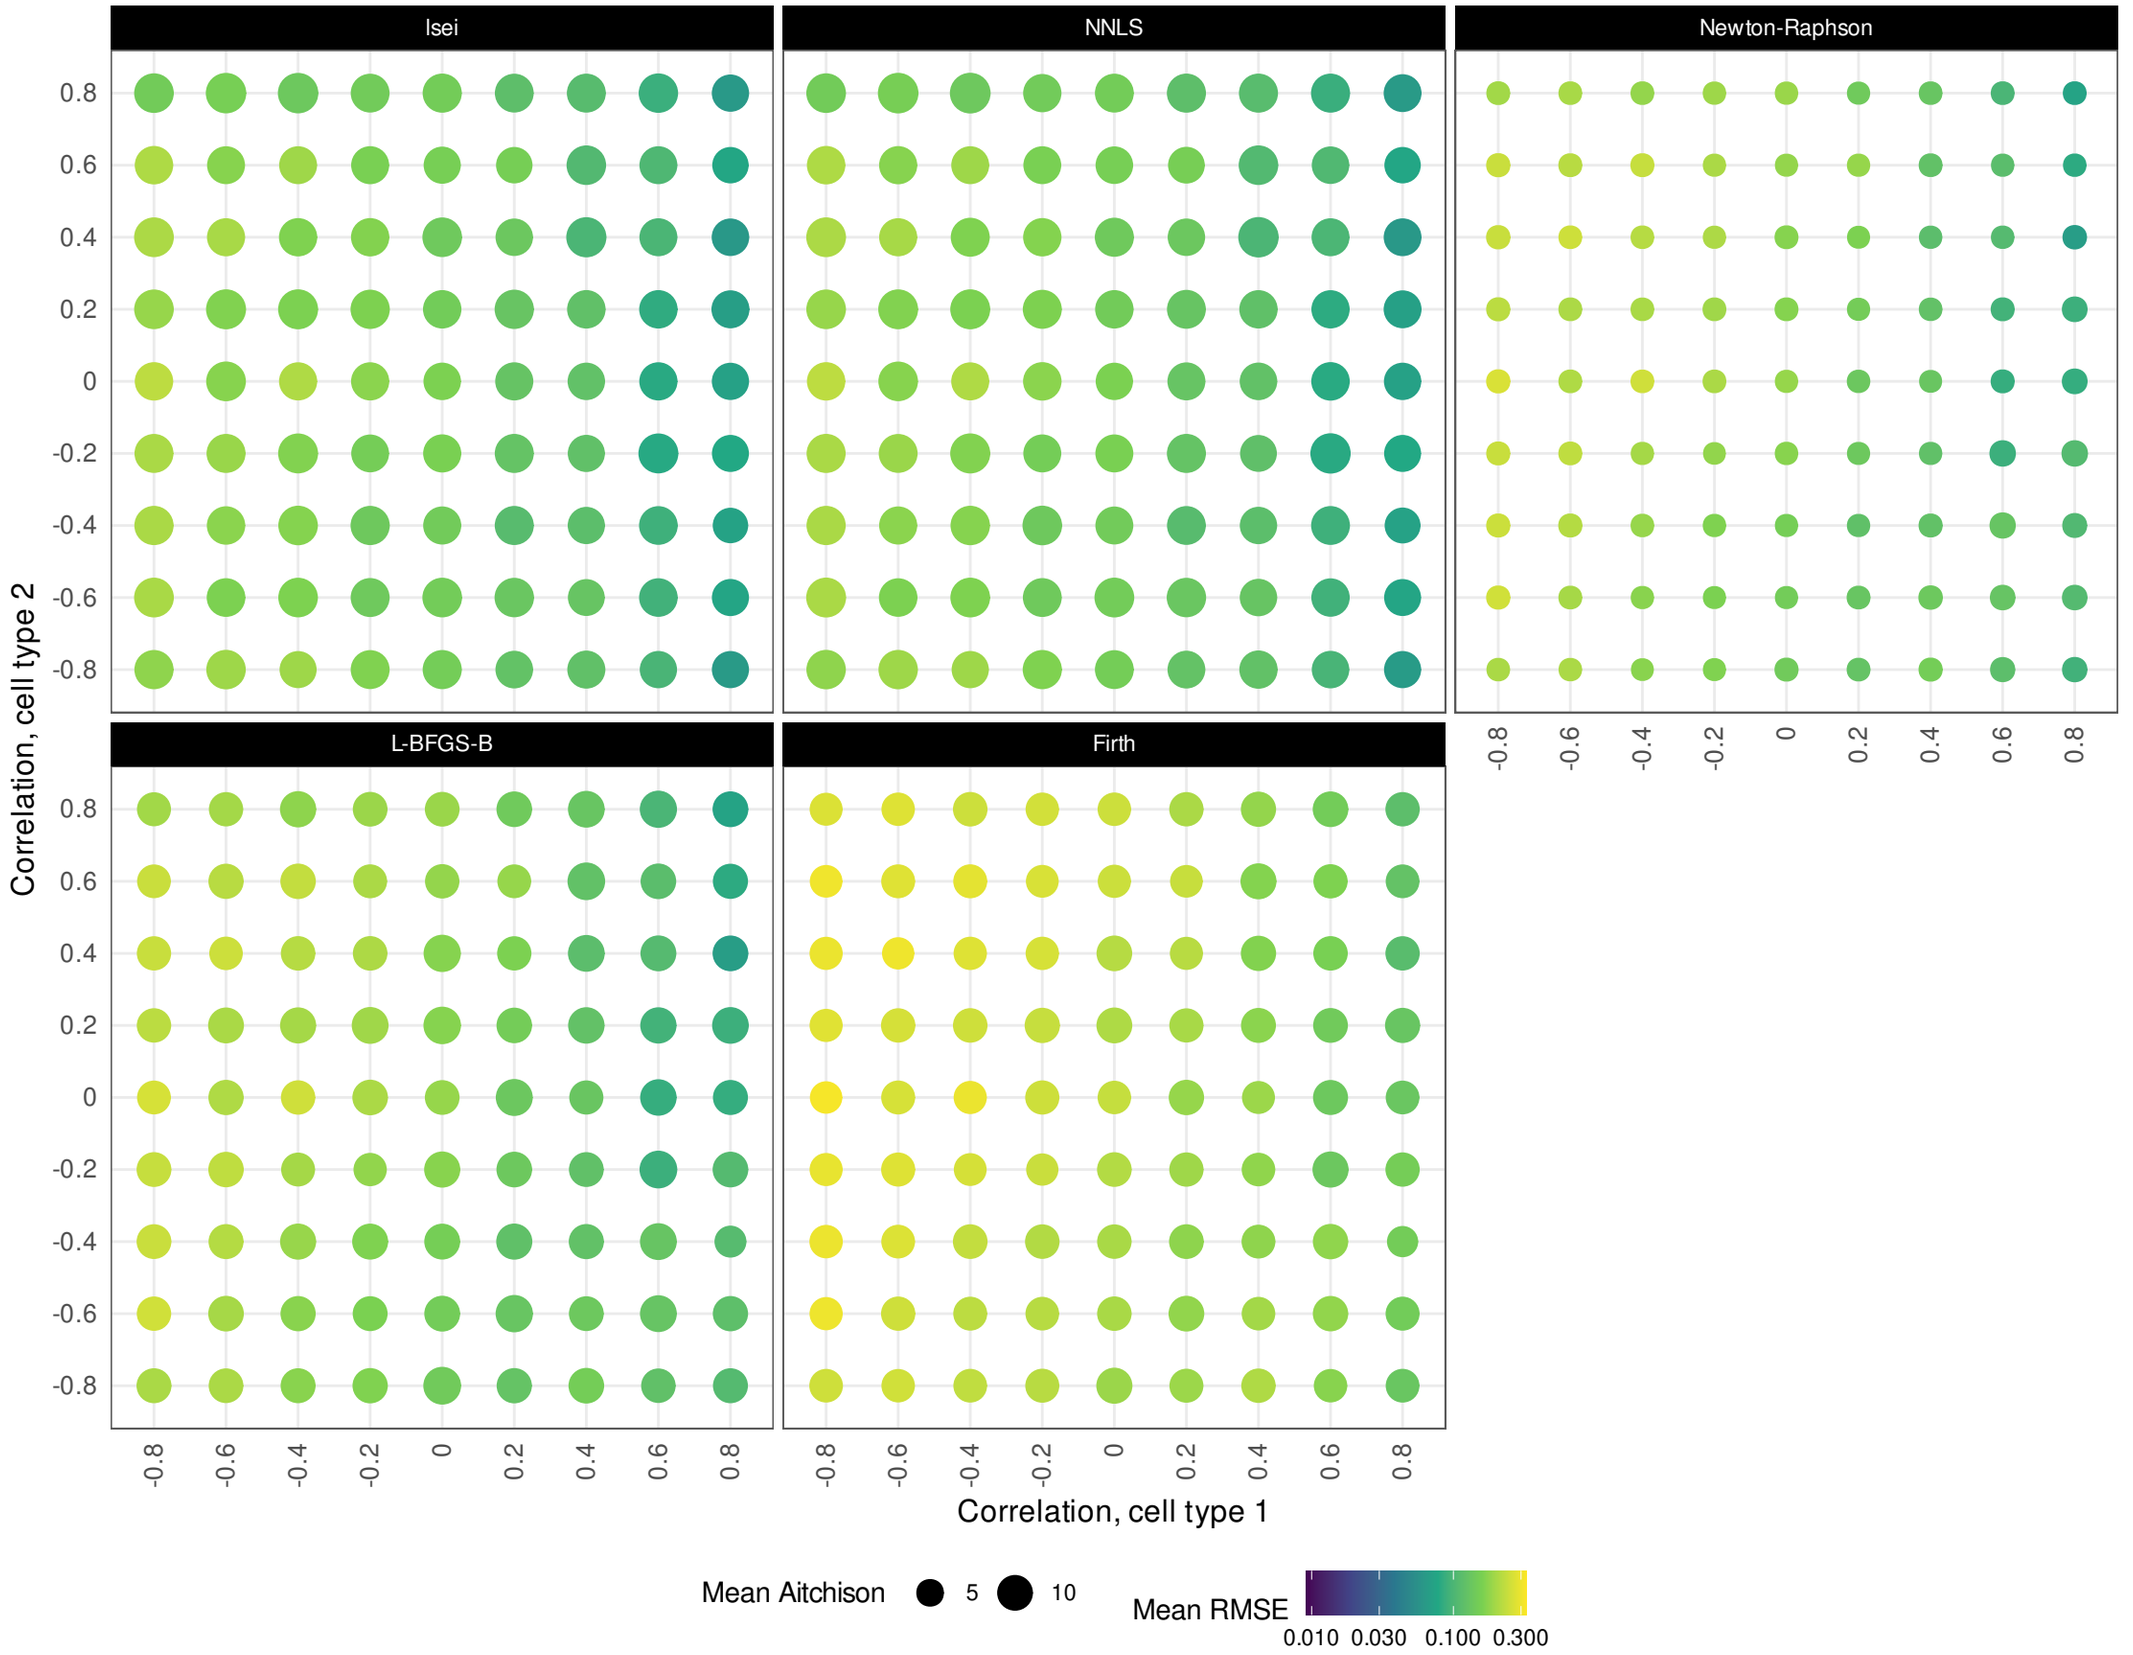

small centroid gap / homoscedastic / moderately unbalanced

Means over the simulated bulks; colour and size scales shared by every page.
Cross: the method returned no finite estimate for any bulk of that scenario (solver failure).

Accuracy of every method: colour RMSE, size Aitchison distance

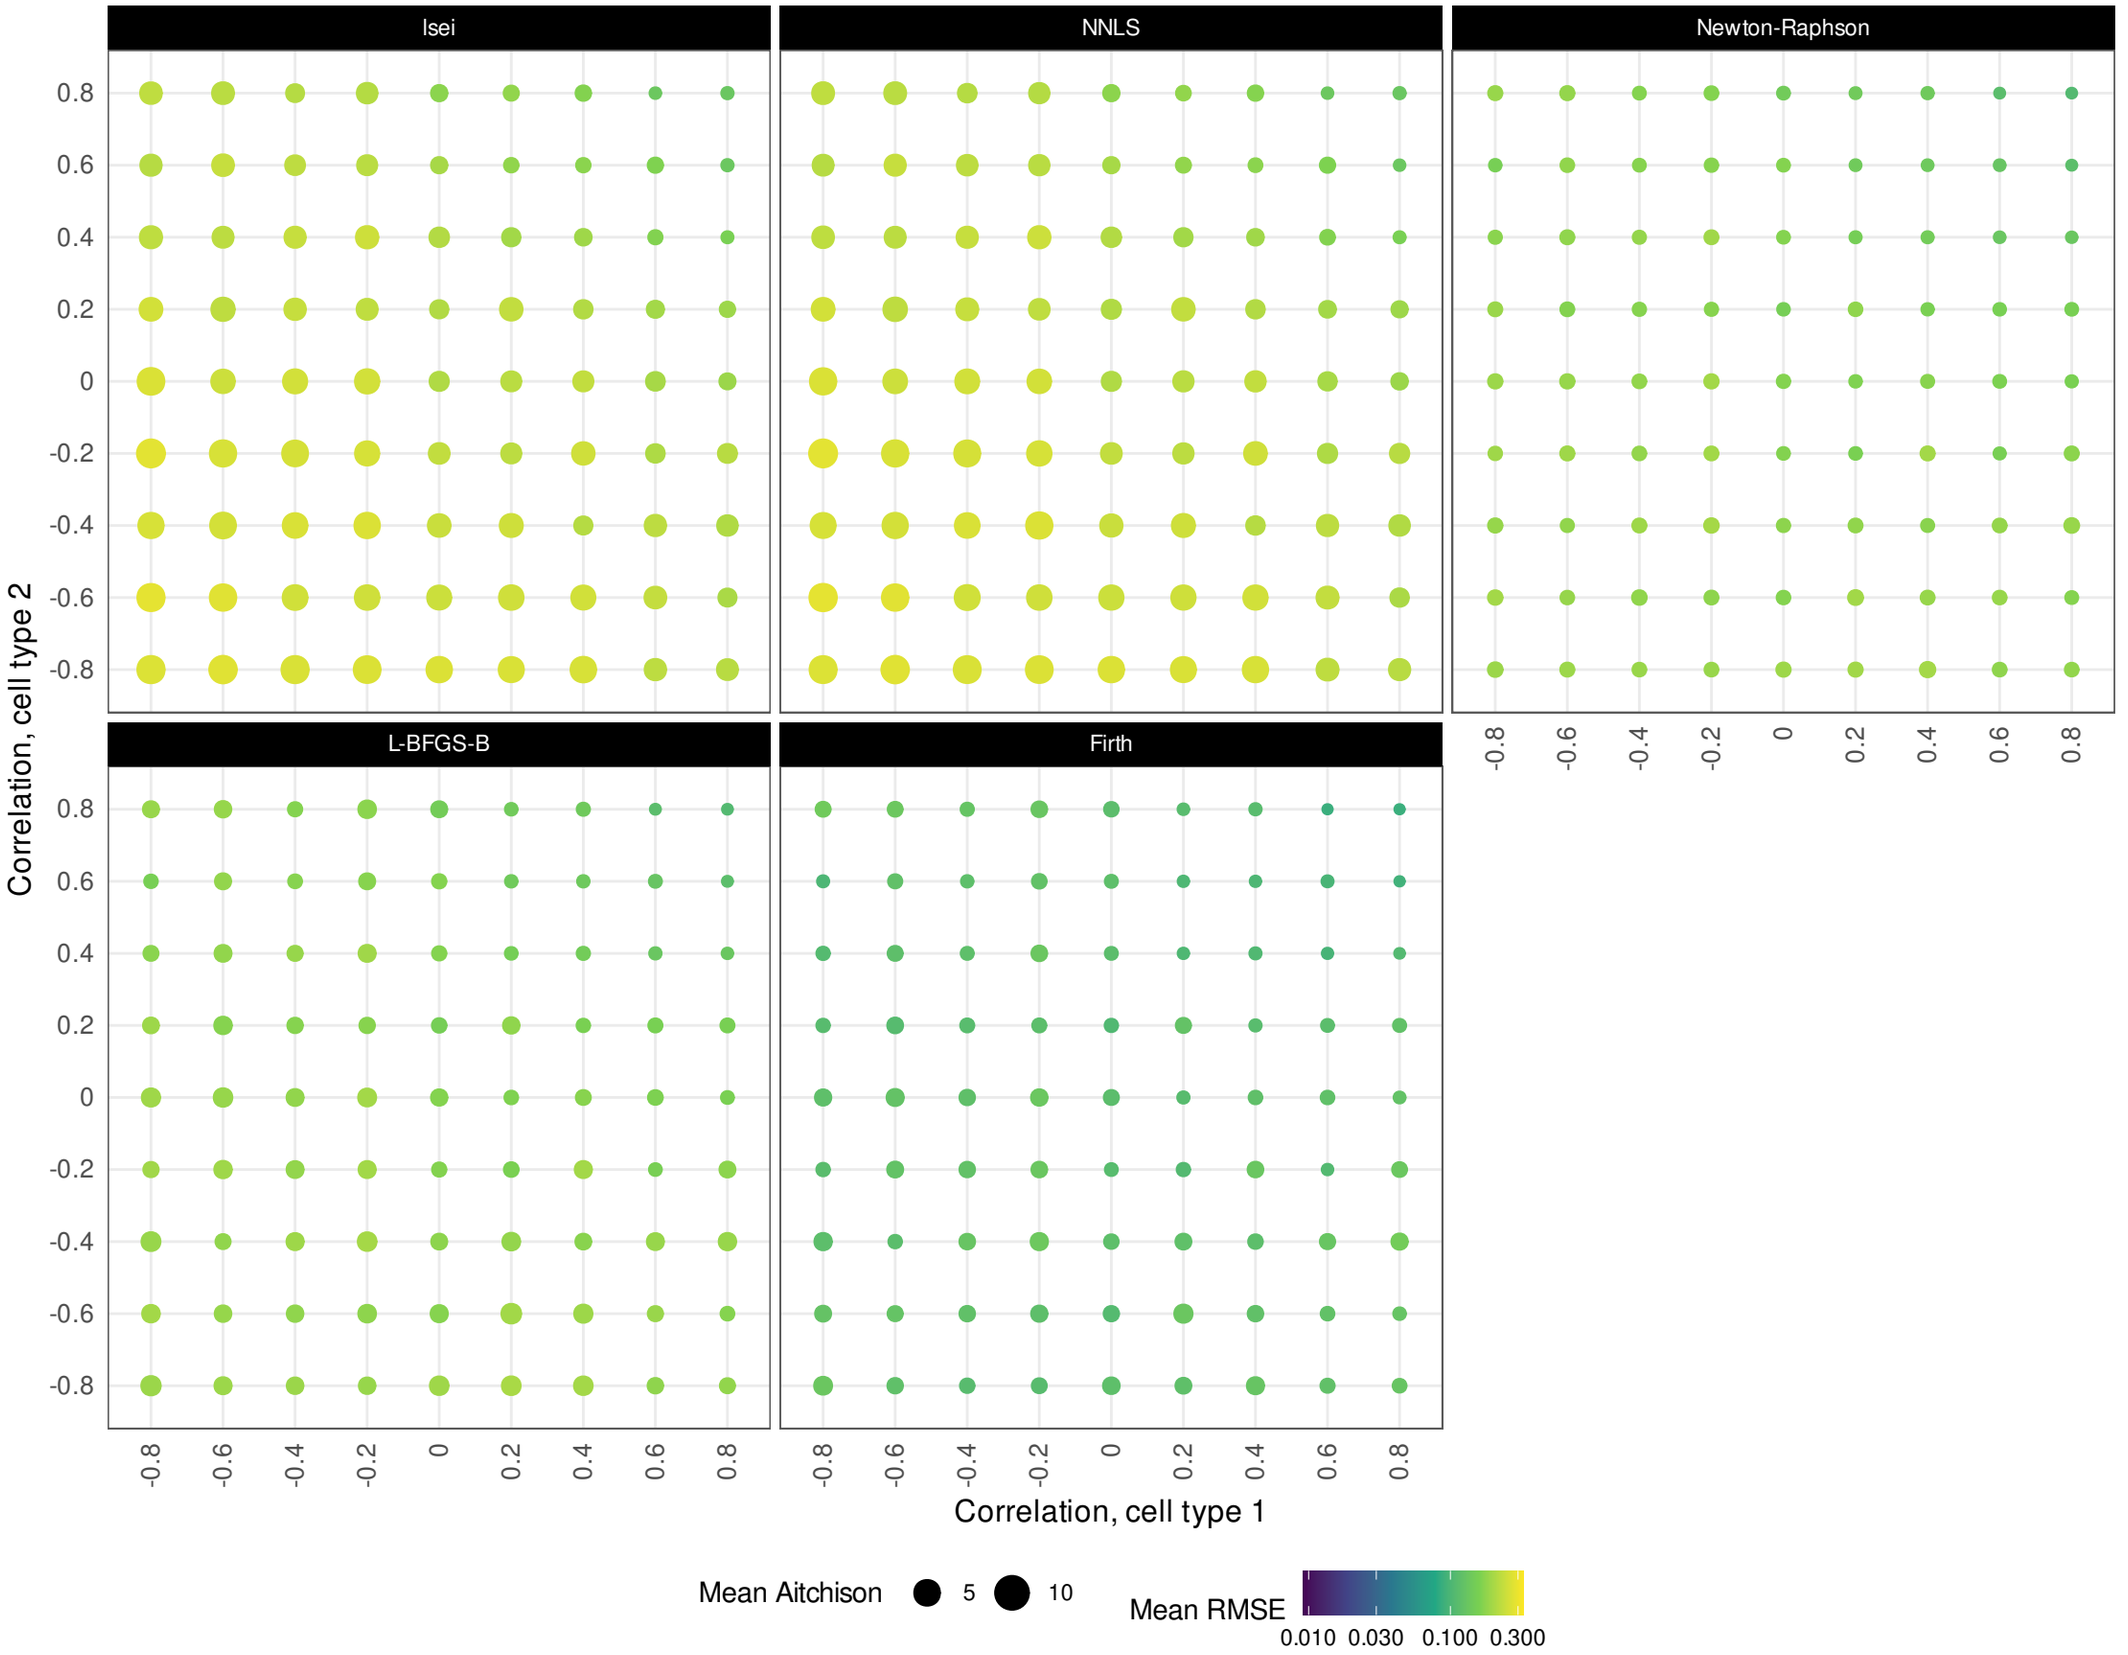

small centroid gap / homoscedastic / highly unbalanced

Means over the simulated bulks; colour and size scales shared by every page.
Cross: the method returned no finite estimate for any bulk of that scenario (solver failure).

Accuracy of every method: colour RMSE, size Aitchison distance

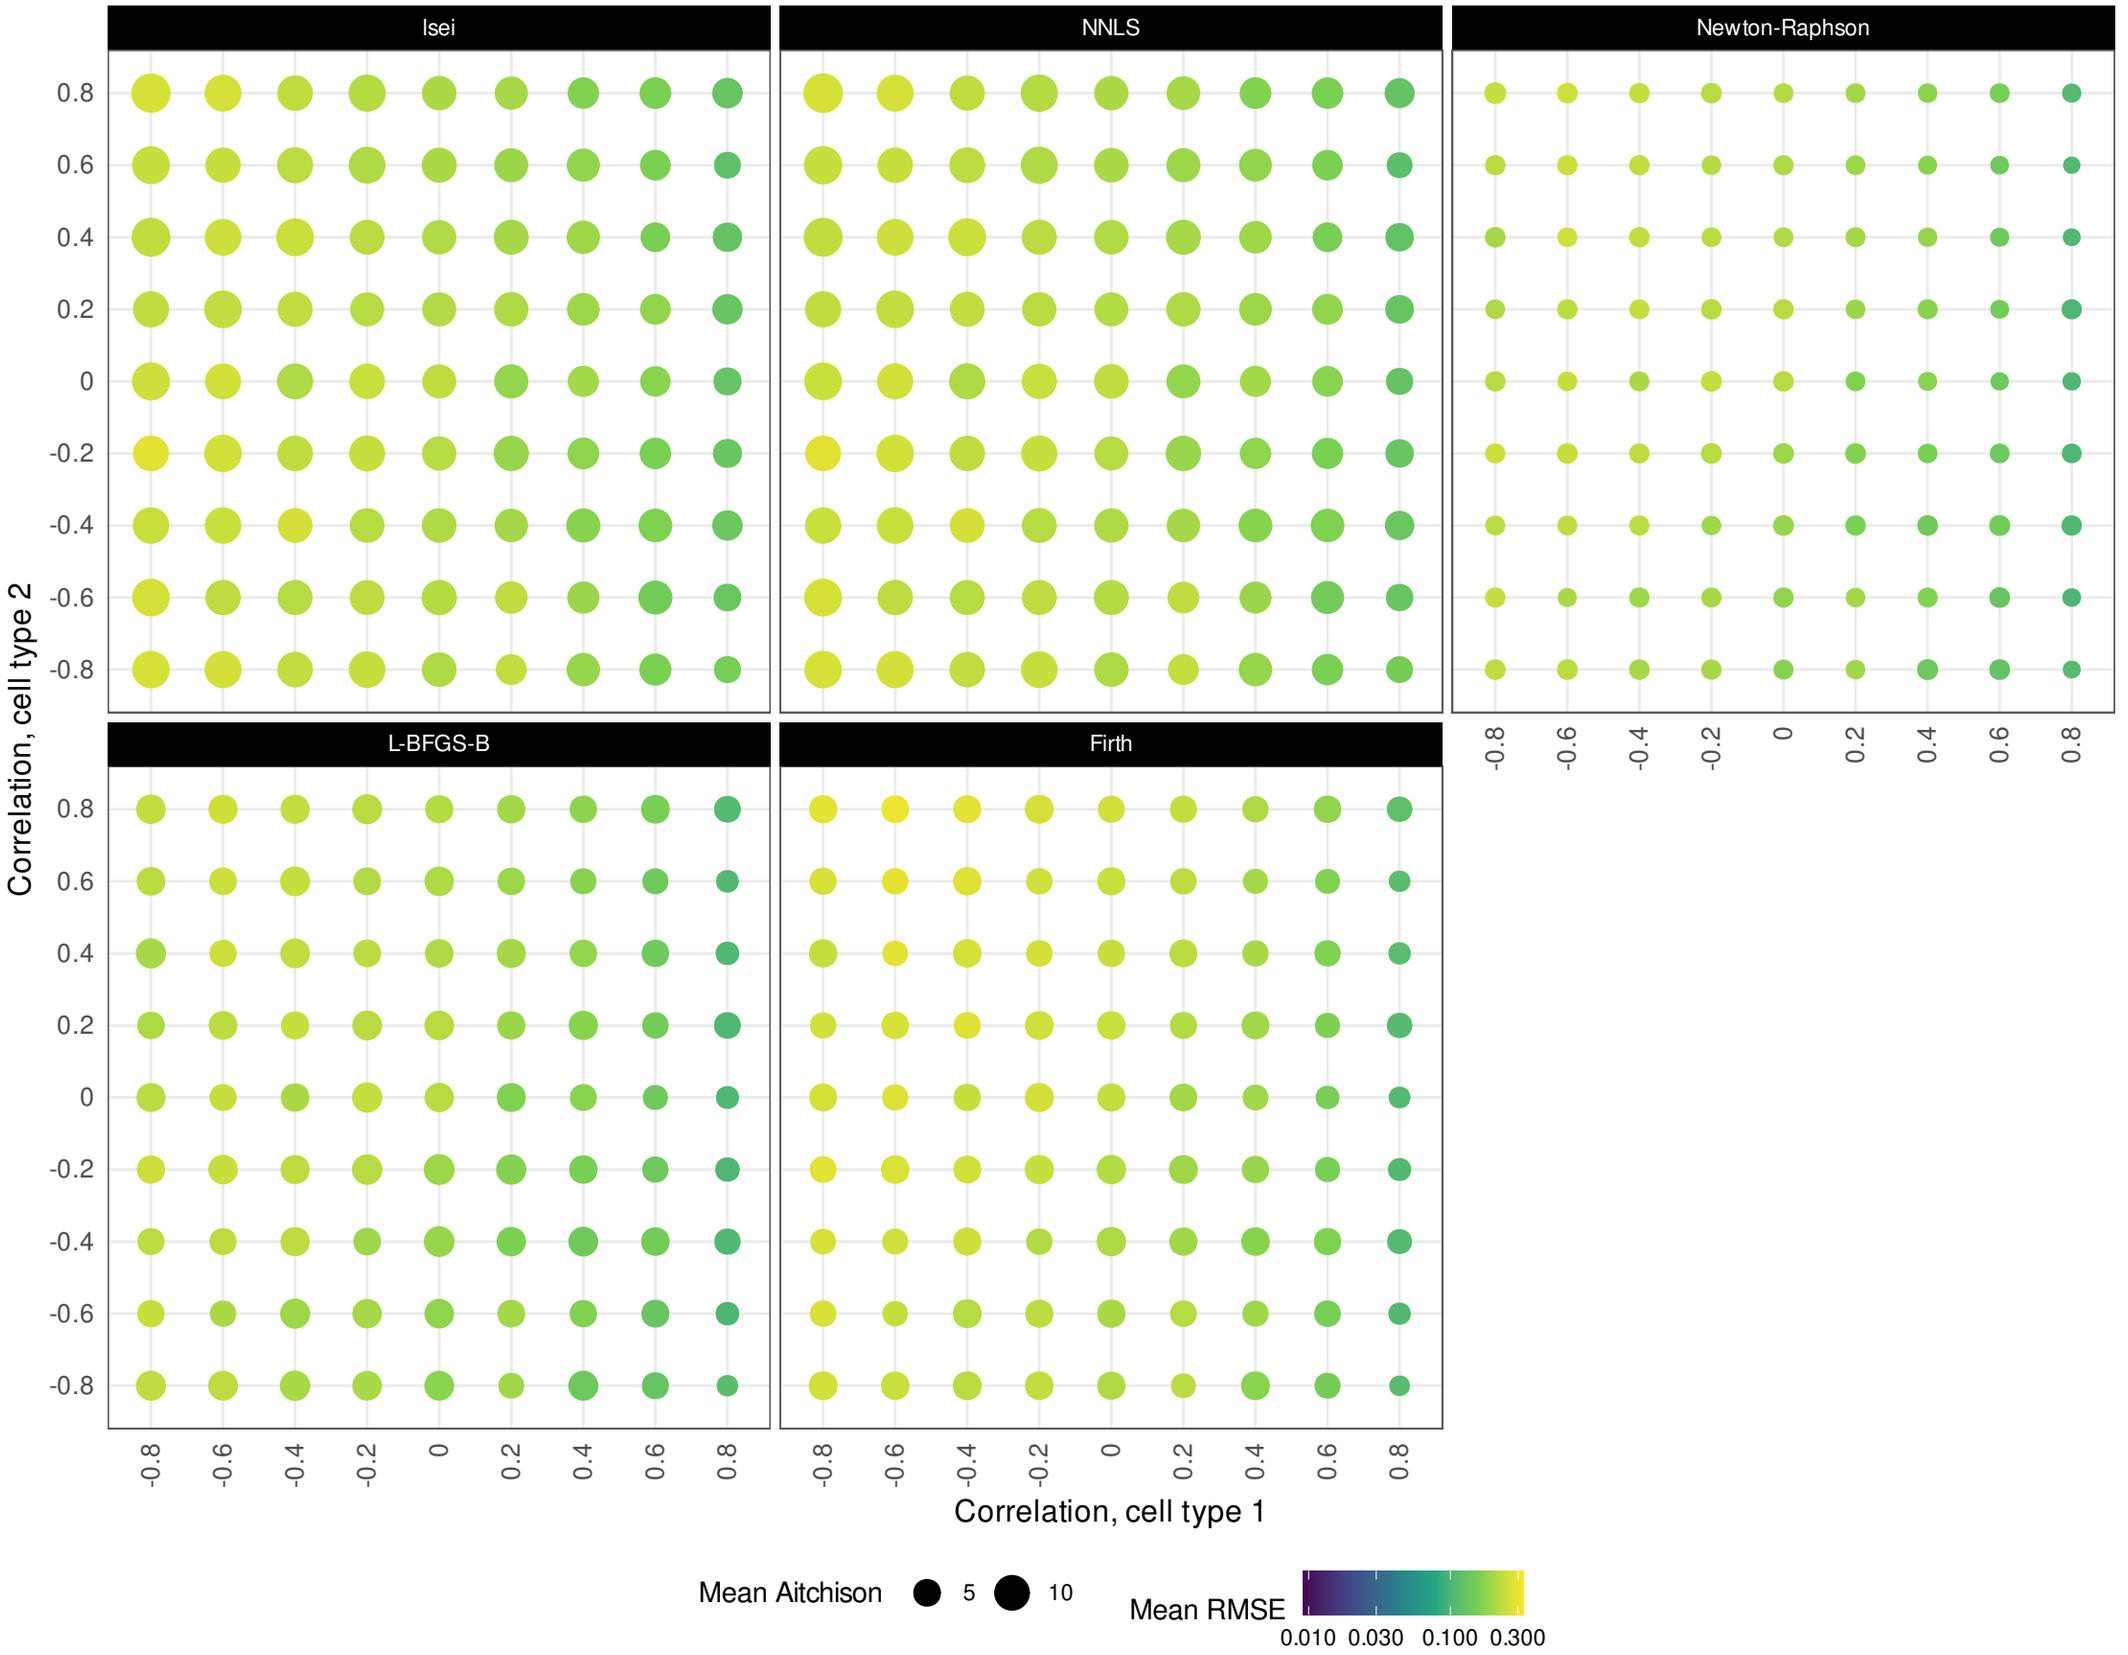

small centroid gap / heteroscedastic / balanced

Means over the simulated bulks; colour and size scales shared by every page.
Cross: the method returned no finite estimate for any bulk of that scenario (solver failure).

Accuracy of every method: colour RMSE, size Aitchison distance

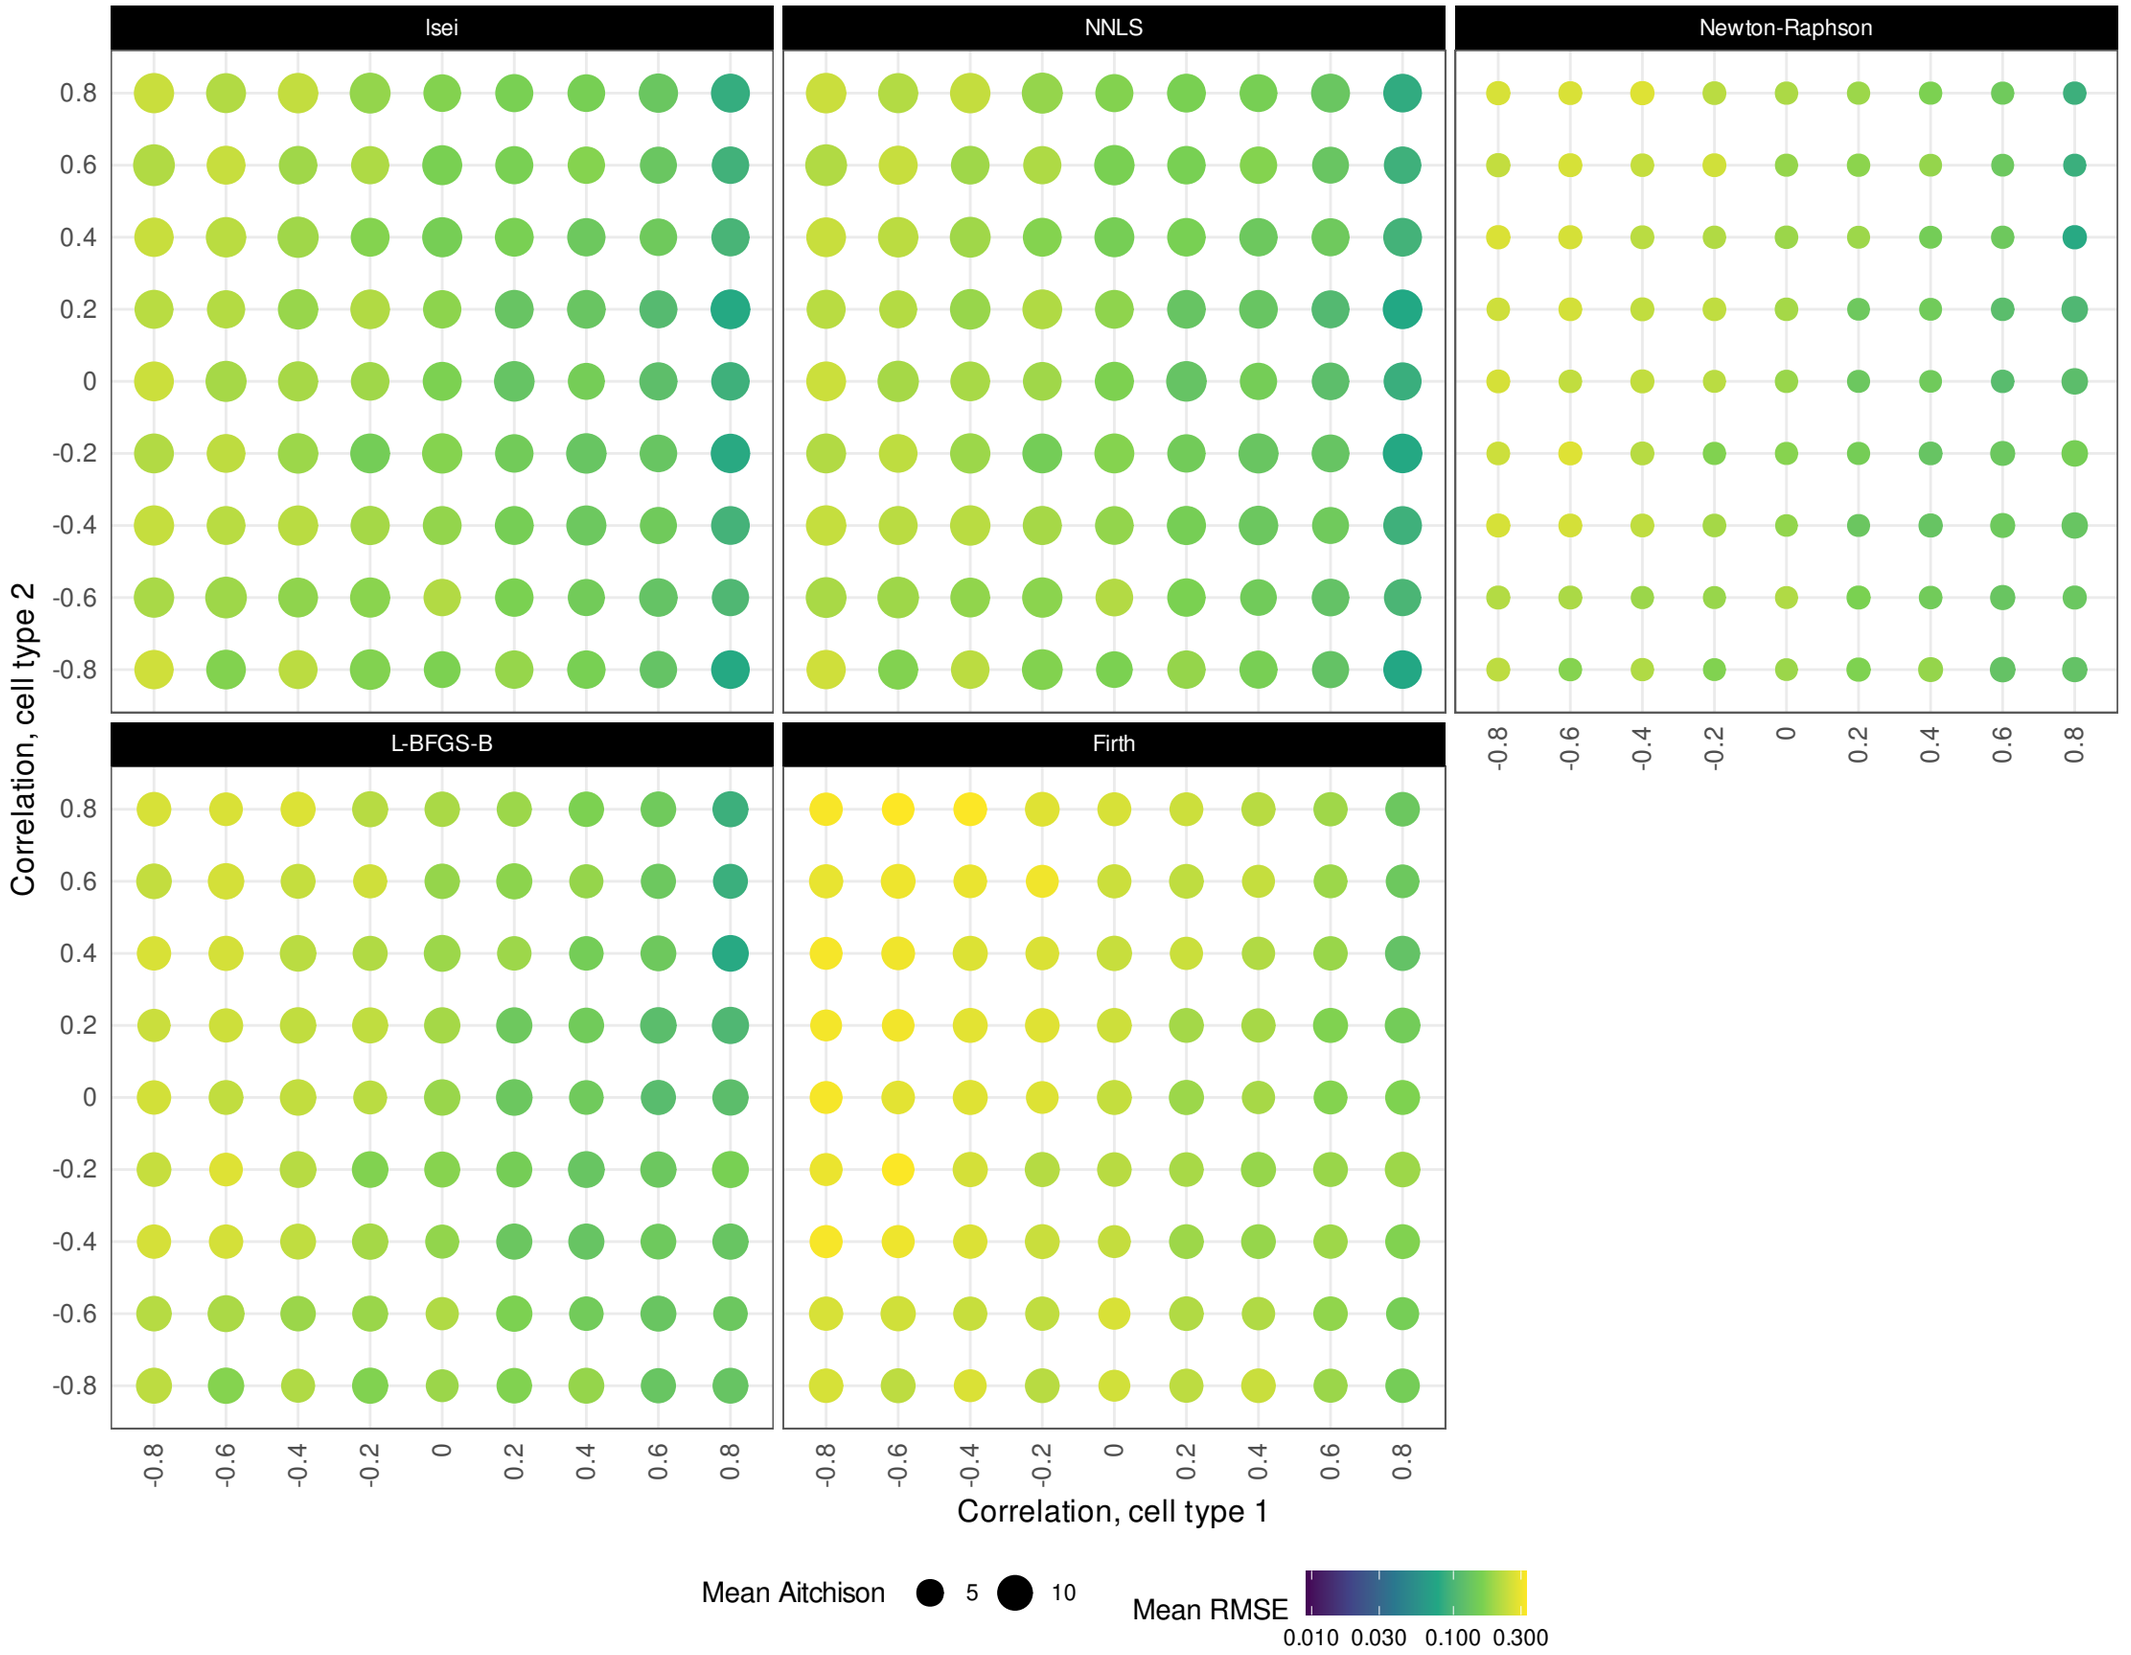

small centroid gap / heteroscedastic / moderately unbalanced

Means over the simulated bulks; colour and size scales shared by every page.
Cross: the method returned no finite estimate for any bulk of that scenario (solver failure).

Accuracy of every method: colour RMSE, size Aitchison distance

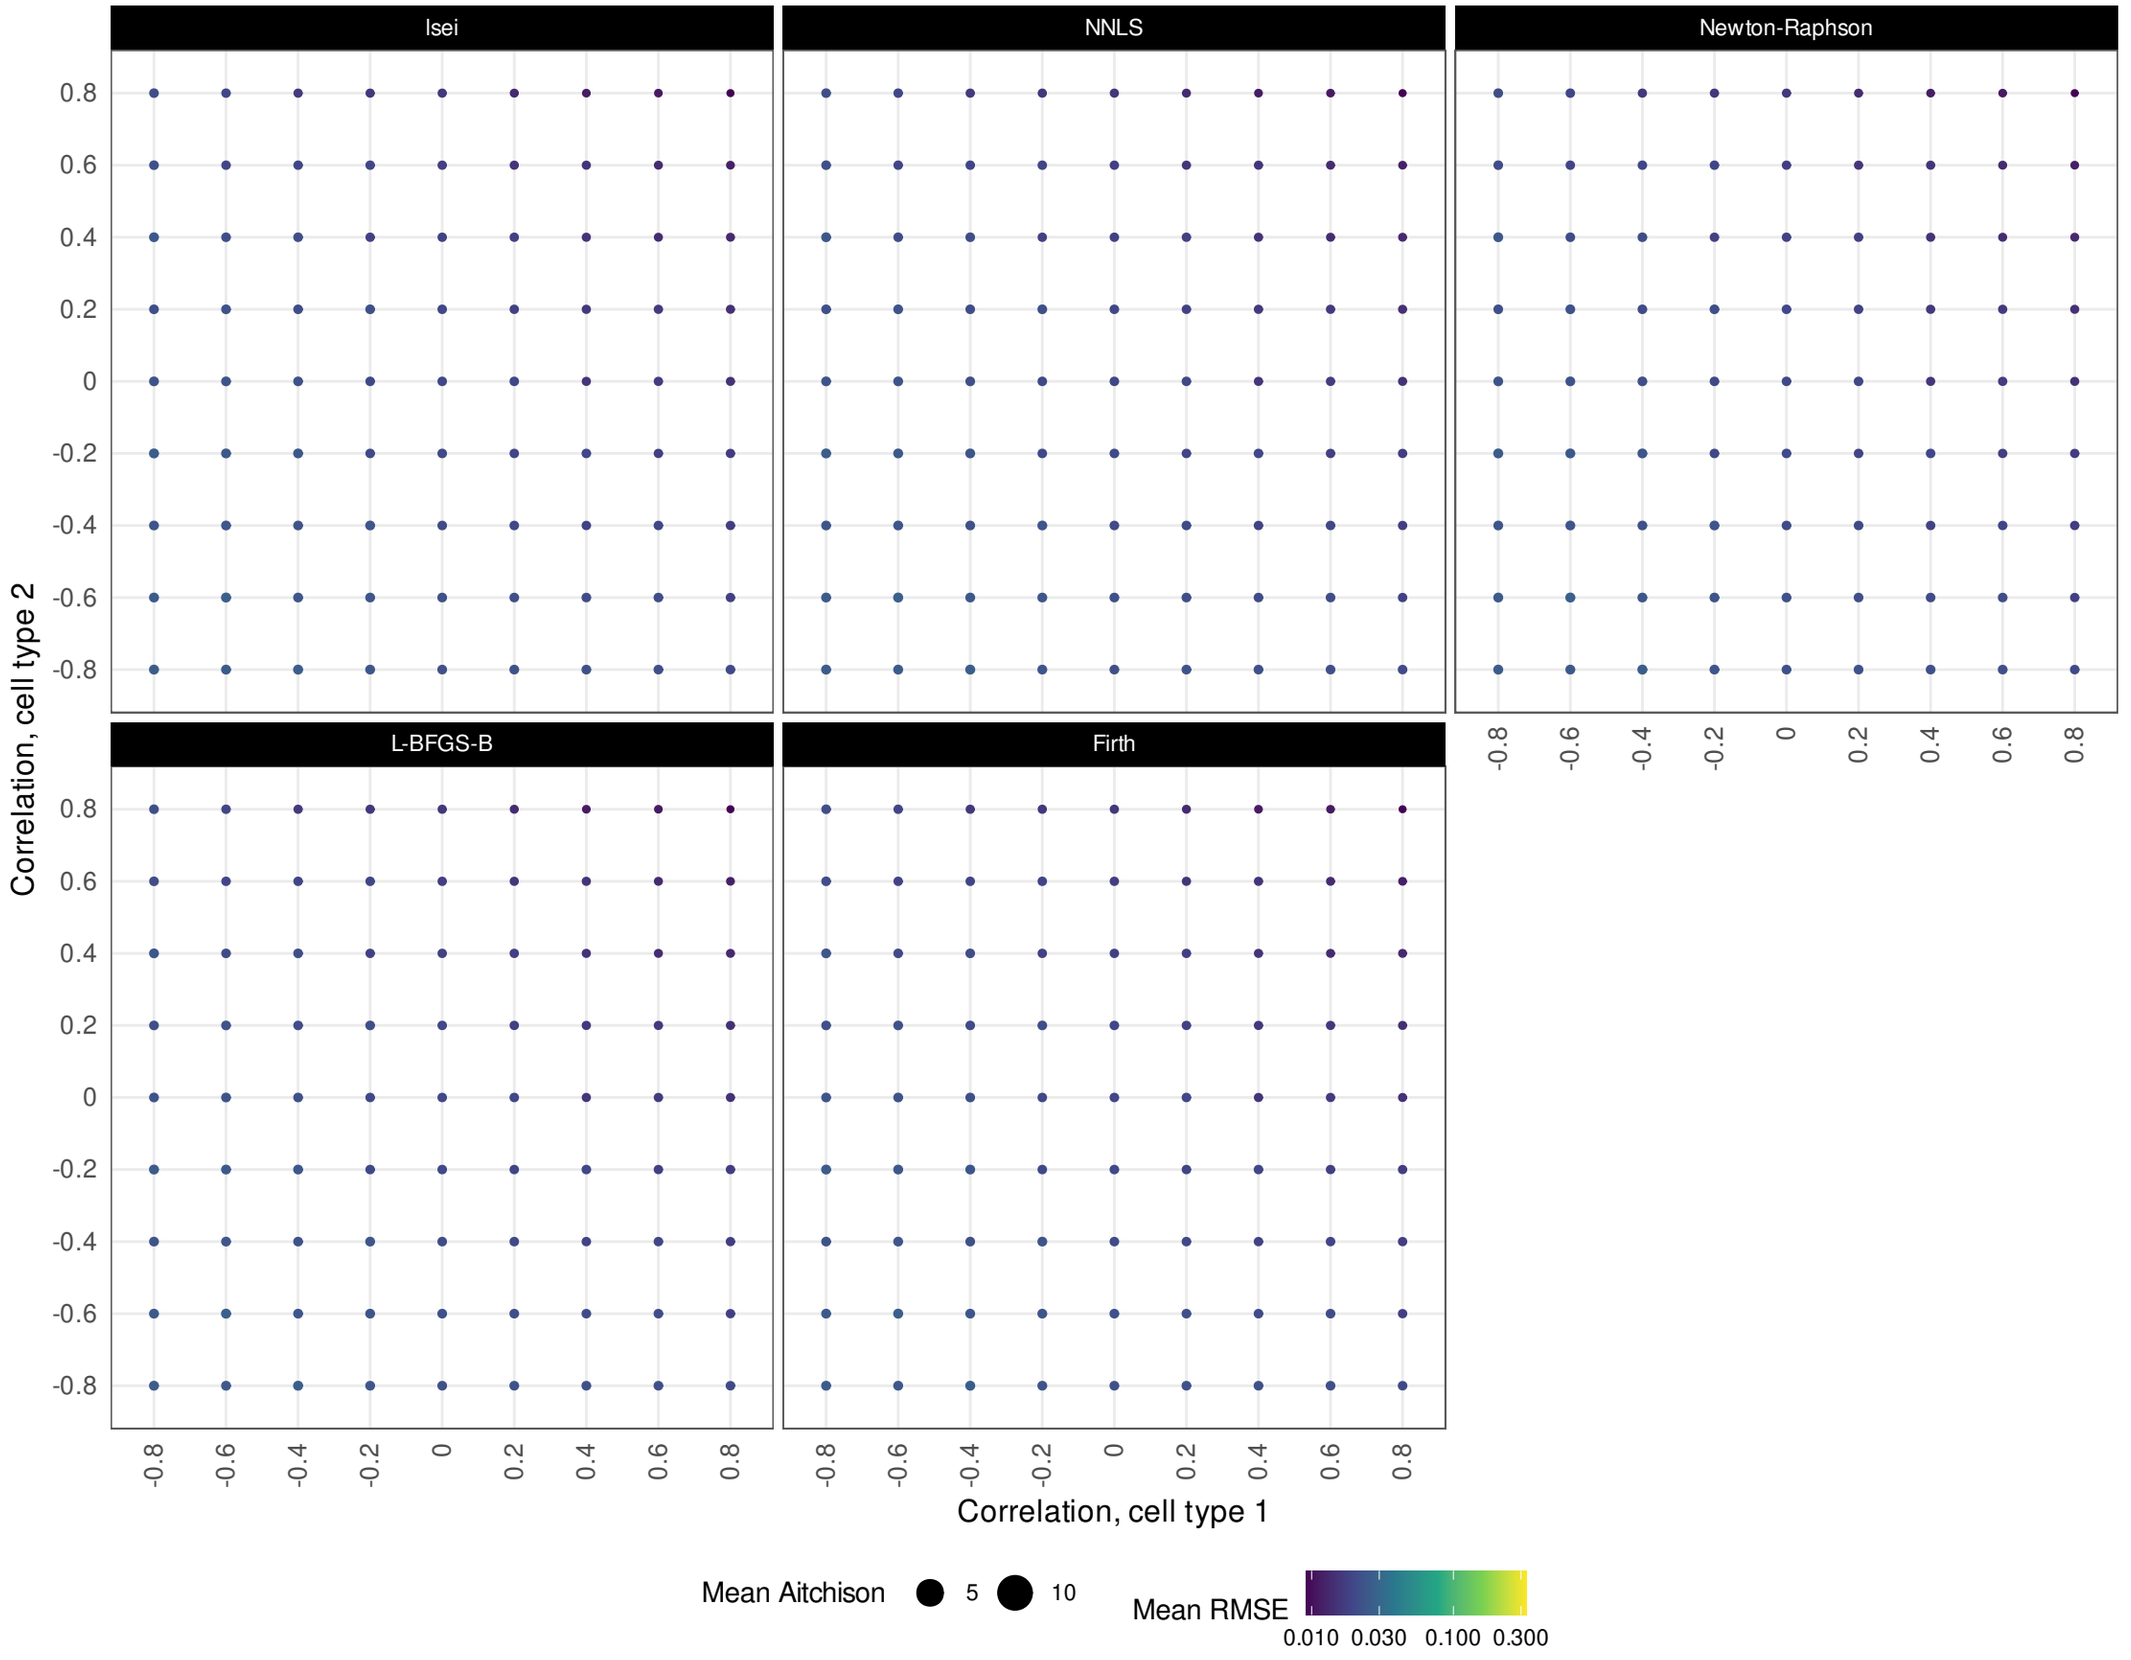

small centroid gap / heteroscedastic / highly unbalanced

Means over the simulated bulks; colour and size scales shared by every page.
Cross: the method returned no finite estimate for any bulk of that scenario (solver failure).

Accuracy of every method: colour RMSE, size Aitchison distance

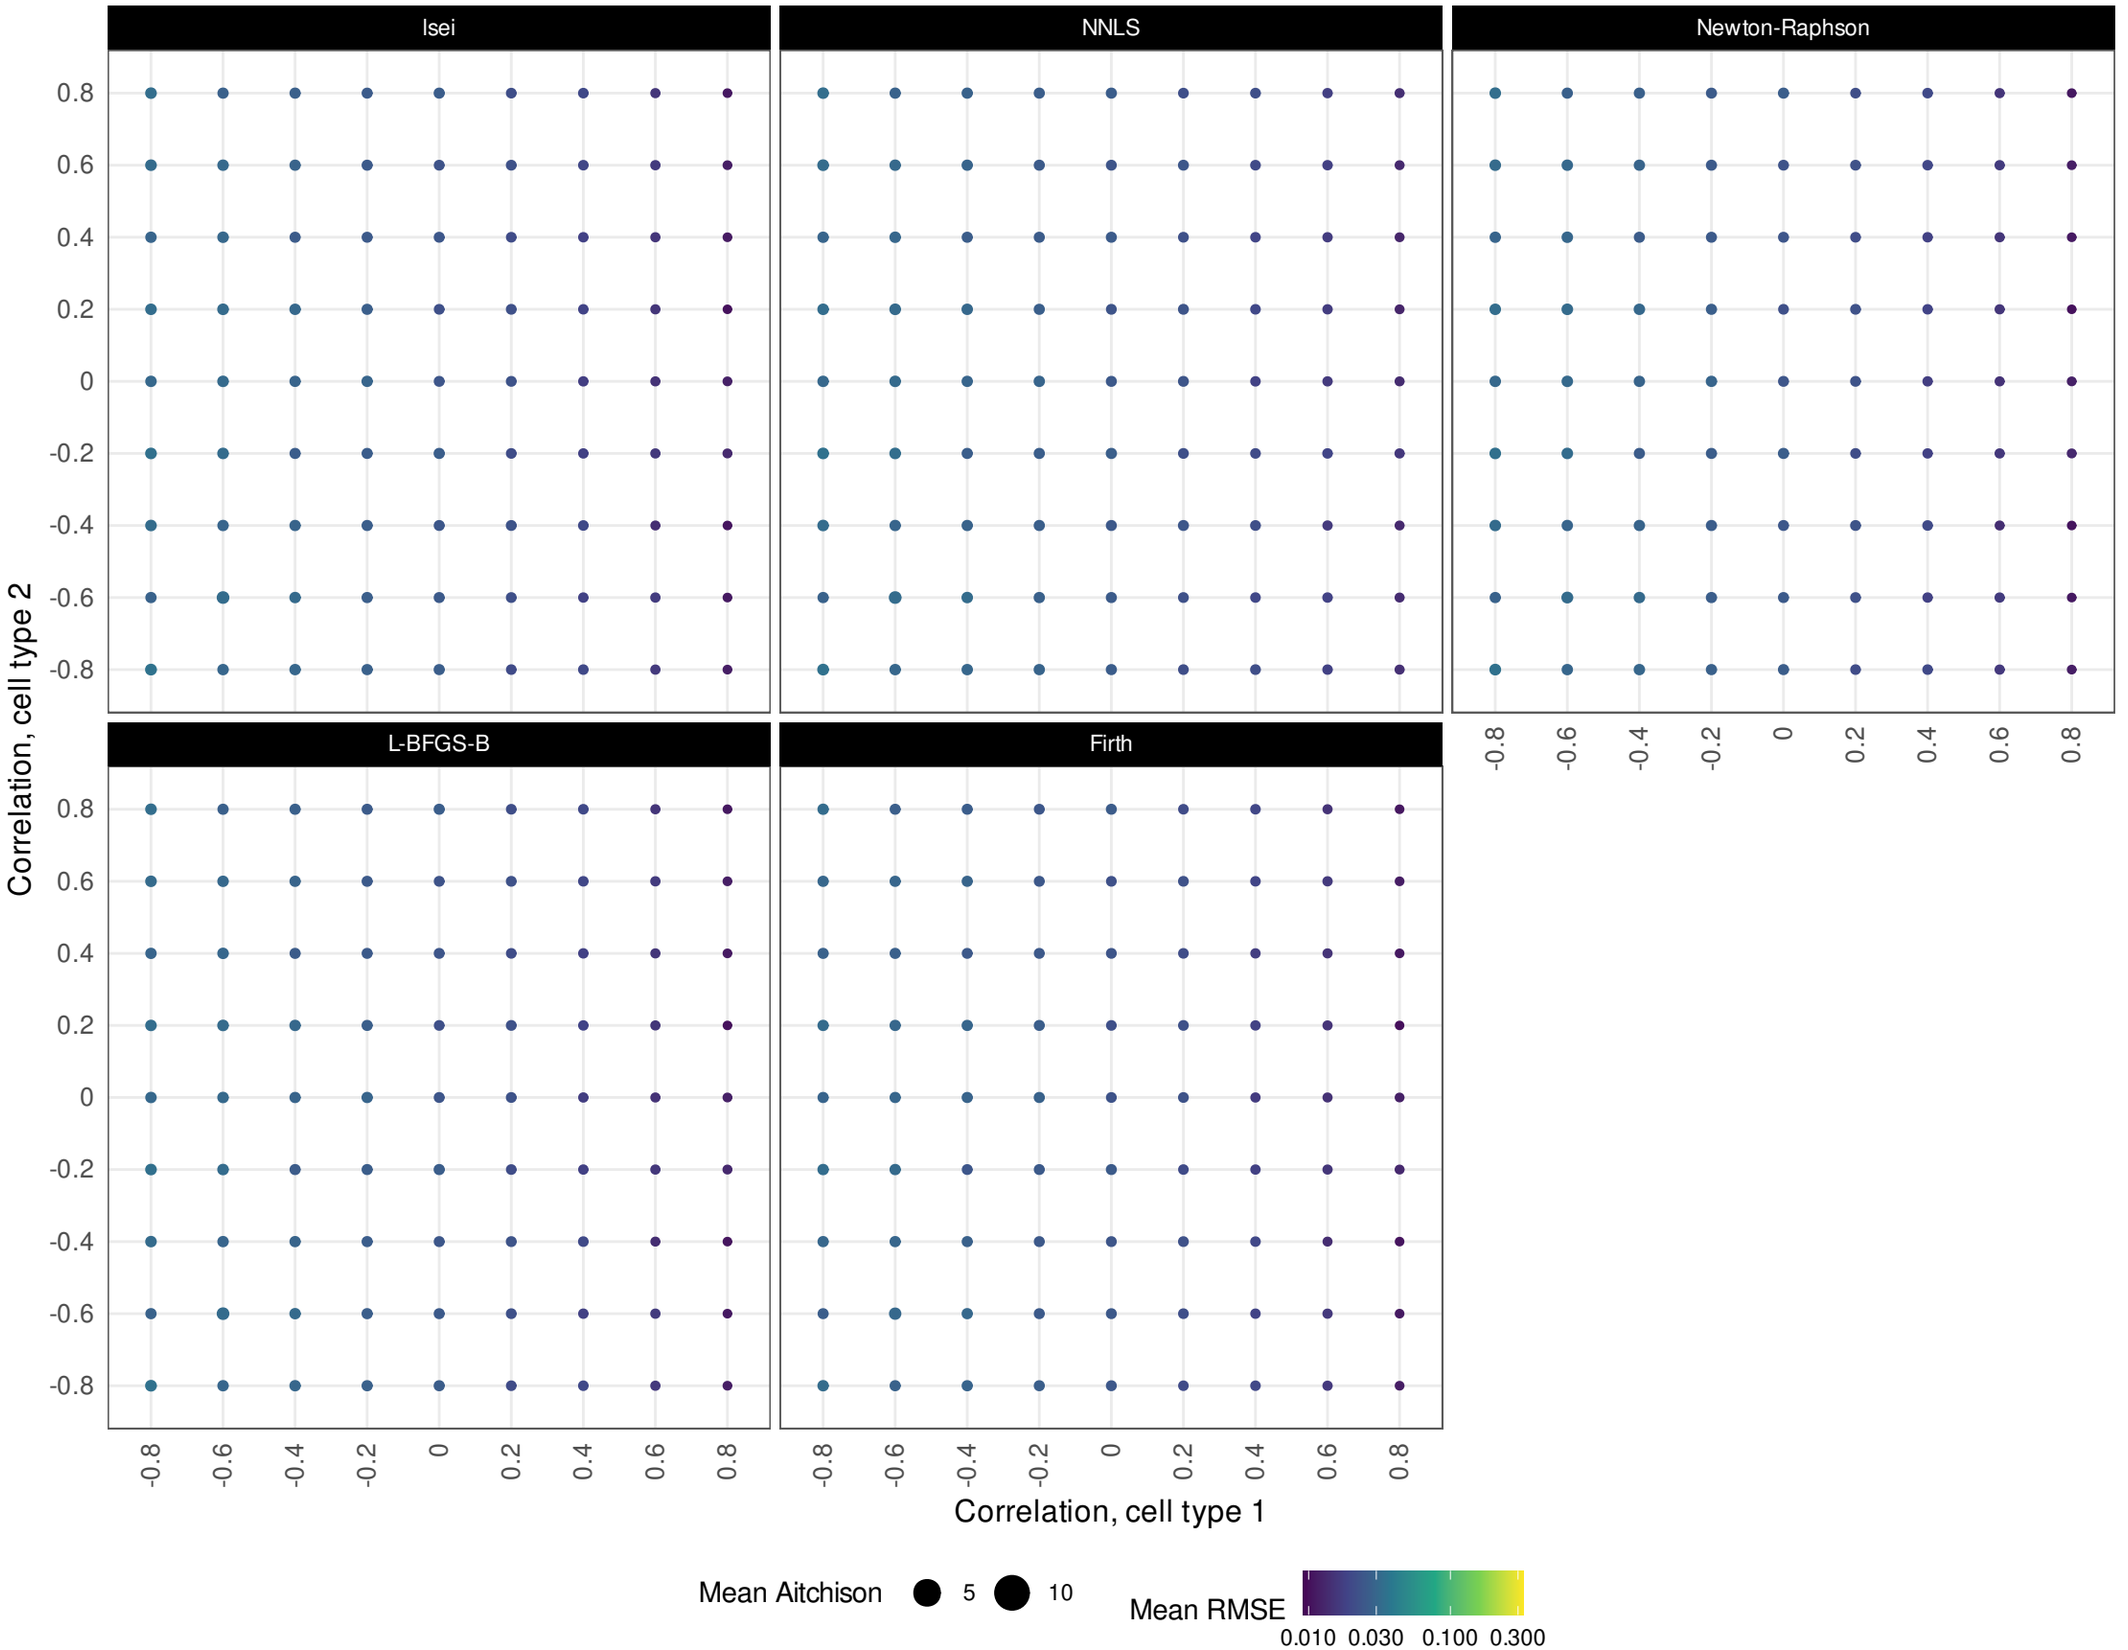

large centroid gap / homoscedastic / balanced

Means over the simulated bulks; colour and size scales shared by every page.
Cross: the method returned no finite estimate for any bulk of that scenario (solver failure).

Accuracy of every method: colour RMSE, size Aitchison distance

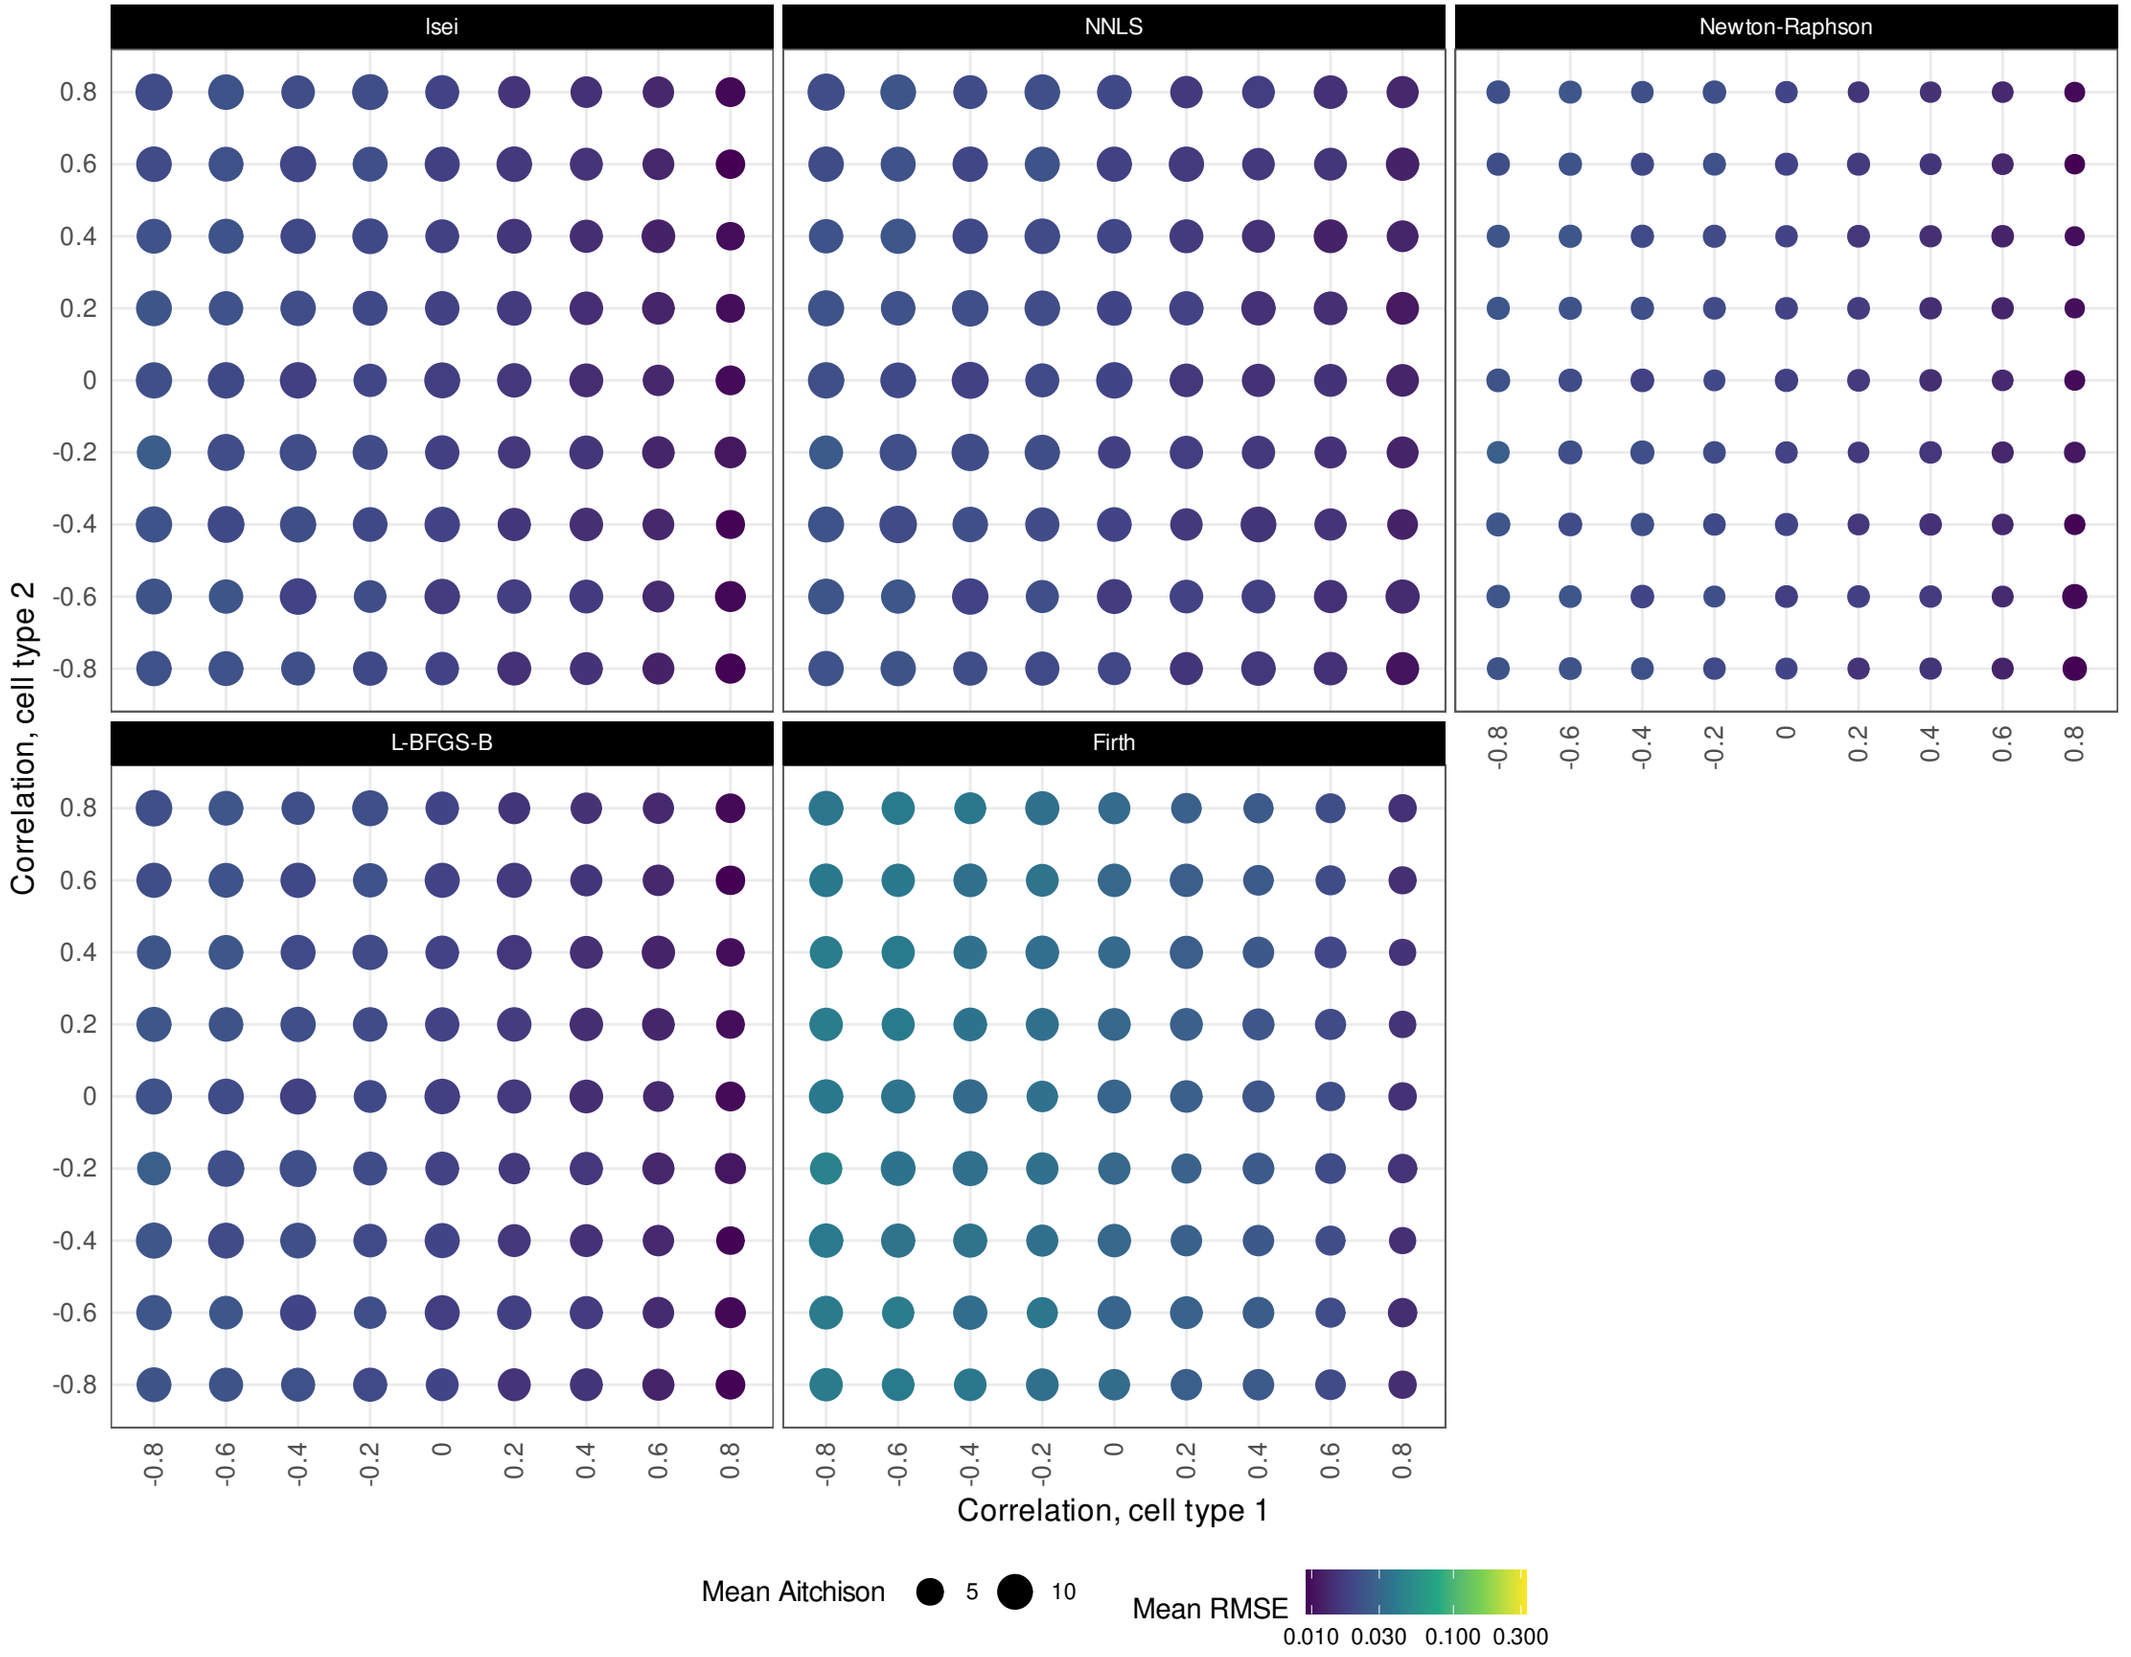

large centroid gap / homoscedastic / moderately unbalanced

Means over the simulated bulks; colour and size scales shared by every page.
Cross: the method returned no finite estimate for any bulk of that scenario (solver failure).

Accuracy of every method: colour RMSE, size Aitchison distance

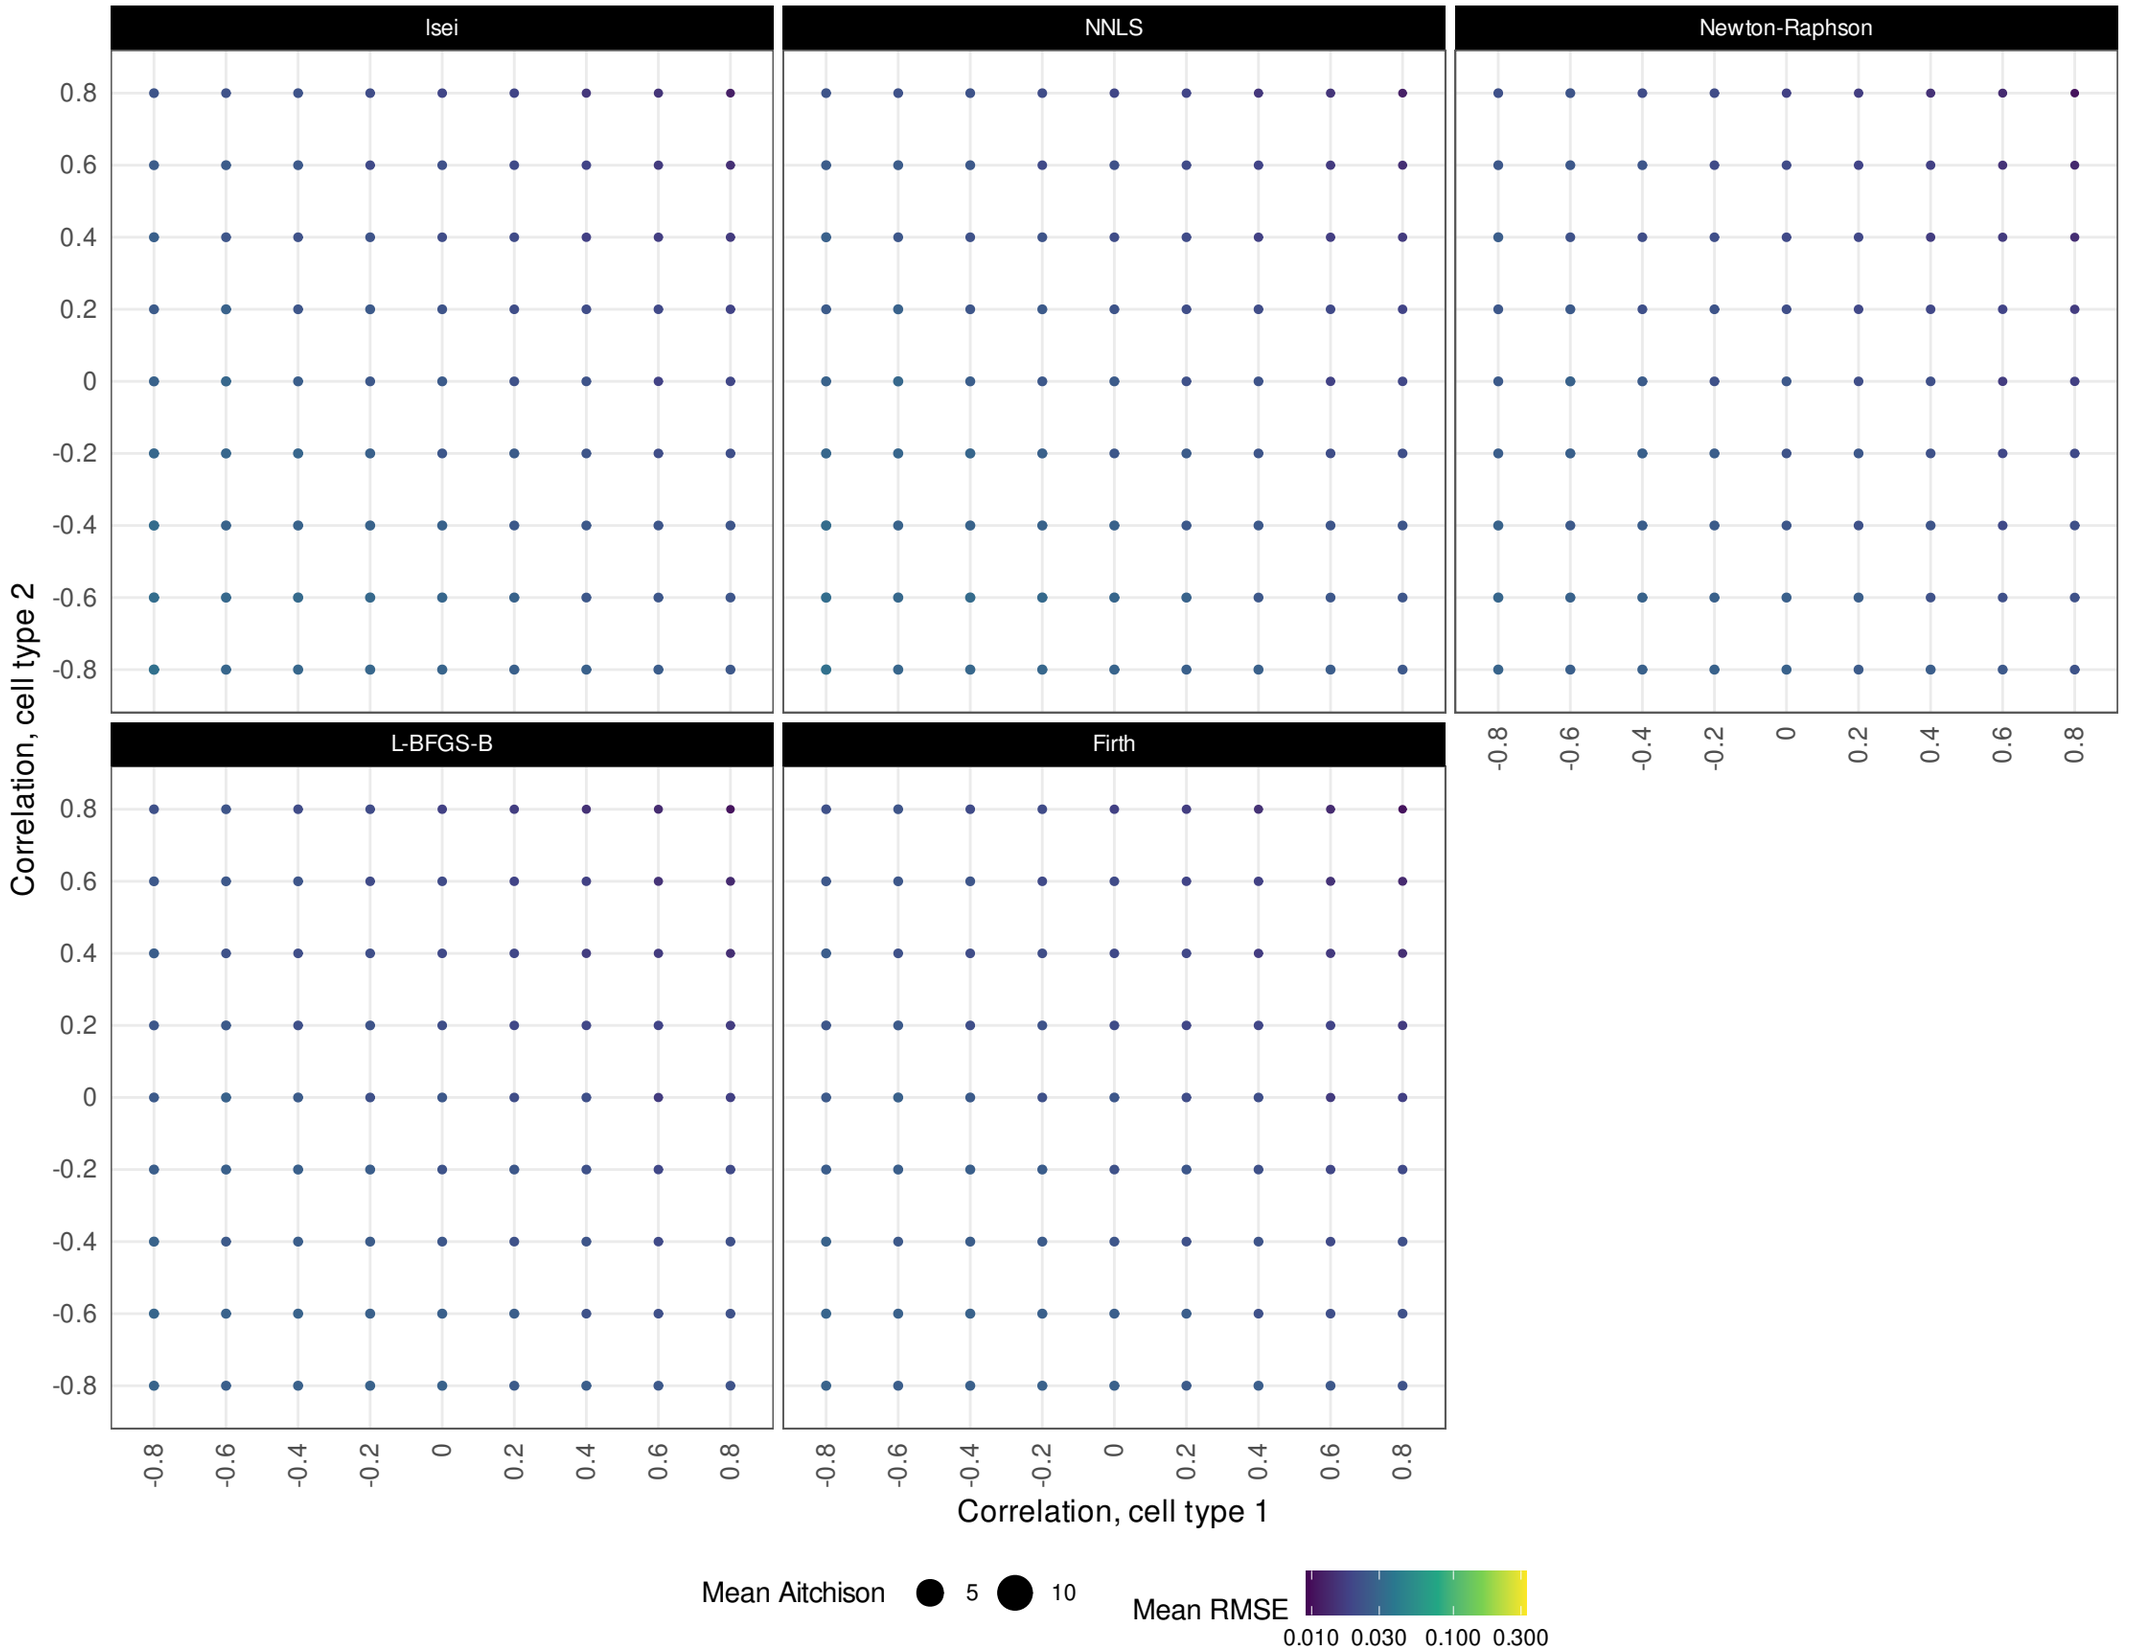

large centroid gap / homoscedastic / highly unbalanced

Means over the simulated bulks; colour and size scales shared by every page.
Cross: the method returned no finite estimate for any bulk of that scenario (solver failure).

Accuracy of every method: colour RMSE, size Aitchison distance

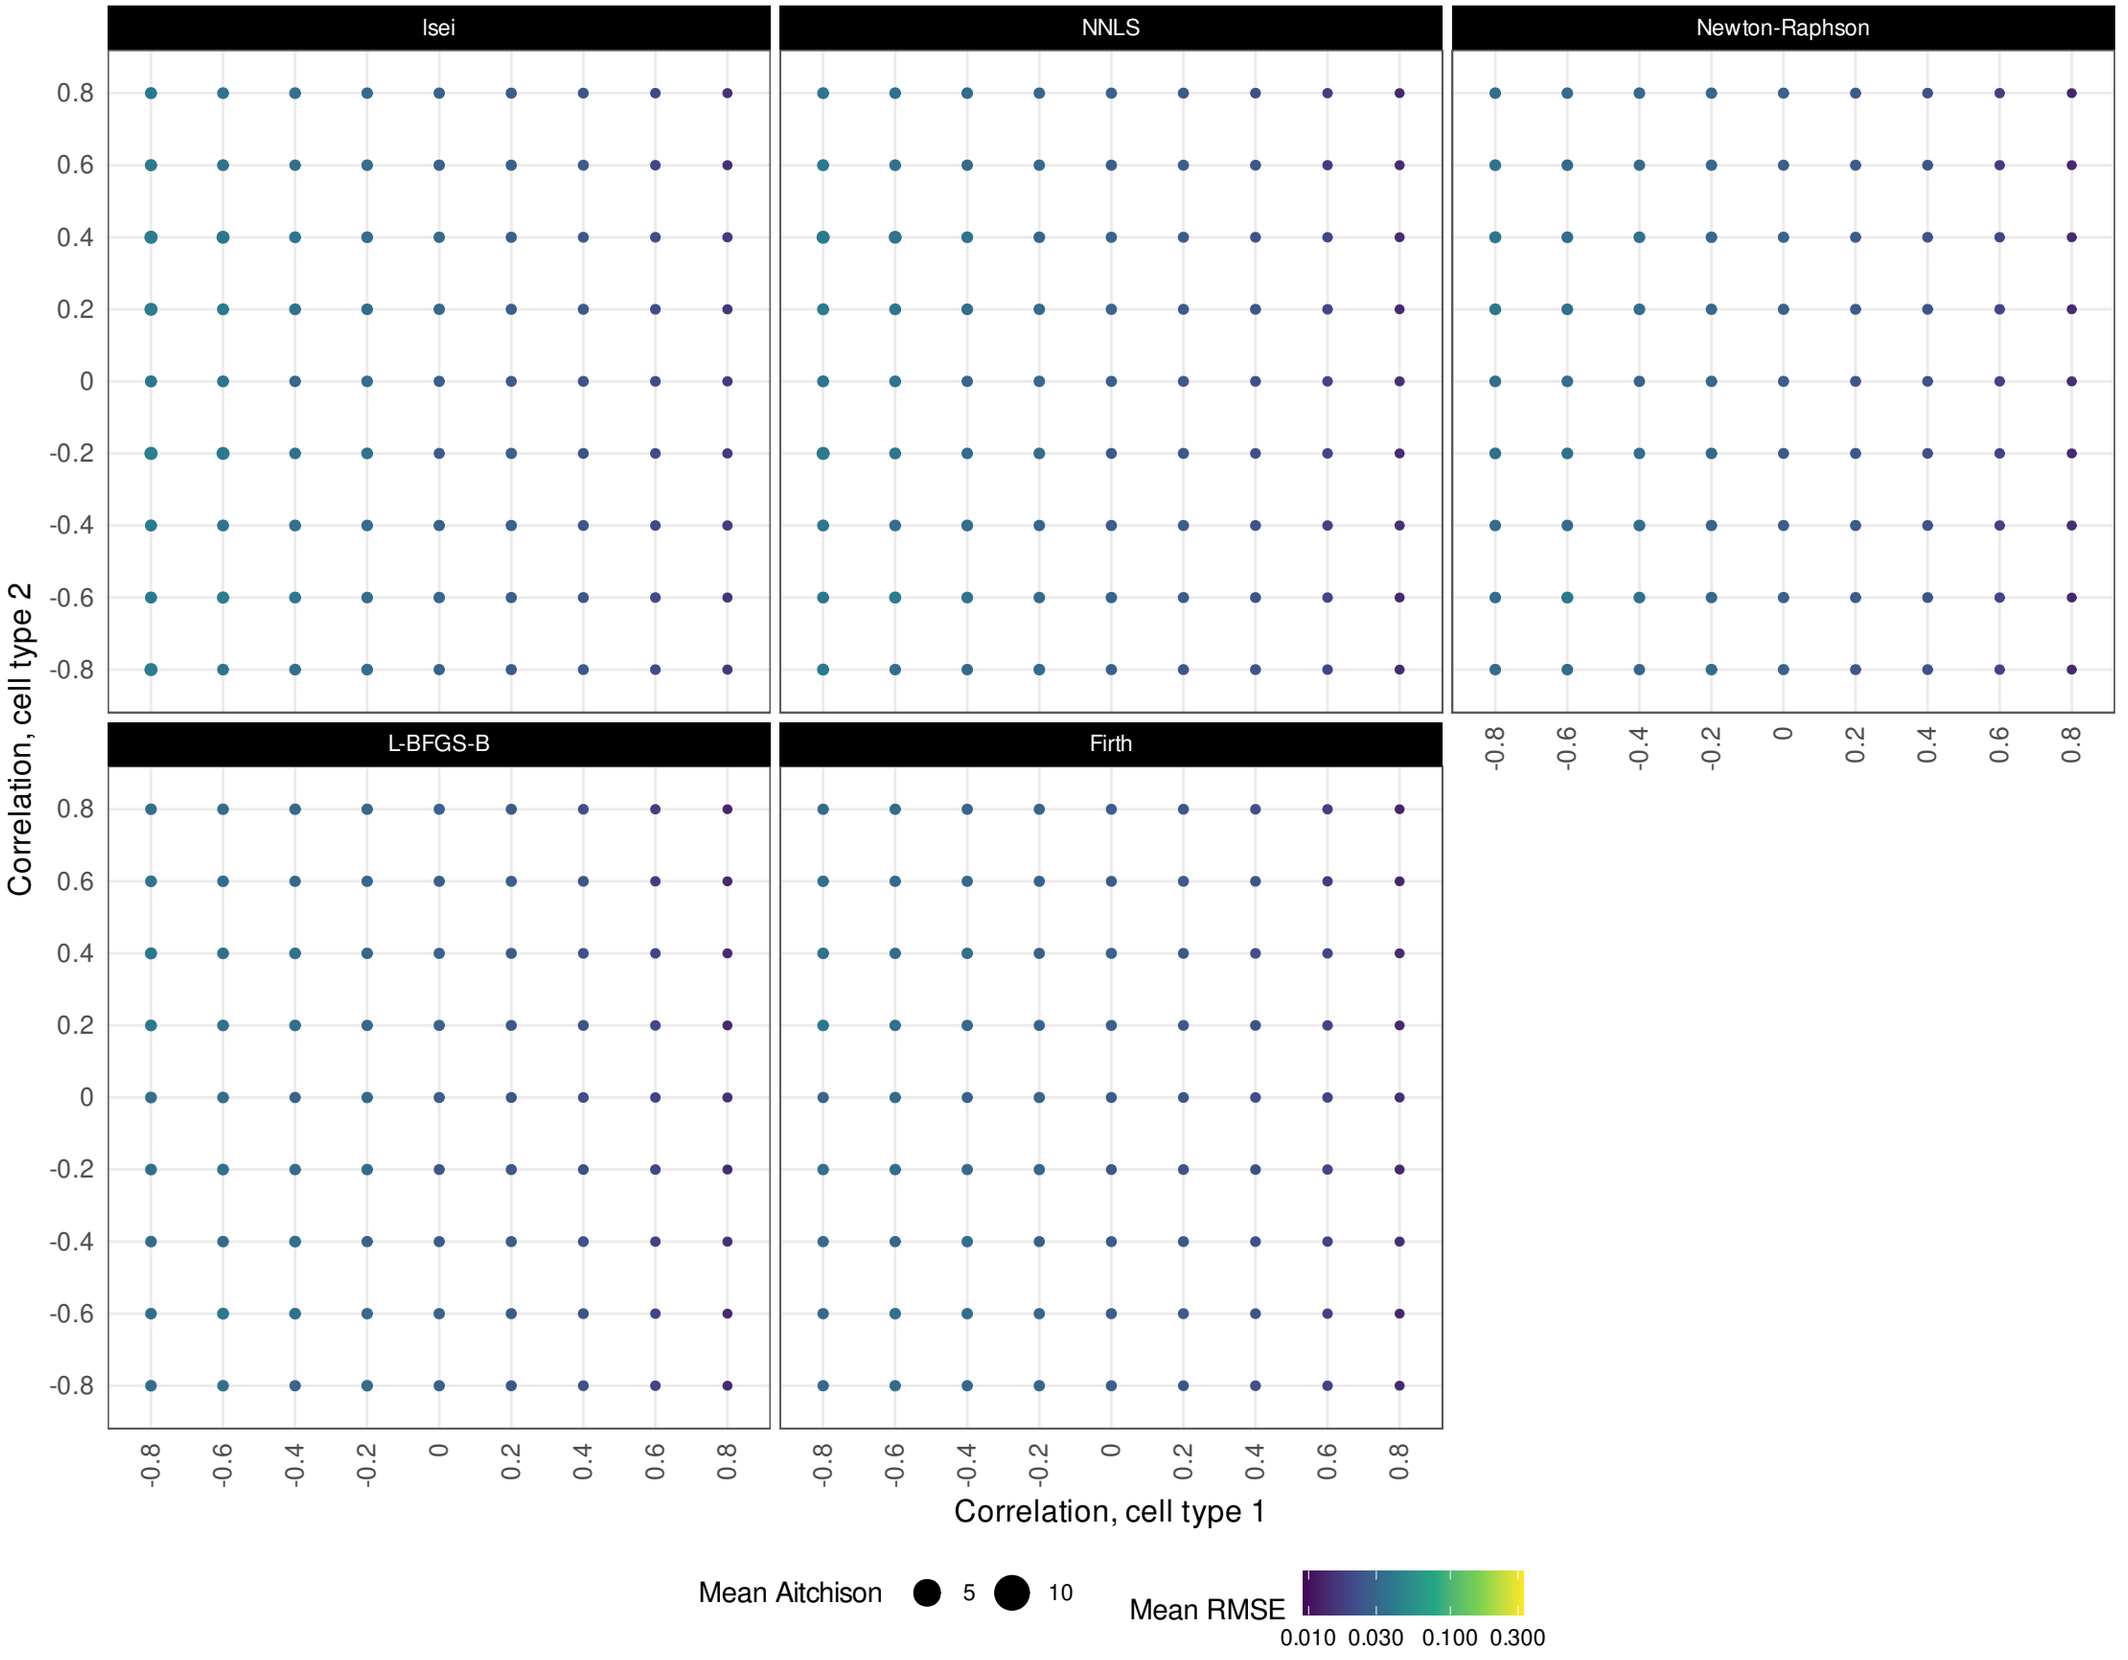

large centroid gap / heteroscedastic / balanced

Means over the simulated bulks; colour and size scales shared by every page.
Cross: the method returned no finite estimate for any bulk of that scenario (solver failure).

Accuracy of every method: colour RMSE, size Aitchison distance

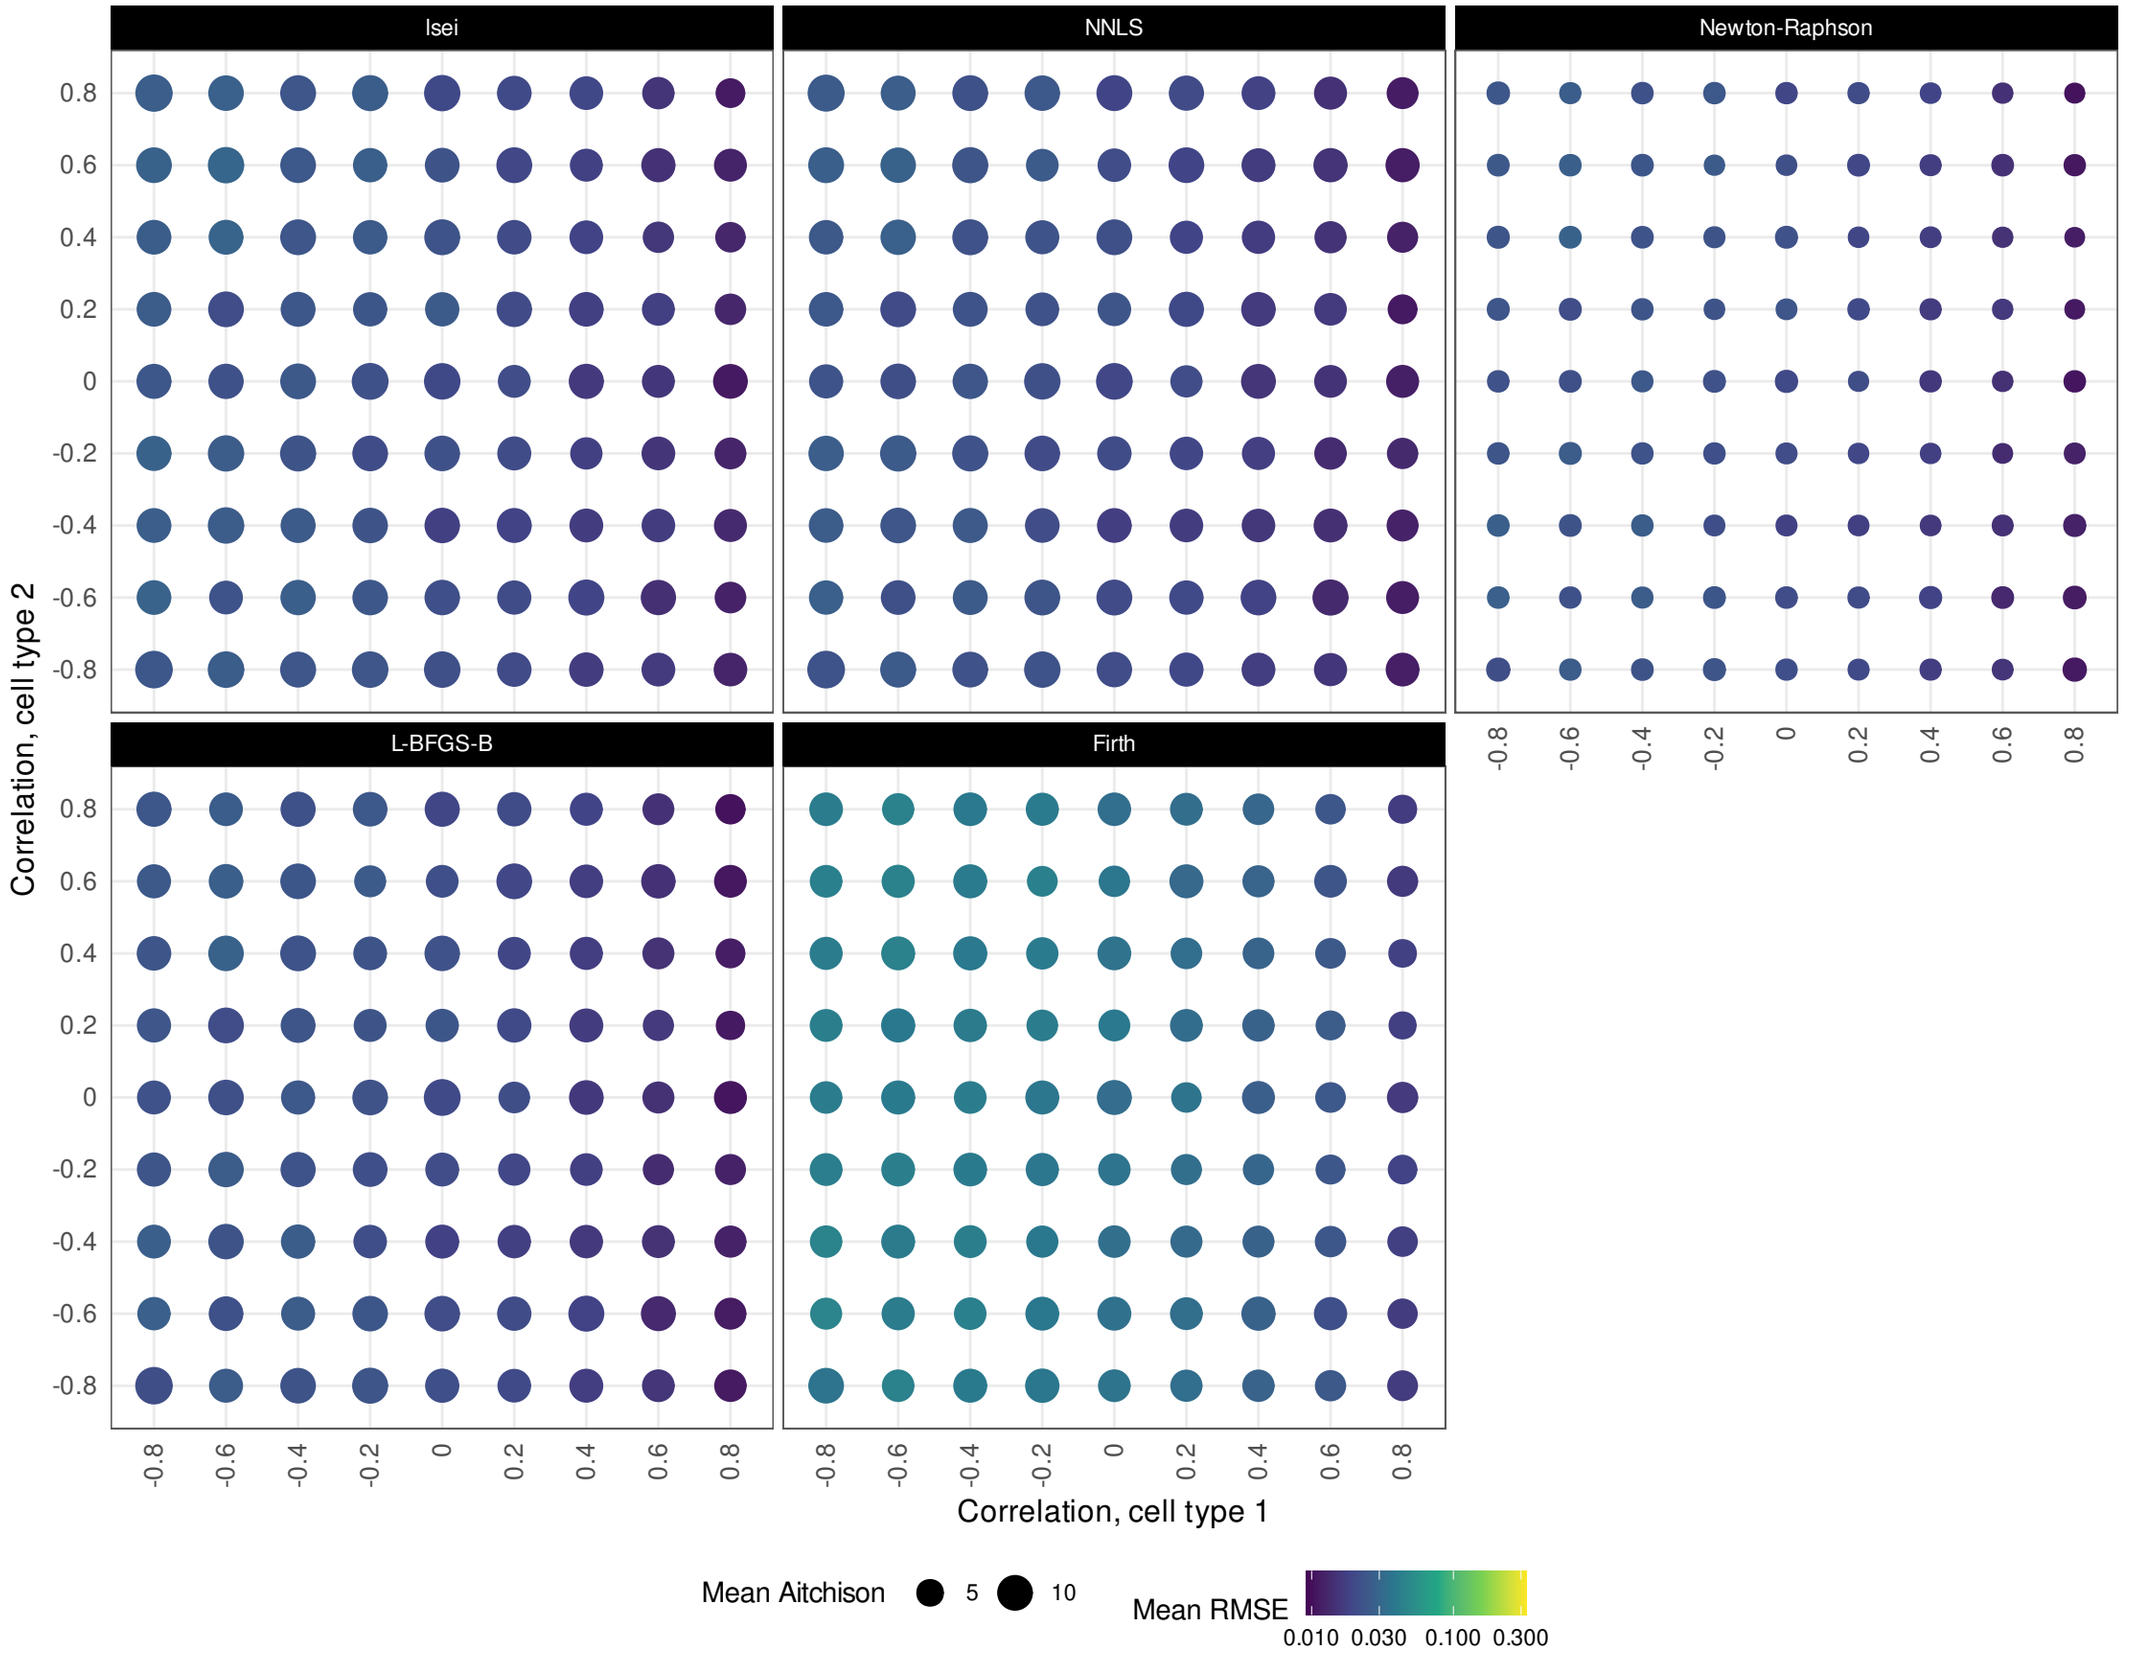

large centroid gap / heteroscedastic / moderately unbalanced

Means over the simulated bulks; colour and size scales shared by every page.
Cross: the method returned no finite estimate for any bulk of that scenario (solver failure).

Accuracy of every method: colour RMSE, size Aitchison distance

large centroid gap / heteroscedastic / highly unbalanced

Means over the simulated bulks; colour and size scales shared by every page.
Cross: the method returned no finite estimate for any bulk of that scenario (solver failure).
