

small_CLD / homoscedastic / balanced

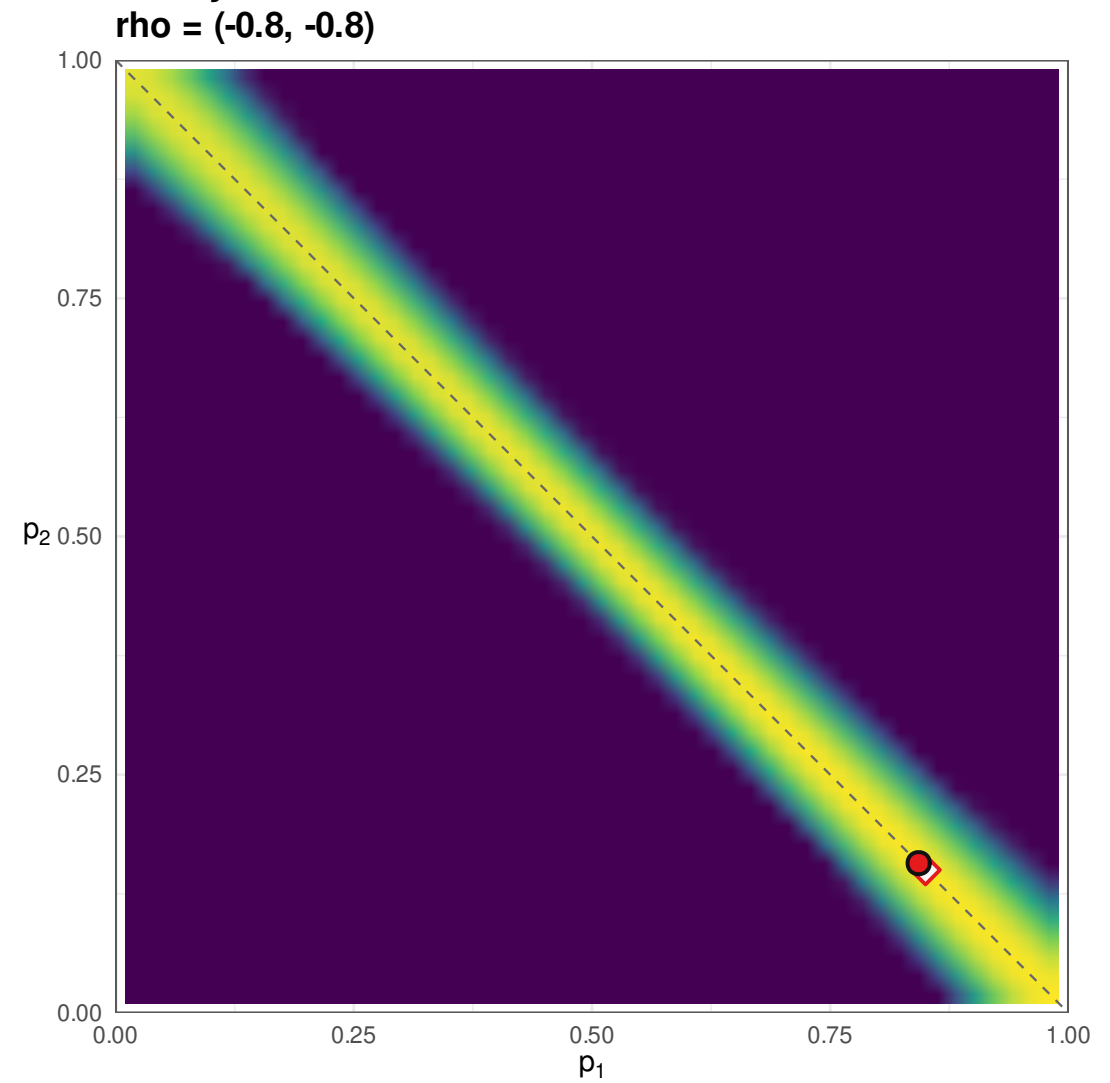

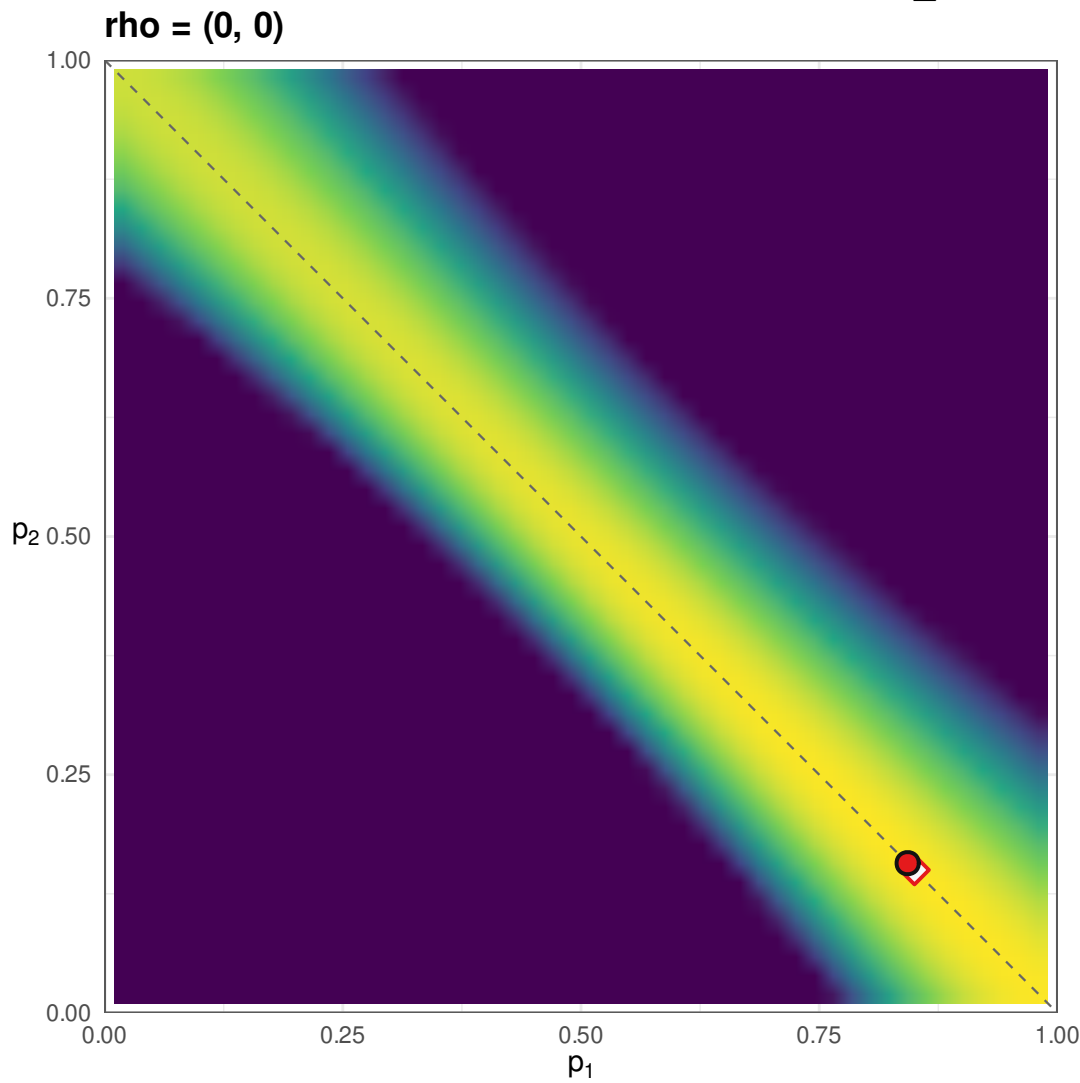

(μp^* , $\Sigma(p^*)$). White diamond: true p^* . Red circle, black stroke: maximiser of the expected log-likelihood.

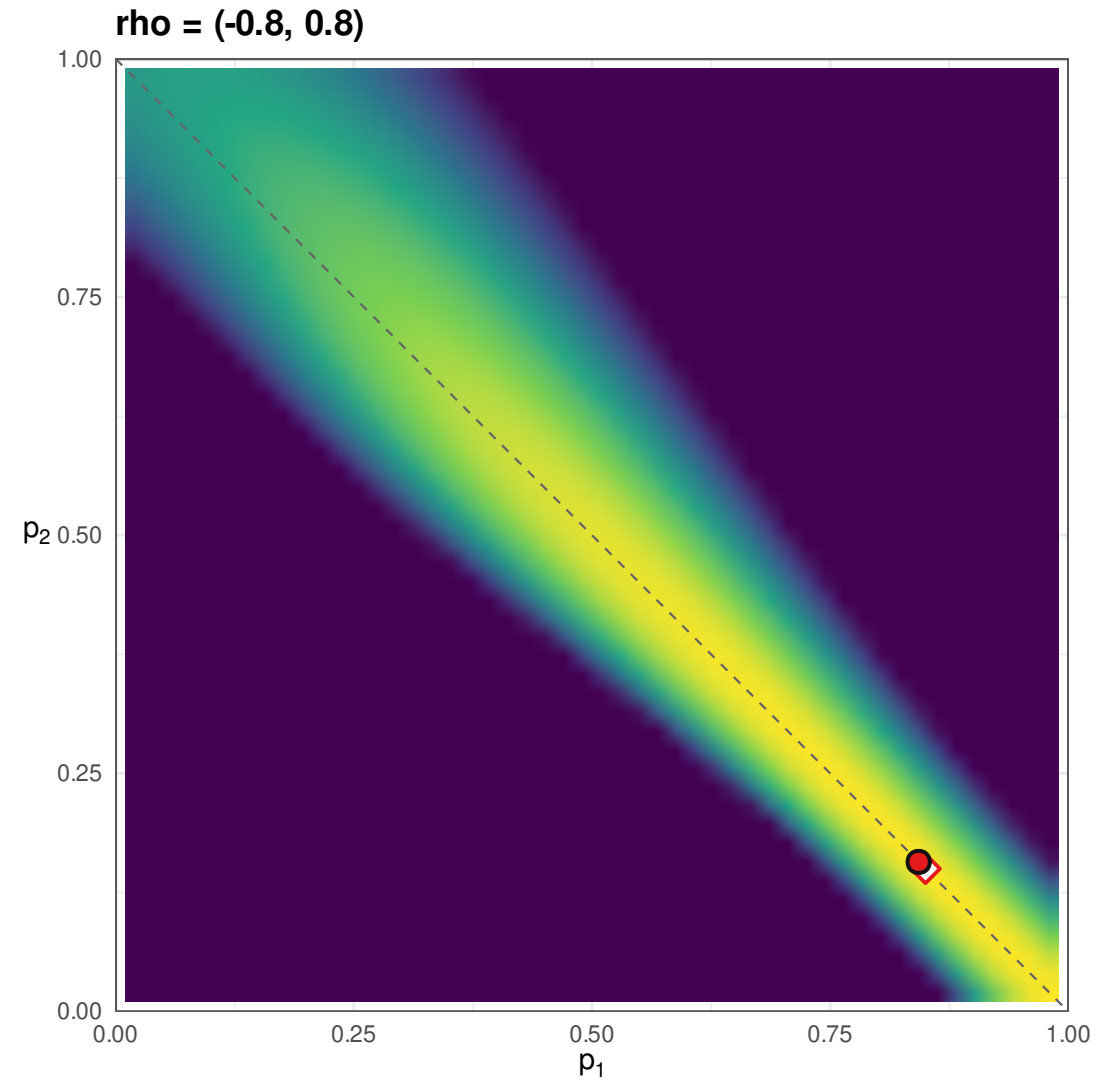

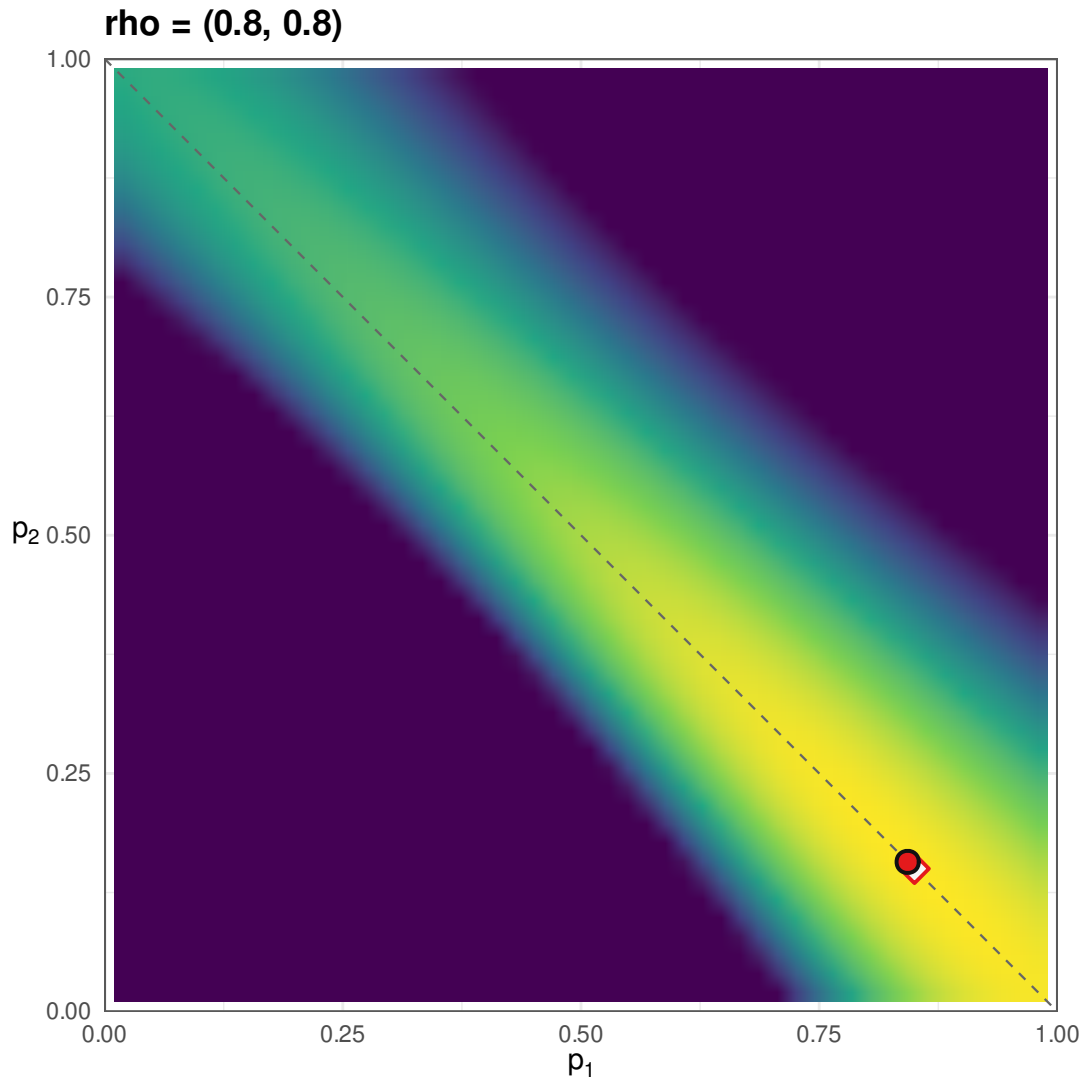

(μp^* , $\Sigma(p^*)$). White diamond: true p^* . Red circle, black stroke: maximiser of the expected log-likelihood.

small_CLD / homoscedastic / moderately unbalanced

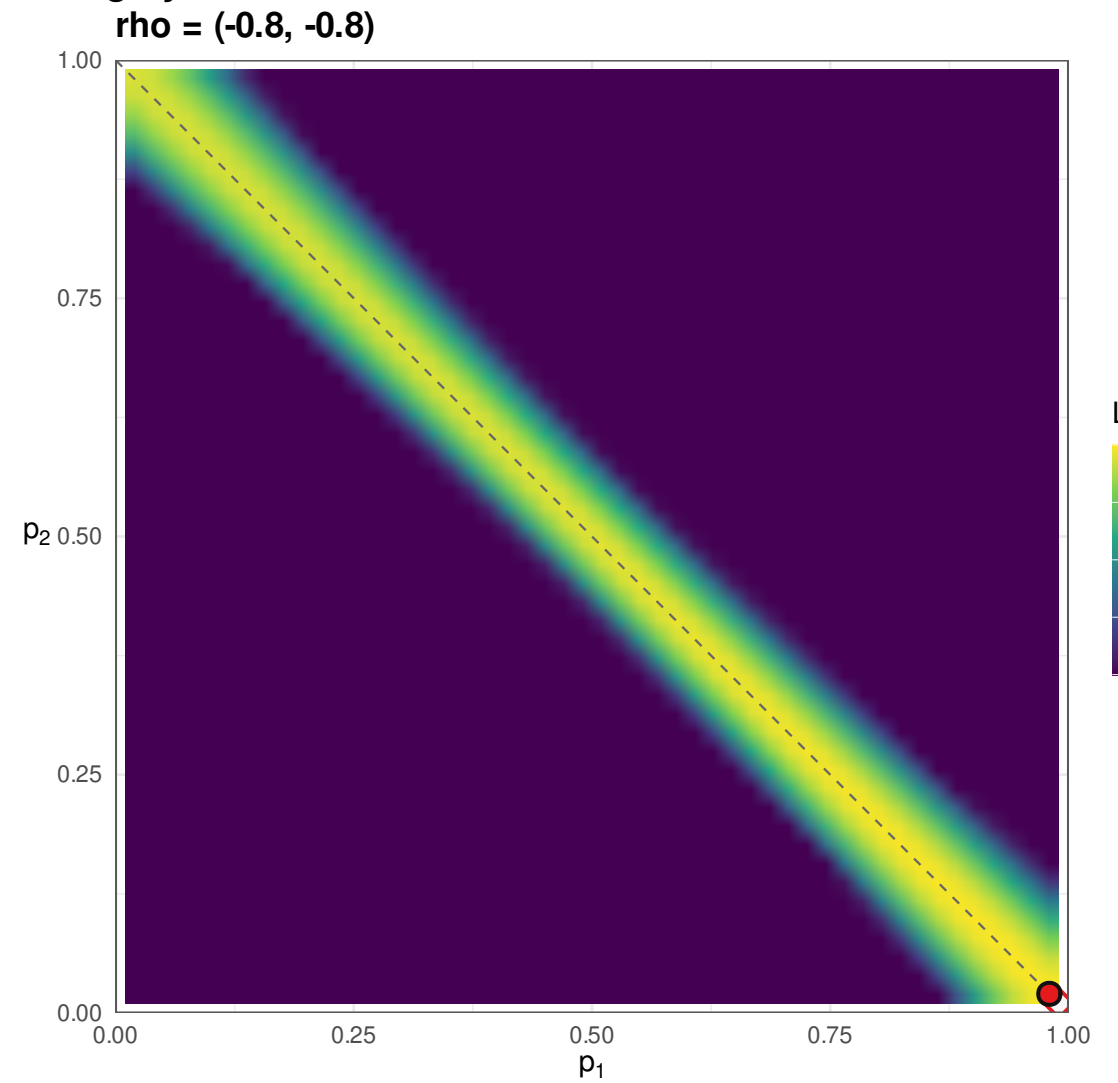

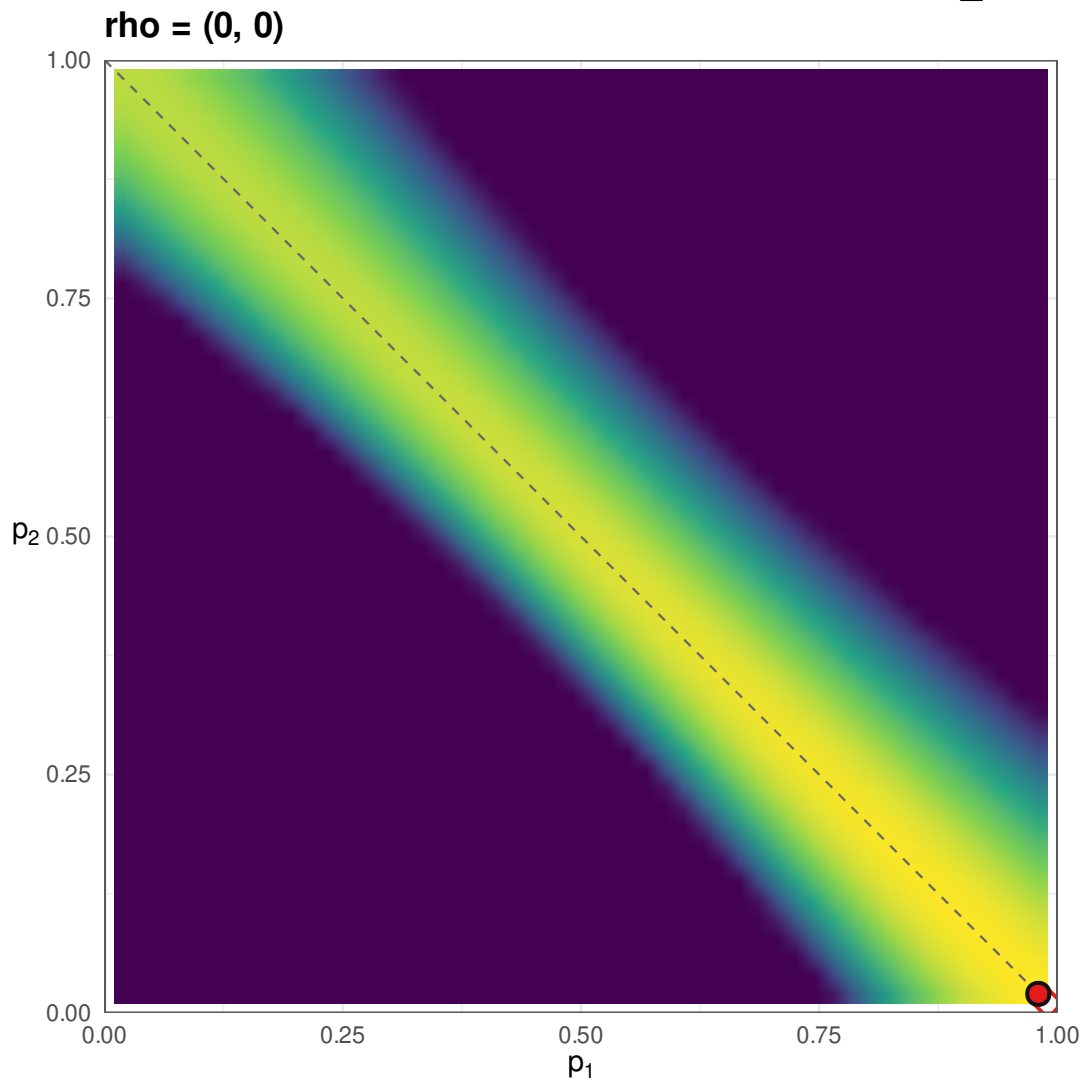

(μp^* , $\Sigma(p^*)$). White diamond: true p^* . Red circle, black stroke: maximiser of the expected log-likelihood. $E[L] / \max E[L]$ under $Y \sim N(\mu p^*, \Sigma(p^*))$. White diamond: true p^* . Red circle, black stroke: maximiser of the expected log-likelihood.

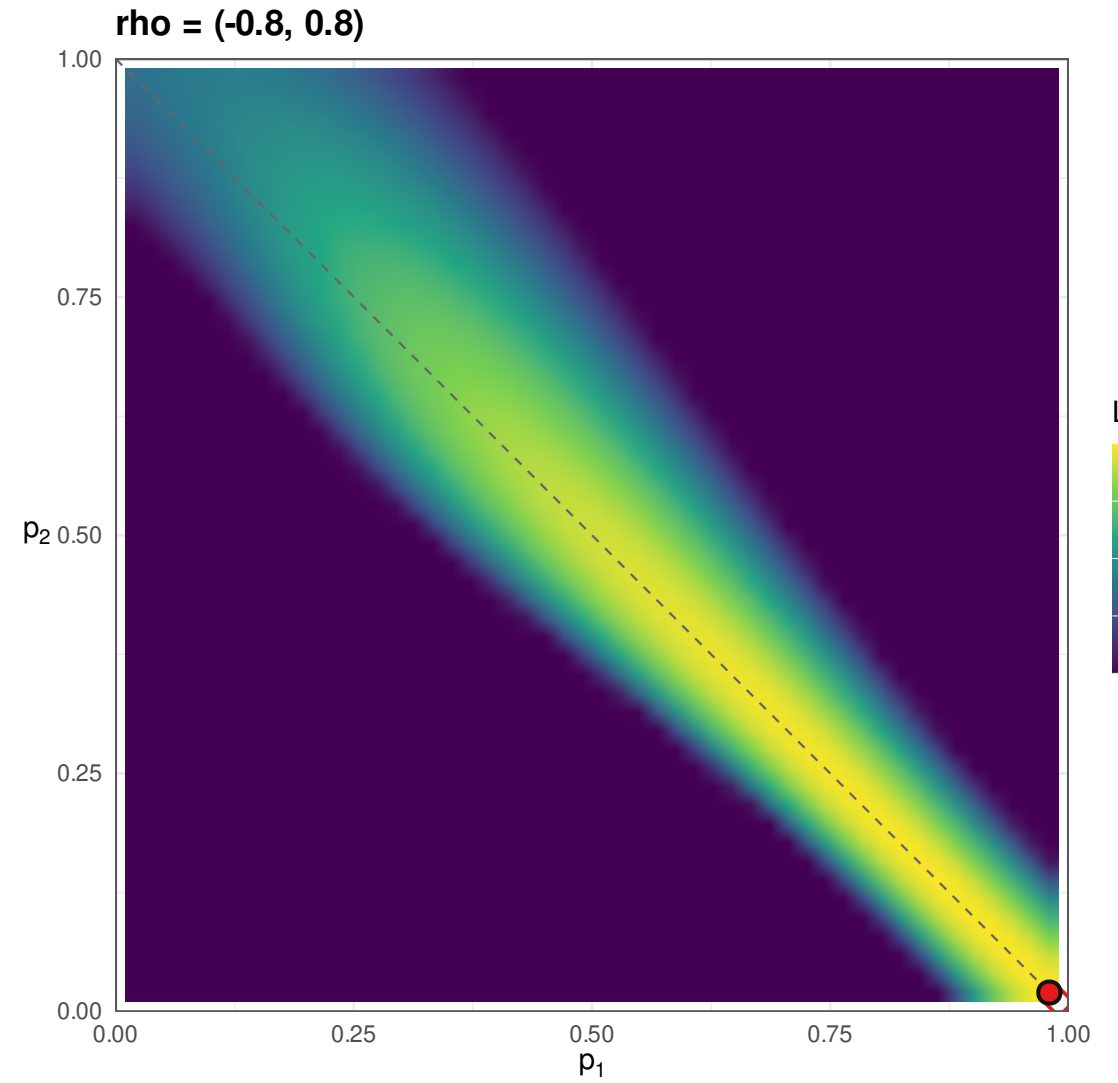

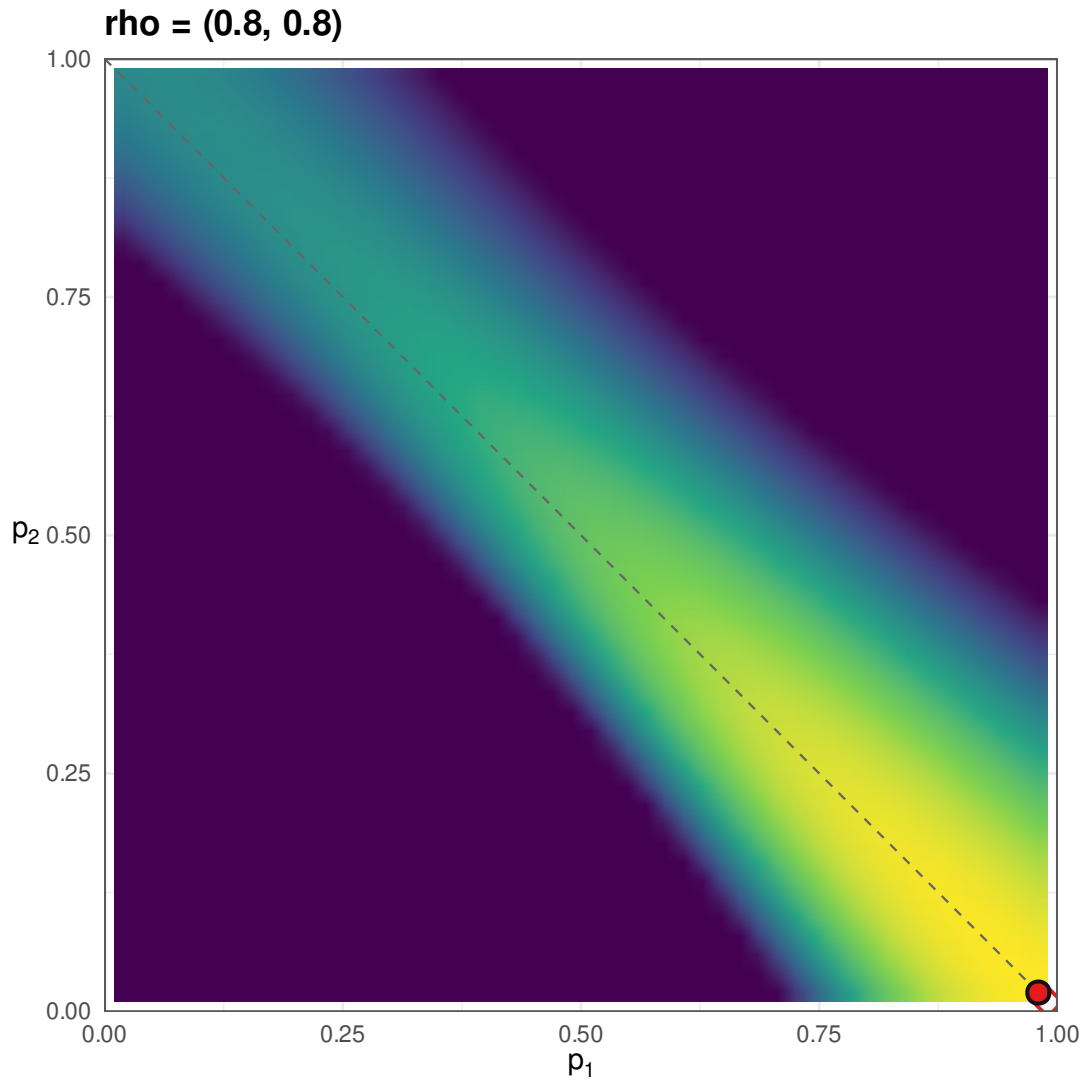

(μp^* , $\Sigma(p^*)$). White diamond: true p^* . Red circle, black stroke: maximiser of the expected log-likelihood. $E[L] / \max E[L]$ under $Y \sim N(\mu p^*, \Sigma(p^*))$. White diamond: true p^* . Red circle, black stroke: maximiser of the expected log-likelihood.

small_CLD / homoscedastic / highly unbalanced

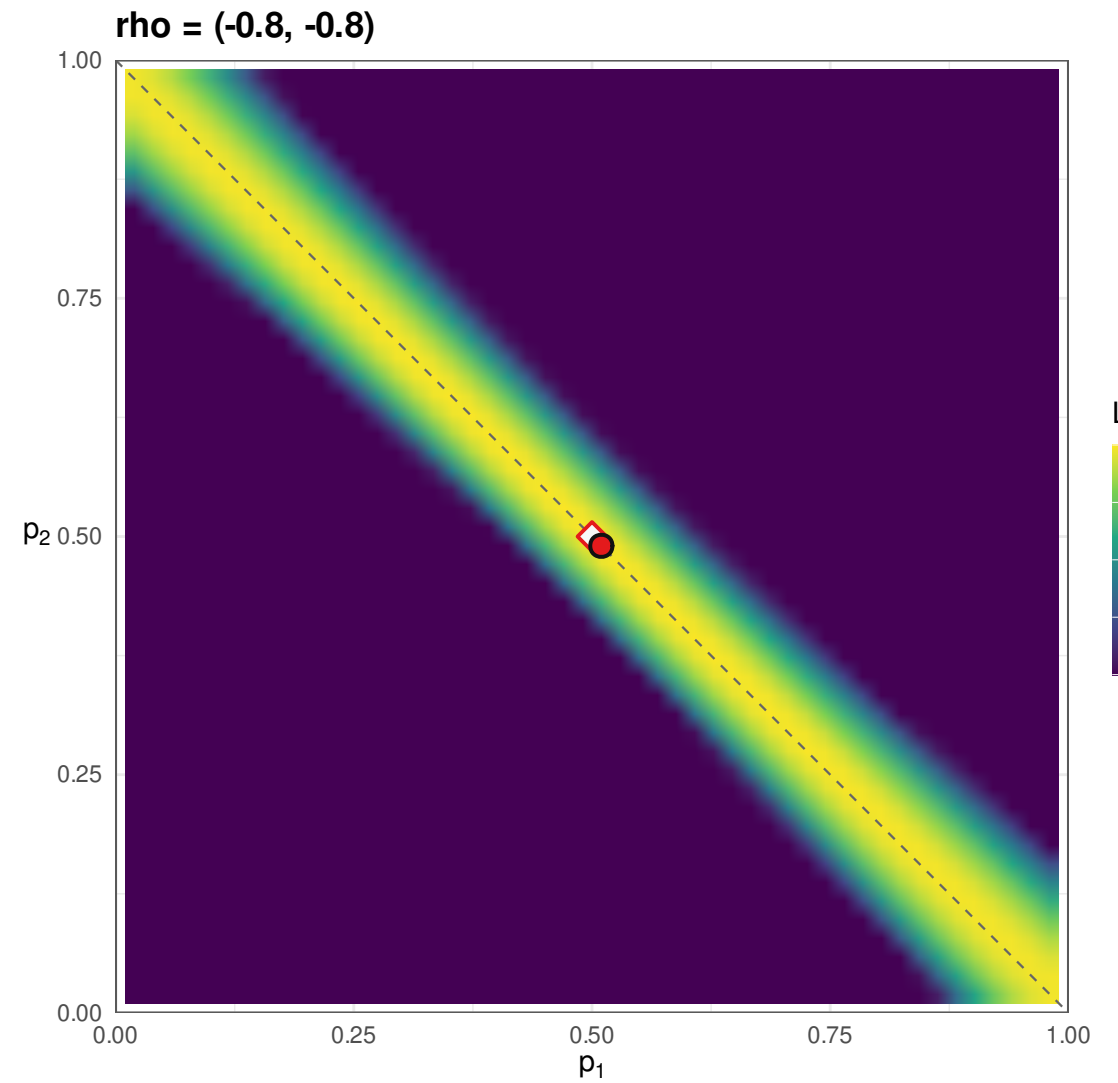

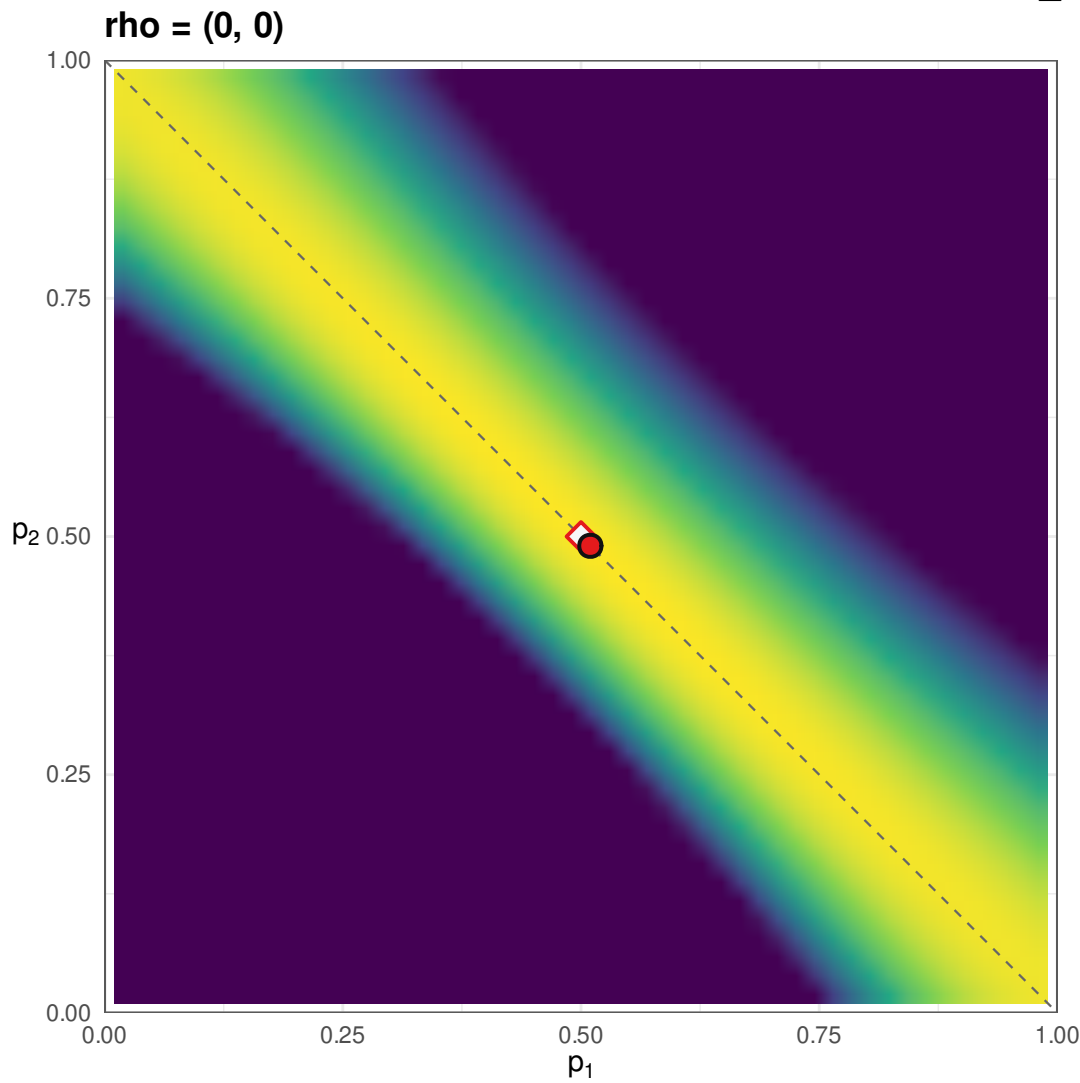

(μp^* , $\Sigma(p^*)$). White diamond: true p^* . Red circle, black stroke: maximiser of the expected log-likelihood. $E[L] / \max E[L]$ under $Y \sim N(\mu p^*, \Sigma(p^*))$. White diamond: true p^* . Red circle, black stroke: maximiser of the expected log-likelihood.

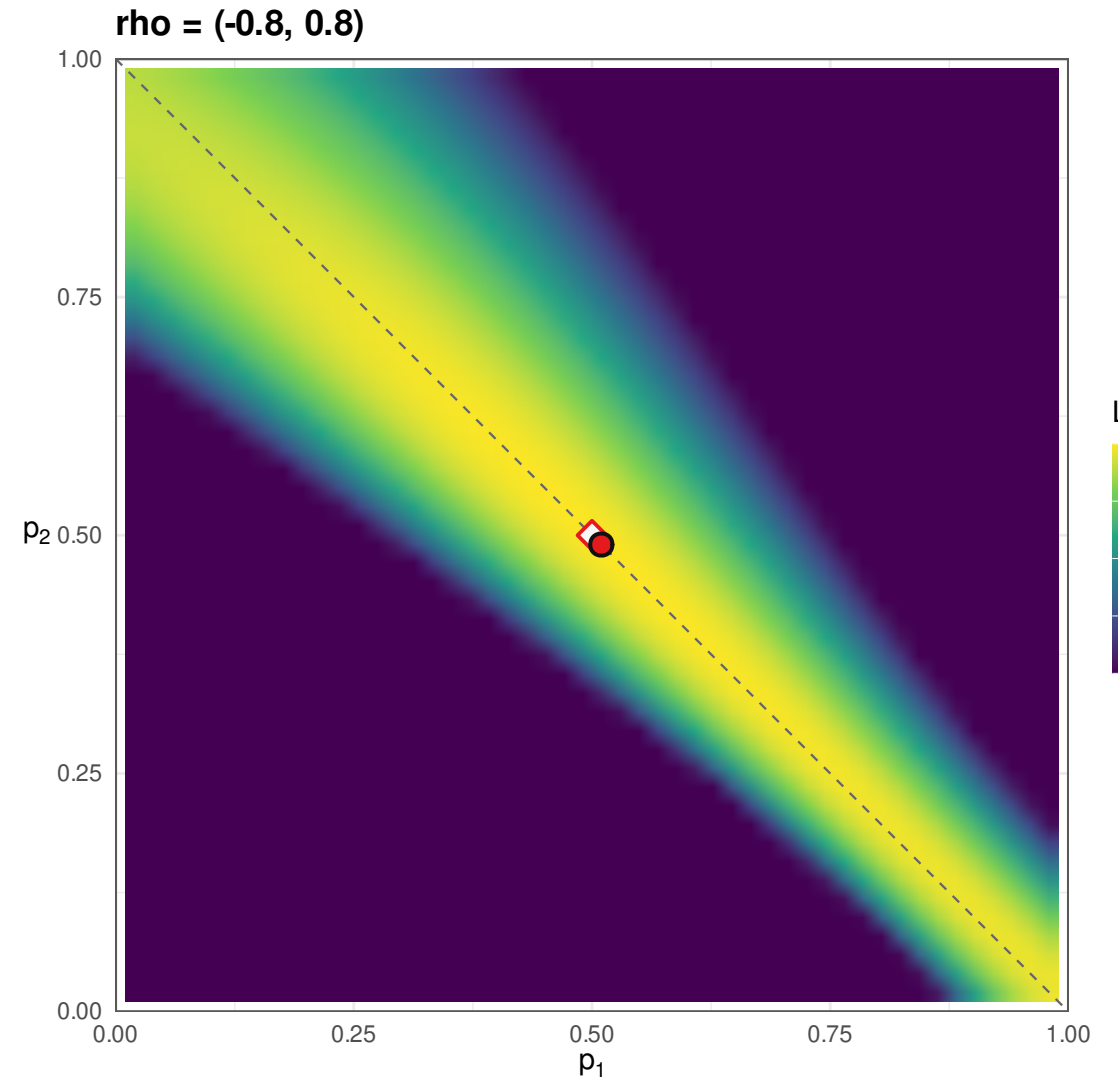

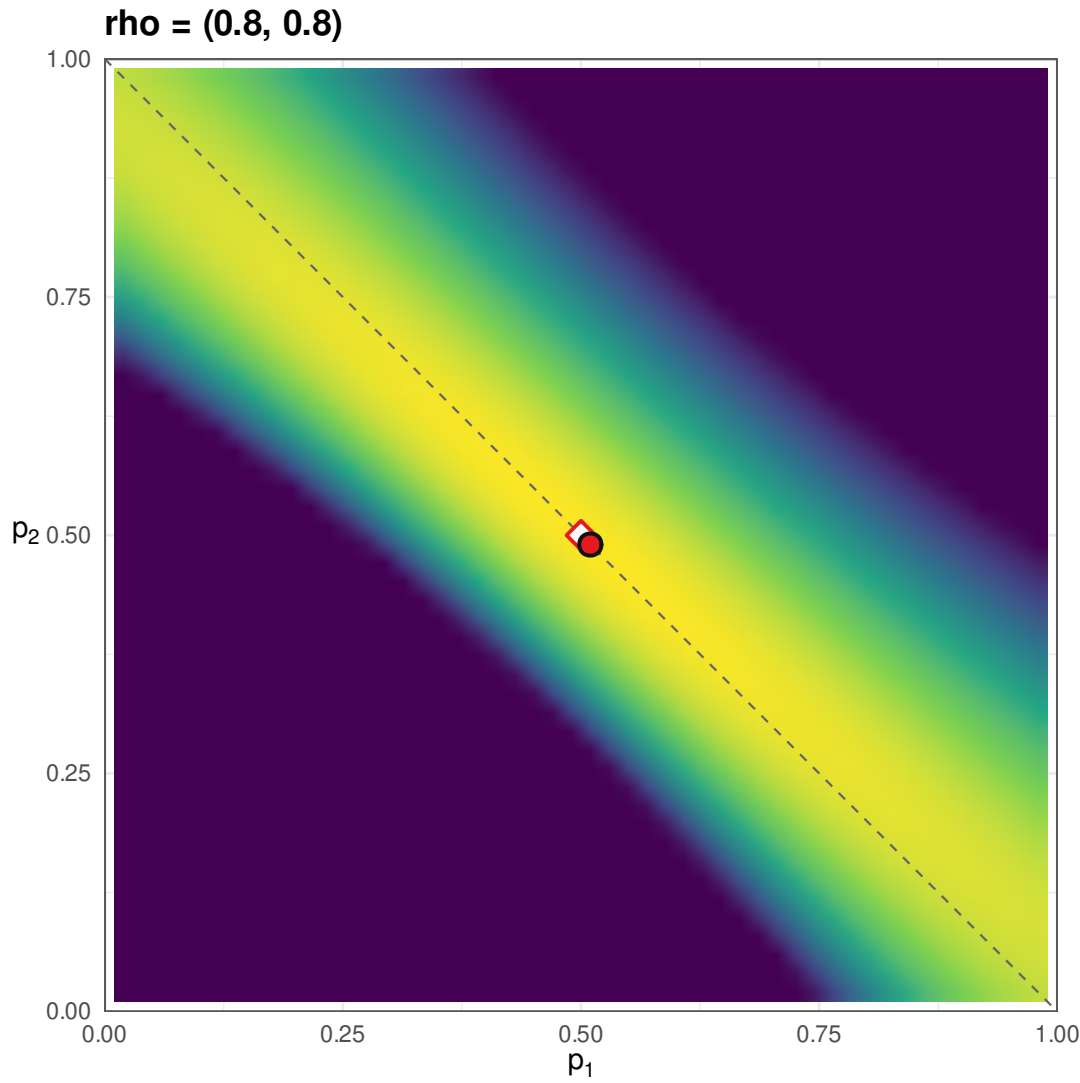

(μp^* , $\Sigma(p^*)$). White diamond: true p^* . Red circle, black stroke: maximiser of the expected log-likelihood. $E[L] / \max E[L]$ under $Y \sim N(\mu p^*, \Sigma(p^*))$. White diamond: true p^* . Red circle, black stroke: maximiser of the expected log-likelihood.

small_CLD / heteroscedastic / balanced

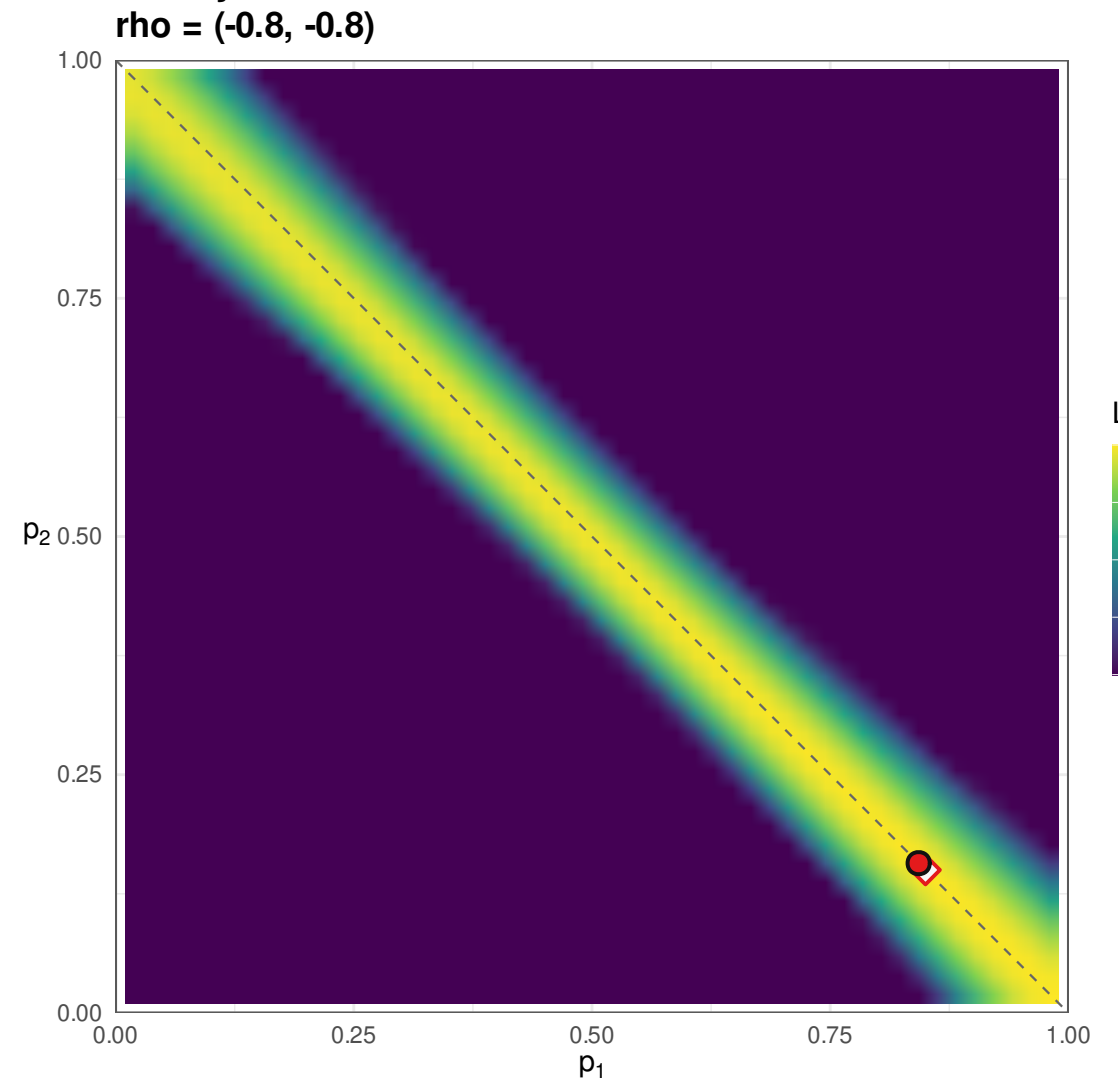

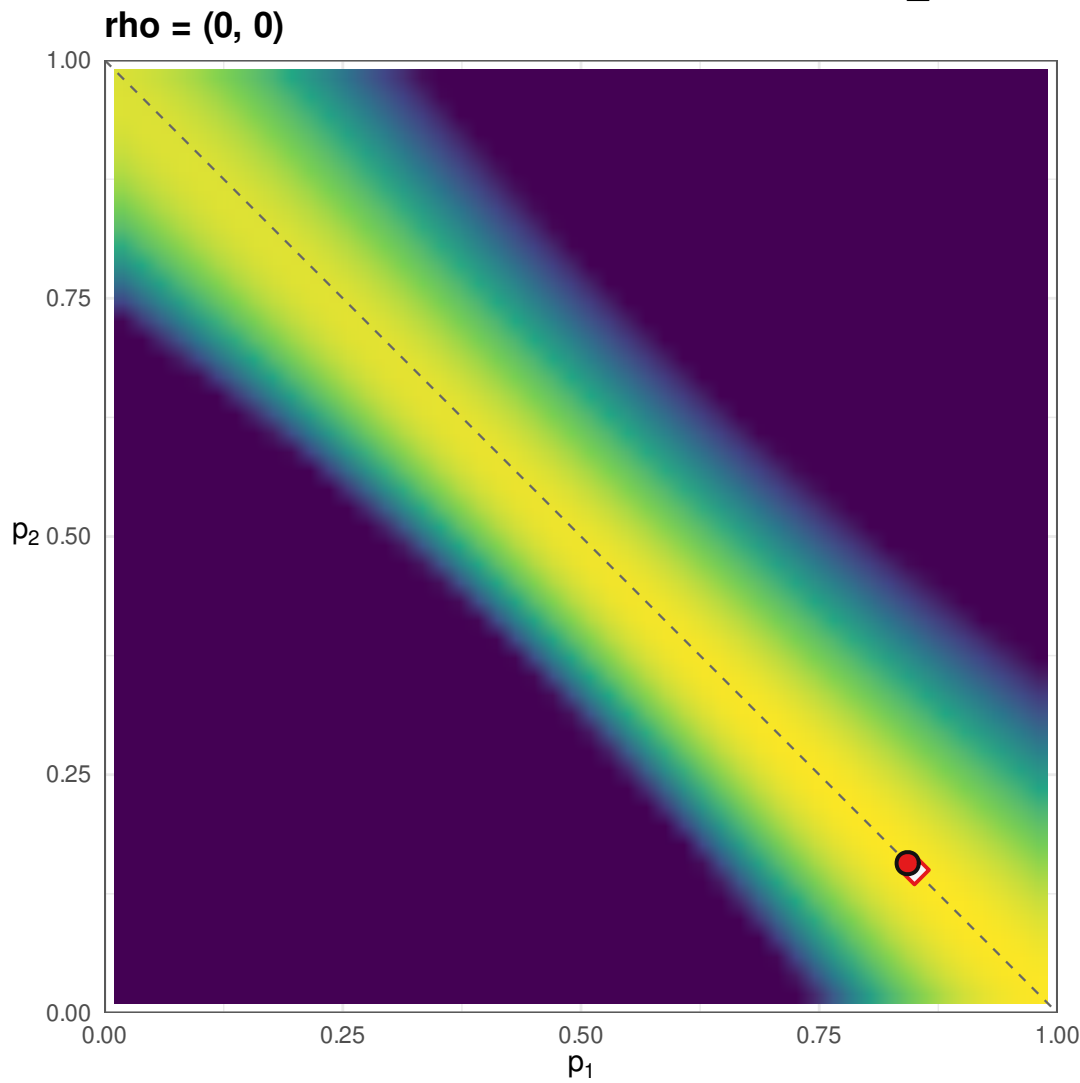

(μp^* , $\Sigma(p^*)$). White diamond: true p^* . Red circle, black stroke: maximiser of the expected log-likelihood. $E[L] / \max E[L]$ under $Y \sim N(\mu p^*, \Sigma(p^*))$. White diamond: true p^* . Red circle, black stroke: maximiser of the expected log-likelihood.

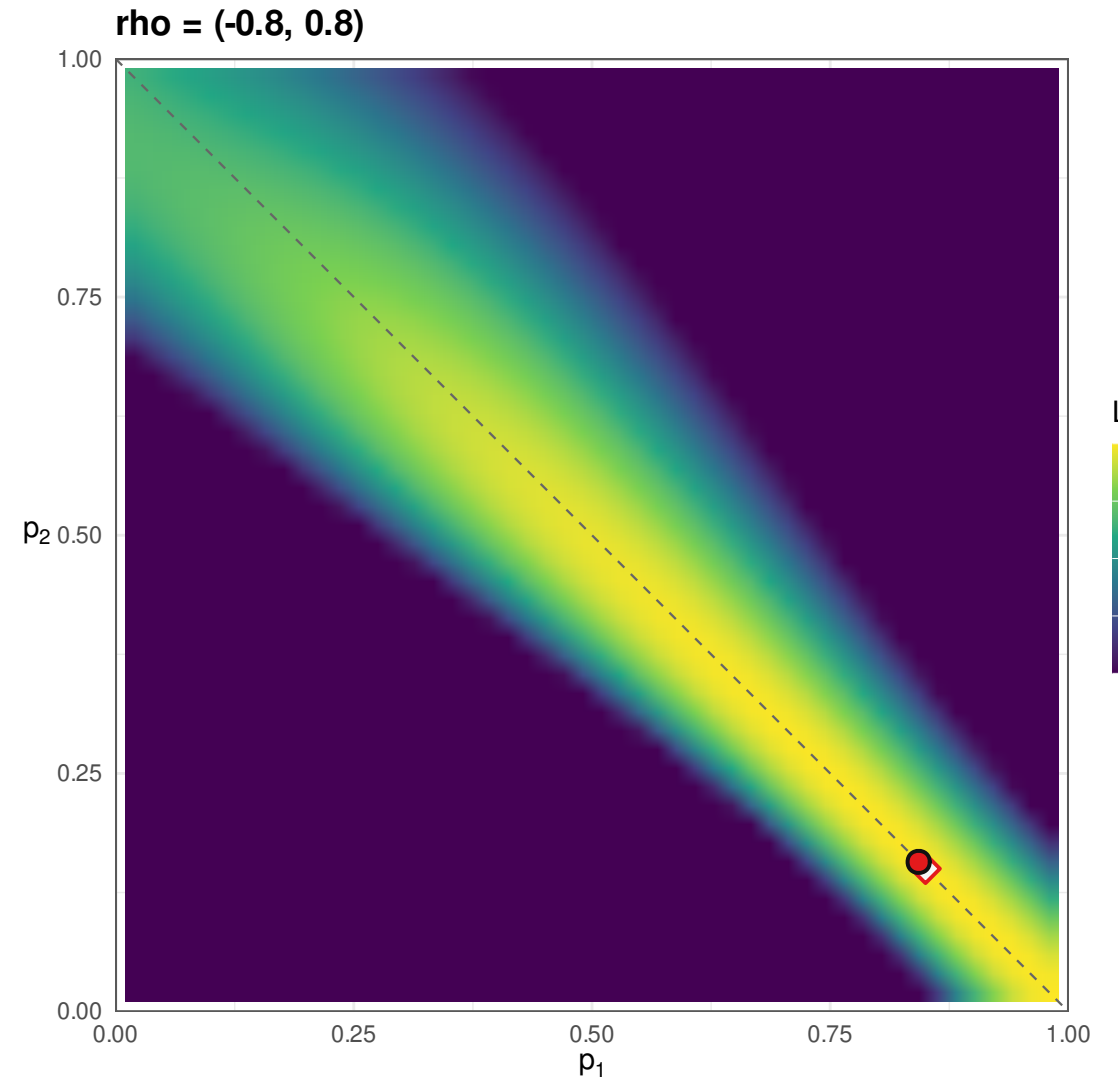

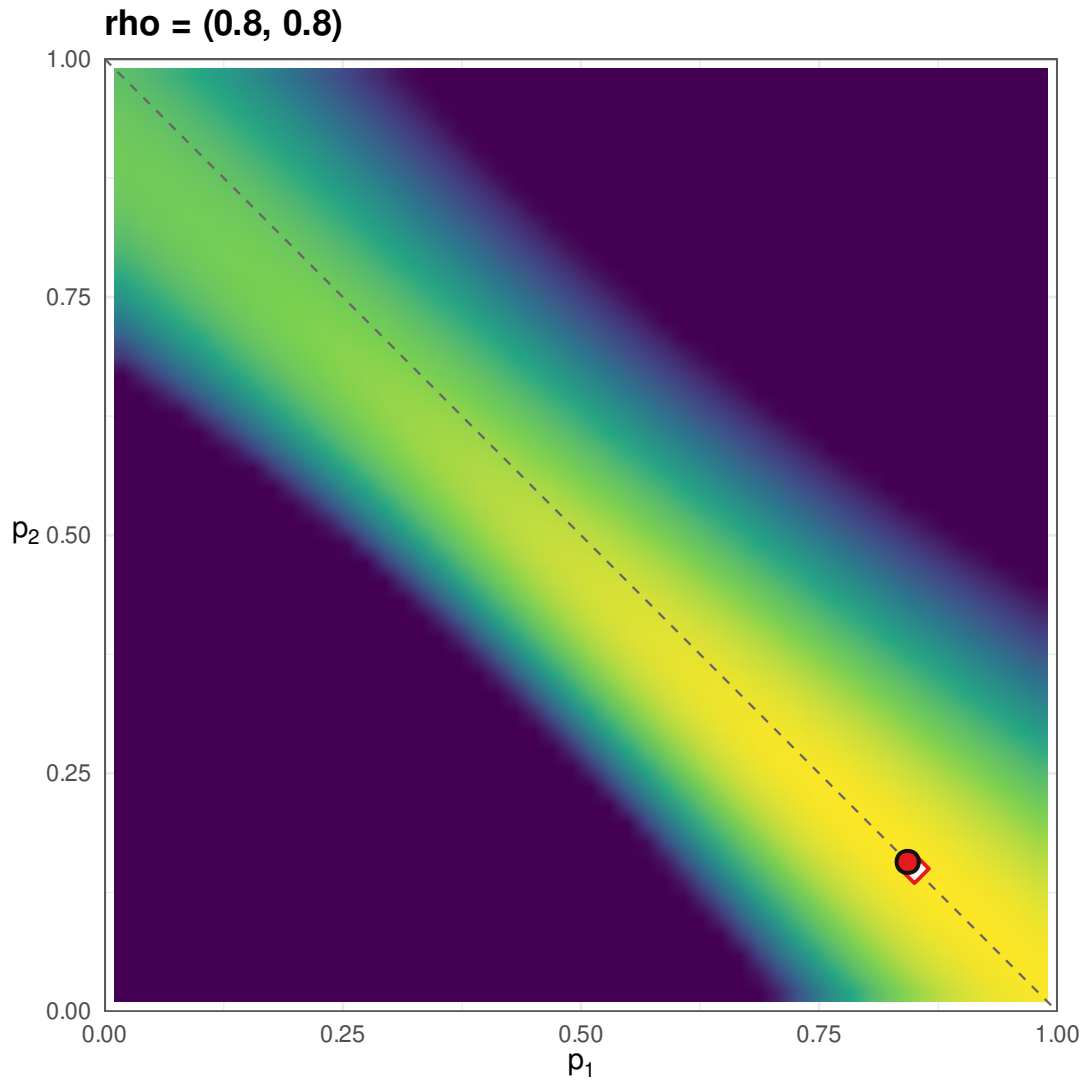

(μp^* , $\Sigma(p^*)$). White diamond: true p^* . Red circle, black stroke: maximiser of the expected log-likelihood. $E[L] / \max E[L]$ under $Y \sim N(\mu p^*, \Sigma(p^*))$. White diamond: true p^* . Red circle, black stroke: maximiser of the expected log-likelihood.

small_CLD / heteroscedastic / moderately unbalanced

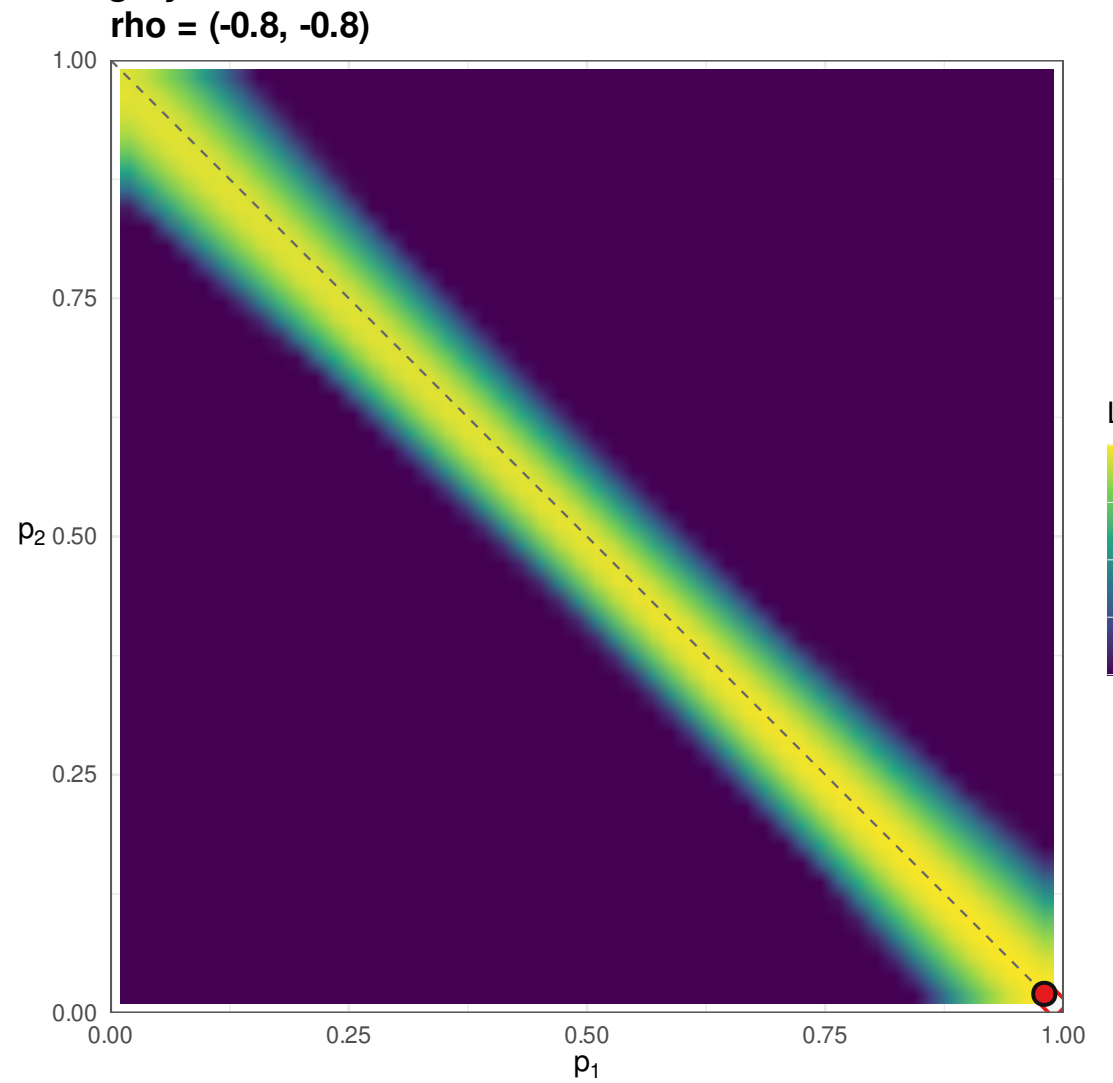

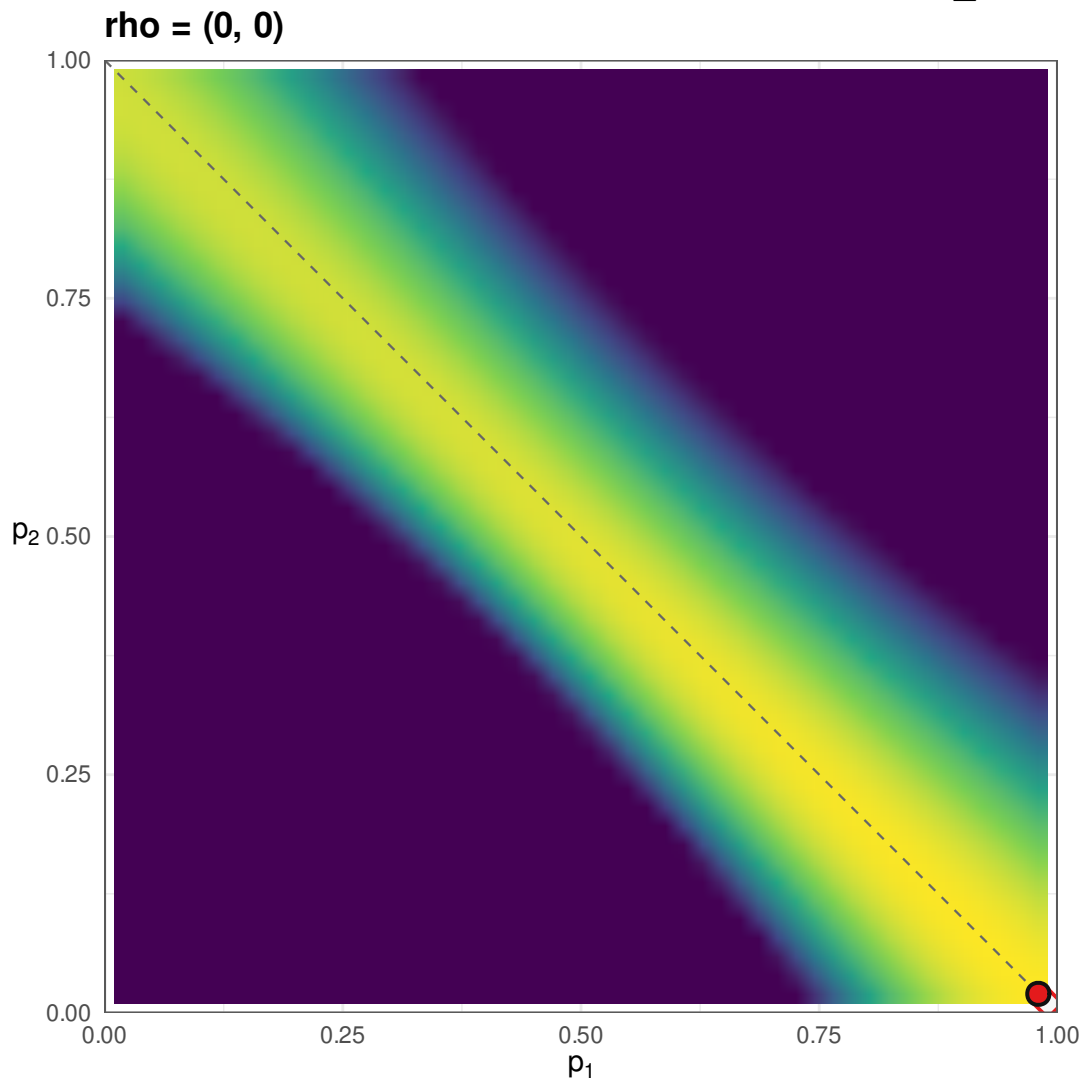

(μp^* , $\Sigma(p^*)$). White diamond: true p^* . Red circle, black stroke: maximiser of the expected log-likelihood. $E[L(p)] / \max E[L]$ under $Y \sim N(\mu p^*, \Sigma(p^*))$. White diamond: true p^* . Red circle, black stroke: maximiser of the expected log-likelihood.

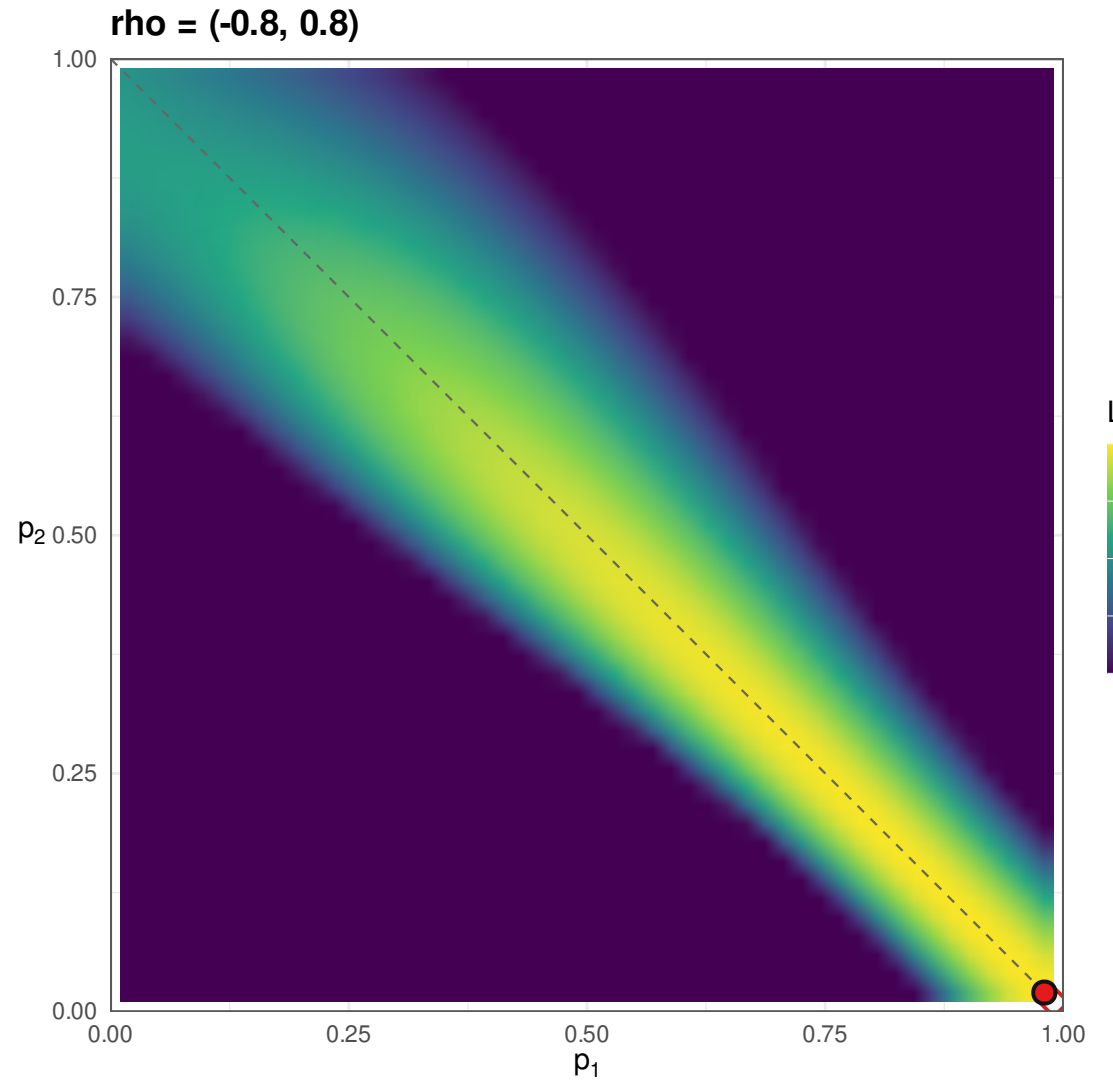

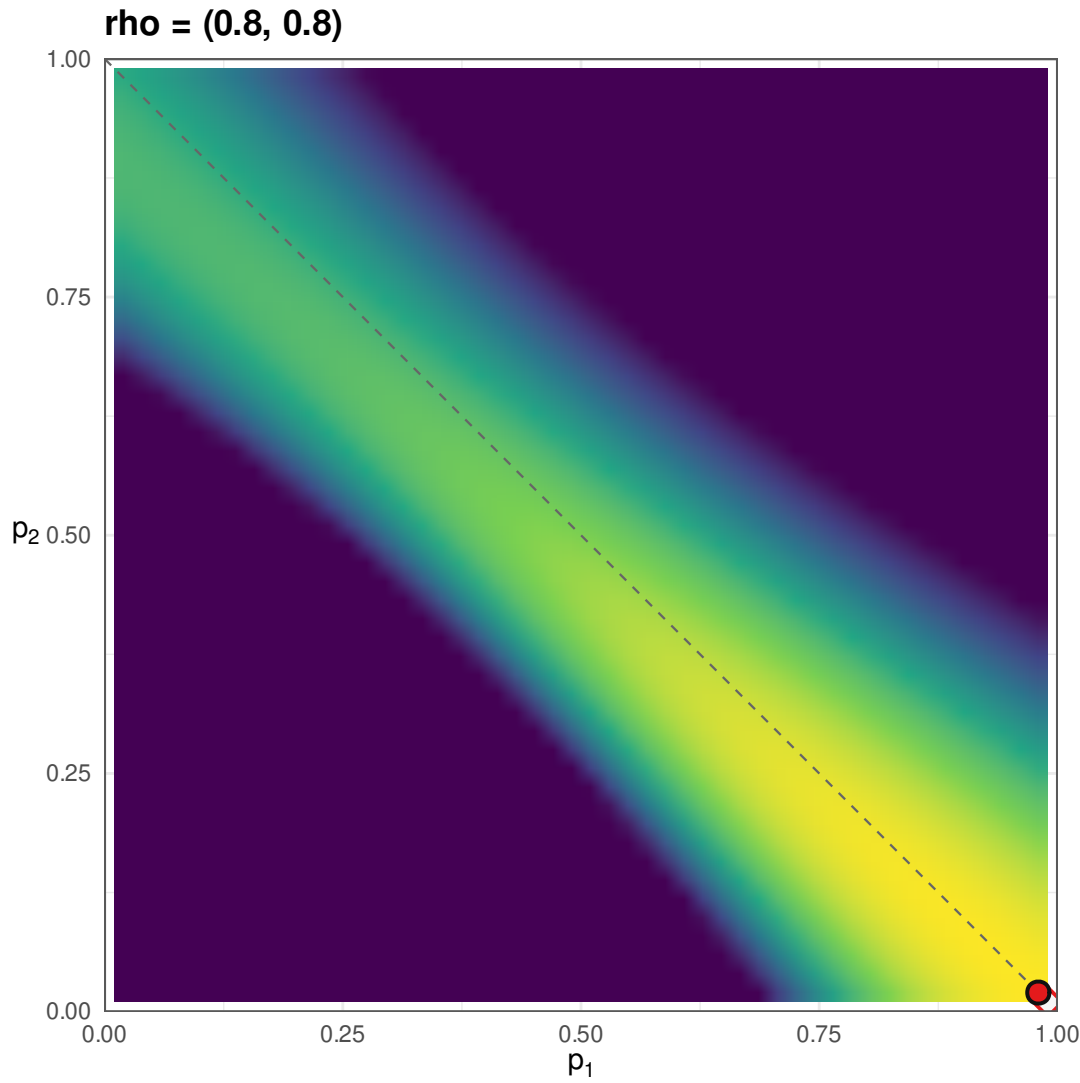

(μp^* , $\Sigma(p^*)$). White diamond: true p^* . Red circle, black stroke: maximiser of the expected log-likelihood. $E[L(p)] / \max E[L]$ under $Y \sim N(\mu p^*, \Sigma(p^*))$. White diamond: true p^* . Red circle, black stroke: maximiser of the expected log-likelihood.

small_CLD / heteroscedastic / highly unbalanced

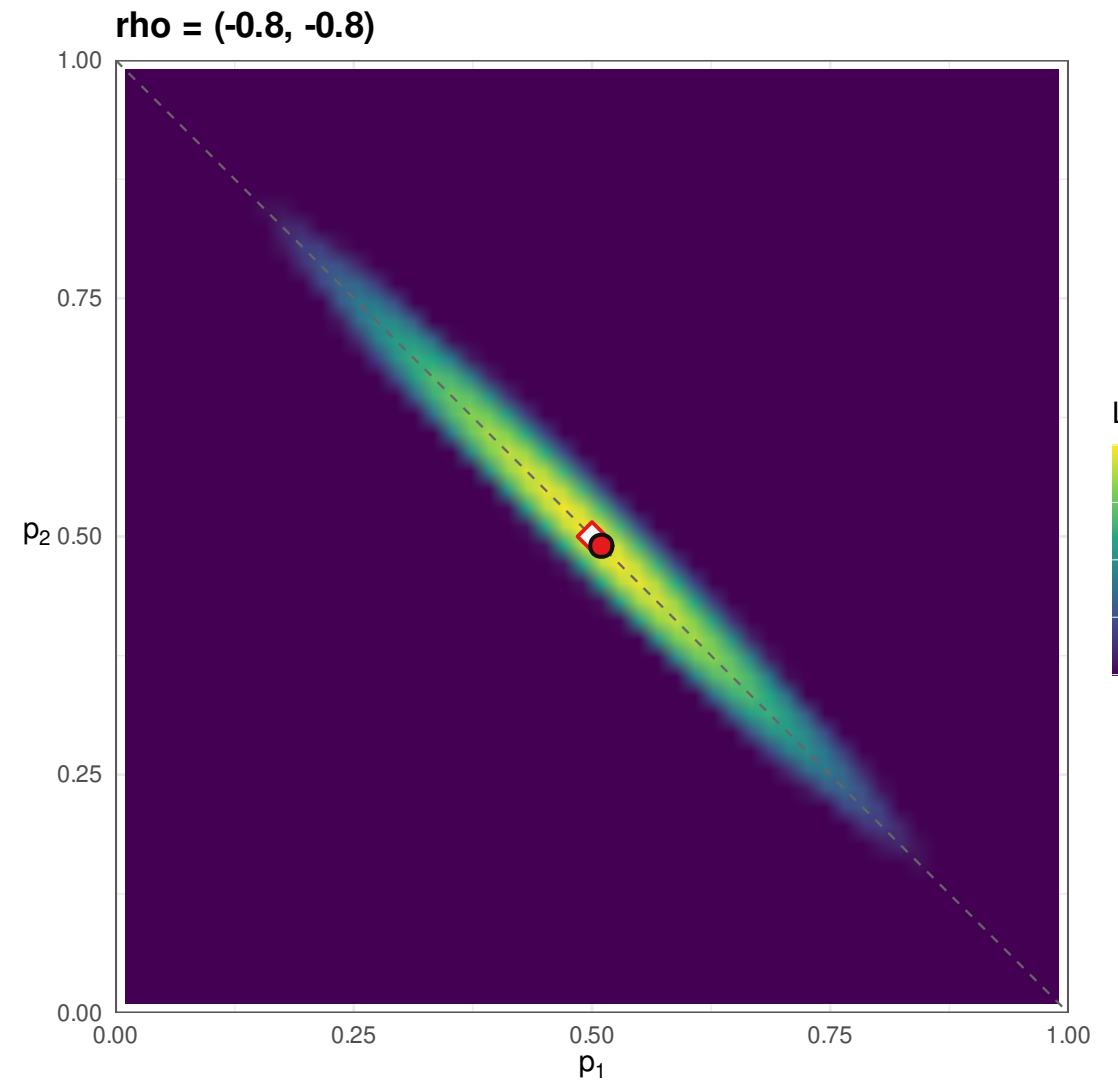

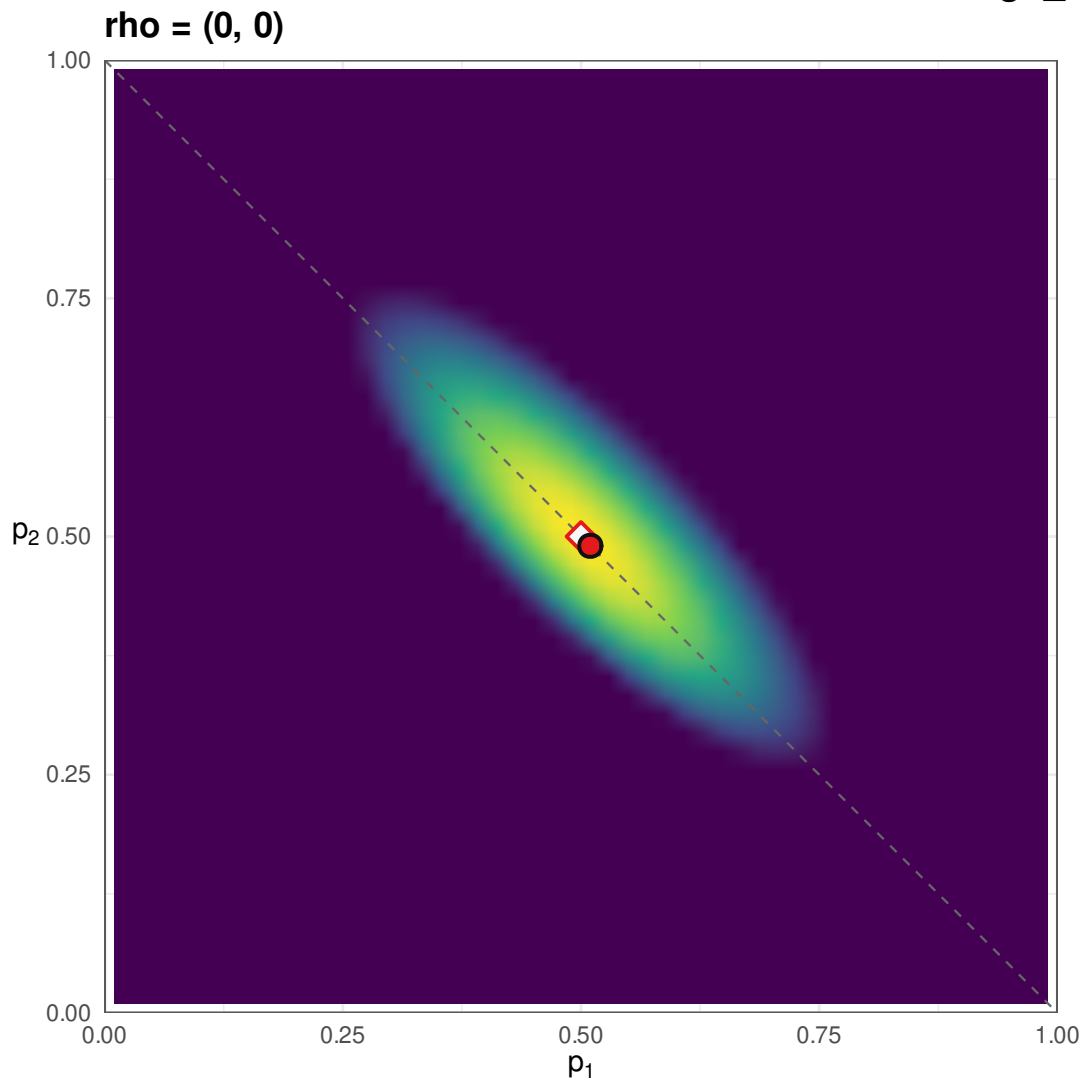

(μp^* , $\Sigma(p^*)$). White diamond: true p^* . Red circle, black stroke: maximiser of the expected log-likelihood. $E[L] / \max E[L]$ under $Y \sim N(\mu p^*, \Sigma(p^*))$. White diamond: true p^* . Red circle, black stroke: maximiser of the expected log-likelihood.

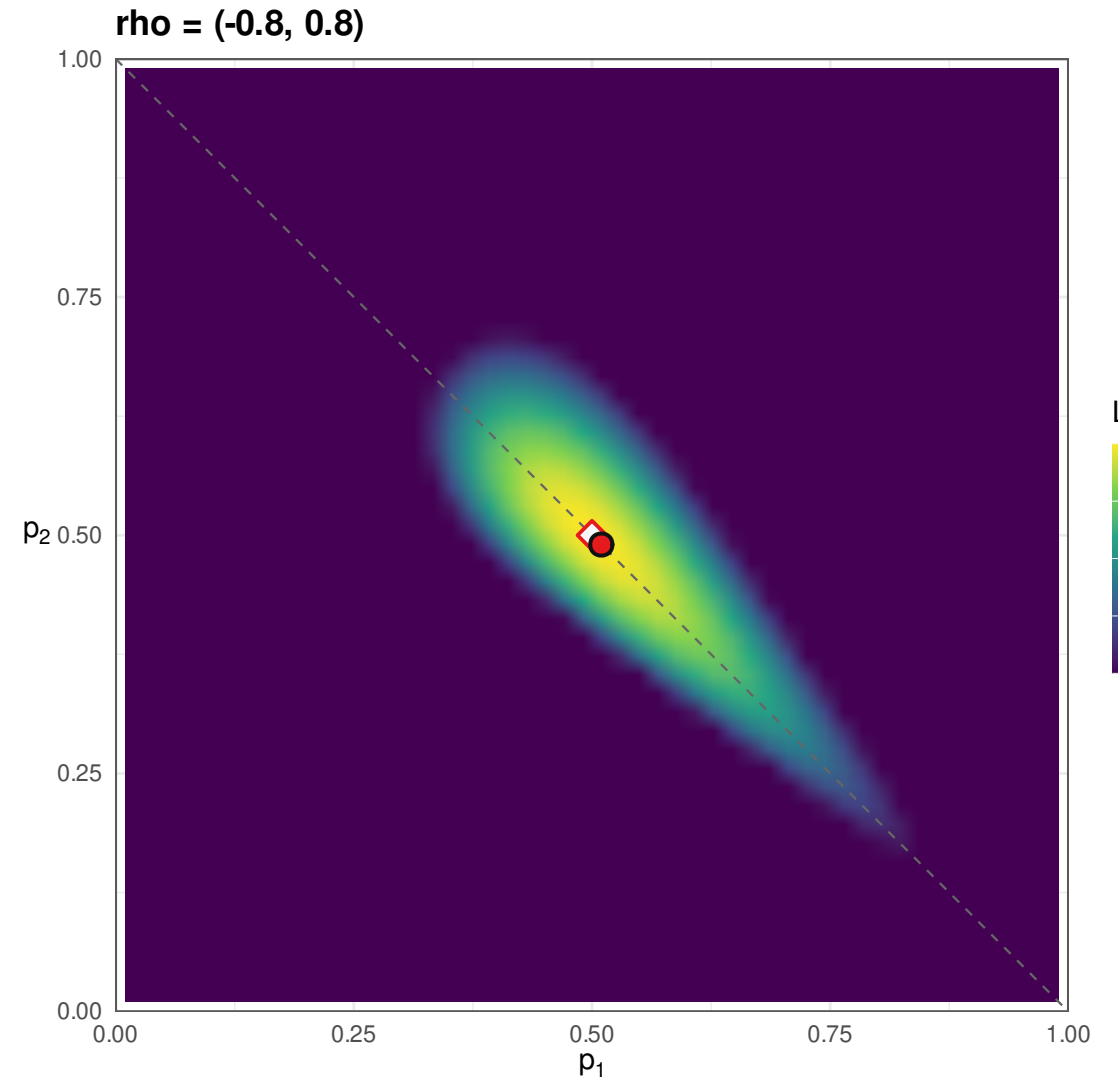

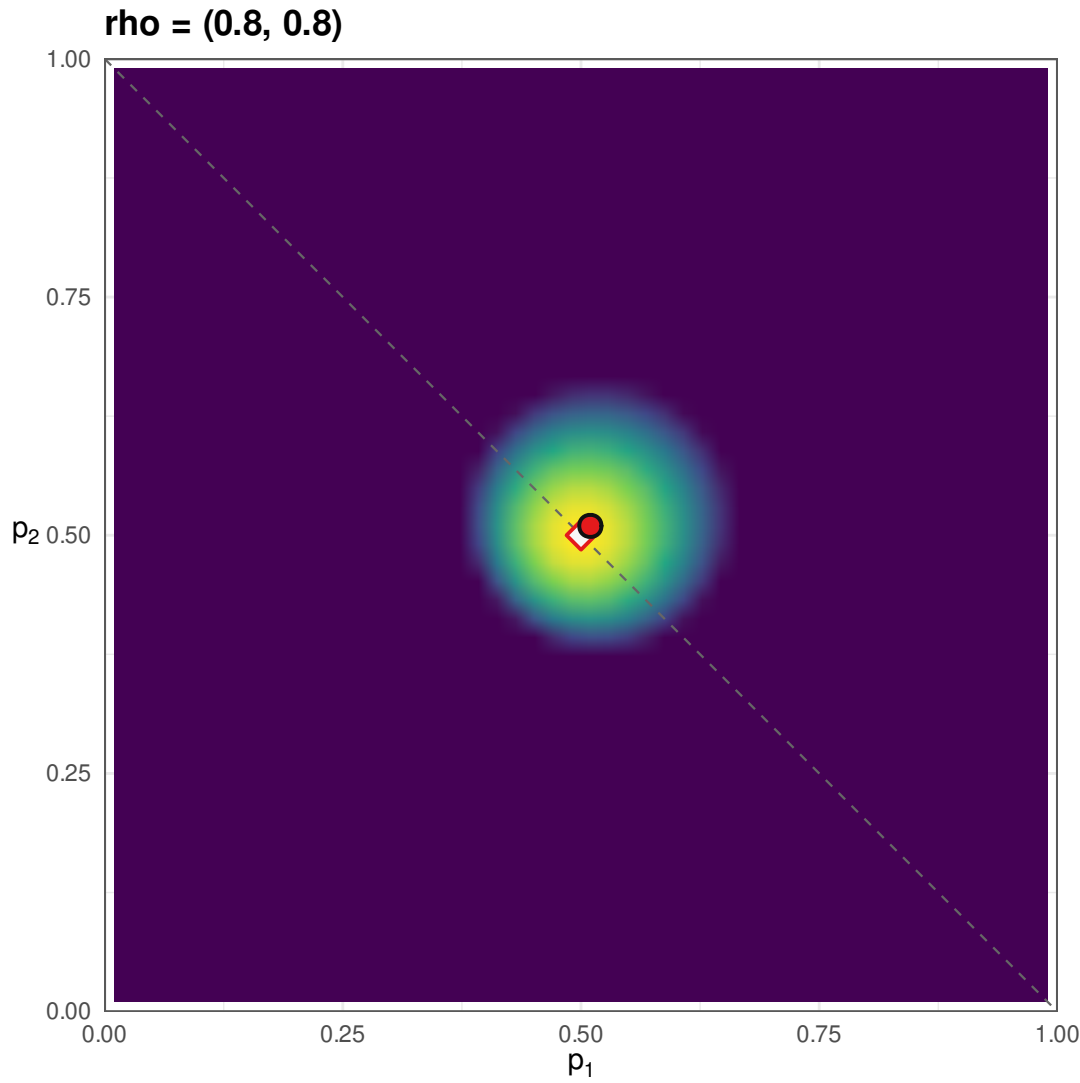

(μp^* , $\Sigma(p^*)$). White diamond: true p^* . Red circle, black stroke: maximiser of the expected log-likelihood. $E[L] / \max E[L]$ under $Y \sim N(\mu p^*, \Sigma(p^*))$. White diamond: true p^* . Red circle, black stroke: maximiser of the expected log-likelihood.

large_CLD / homoscedastic / balanced

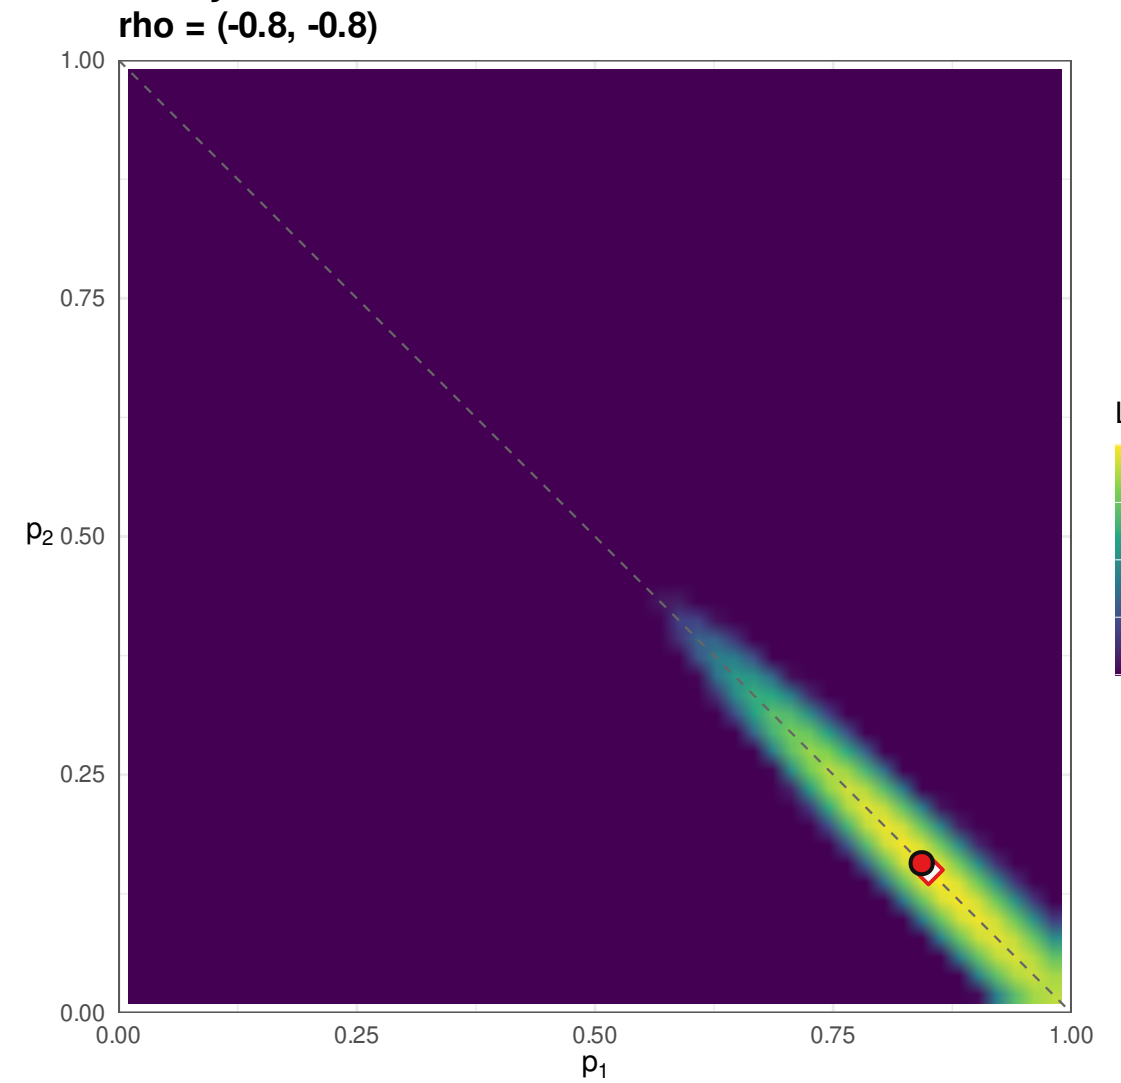

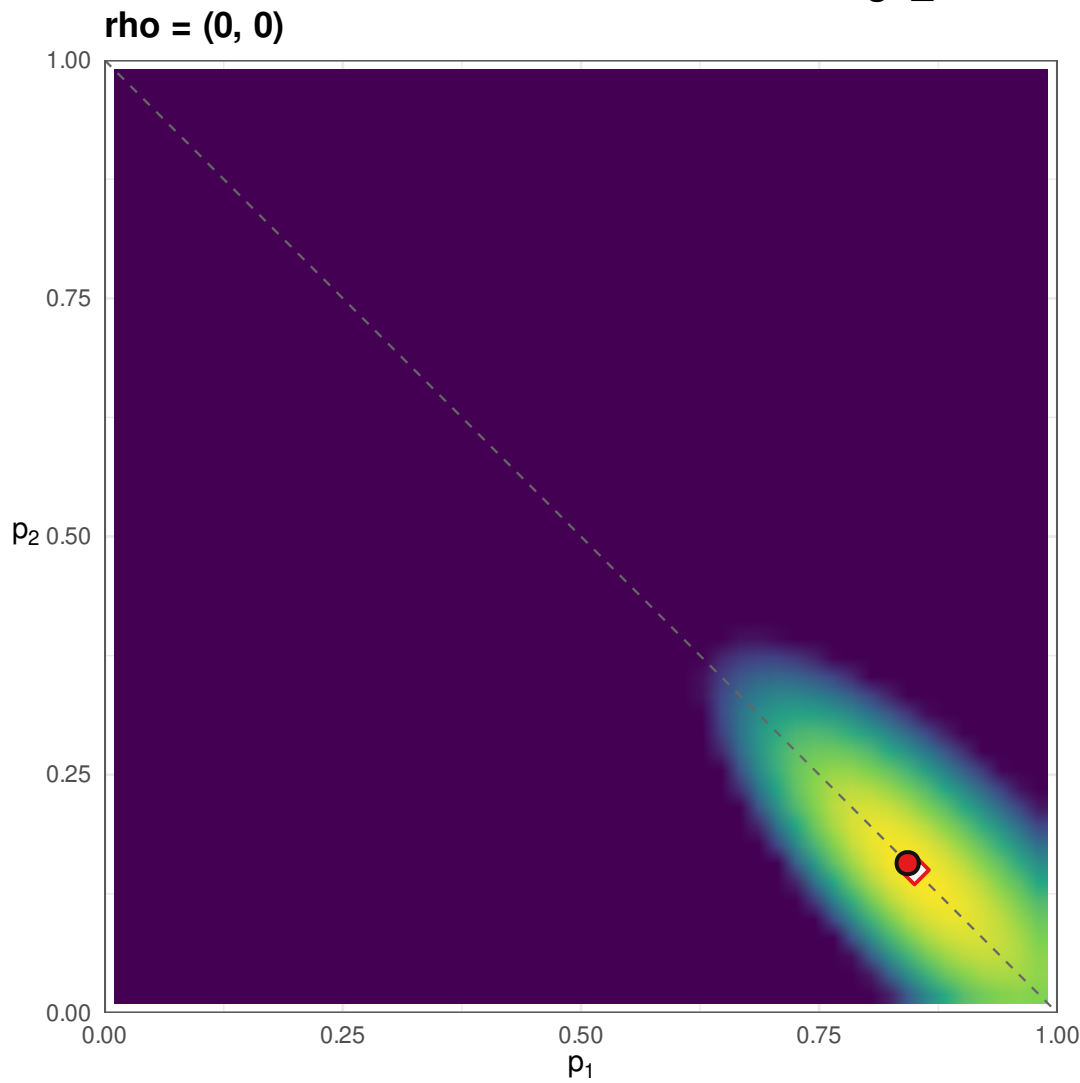

(μp^* , $\Sigma(p^*)$). White diamond: true p^* . Red circle, black stroke: maximiser of the expected log-likelihood. $E[L] / \max E[L]$ under $Y \sim N(\mu p^*, \Sigma(p^*))$. White diamond: true p^* . Red circle, black stroke: maximiser of the expected log-likelihood.

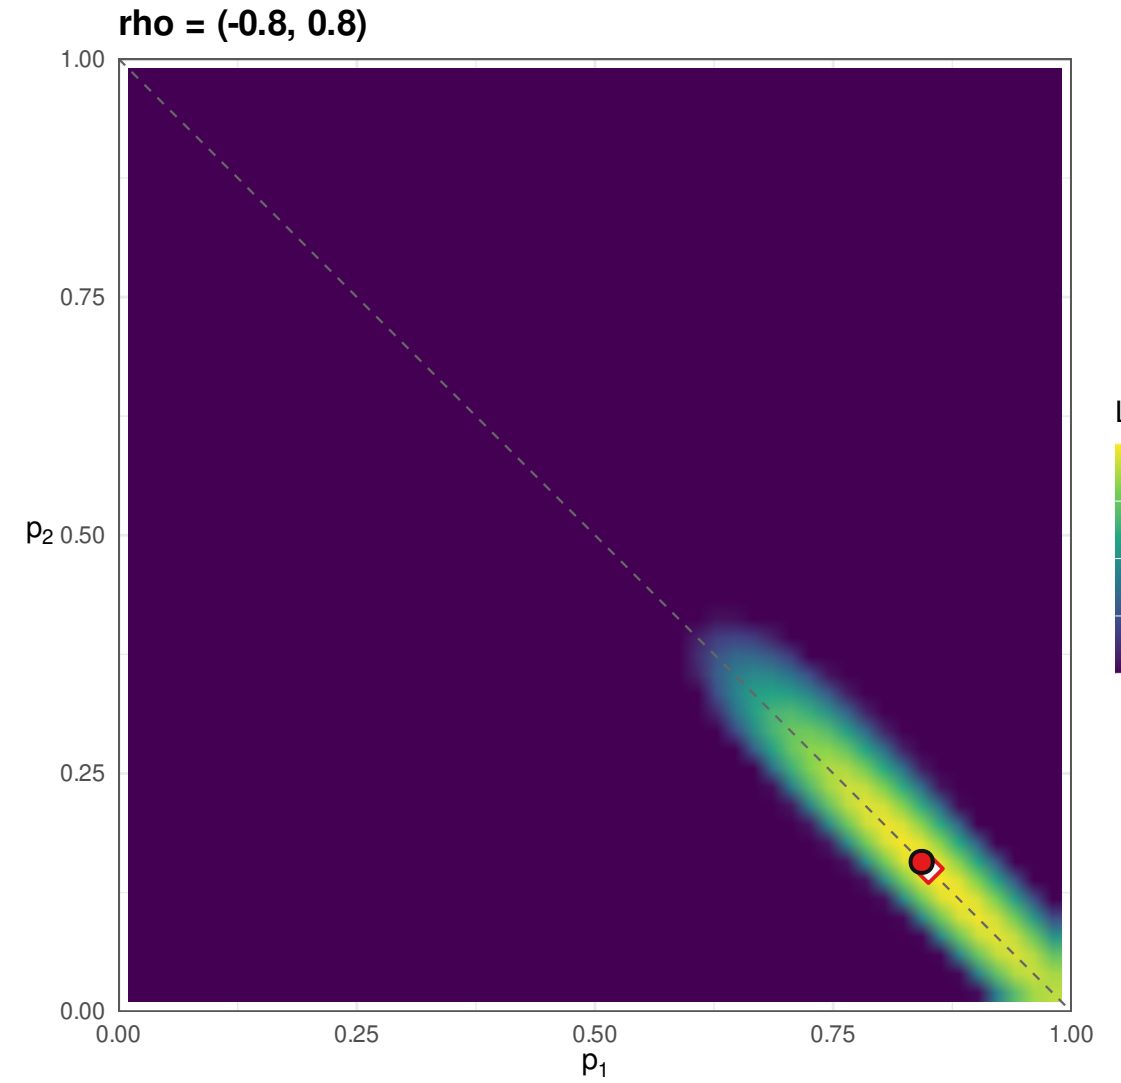

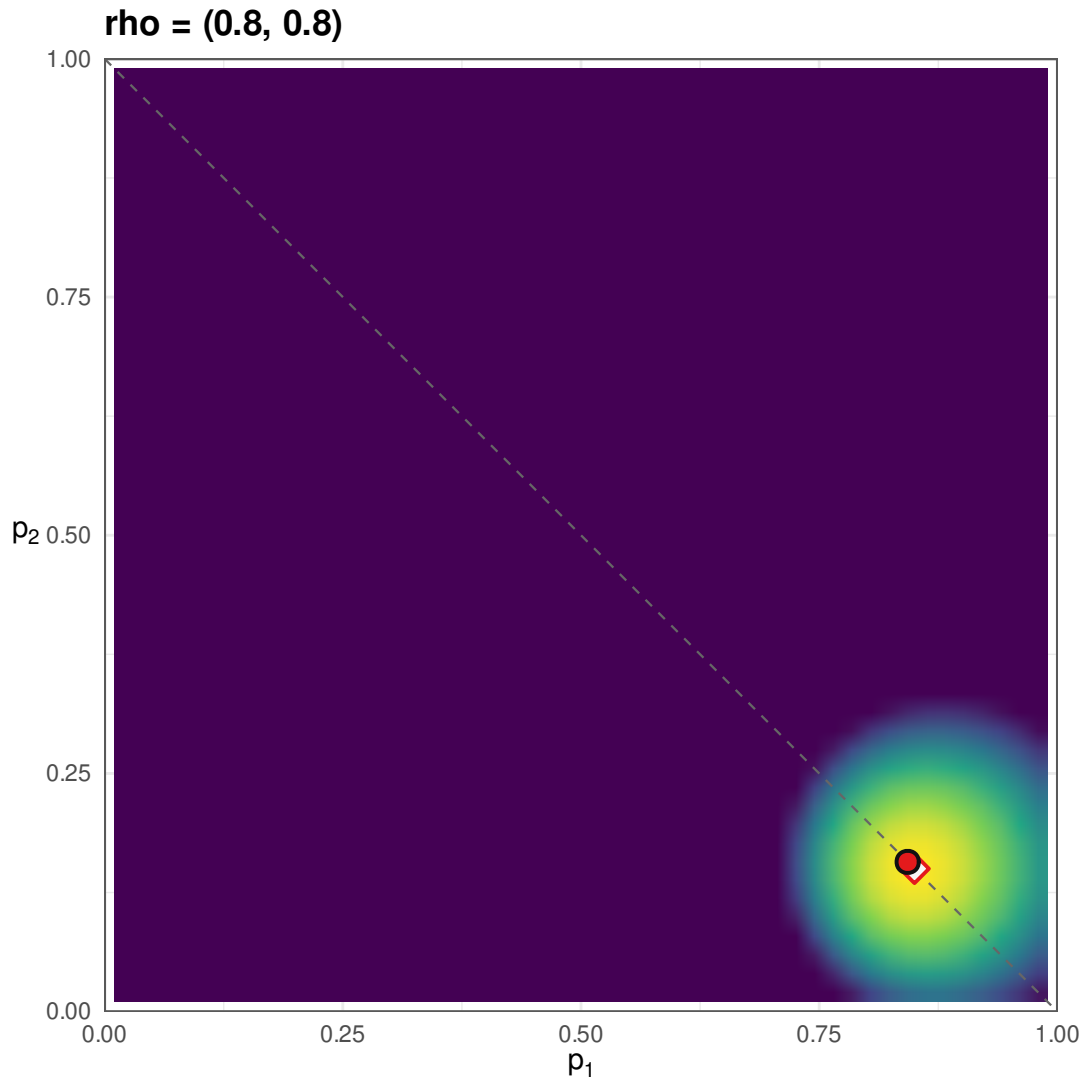

(μp^* , $\Sigma(p^*)$). White diamond: true p^* . Red circle, black stroke: maximiser of the expected log-likelihood. $E[L] / \max E[L]$ under $Y \sim N(\mu p^*, \Sigma(p^*))$. White diamond: true p^* . Red circle, black stroke: maximiser of the expected log-likelihood.

large_CLD / homoscedastic / moderately unbalanced

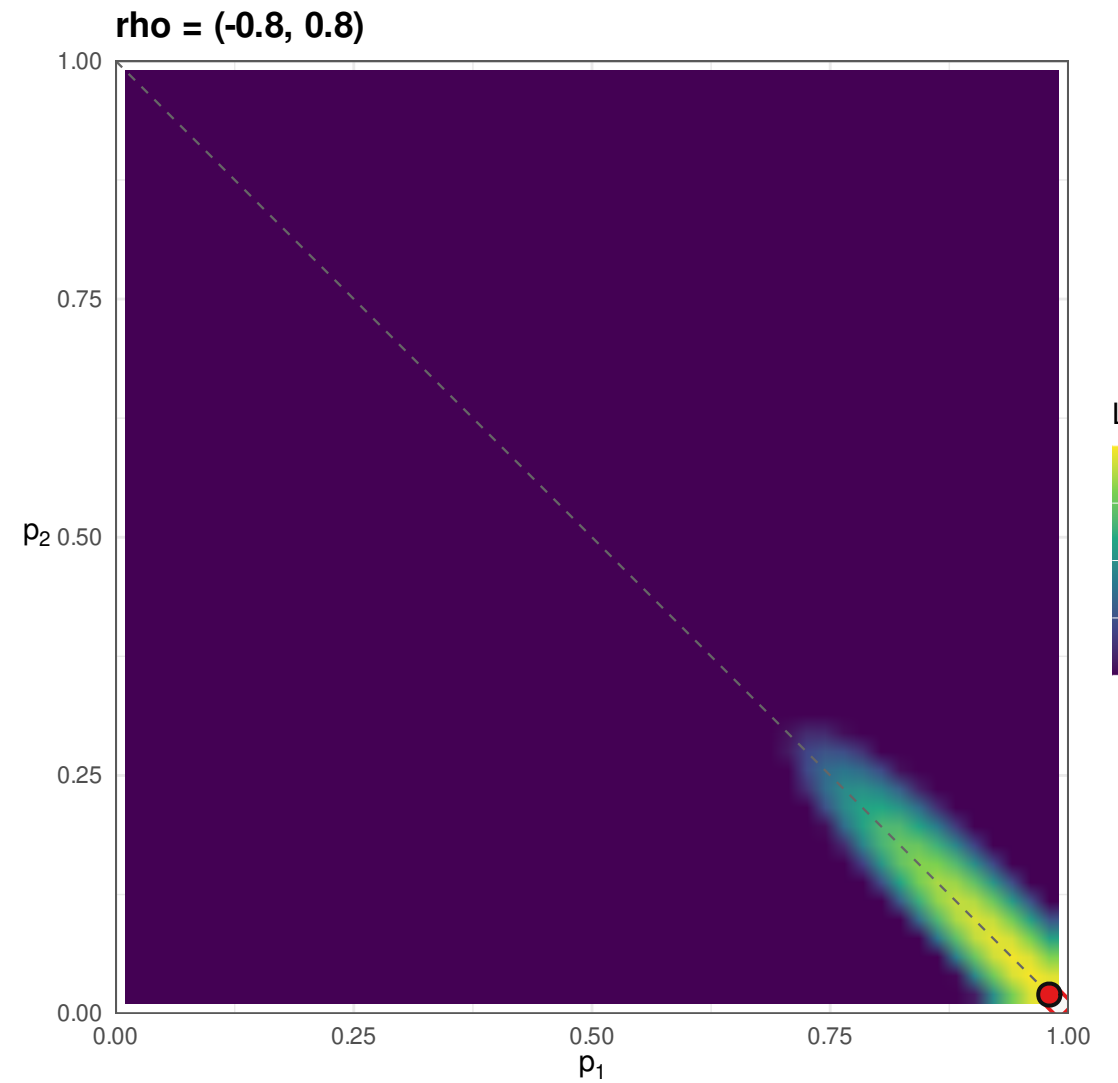

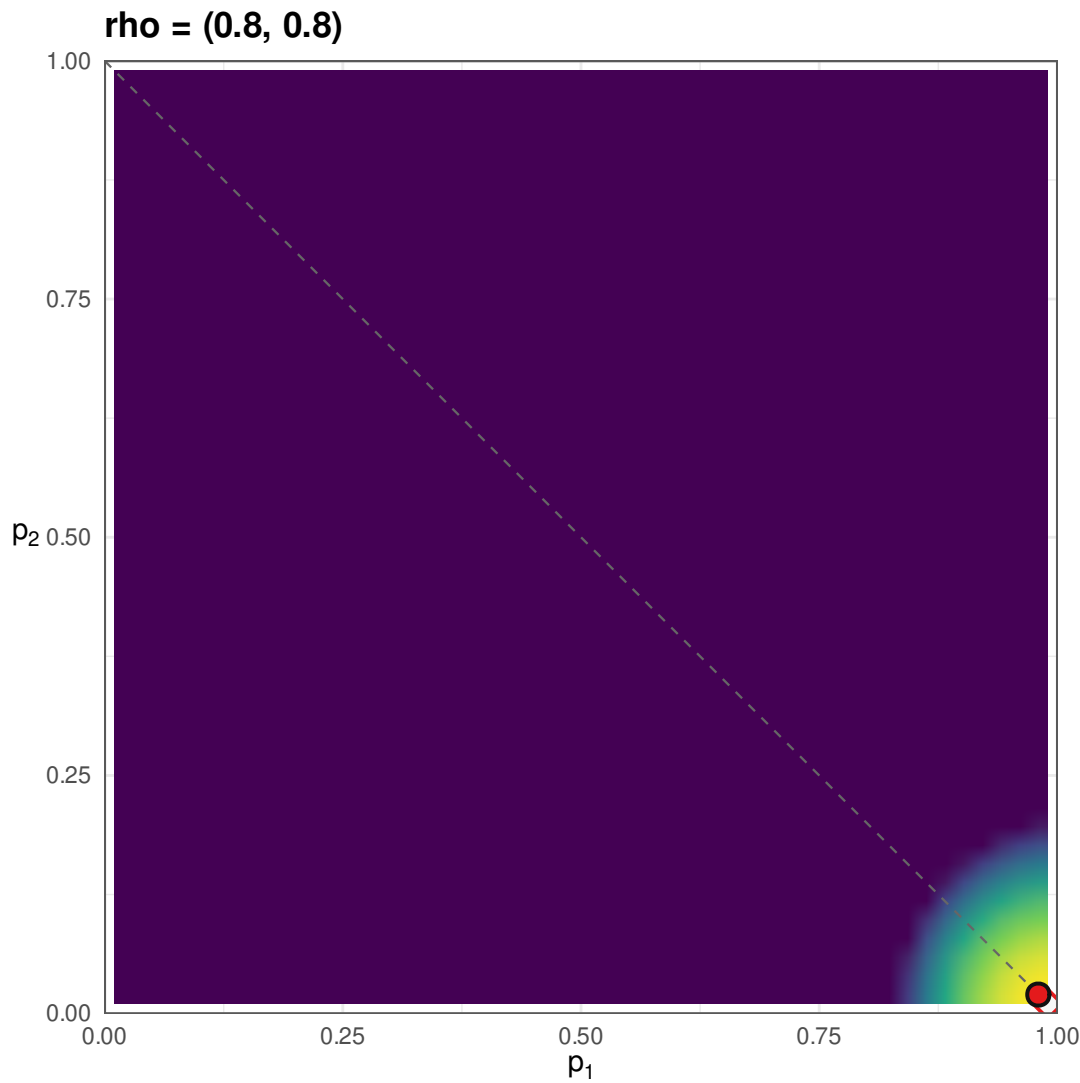

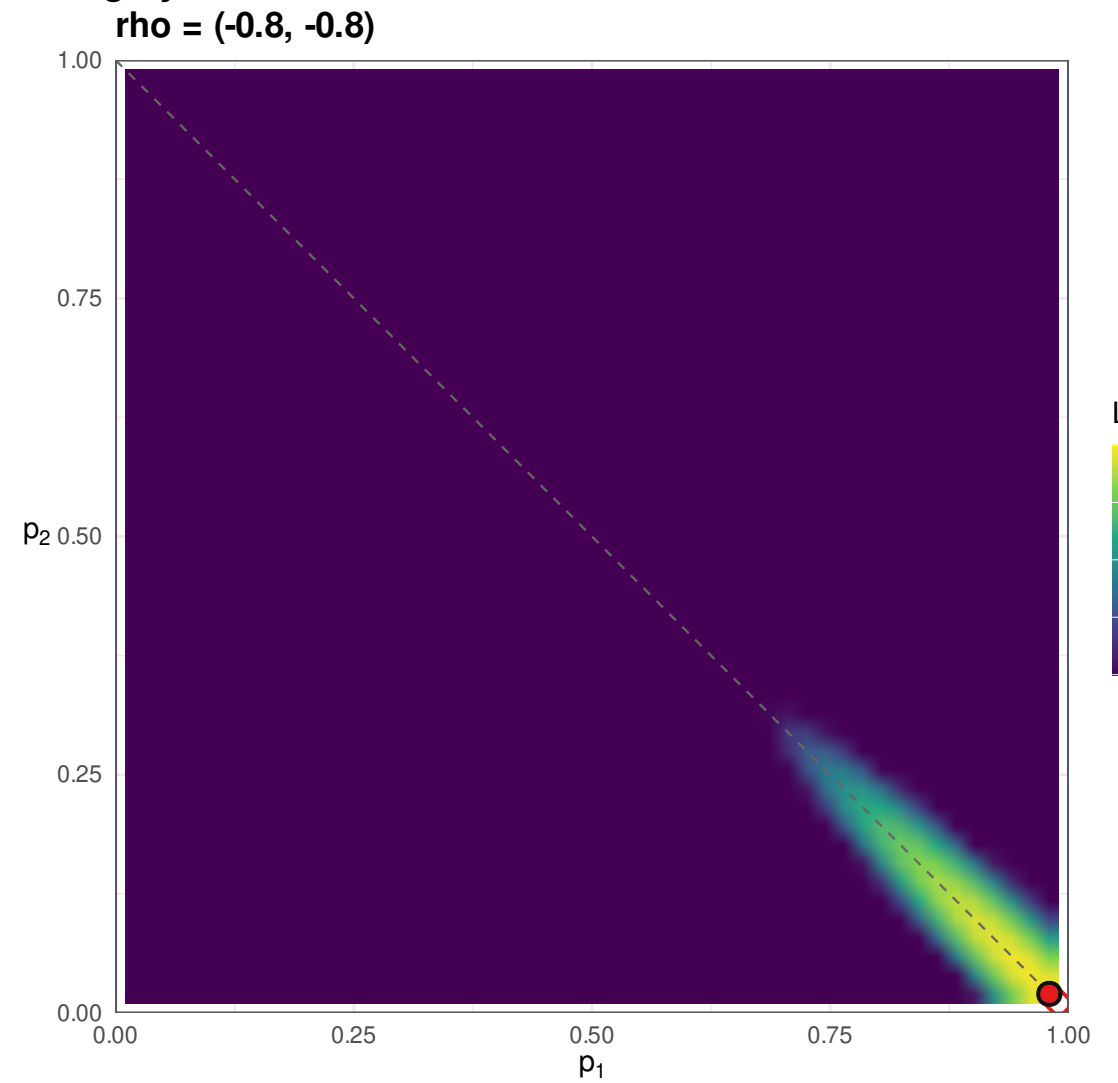

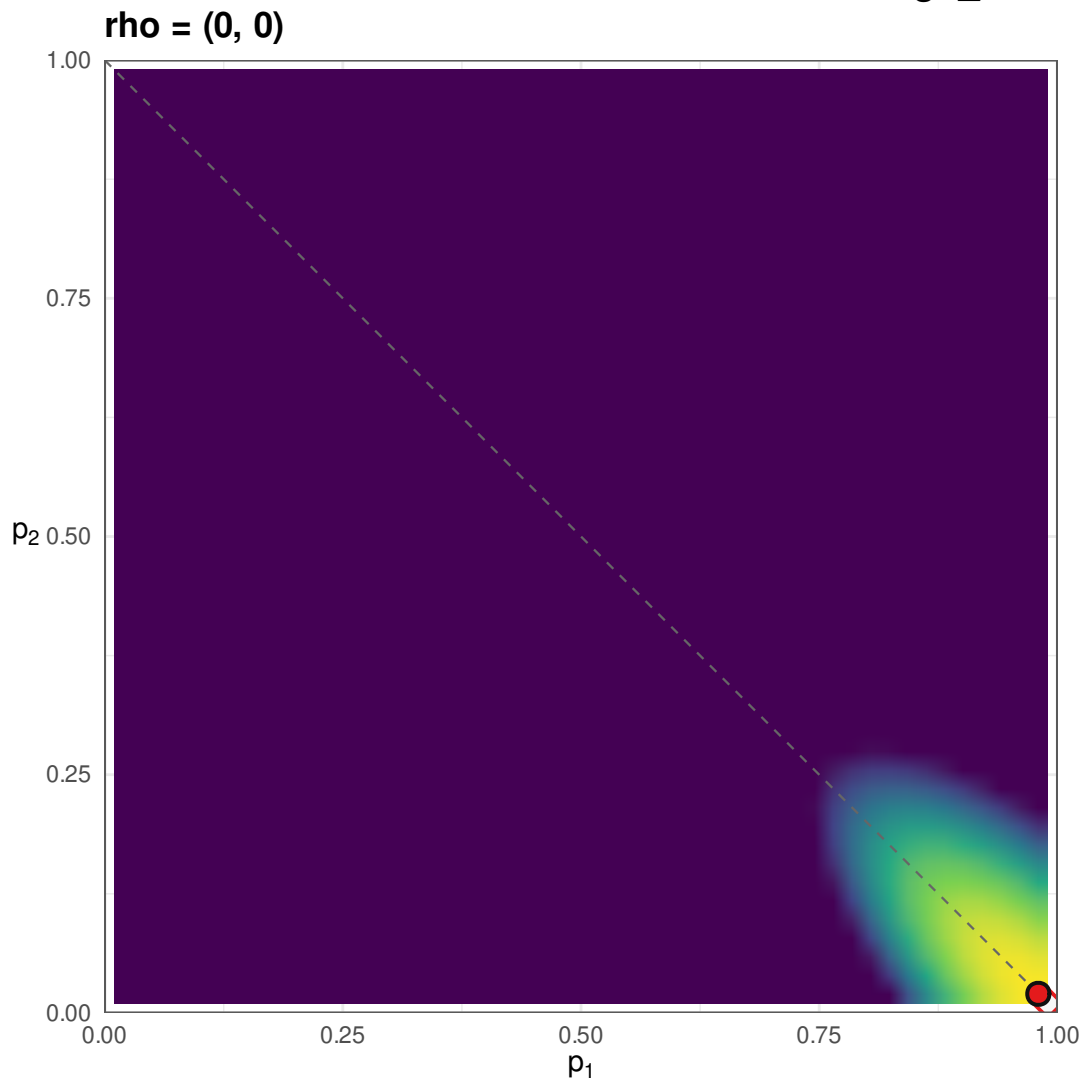

(μp^* , $\Sigma(p^*)$). White diamond: true p^* . Red circle, black stroke: maximiser of the expected log-likelihood. $E[L] / \max E[L]$ under $Y \sim N(\mu p^*, \Sigma(p^*))$. White diamond: true p^* . Red circle, black stroke: maximiser of the expected log-likelihood.

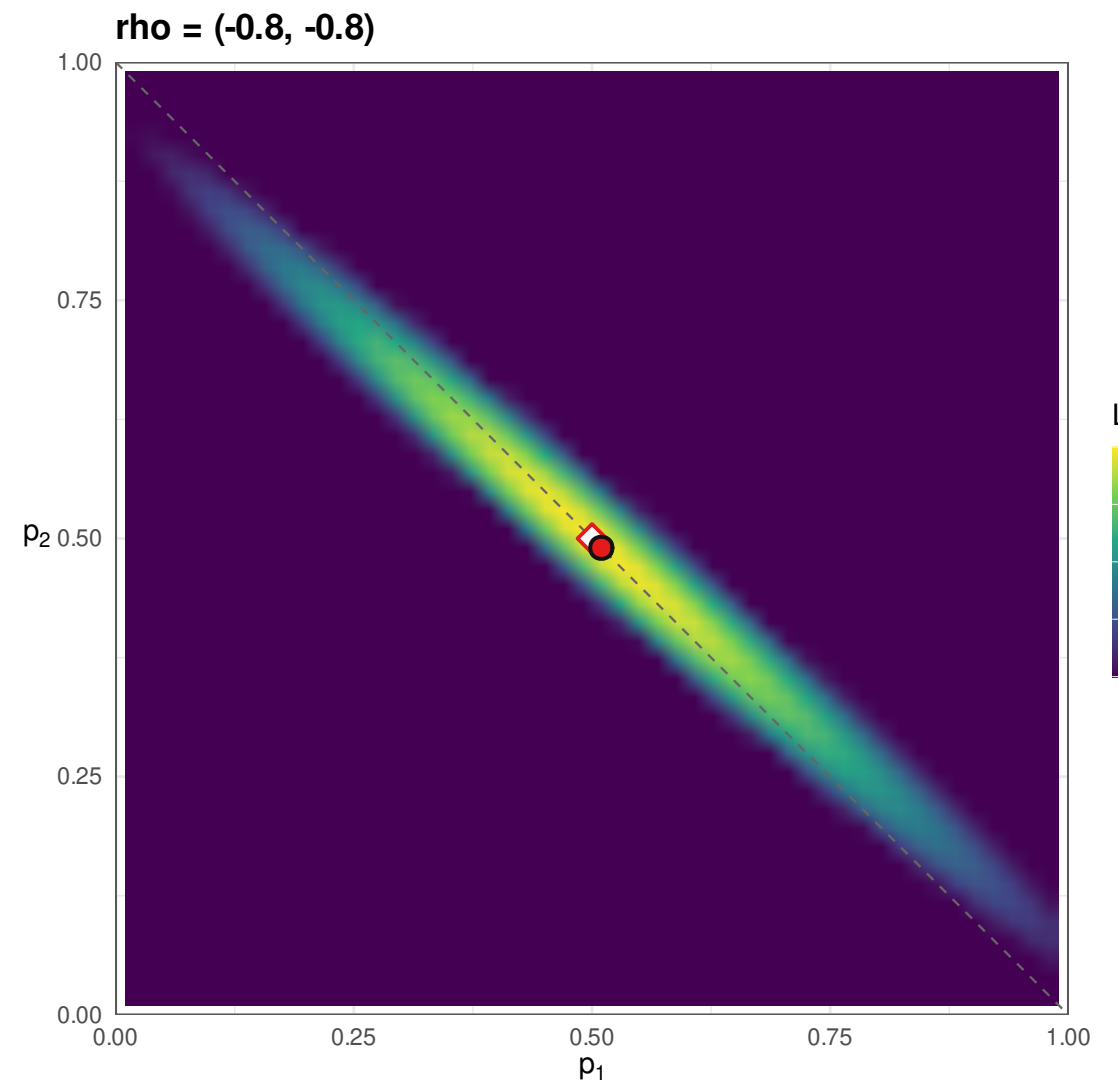

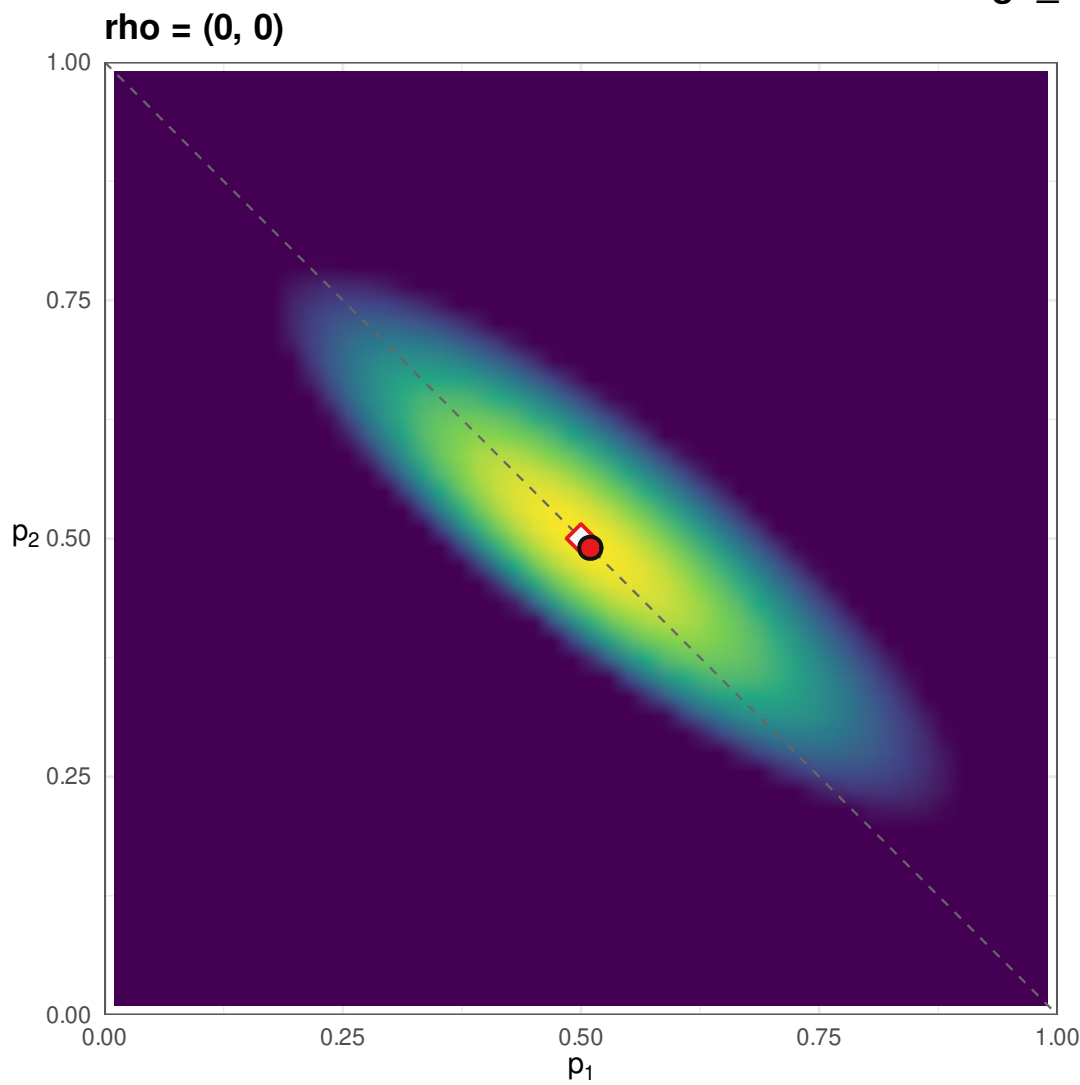

(μp^* , $\Sigma(p^*)$). White diamond: true p^* . Red circle, black stroke: maximiser of the expected log-likelihood. $E[L] / \max E[L]$ under $Y \sim N(\mu p^*, \Sigma(p^*))$. White diamond: true p^* . Red circle, black stroke: maximiser of the expected log-likelihood.

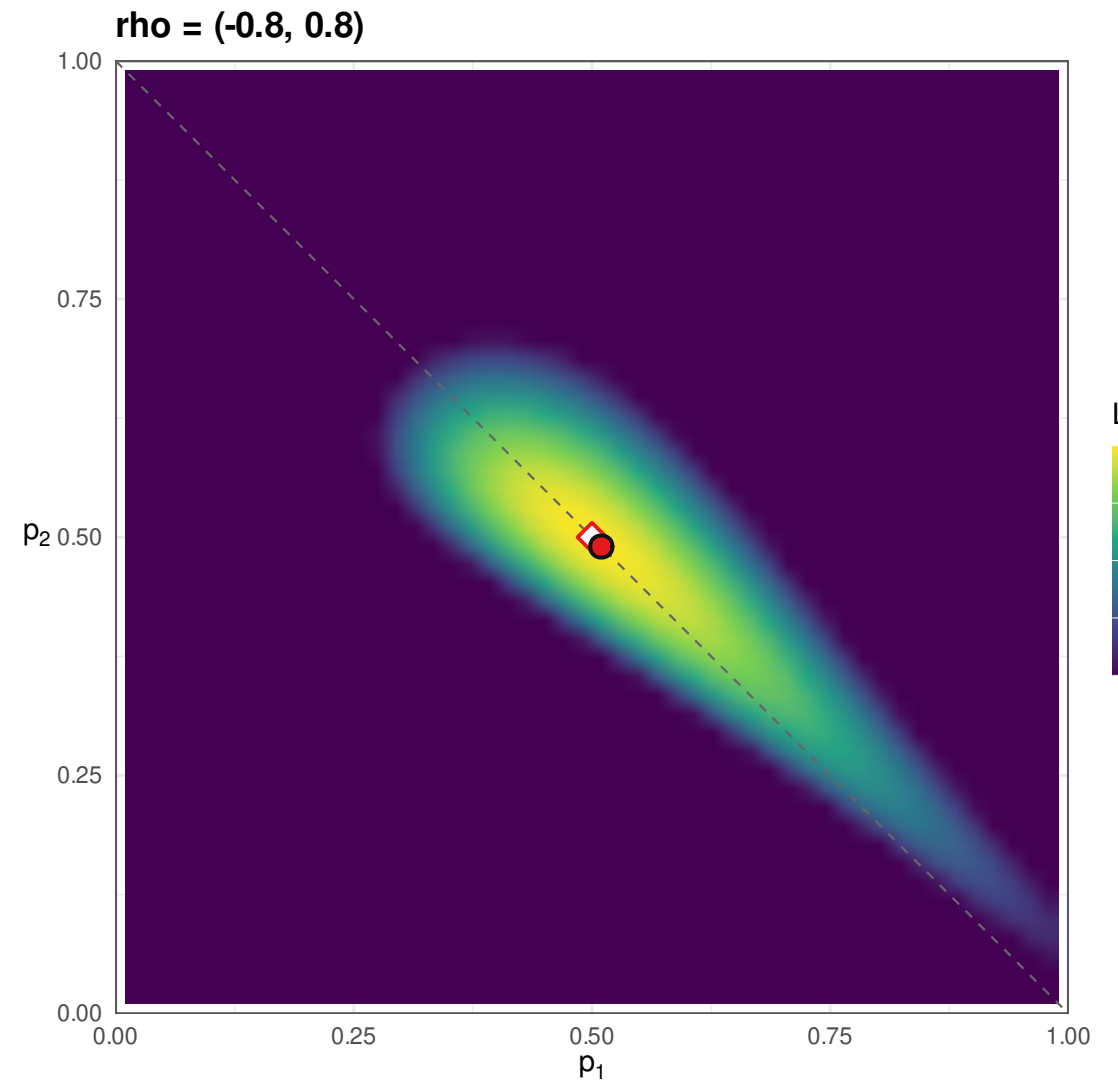

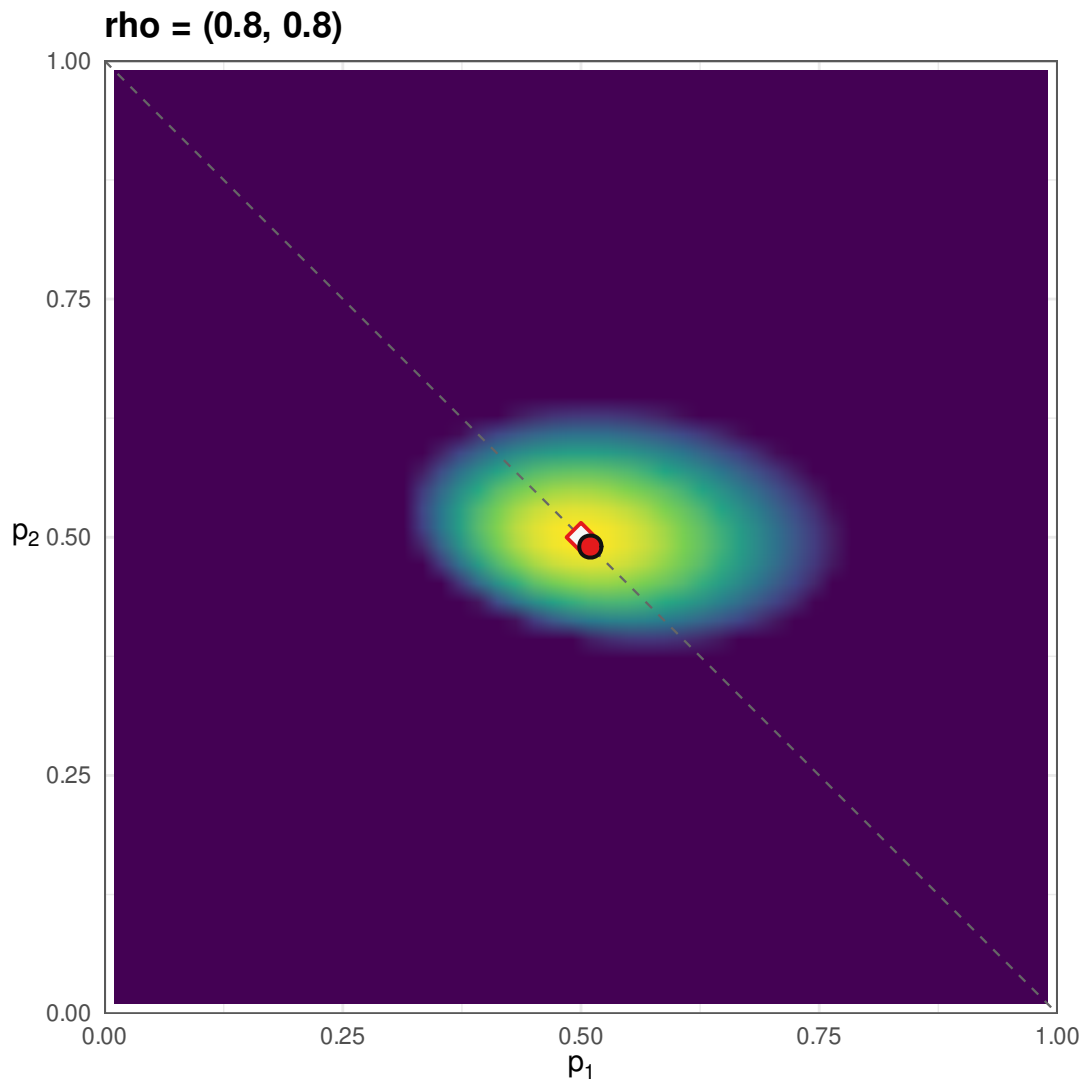

large_CLD / homoscedastic / highly unbalanced

large_CLD / heteroscedastic / balanced

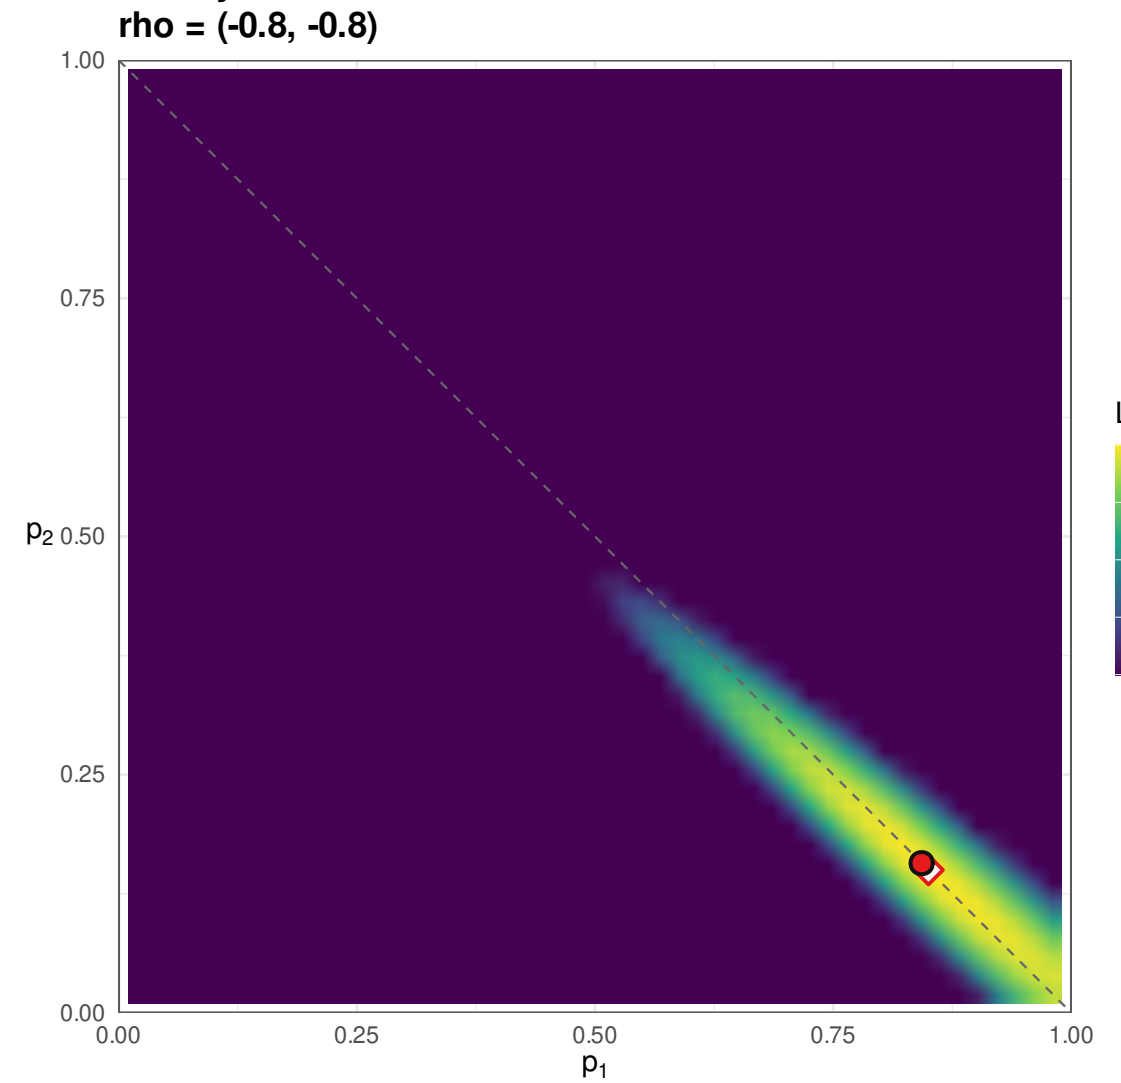

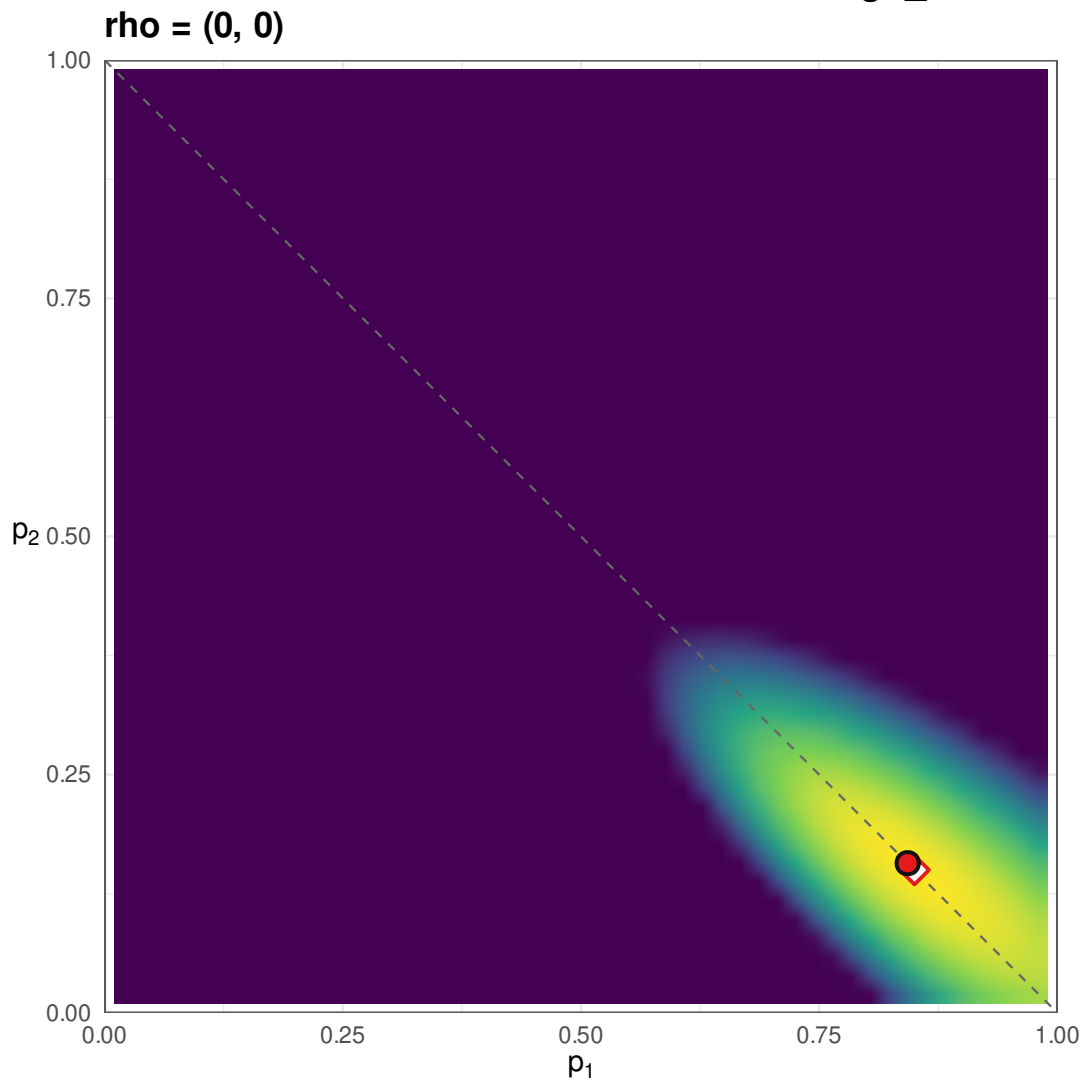

(μp^* , $\Sigma(p^*)$). White diamond: true p^* . Red circle, black stroke: maximiser of the expected log-likelihood. $E[L]$ under $Y \sim N(\mu p^*, \Sigma(p^*))$. White diamond: true p^* . Red circle, black stroke: maximiser of the expected log-likelihood.

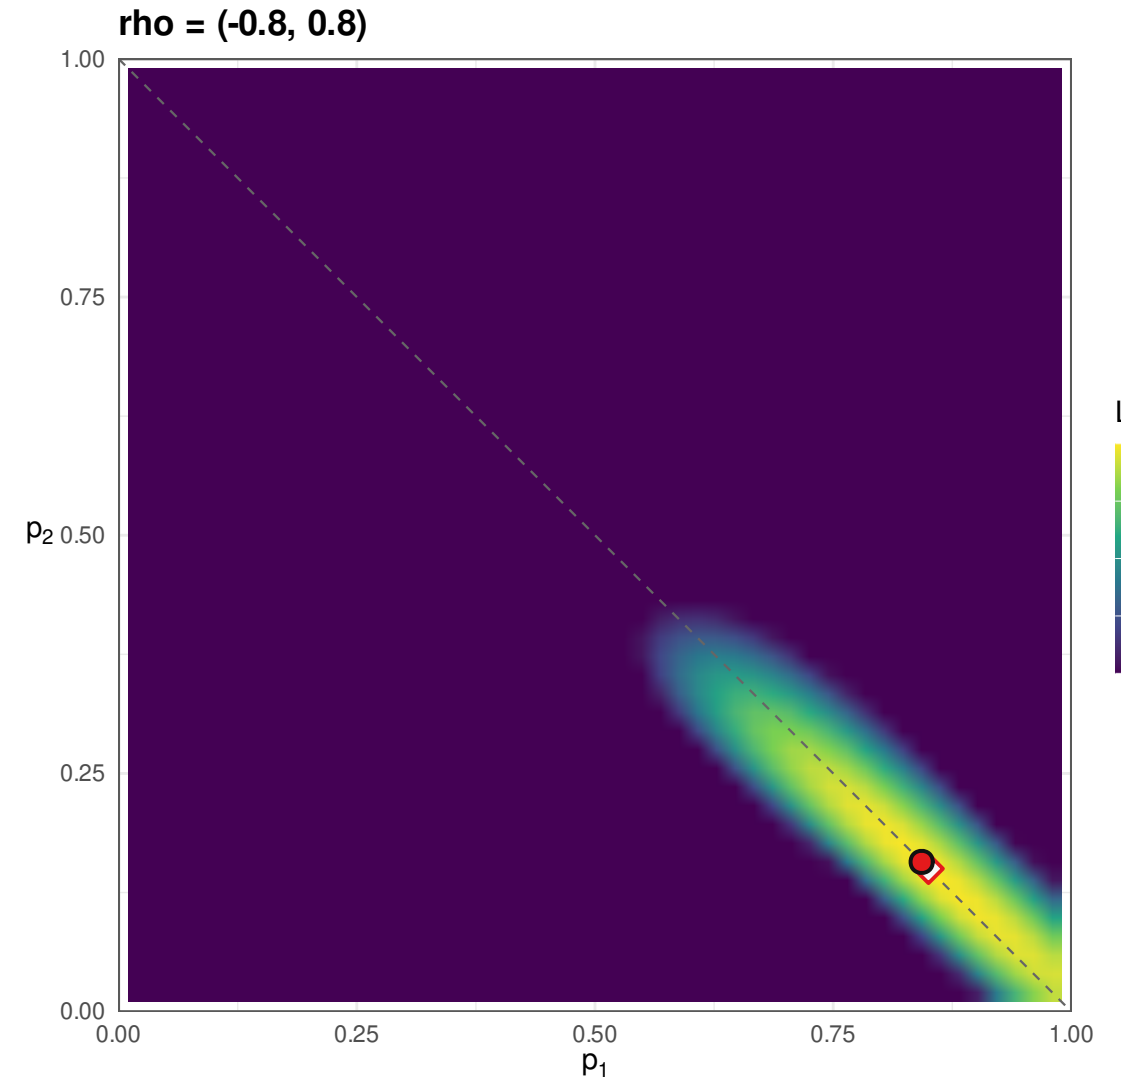

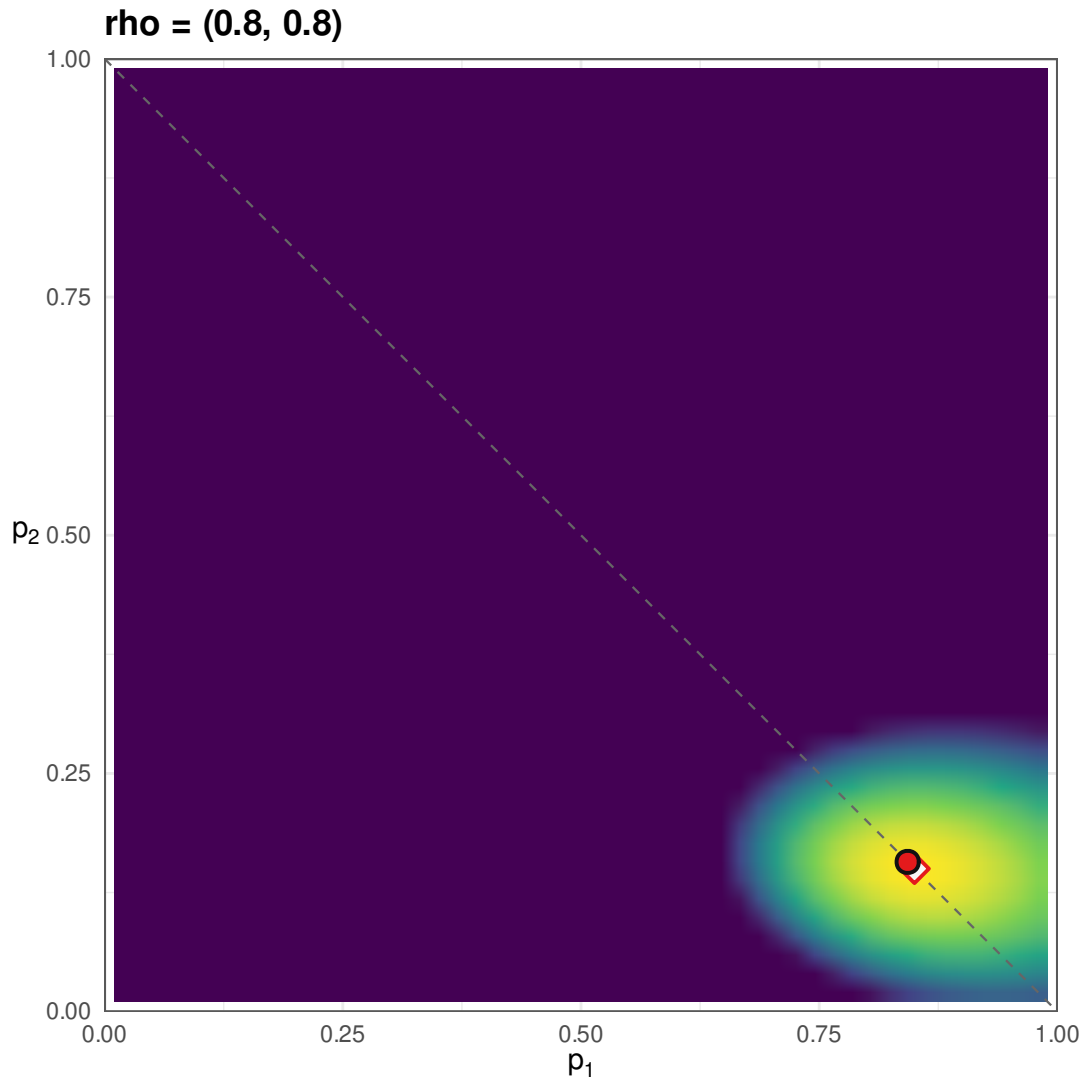

(μp^* , $\Sigma(p^*)$). White diamond: true p^* . Red circle, black stroke: maximiser of the expected log-likelihood. $E[L]$ under $Y \sim N(\mu p^*, \Sigma(p^*))$. White diamond: true p^* . Red circle, black stroke: maximiser of the expected log-likelihood.

large_CLD / heteroscedastic / moderately unbalanced

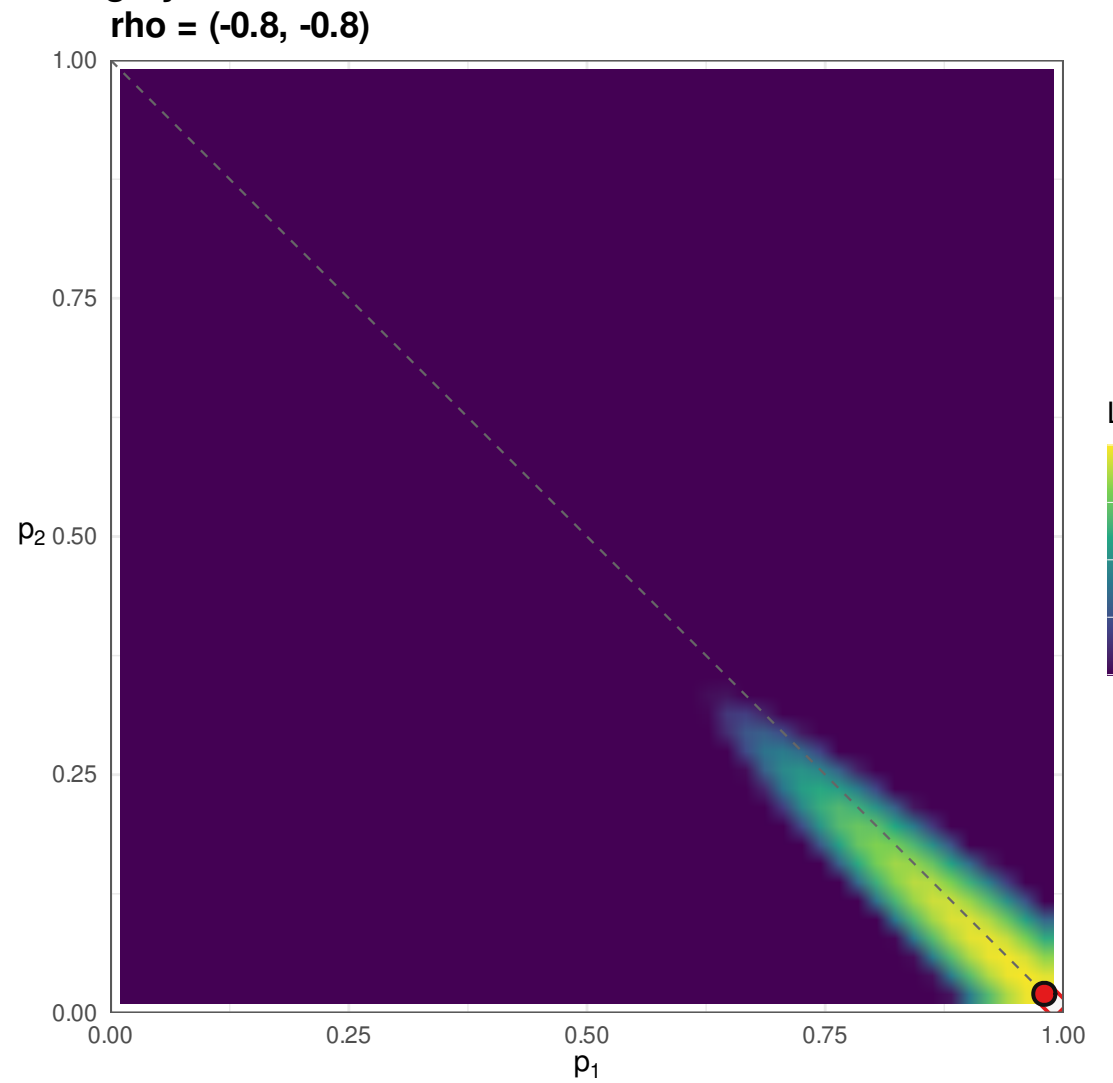

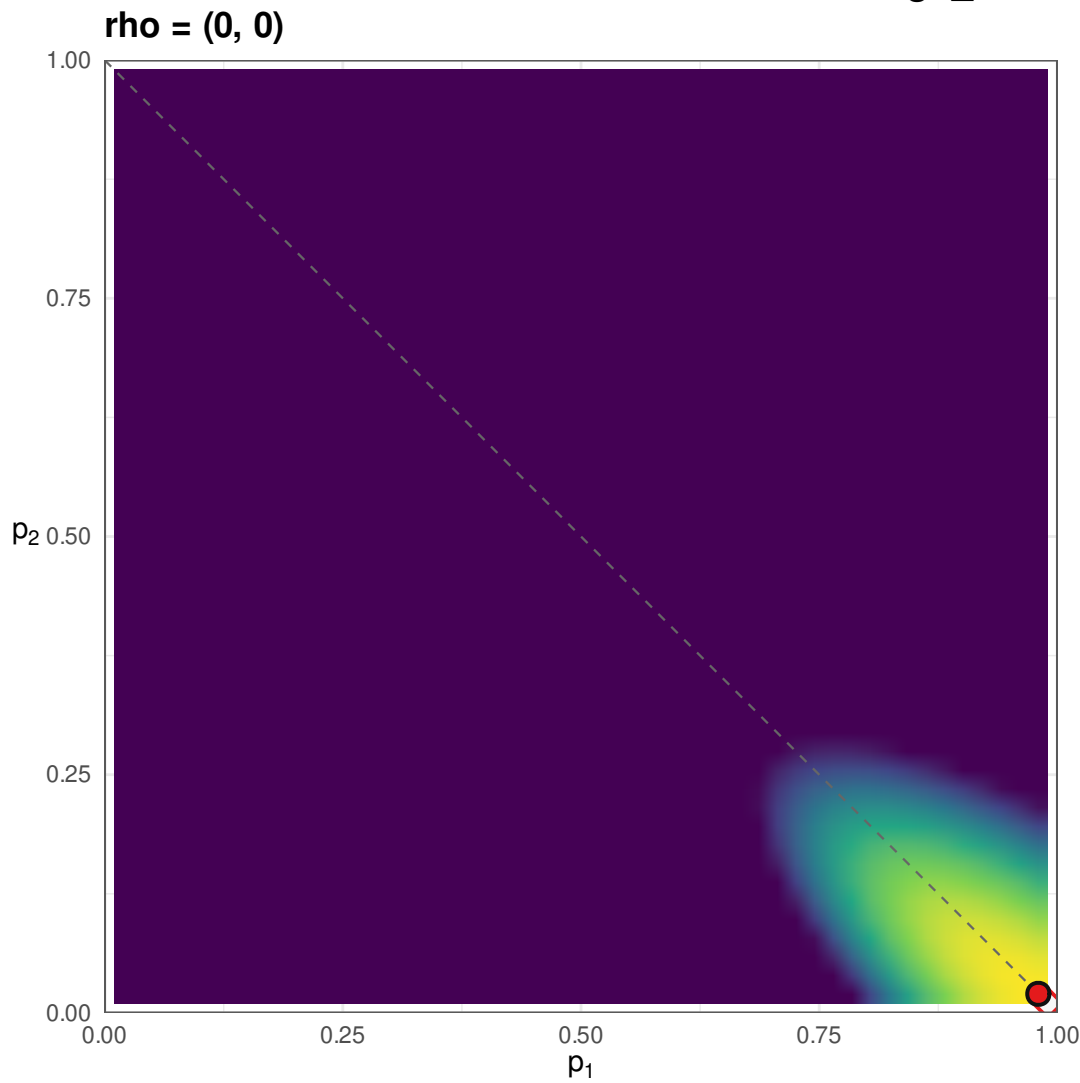

(μp^* , $\Sigma(p^*)$). White diamond: true p^* . Red circle, black stroke: maximiser of the expected log-likelihood. $E[L] / \max E[L]$ under $Y \sim N(\mu p^*, \Sigma(p^*))$. White diamond: true p^* . Red circle, black stroke: maximiser of the expected log-likelihood.

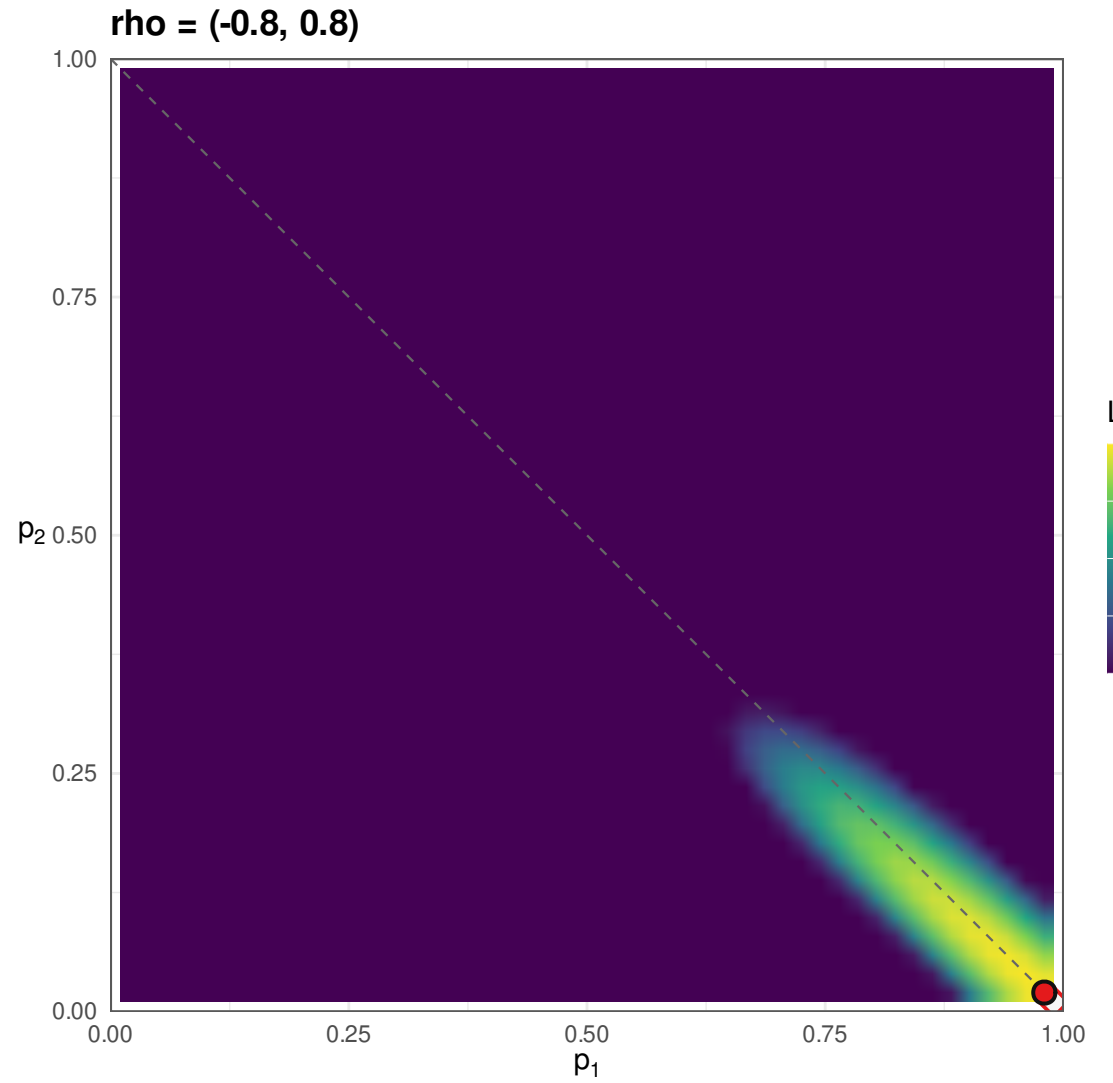

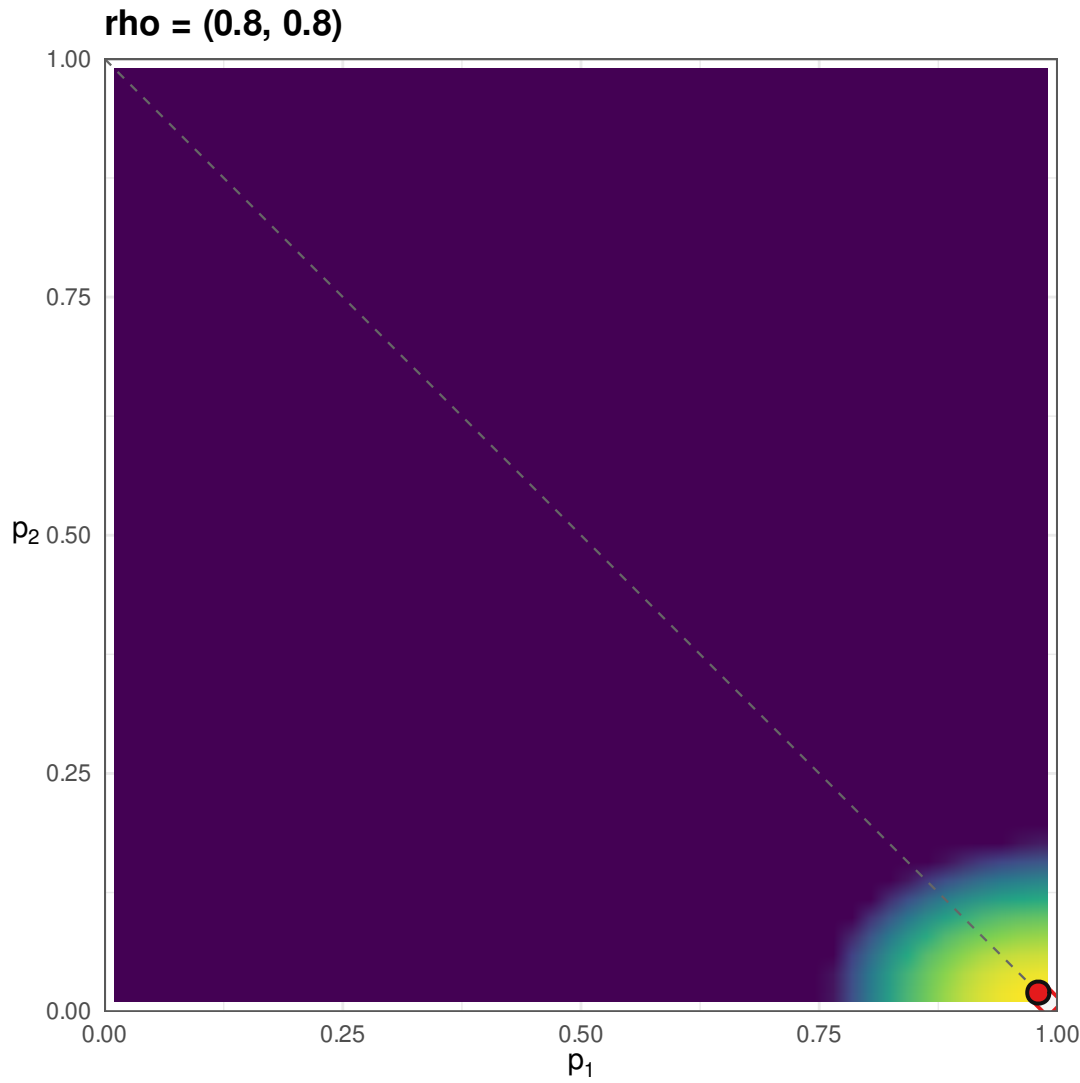

(μp^* , $\Sigma(p^*)$). White diamond: true p^* . Red circle, black stroke: maximiser of the expected log-likelihood. $E[L] / \max E[L]$ under $Y \sim N(\mu p^*, \Sigma(p^*))$. White diamond: true p^* . Red circle, black stroke: maximiser of the expected log-likelihood.

large_CLD / heteroscedastic / highly unbalanced

($\mu p^*, \text{Sigma}(p^*)$). White diamond: true p^* . Red circle, black stroke: maximiser of the expected log-likelihood. $E[L] / \max E[L]$ under $Y \sim N(\mu p^*, \text{Sigma}(p^*))$. White diamond: true p^* . Red circle, black stroke: maximiser of the expected log-likelihood.

($\mu p^*, \text{Sigma}(p^*)$). White diamond: true p^* . Red circle, black stroke: maximiser of the expected log-likelihood. $E[L] / \max E[L]$ under $Y \sim N(\mu p^*, \text{Sigma}(p^*))$. White diamond: true p^* . Red circle, black stroke: maximiser of the expected log-likelihood.
