

balanced / moderate OVL

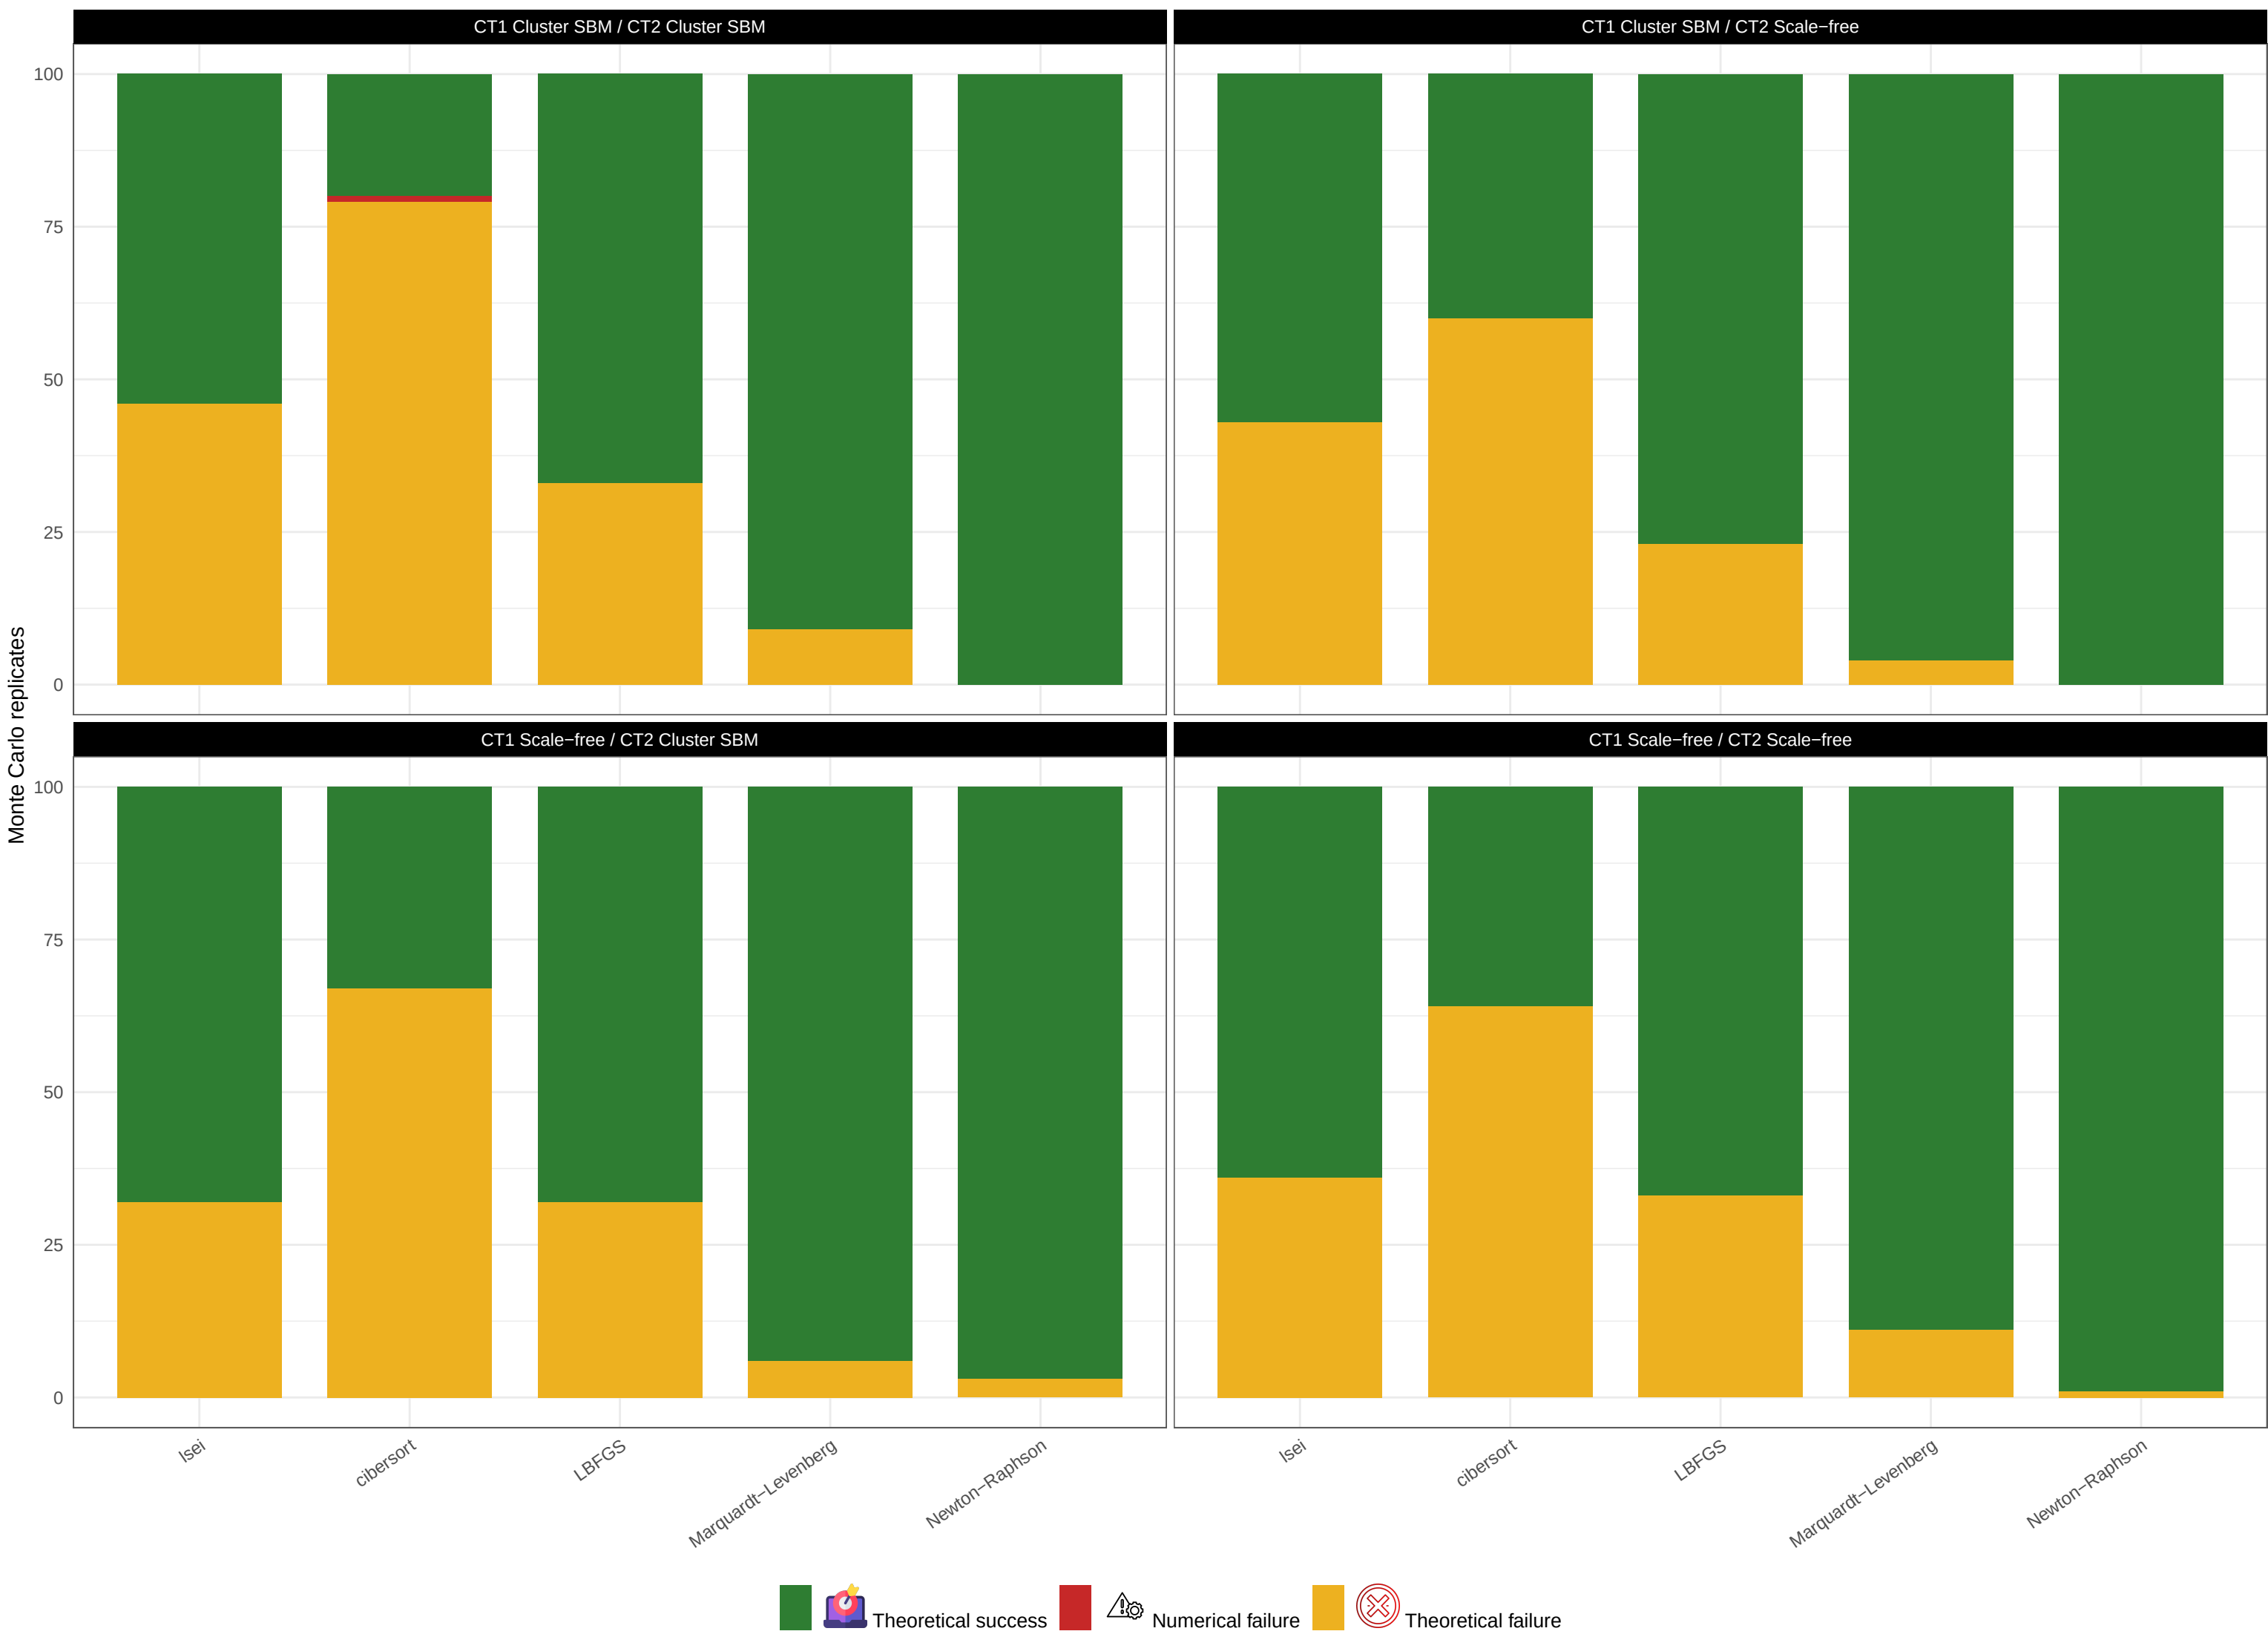

Disjoint partition: theoretical success; numerical failure (nested in theoretical failure); theoretical failure with a finite simplex. Icons: green success, red numerical failure, yellow theoretical failure.

balanced / high OVL

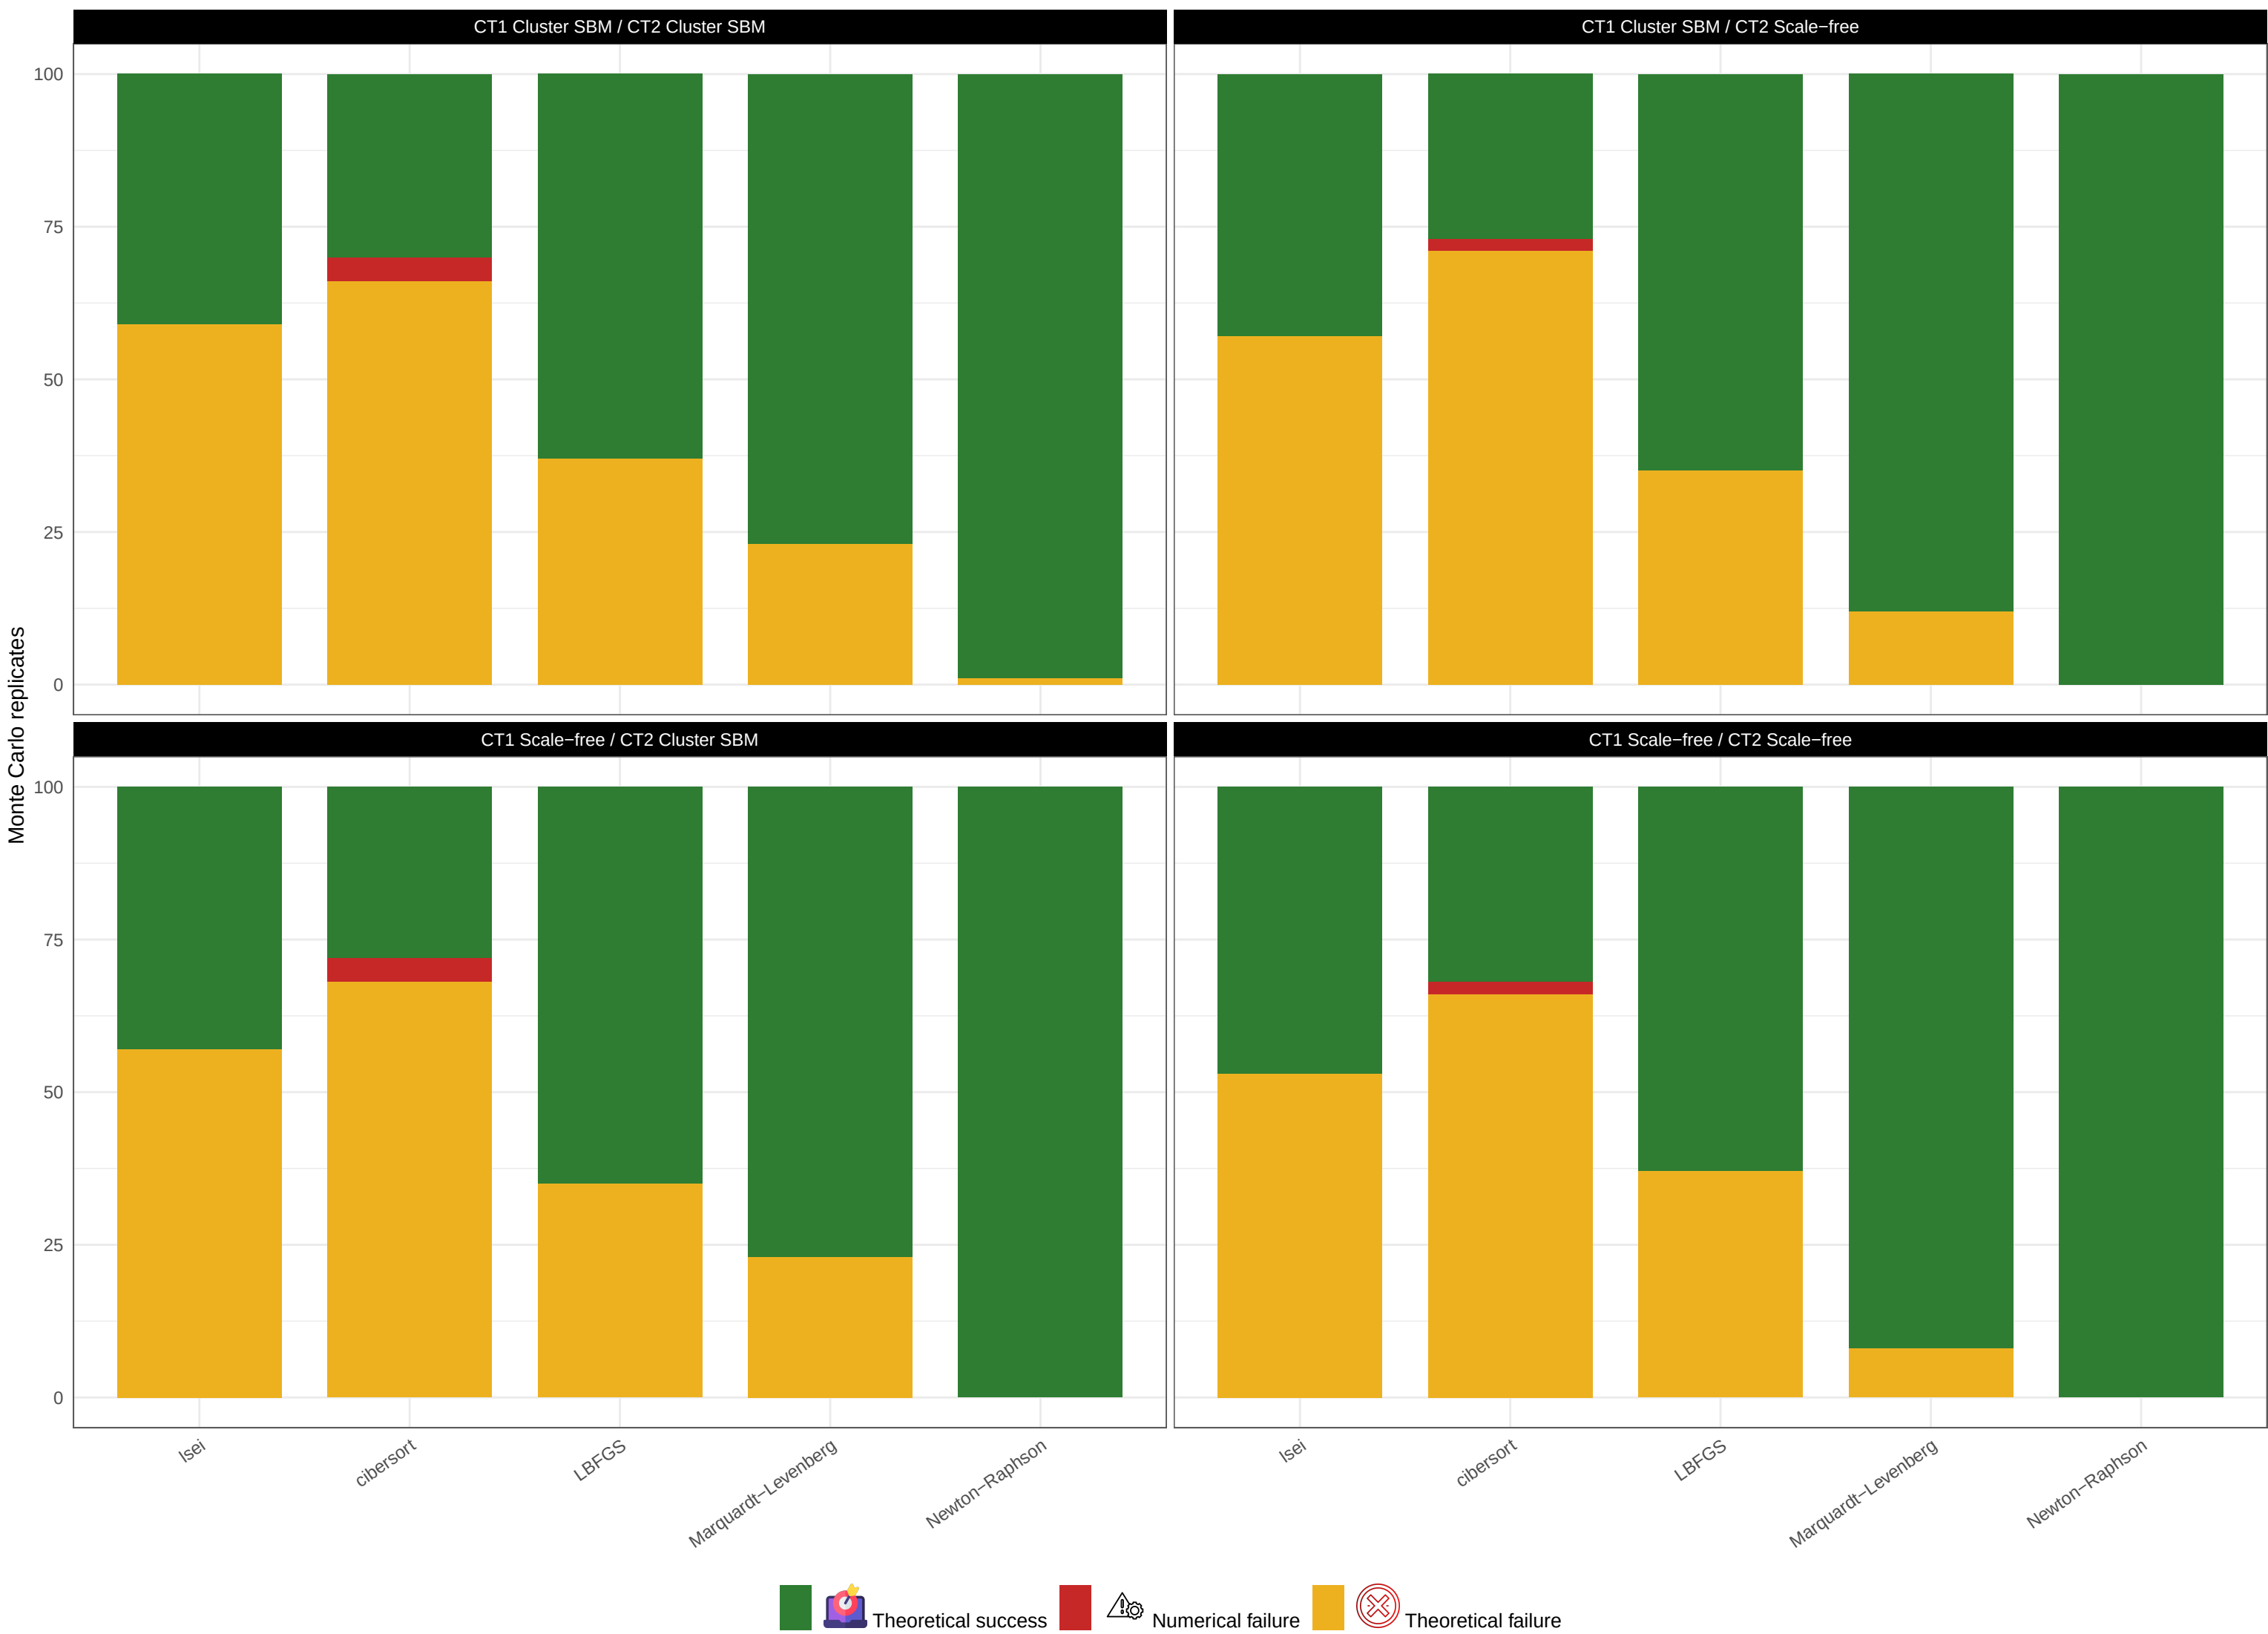

Disjoint partition: theoretical success; numerical failure (nested in theoretical failure); theoretical failure with a finite simplex. Icons: green success, red numerical failure, yellow theoretical failure.

moderately unbalanced / low OVL

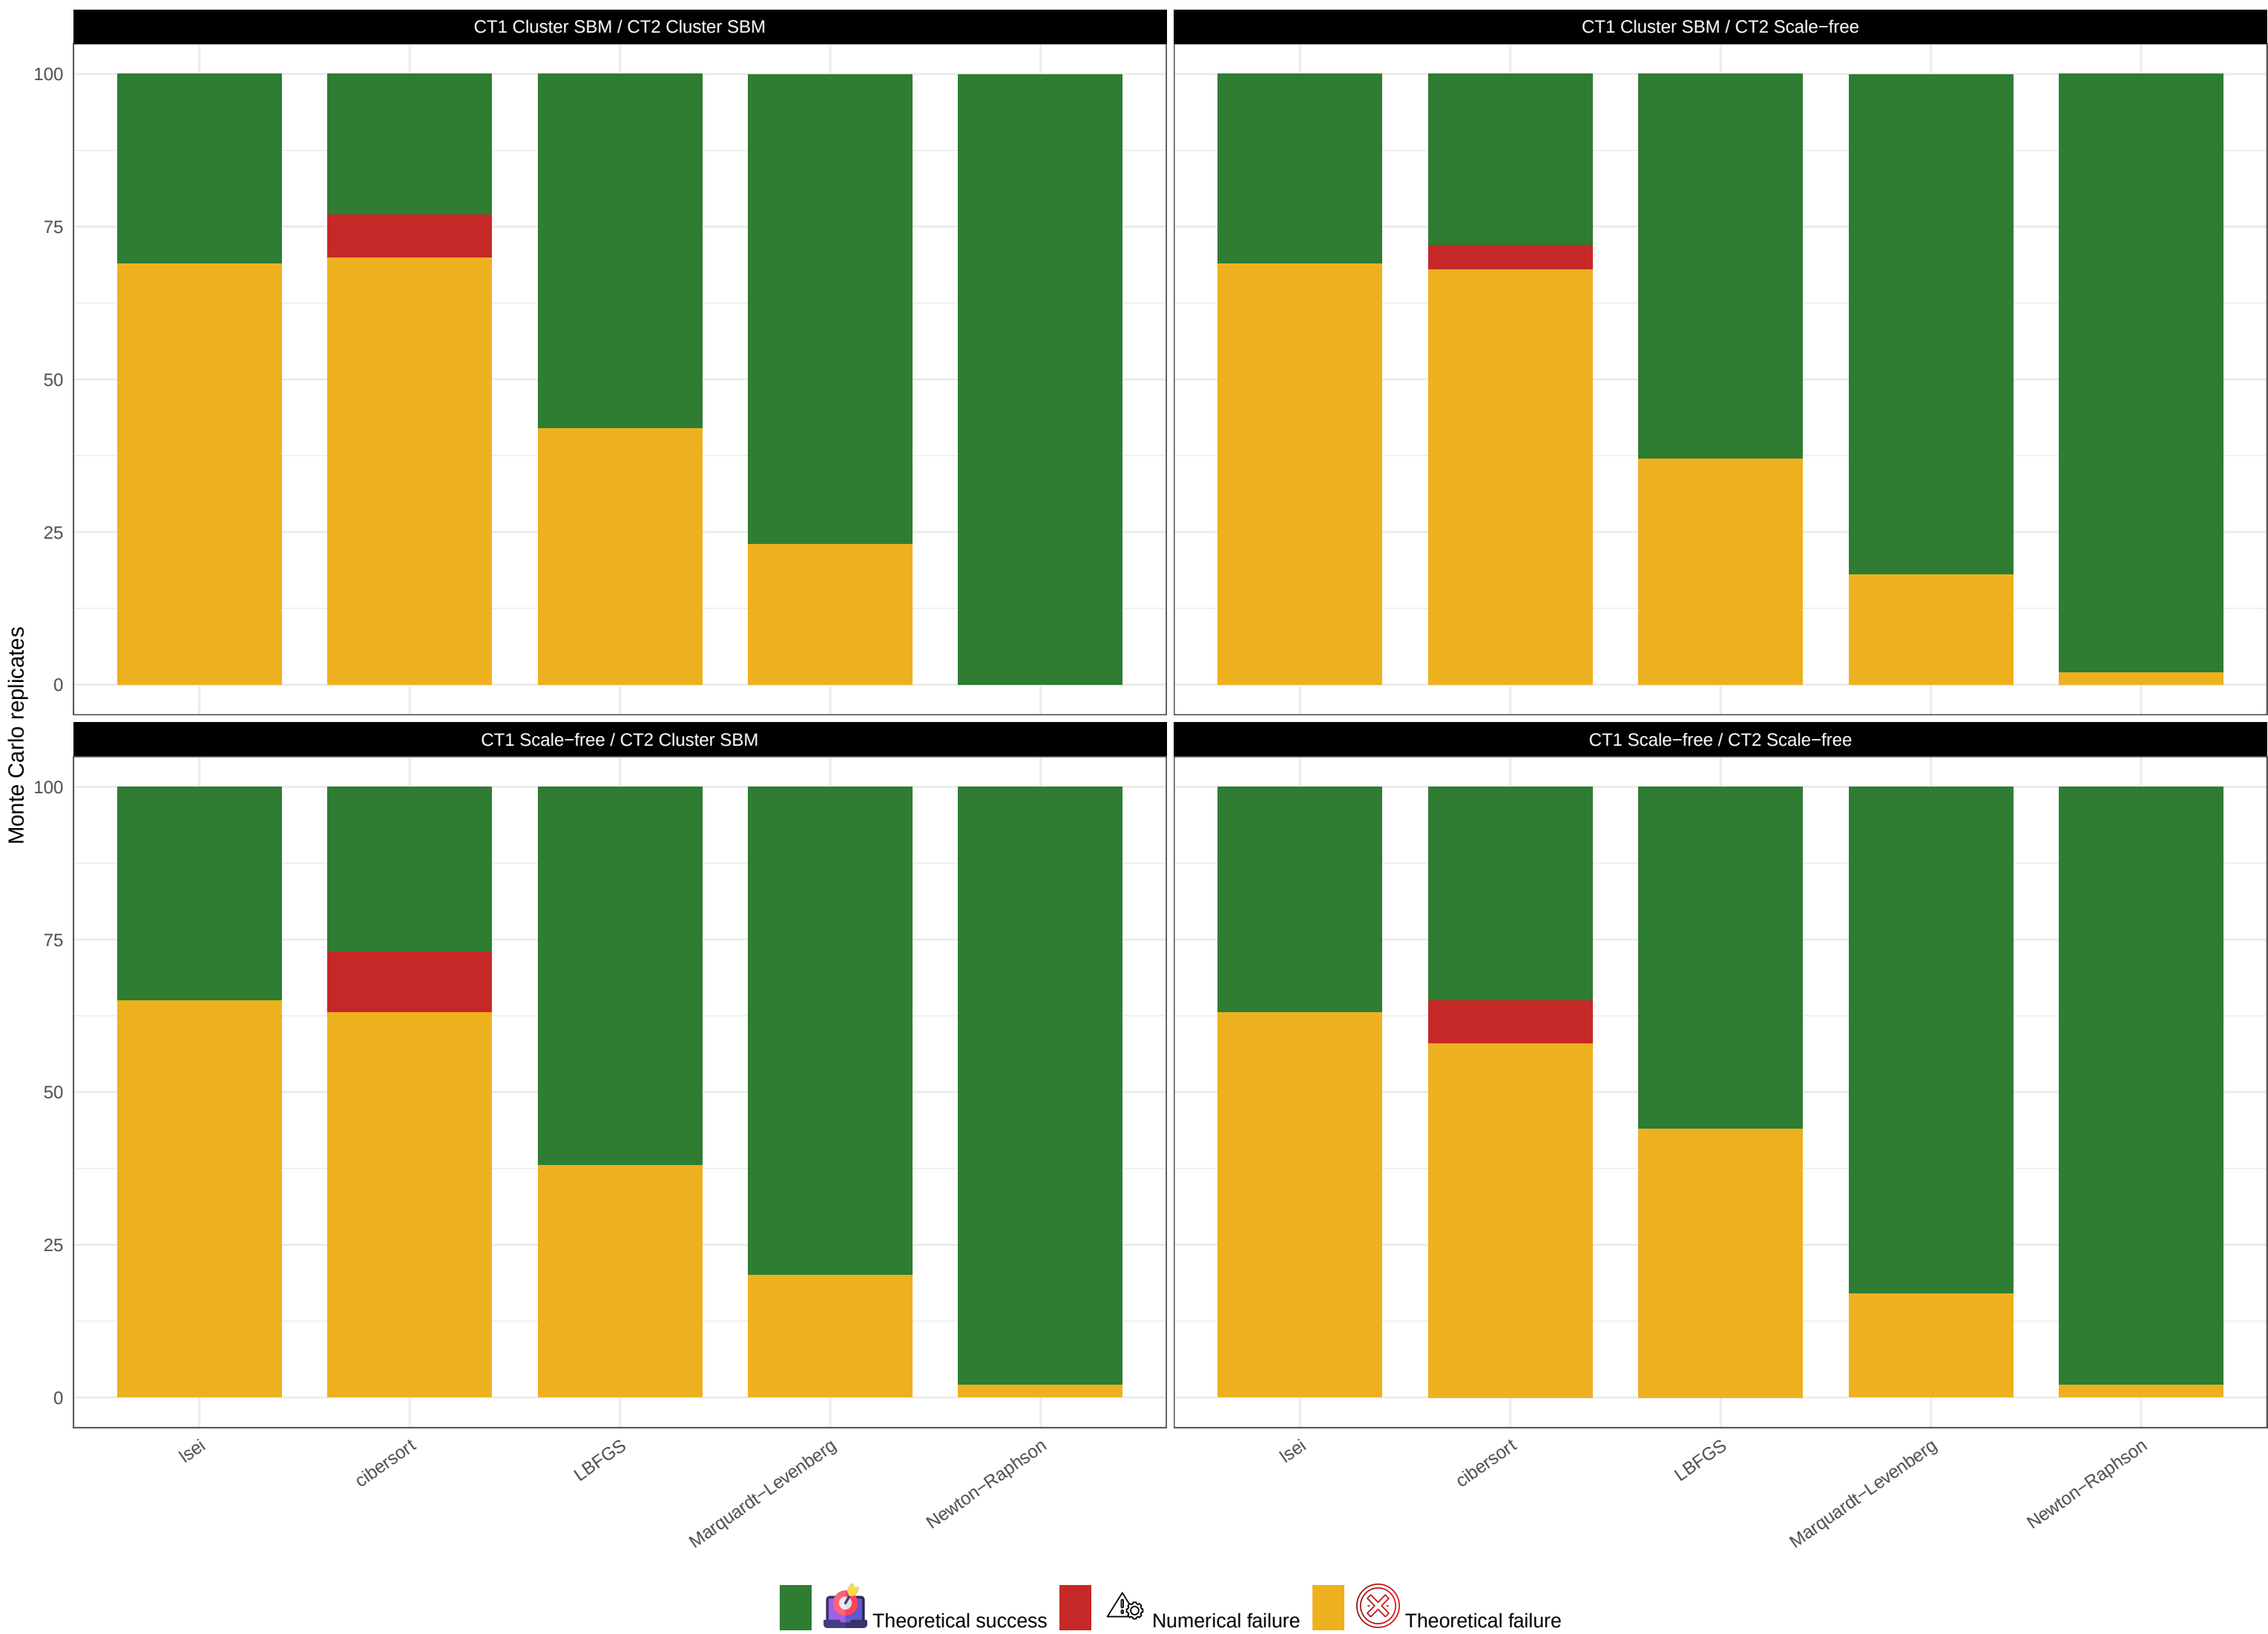

Disjoint partition: theoretical success; numerical failure (nested in theoretical failure); theoretical failure with a finite simplex. Icons: green success, red numerical failure, yellow theoretical failure.

moderately unbalanced / moderate OVL

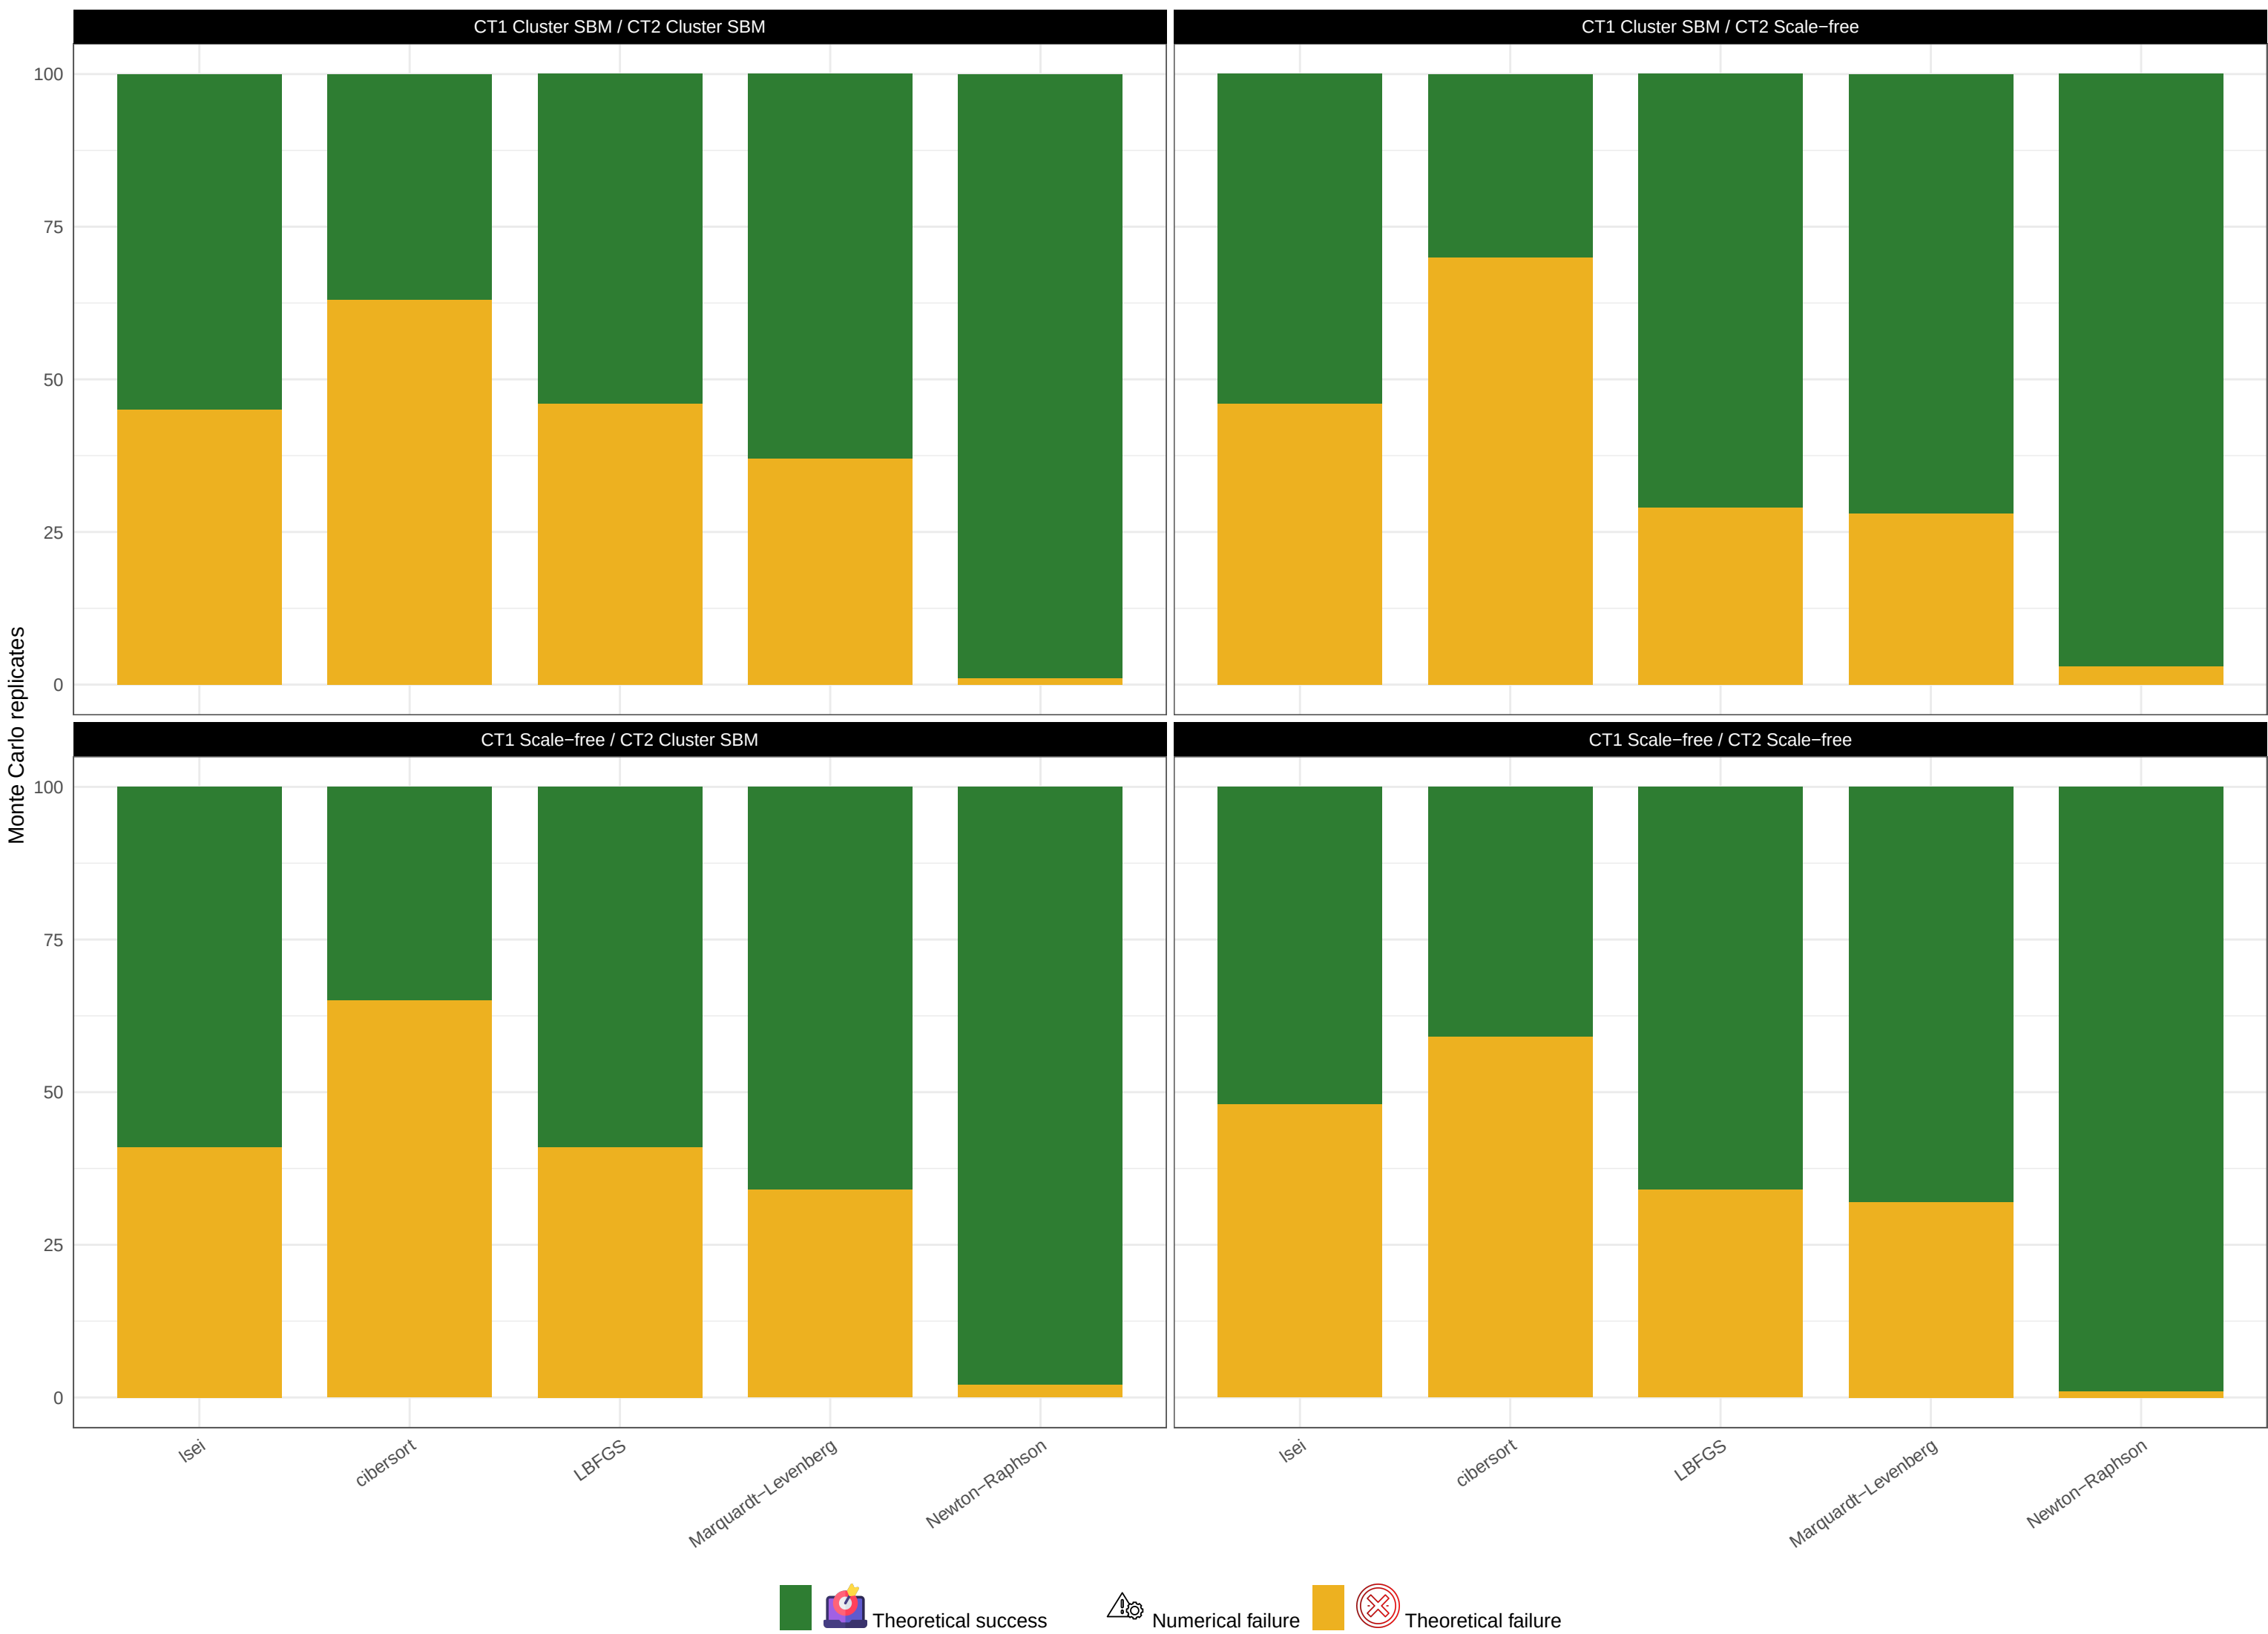

Disjoint partition: theoretical success; numerical failure (nested in theoretical failure); theoretical failure with a finite simplex. Icons: green success, red numerical failure, yellow theoretical failure.

moderately unbalanced / high OVL

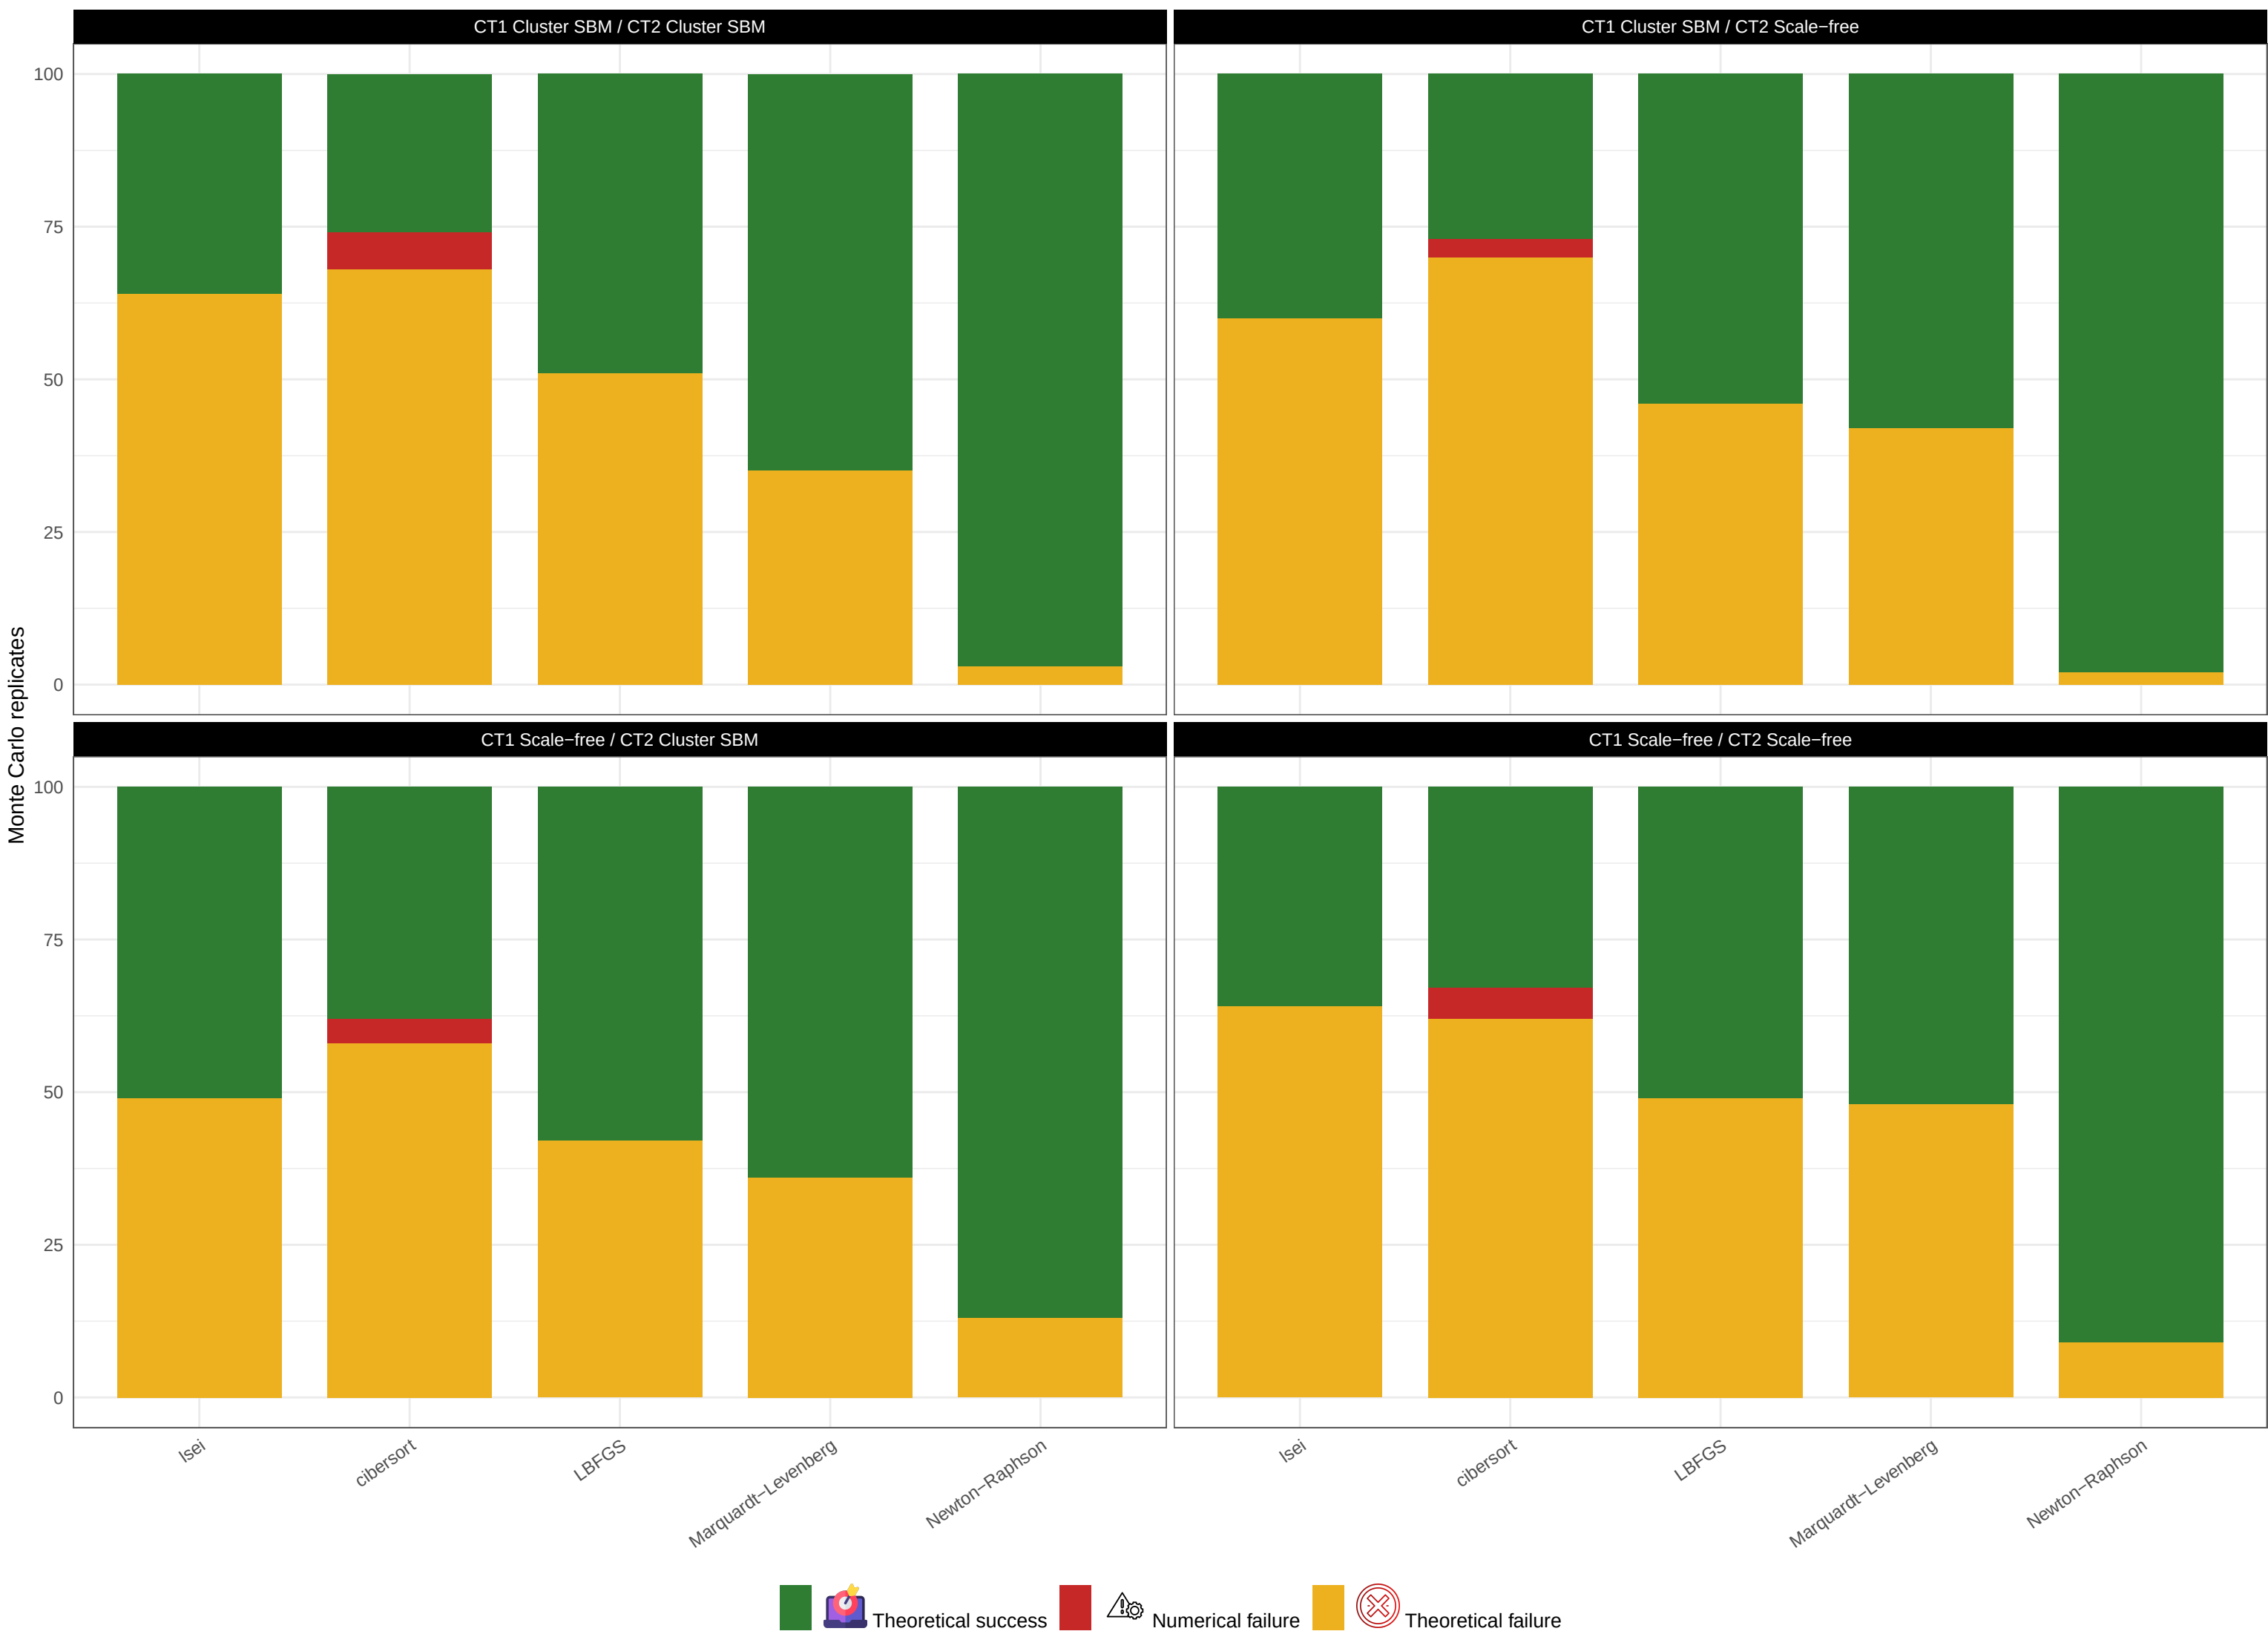

Disjoint partition: theoretical success; numerical failure (nested in theoretical failure); theoretical failure with a finite simplex. Icons: green success, red numerical failure, yellow theoretical failure.

highly unbalanced / low OVL

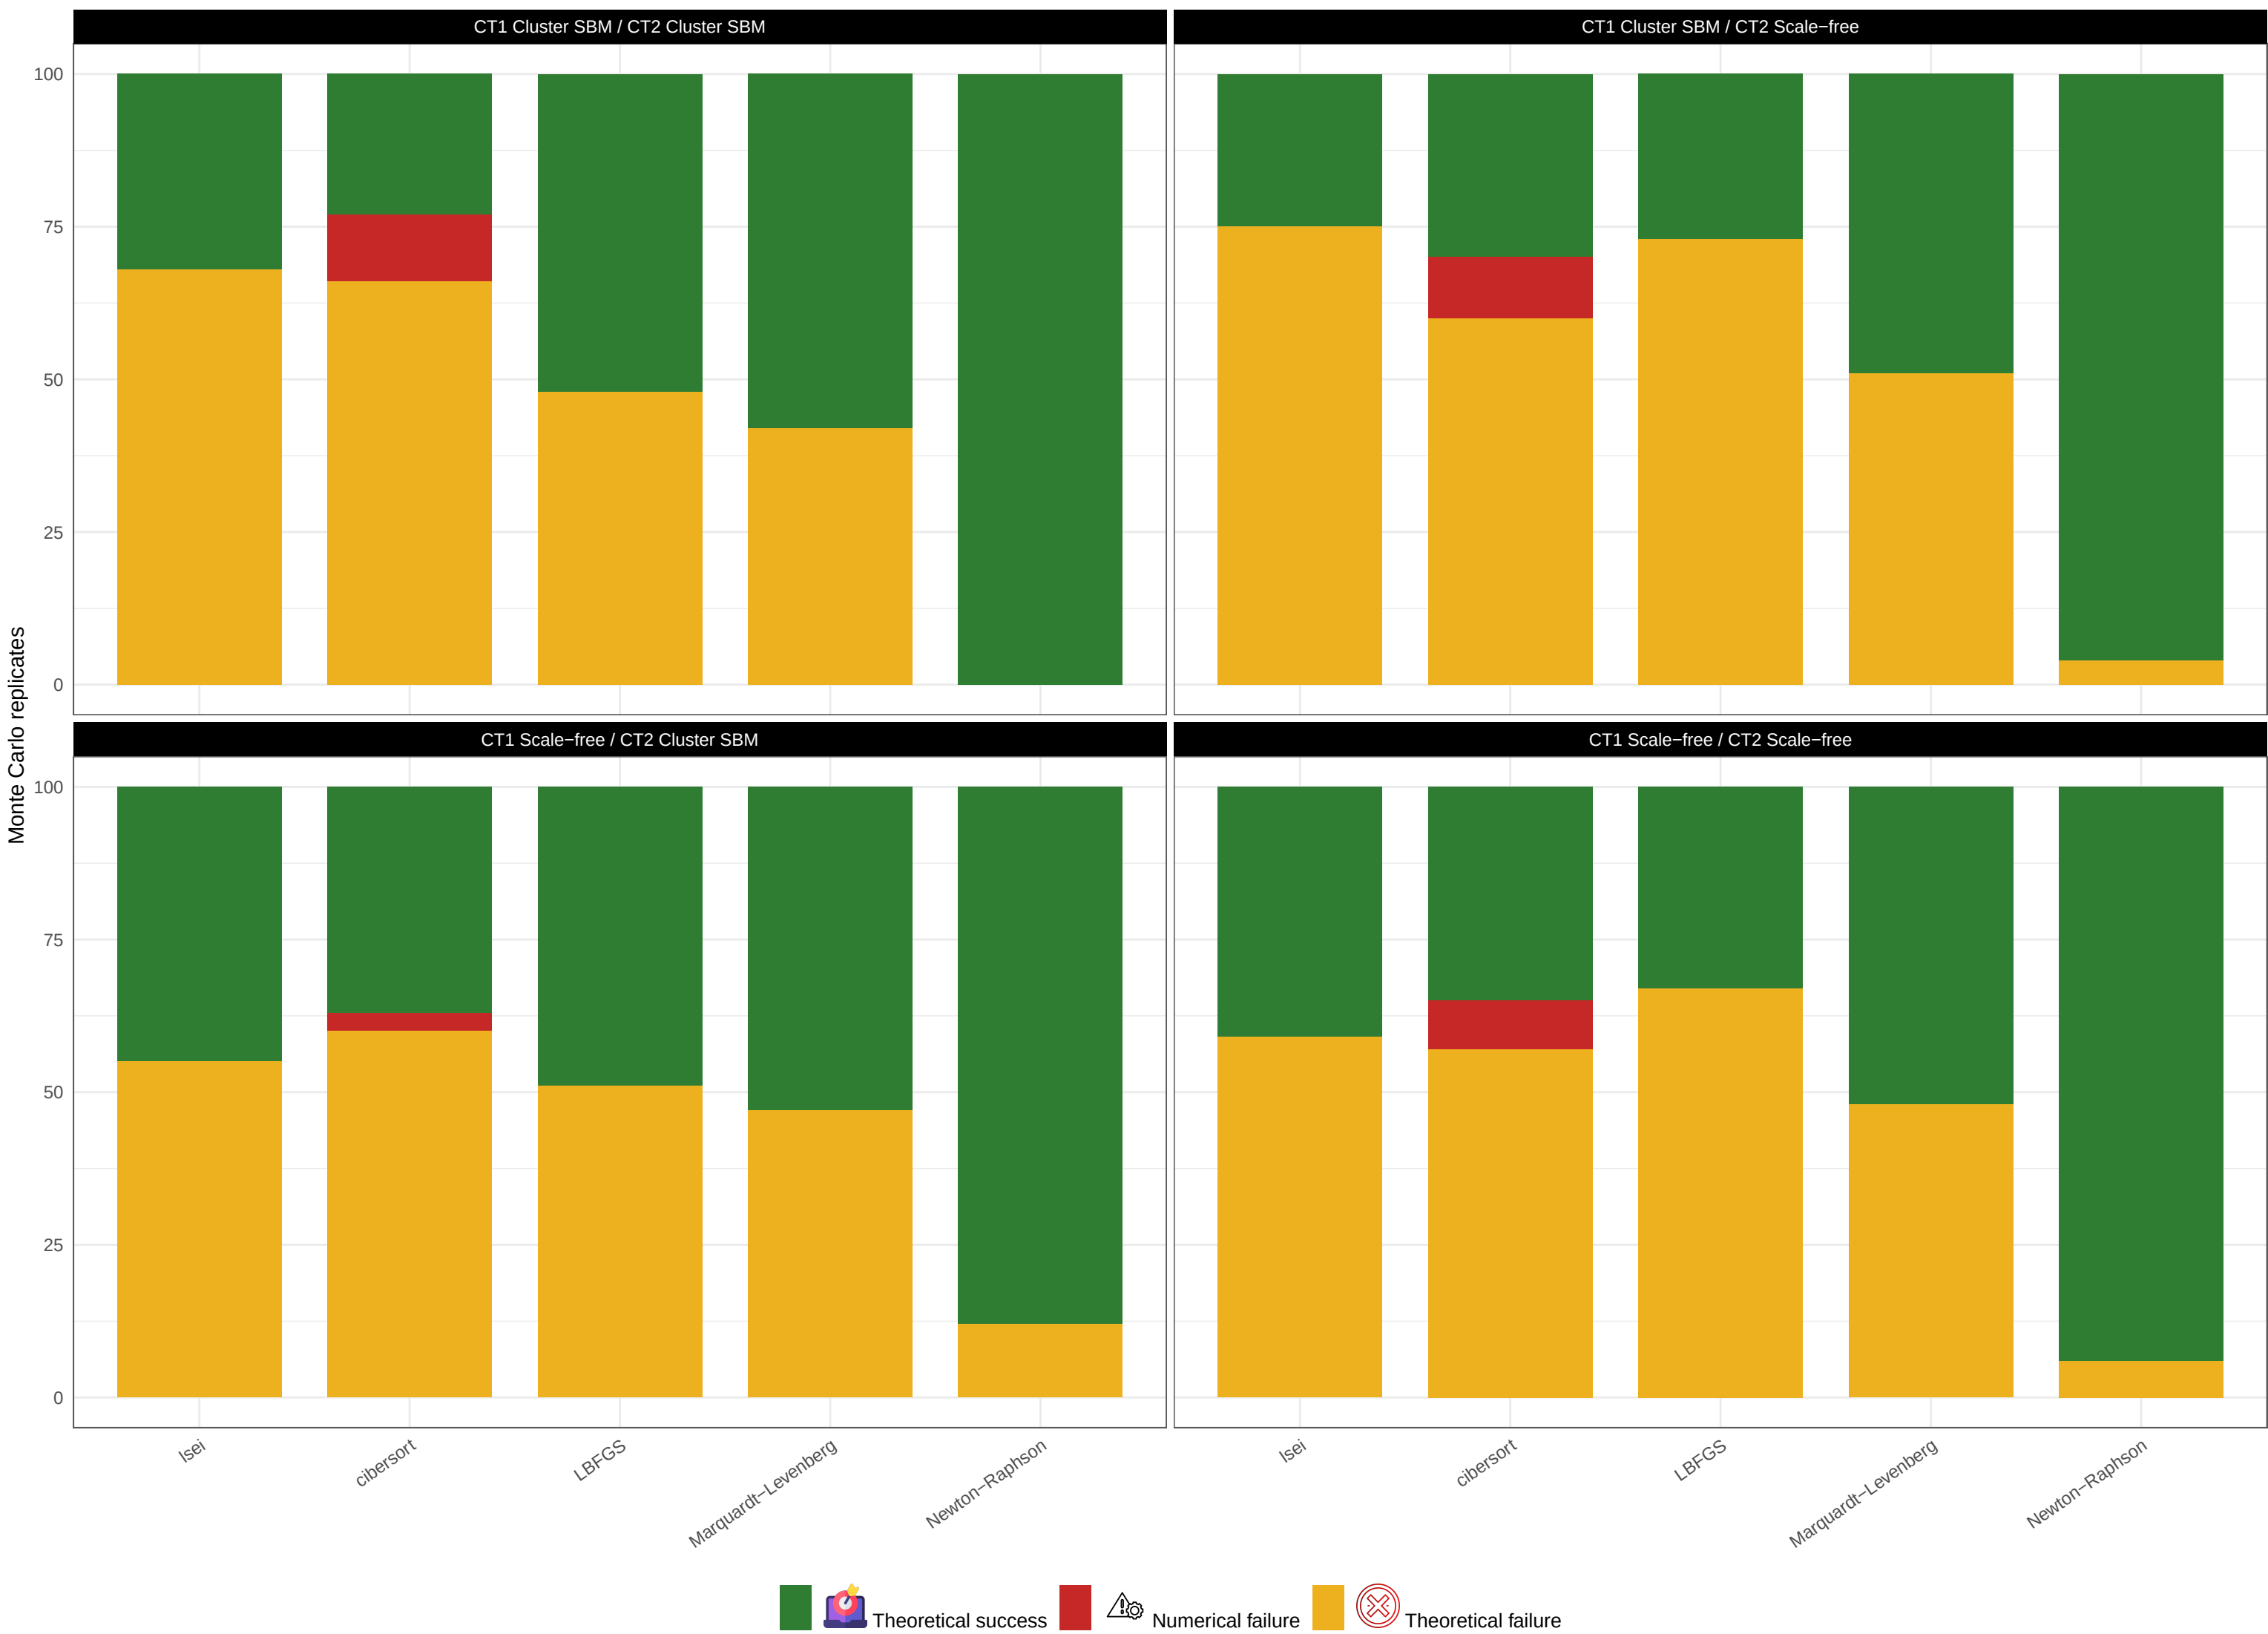

Disjoint partition: theoretical success; numerical failure (nested in theoretical failure); theoretical failure with a finite simplex. Icons: green success, red numerical failure, yellow theoretical failure.

highly unbalanced / moderate OVL

Disjoint partition: theoretical success; numerical failure (nested in theoretical failure); theoretical failure with a finite simplex. Icons: green success, red numerical failure, yellow theoretical failure.

highly unbalanced / high OVL

Disjoint partition: theoretical success; numerical failure (nested in theoretical failure); theoretical failure with a finite simplex. Icons: green success, red numerical failure, yellow theoretical failure.
