Purified cell-type laws, weighted by the composition

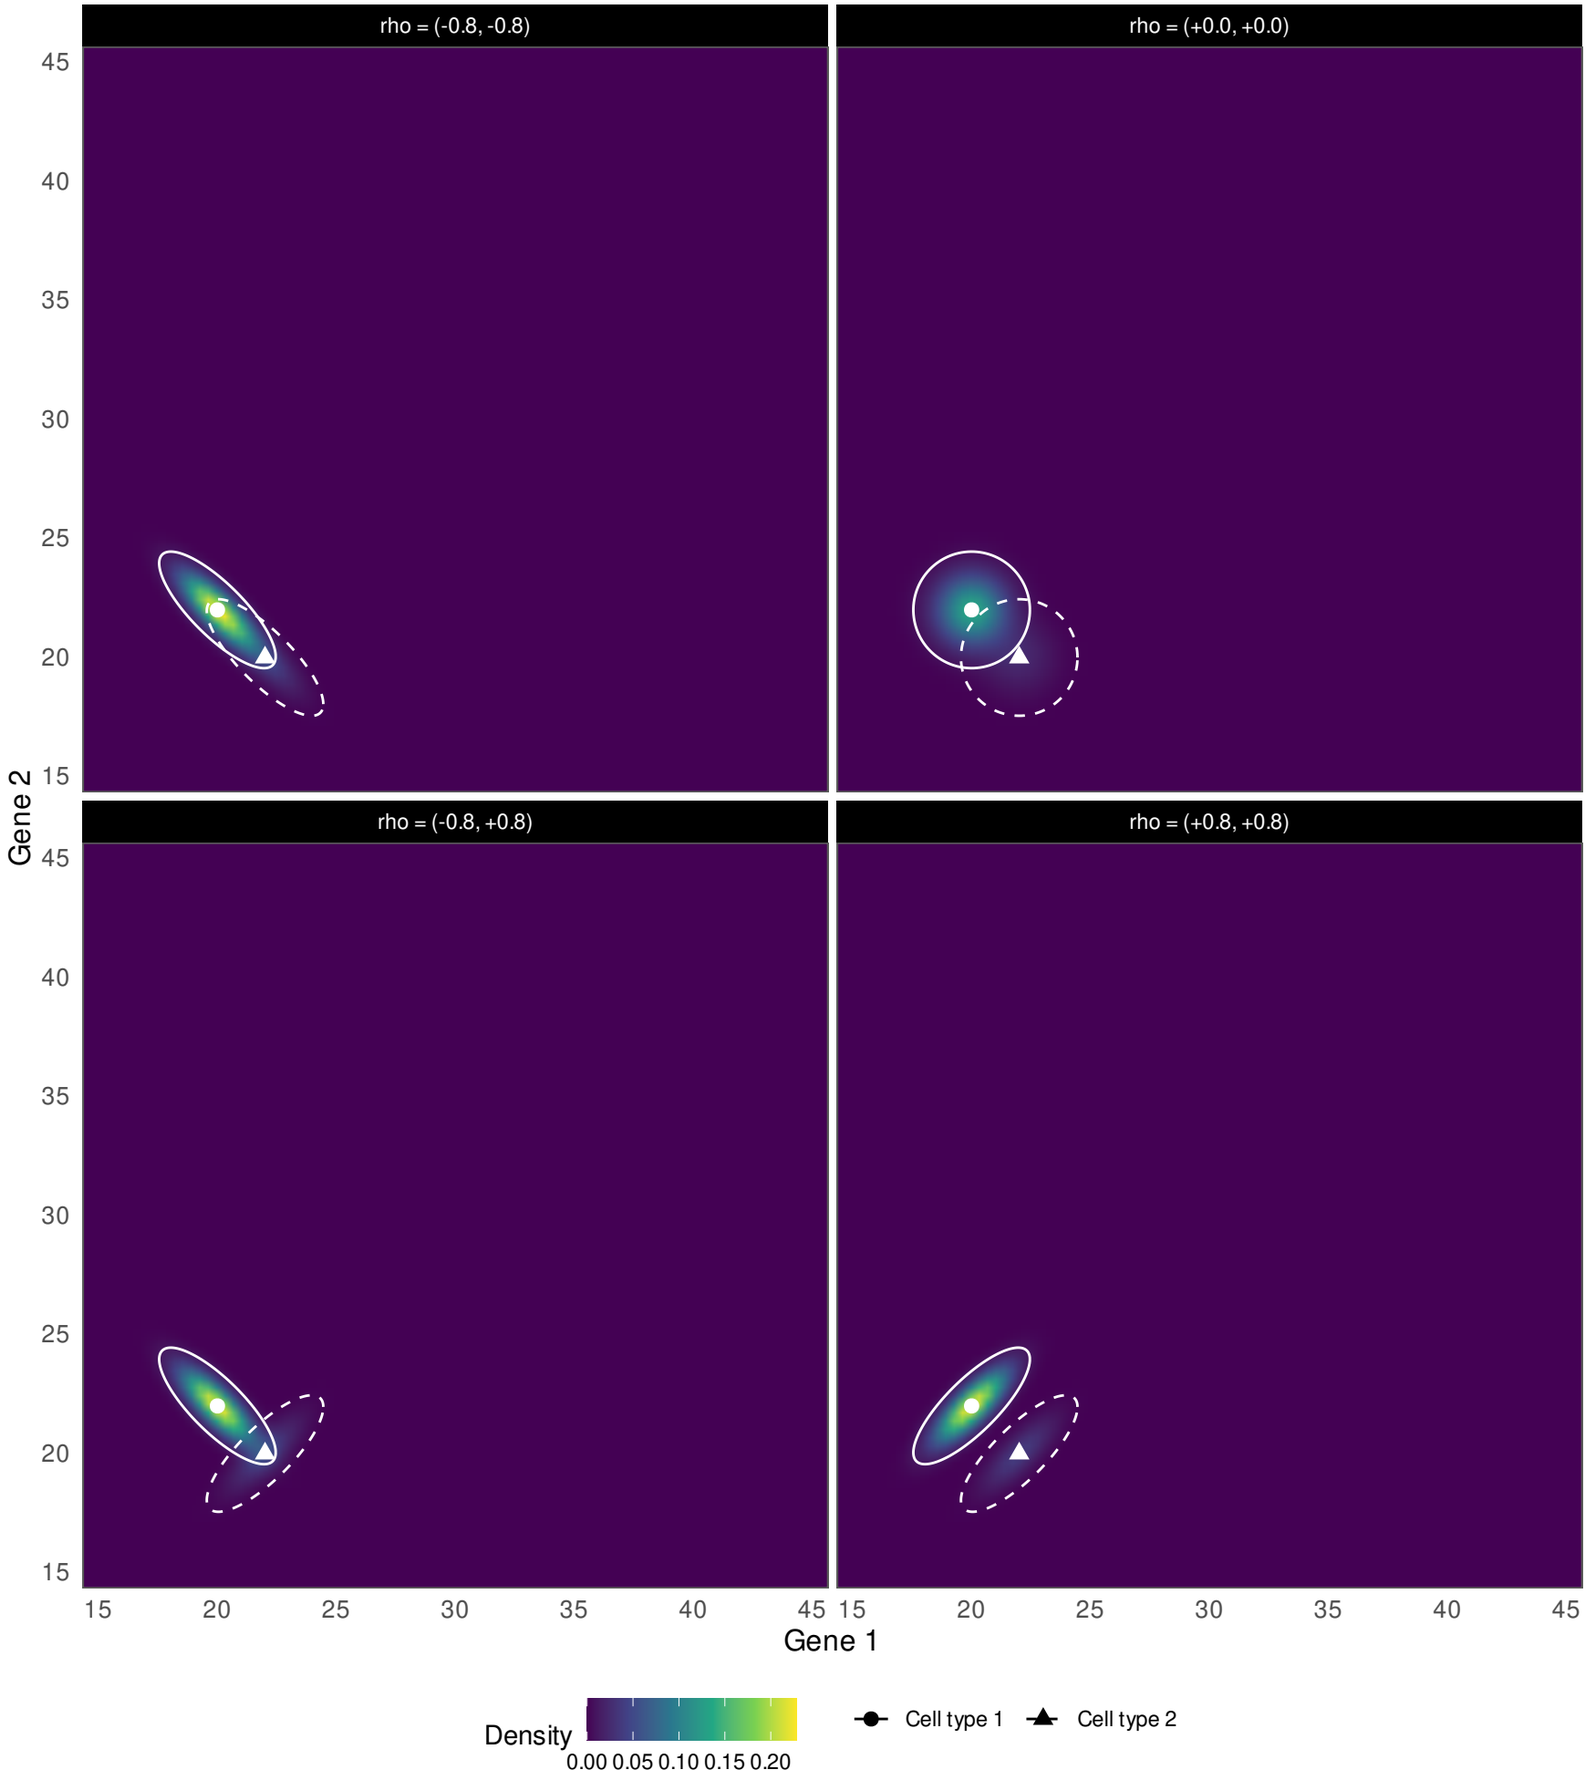

small centroid gap / homoscedastic / balanced

Fill: exact density of sum_j p_j N(mu_j, Sigma_j), not the bulk law. Outlines: 95% regions of each purified type; points: centroids.

Purified cell-type laws, weighted by the composition

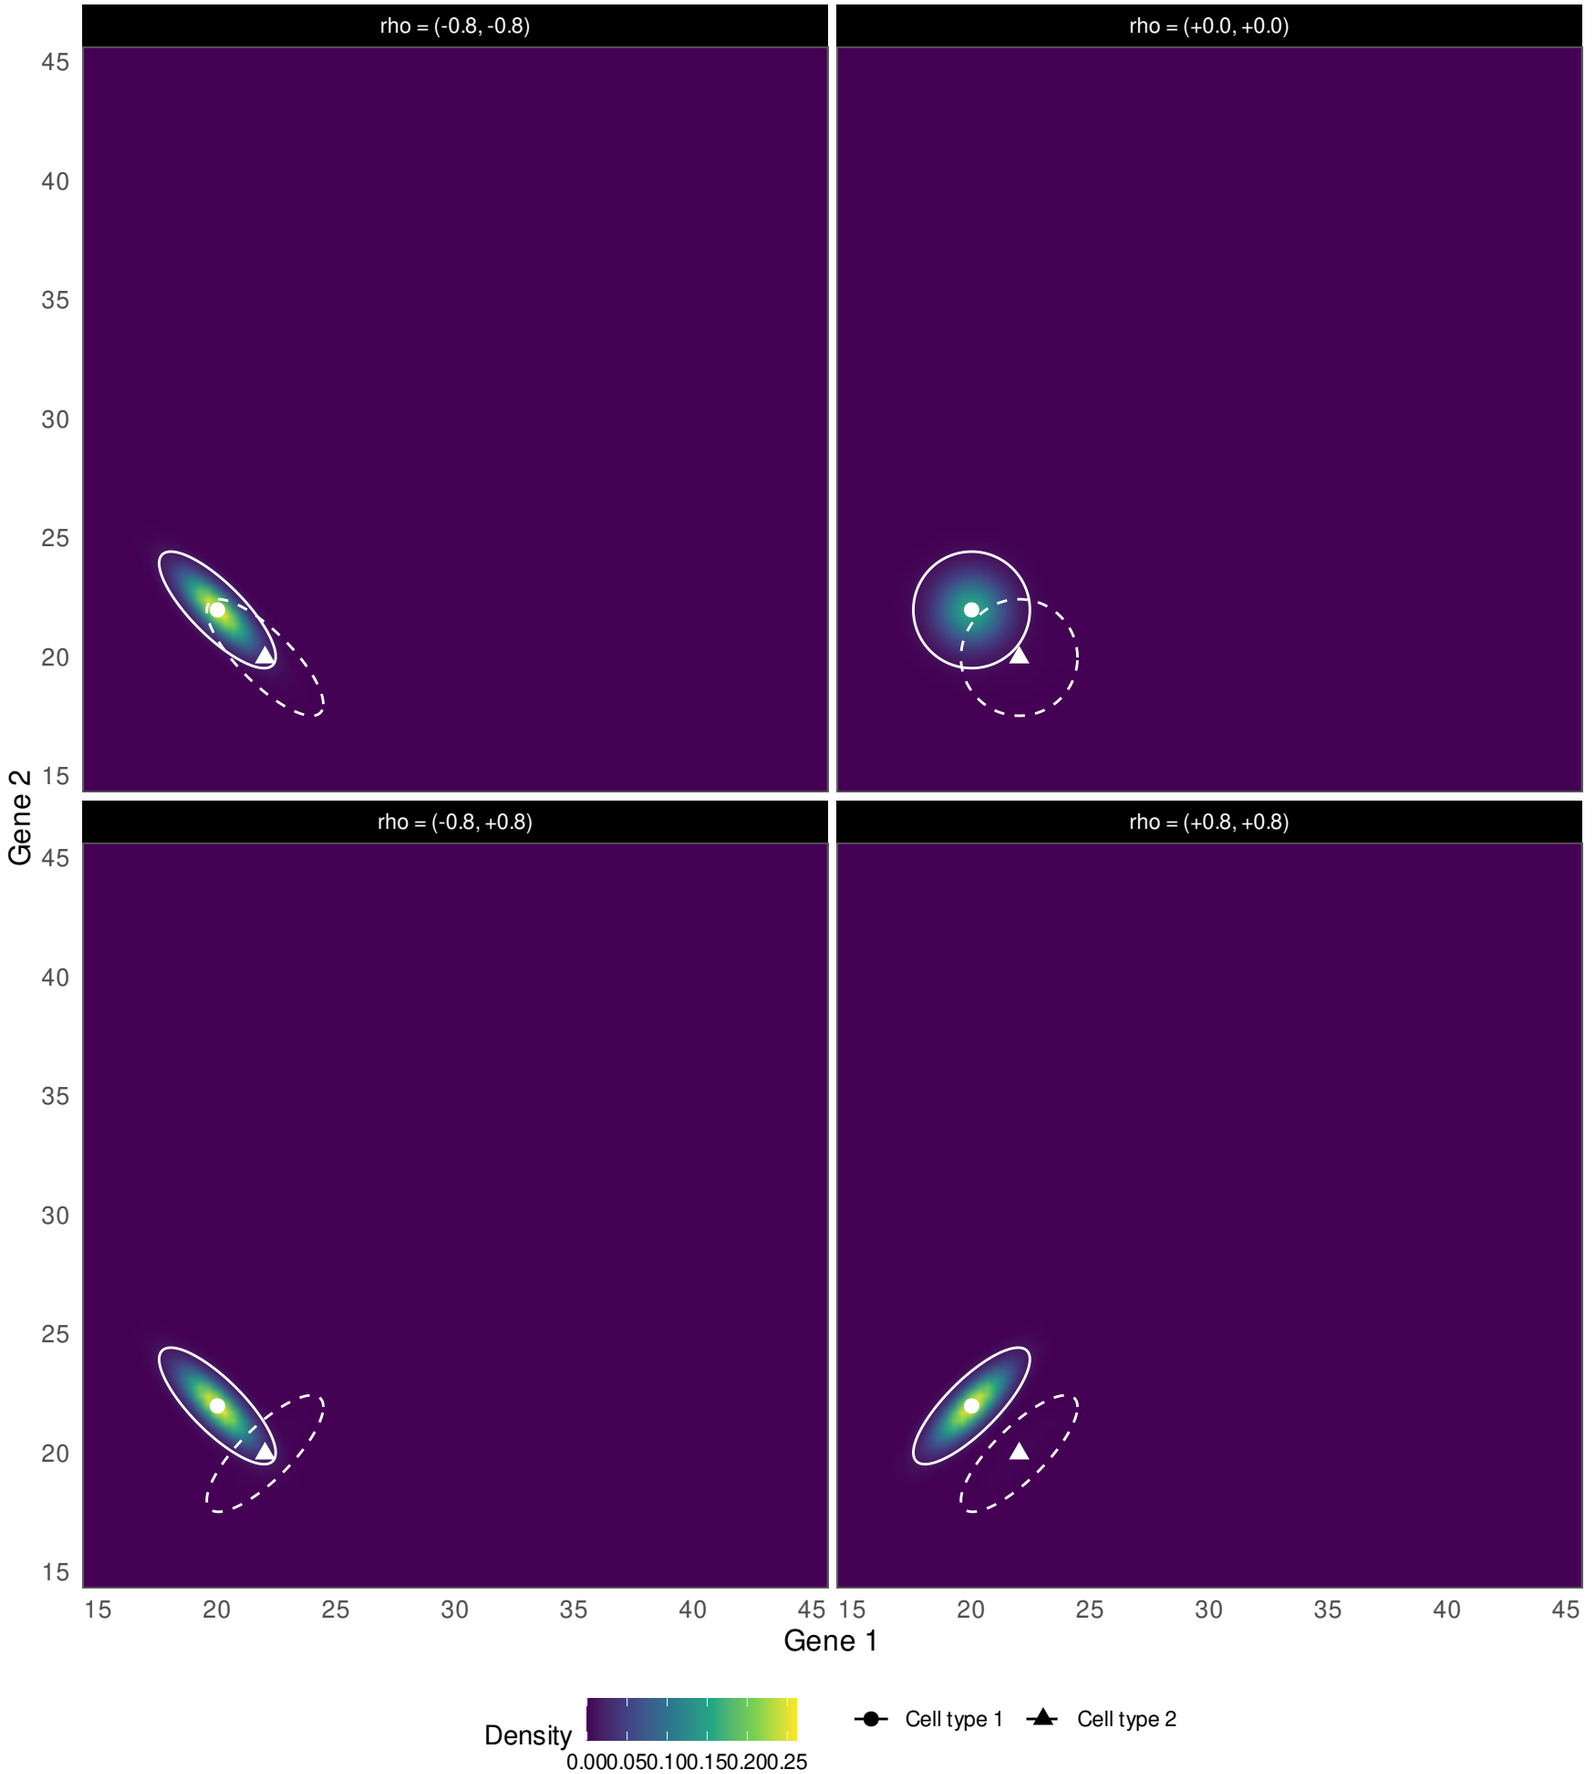

small centroid gap / homoscedastic / moderately unbalanced

Fill: exact density of sum_j p_j N(mu_j, Sigma_j), not the bulk law. Outlines: 95% regions of each purified type; points: centroids.

Purified cell-type laws, weighted by the composition

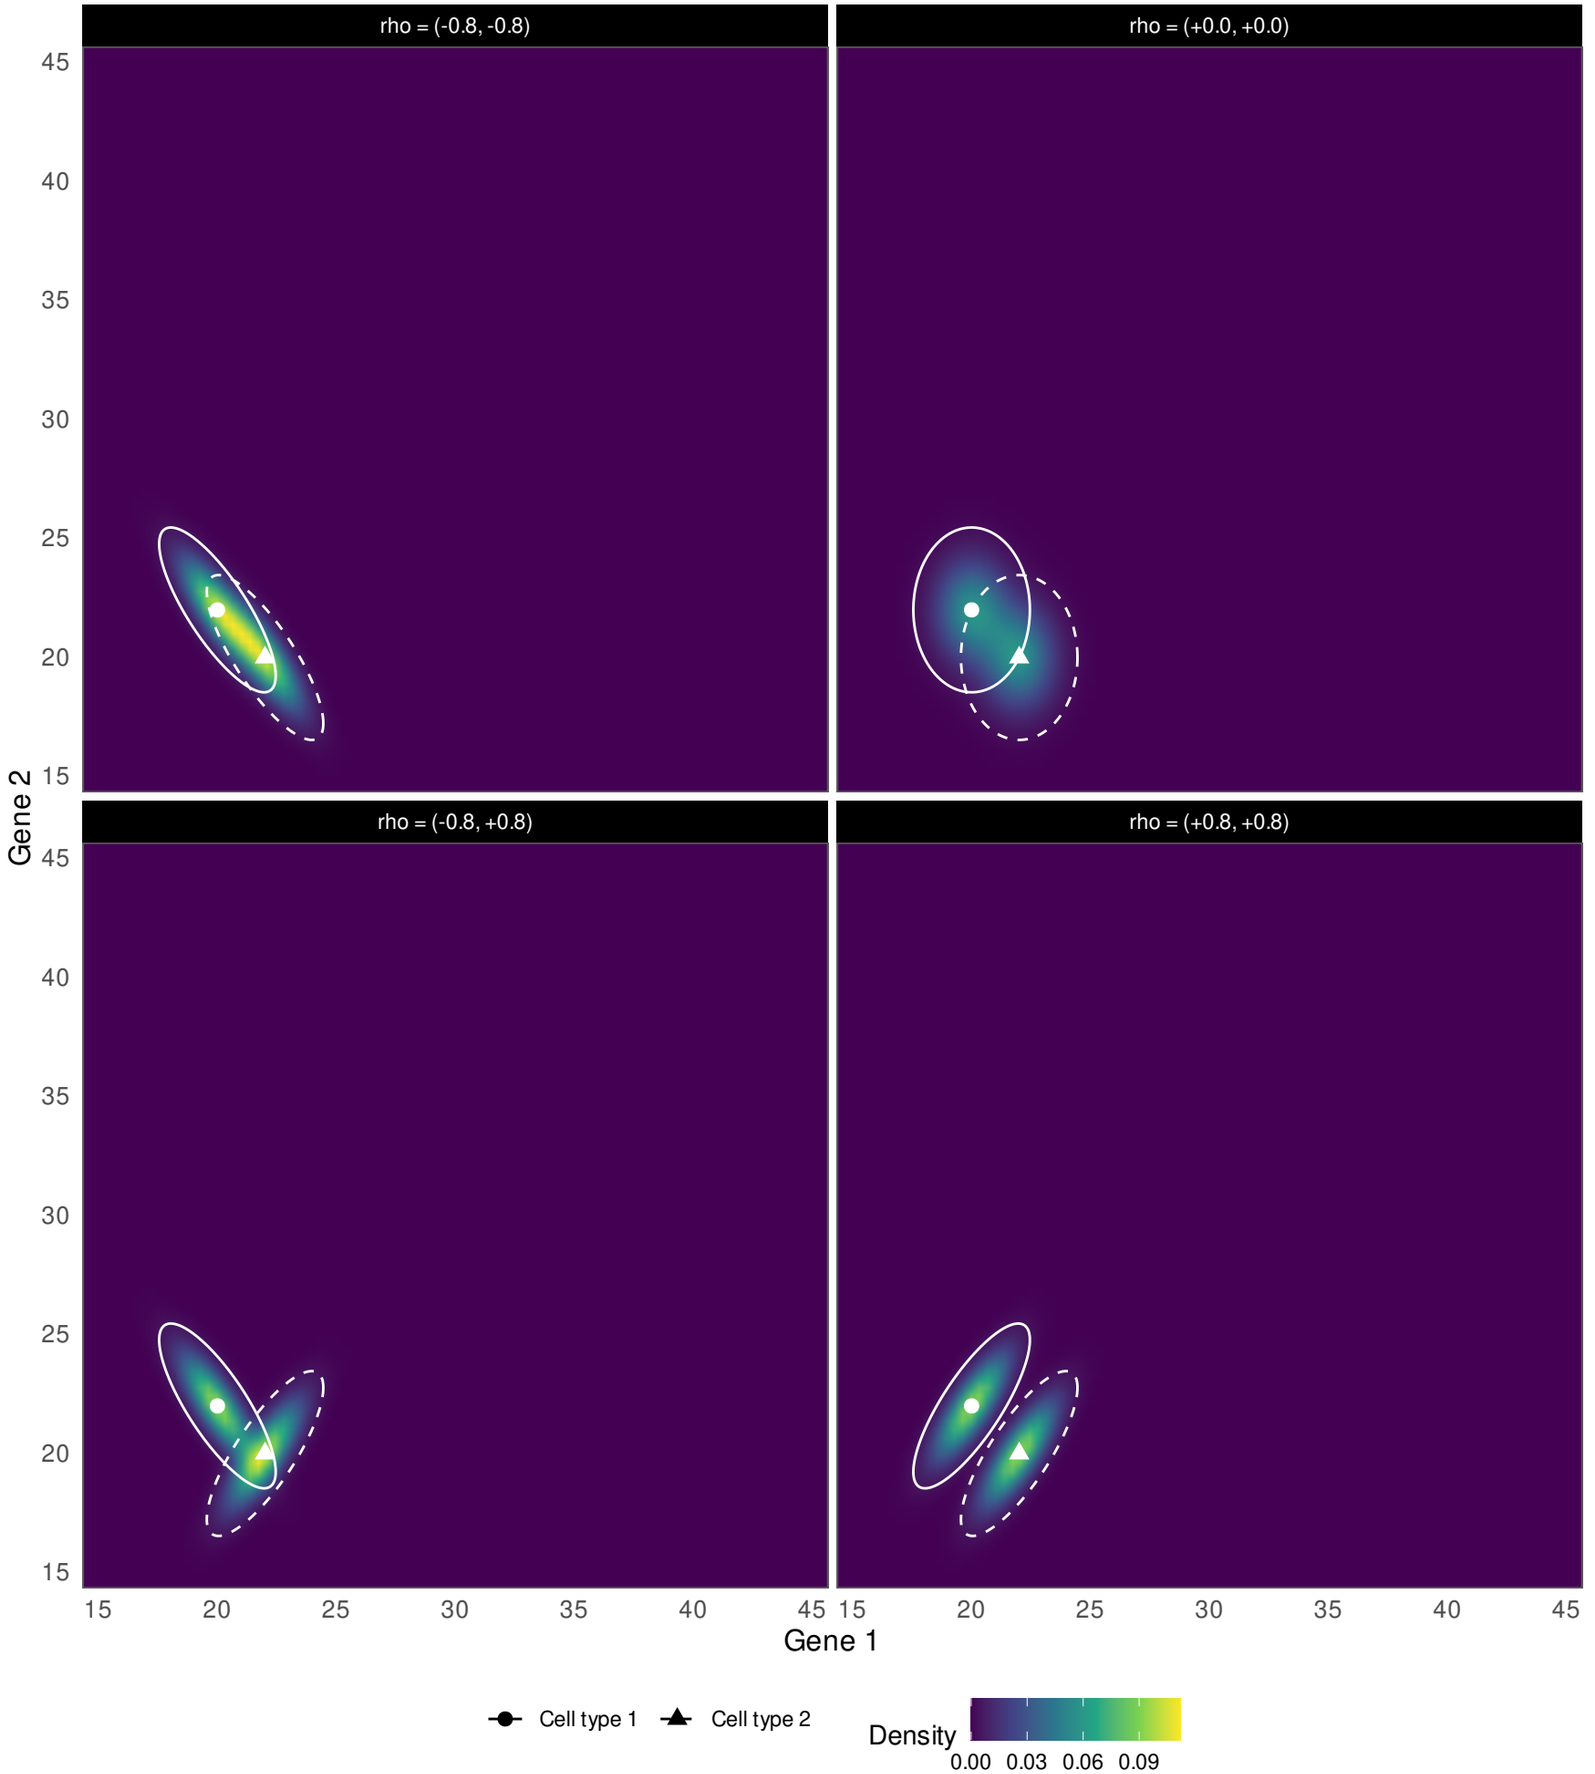

small centroid gap / homoscedastic / highly unbalanced

Fill: exact density of sum_j p_j N(mu_j, Sigma_j), not the bulk law. Outlines: 95% regions of each purified type; points: centroids.

Purified cell-type laws, weighted by the composition

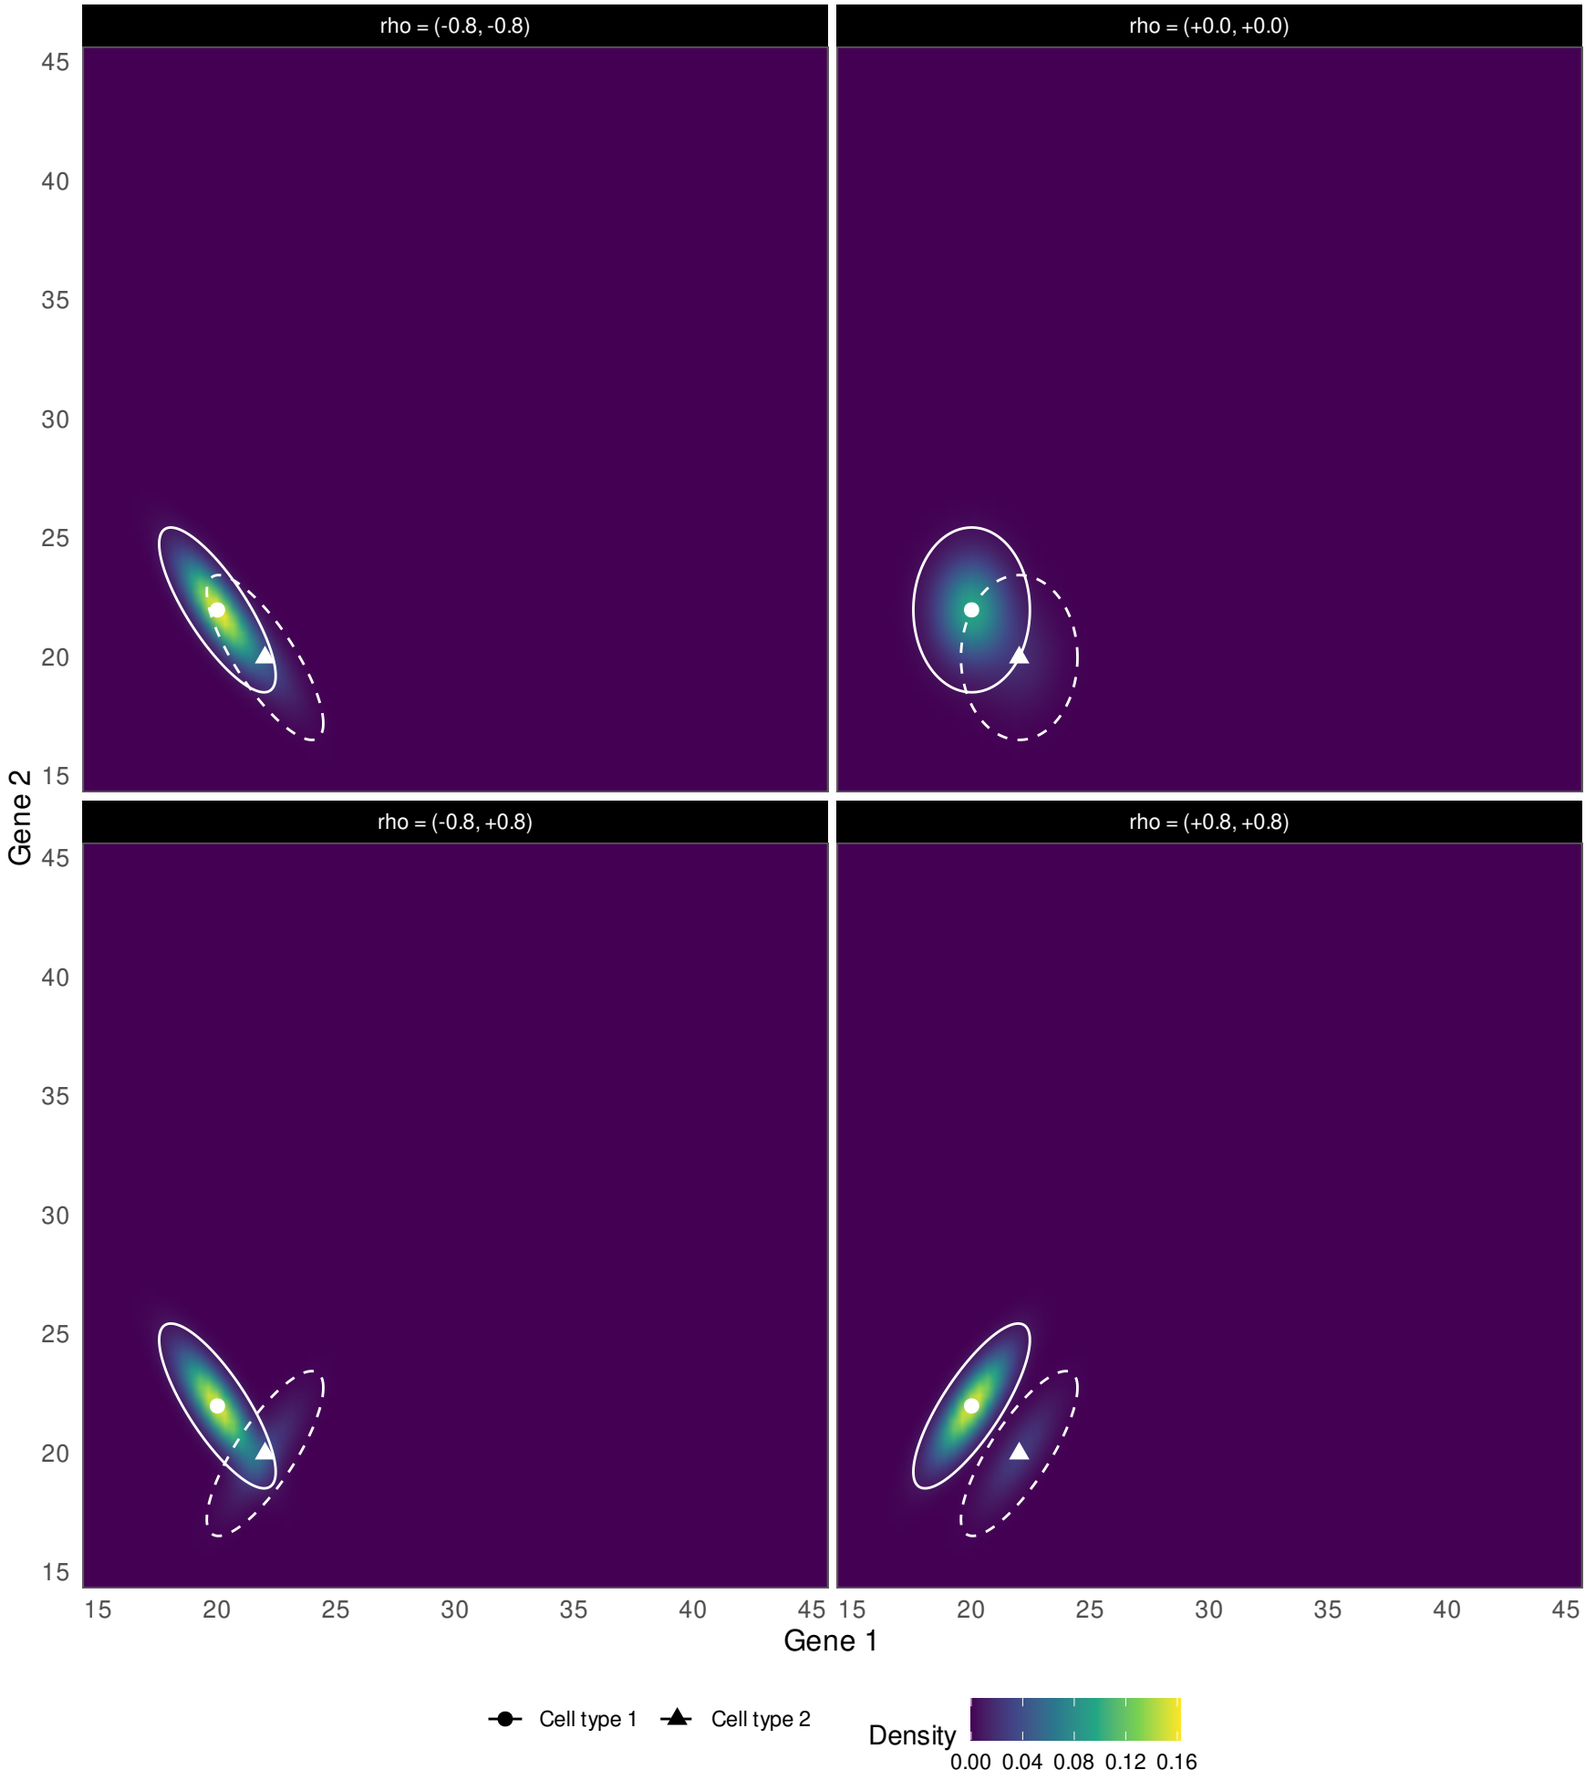

small centroid gap / heteroscedastic / balanced

Fill: exact density of sum_j p_j N(mu_j, Sigma_j), not the bulk law. Outlines: 95% regions of each purified type; points: centroids.

Purified cell-type laws, weighted by the composition

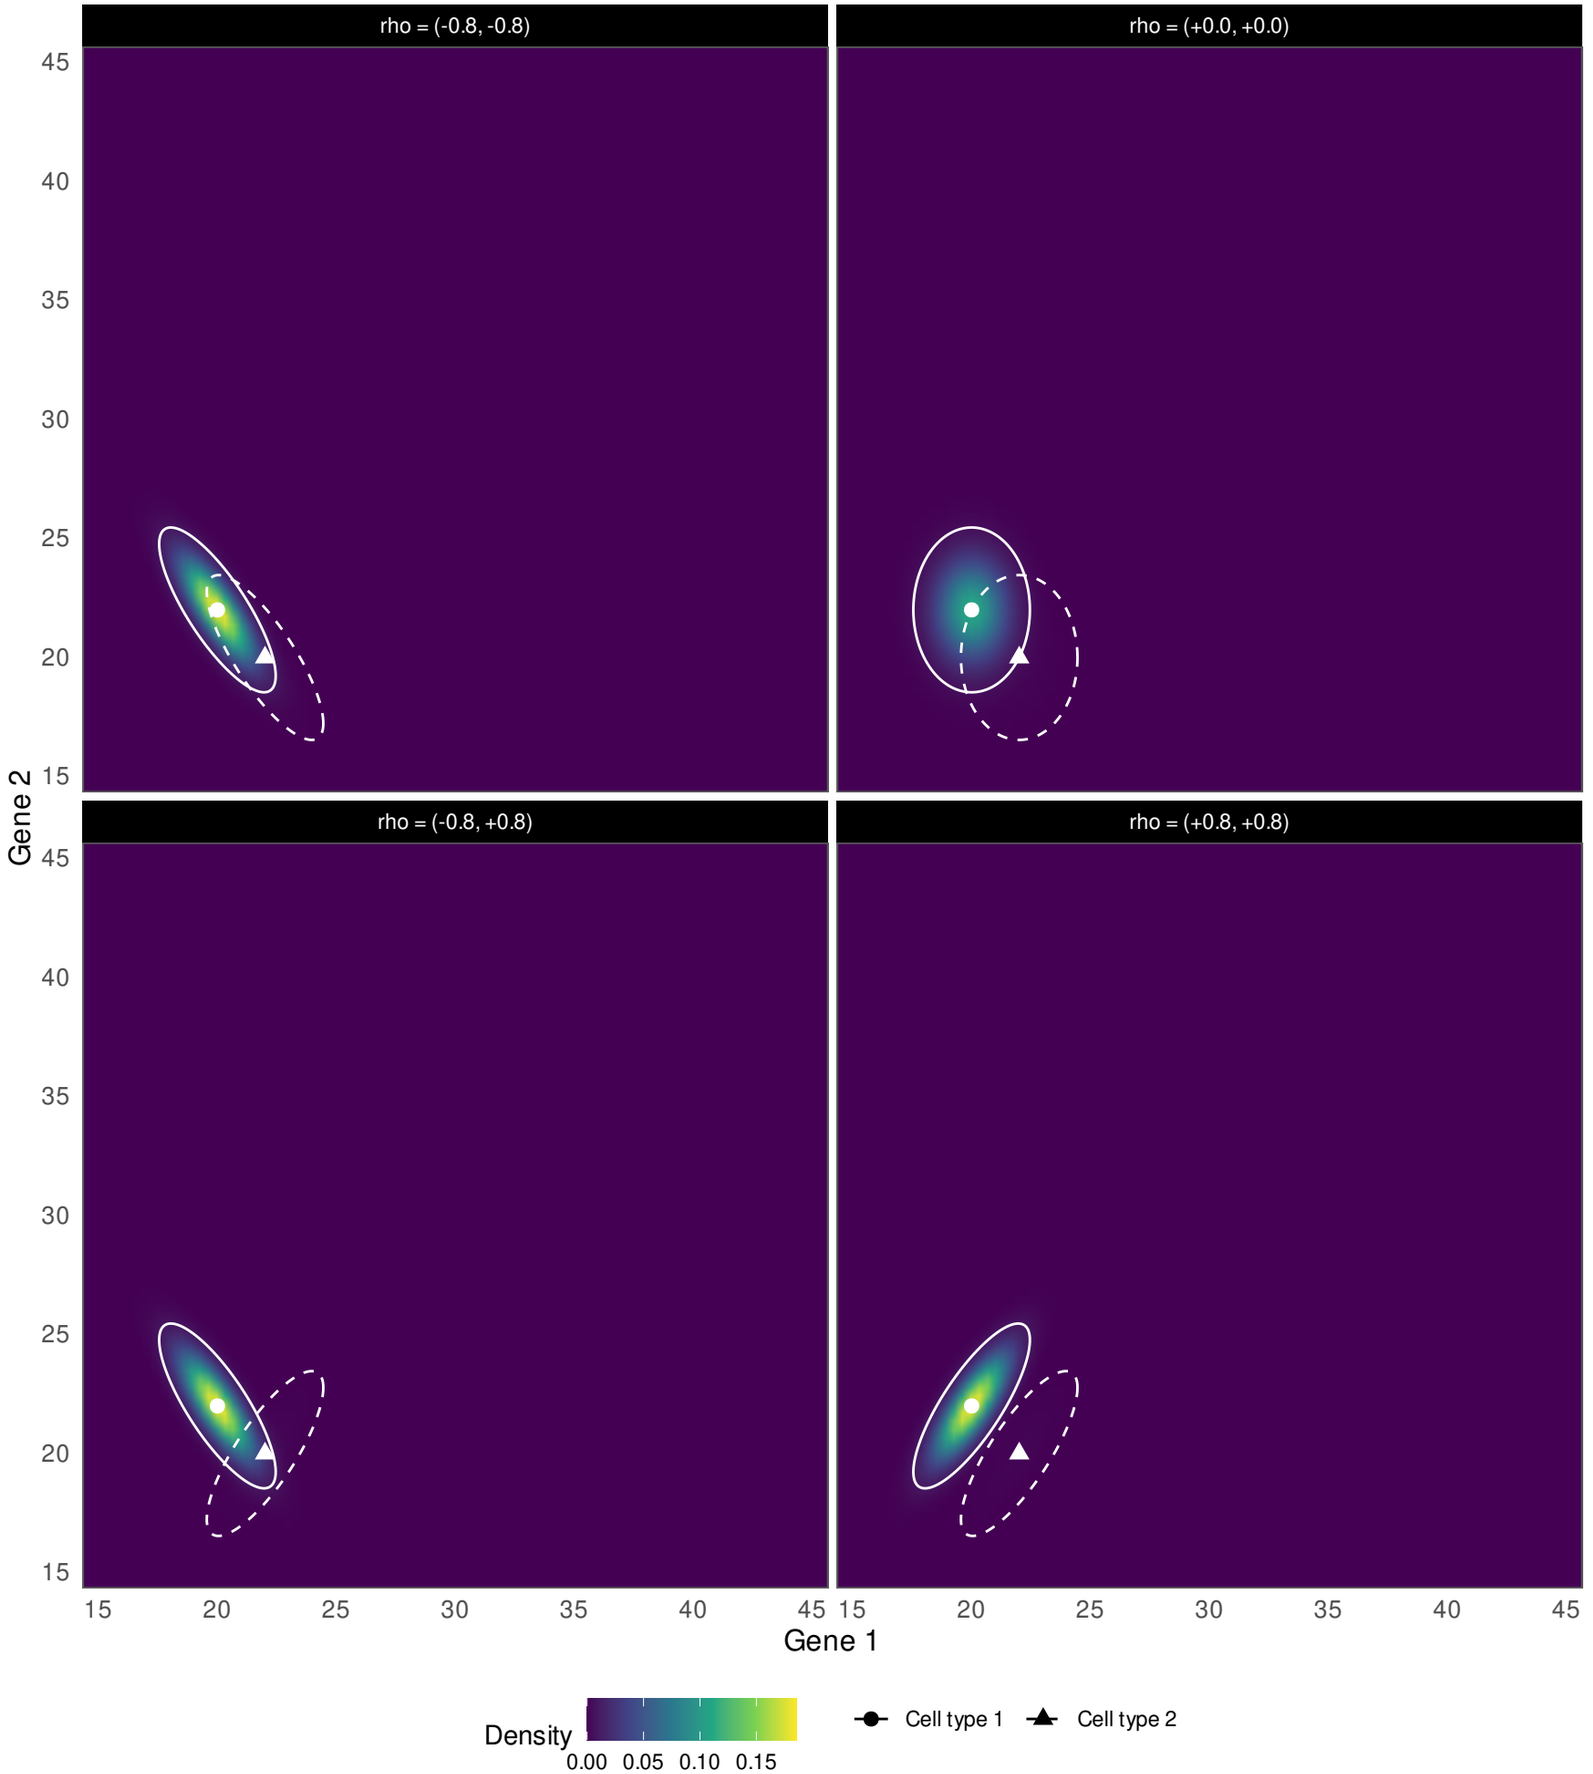

small centroid gap / heteroscedastic / moderately unbalanced

Fill: exact density of sum_j p_j N(mu_j, Sigma_j), not the bulk law. Outlines: 95% regions of each purified type; points: centroids.

Purified cell-type laws, weighted by the composition

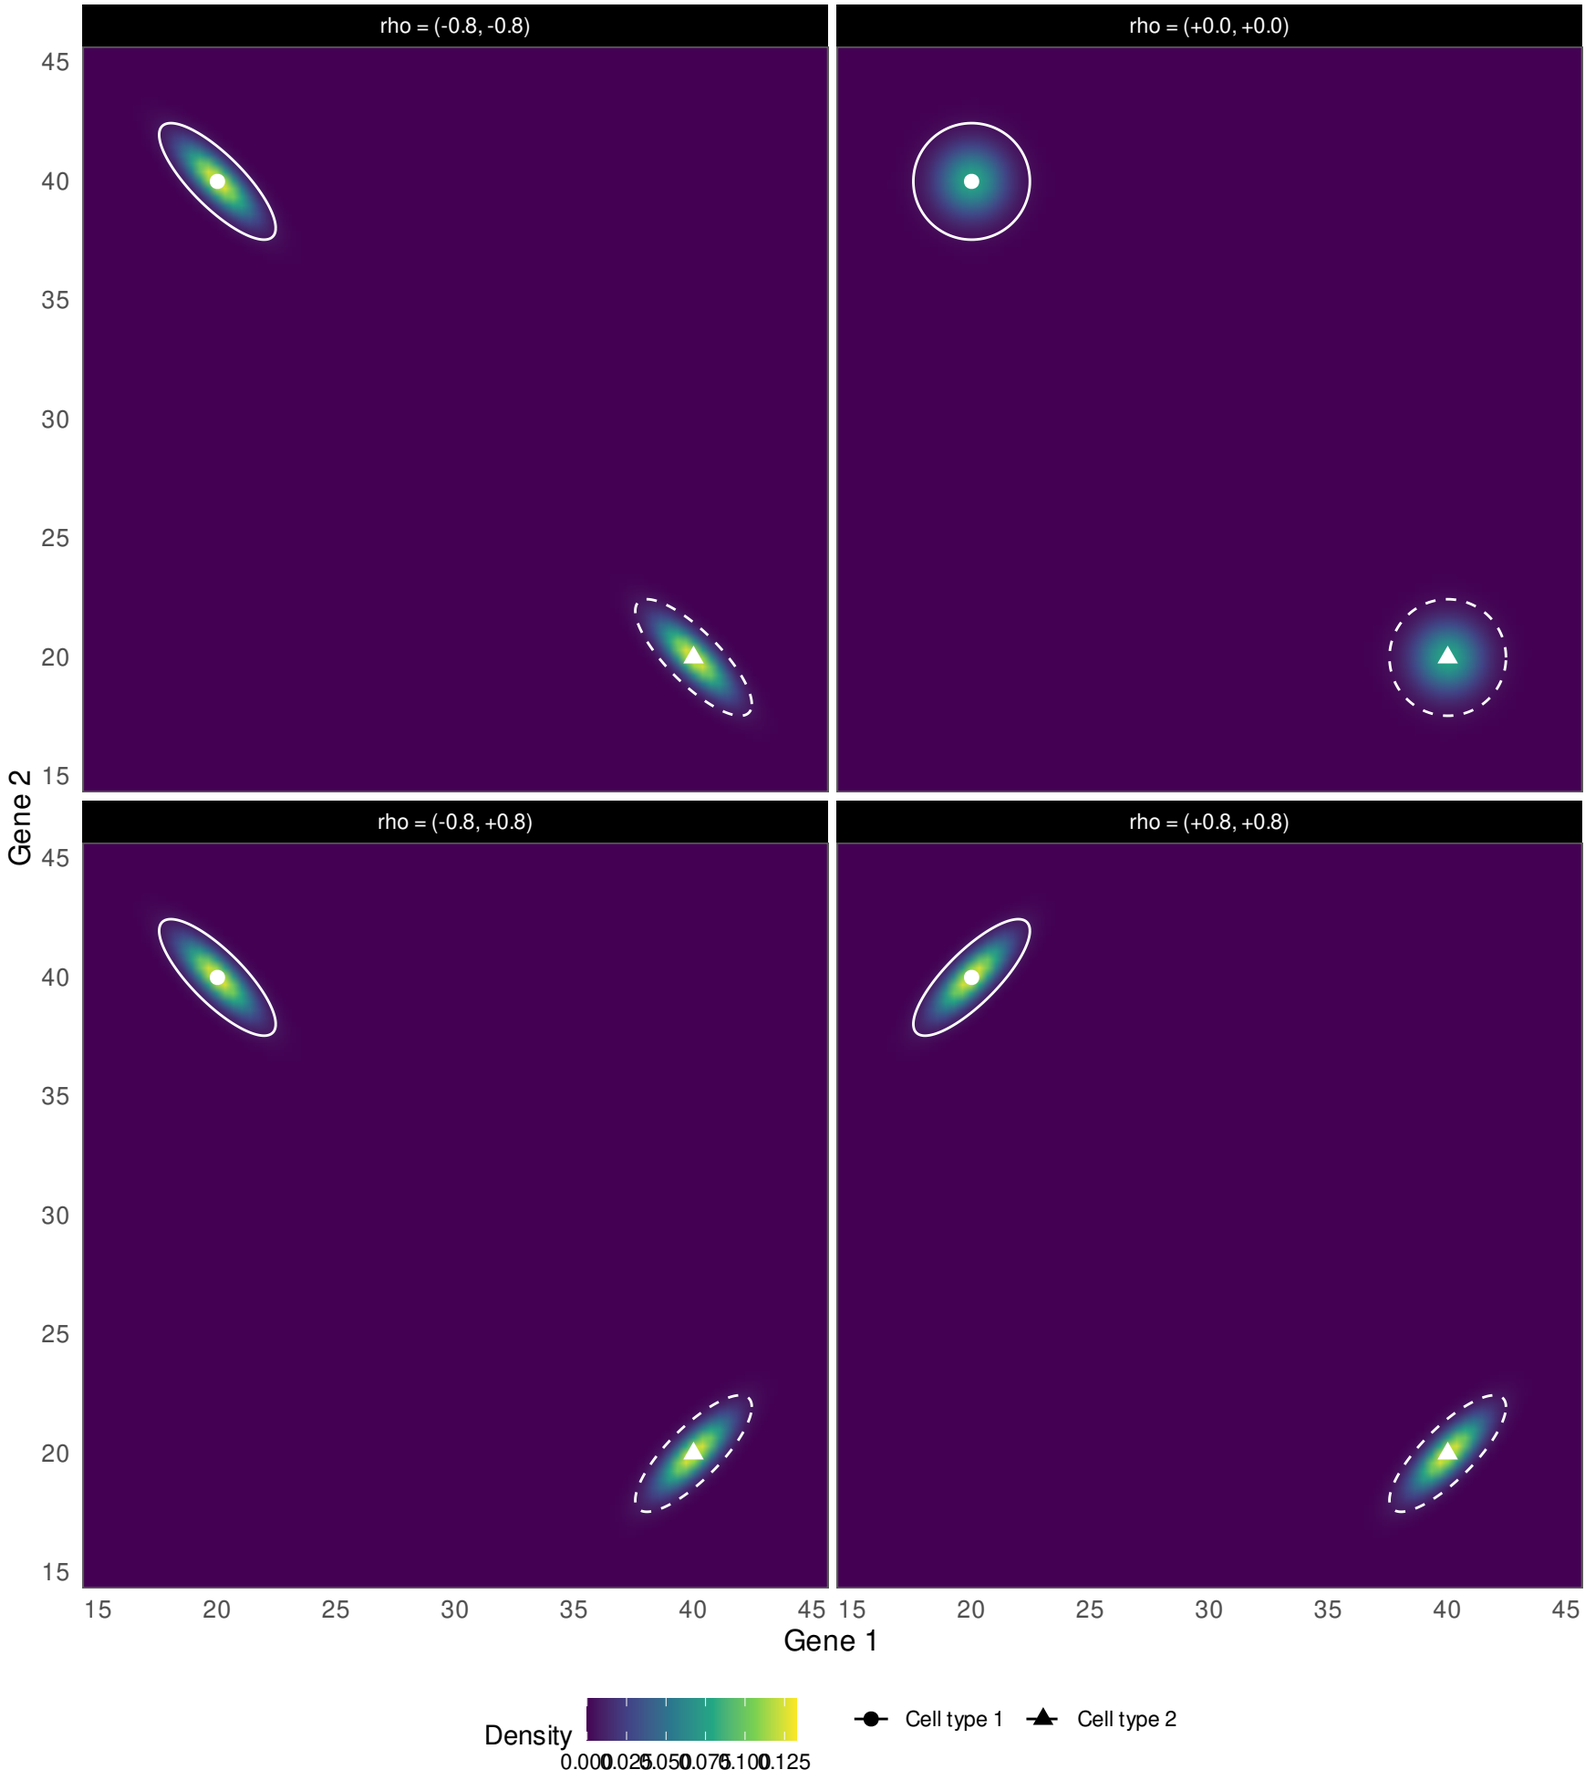

small centroid gap / heteroscedastic / highly unbalanced

Fill: exact density of sum_j p_j N(mu_j, Sigma_j), not the bulk law. Outlines: 95% regions of each purified type; points: centroids.

Purified cell-type laws, weighted by the composition

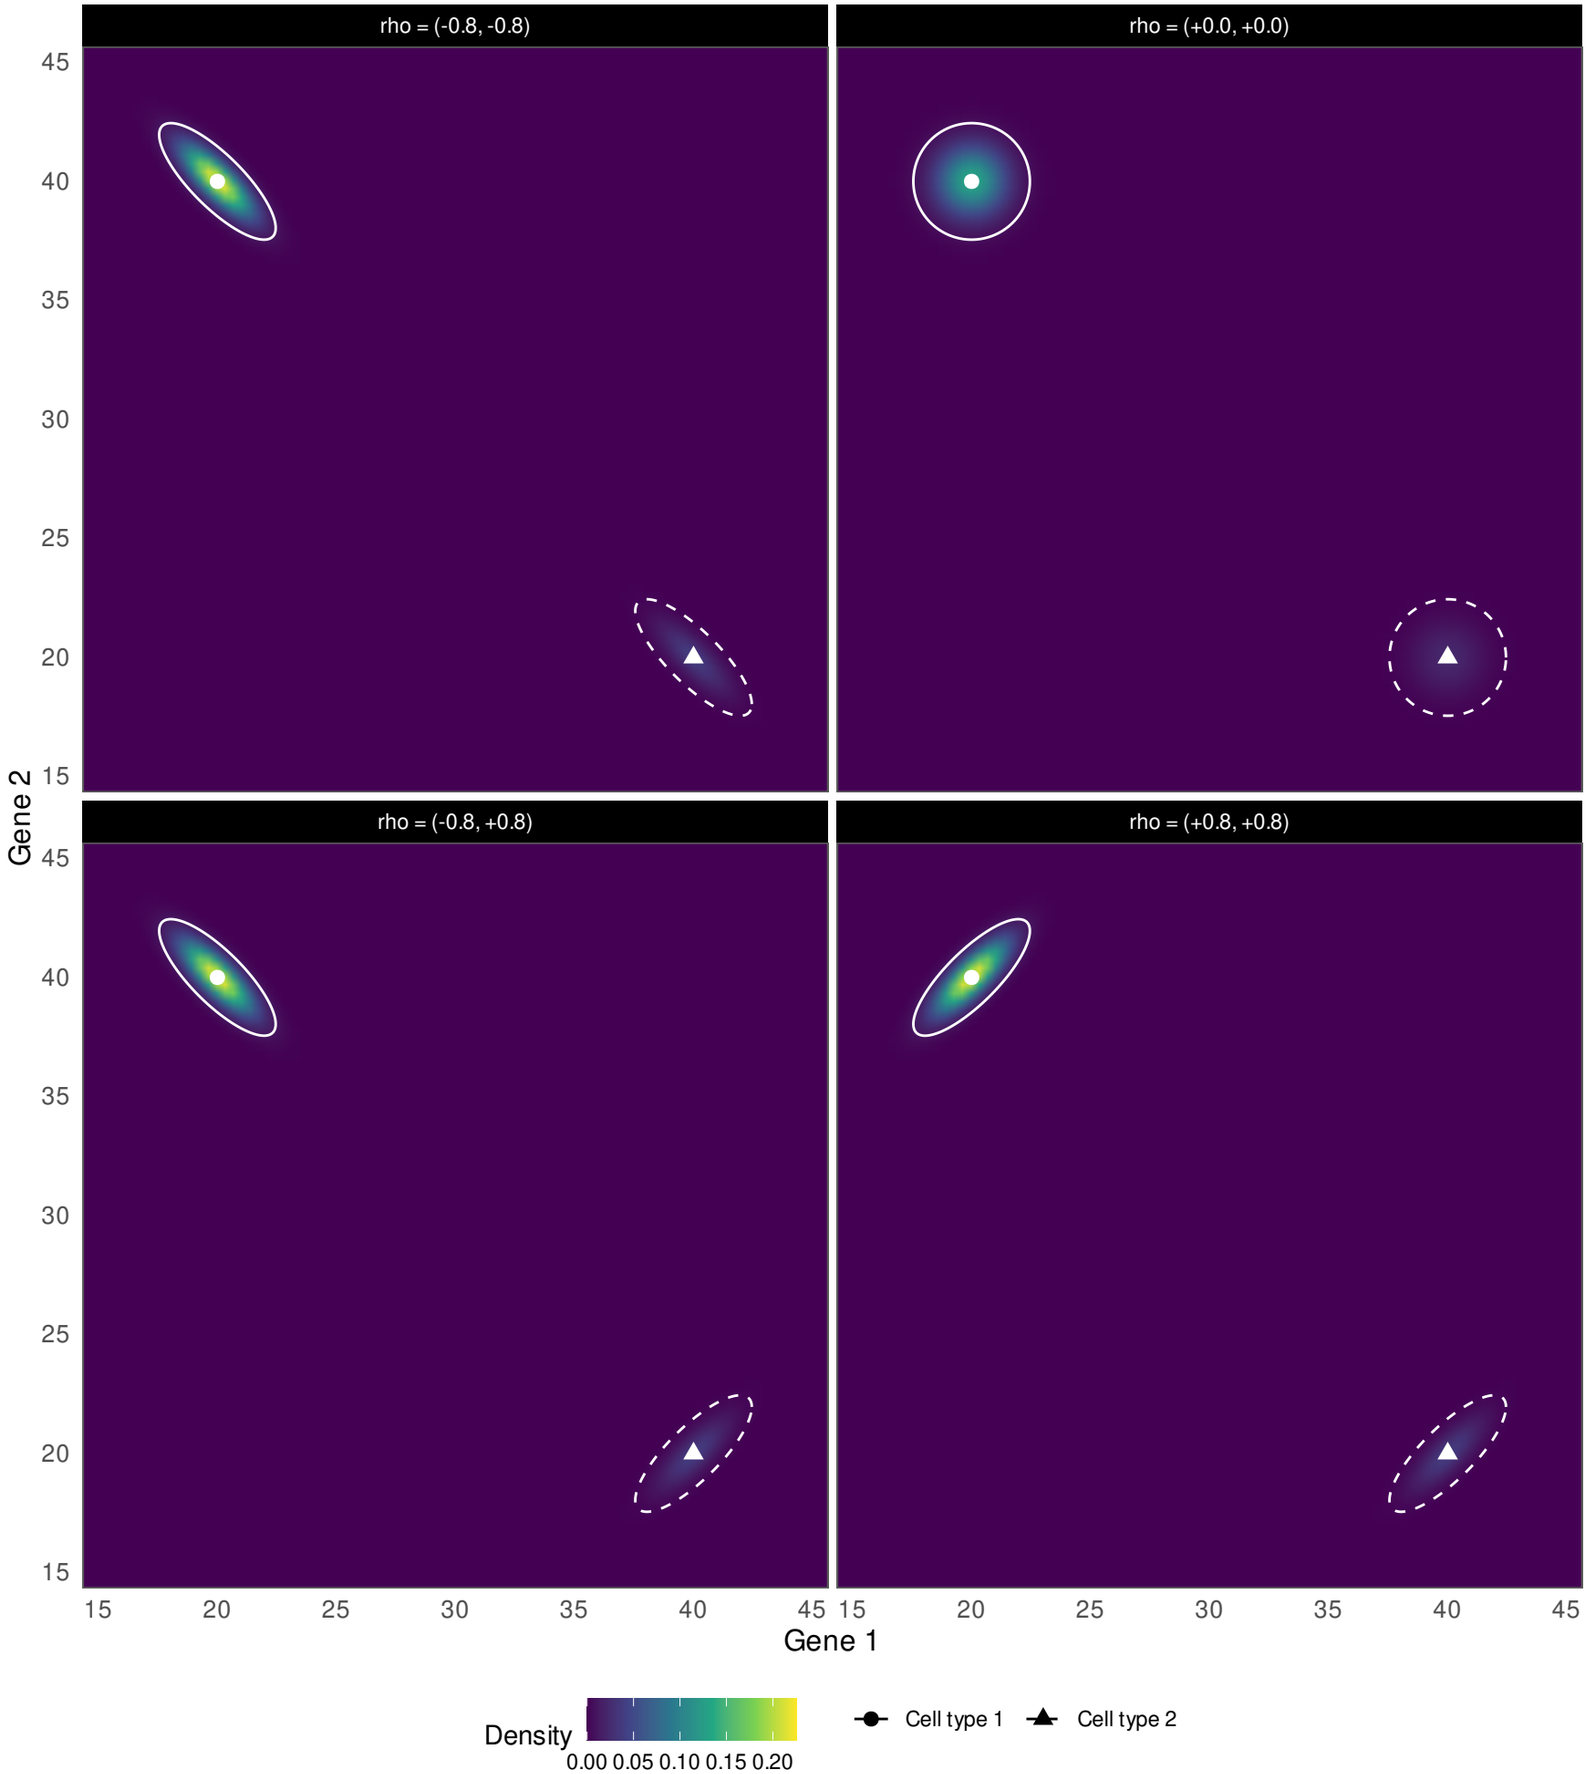

large centroid gap / homoscedastic / balanced

Fill: exact density of sum_j p_j N(mu_j, Sigma_j), not the bulk law. Outlines: 95% regions of each purified type; points: centroids.

Purified cell-type laws, weighted by the composition

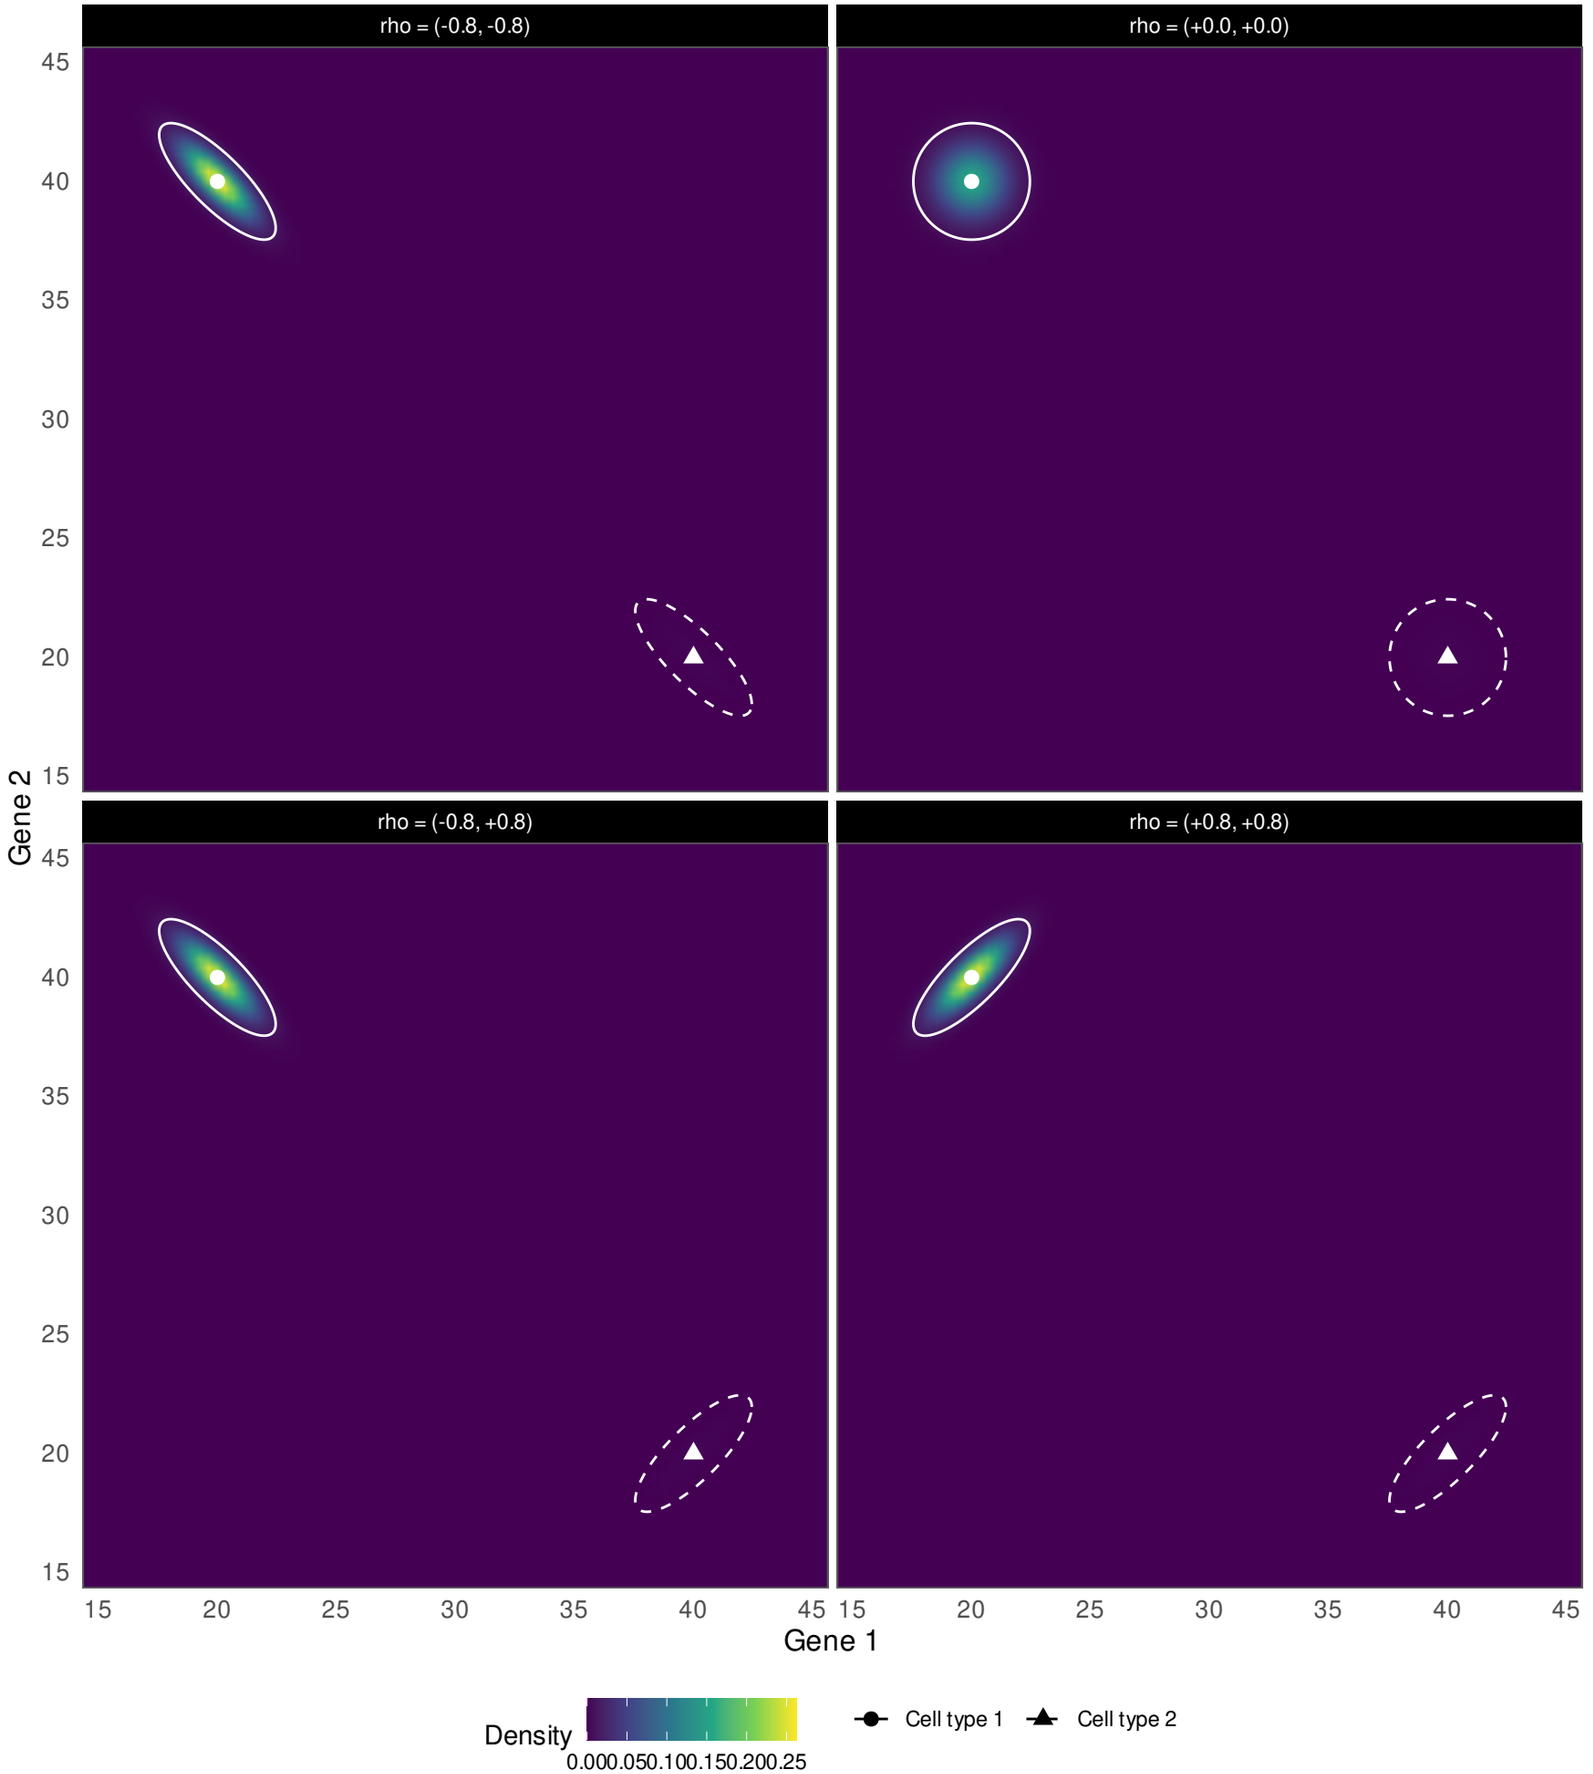

large centroid gap / homoscedastic / moderately unbalanced

Fill: exact density of sum_j p_j N(mu_j, Sigma_j), not the bulk law. Outlines: 95% regions of each purified type; points: centroids.

Purified cell-type laws, weighted by the composition

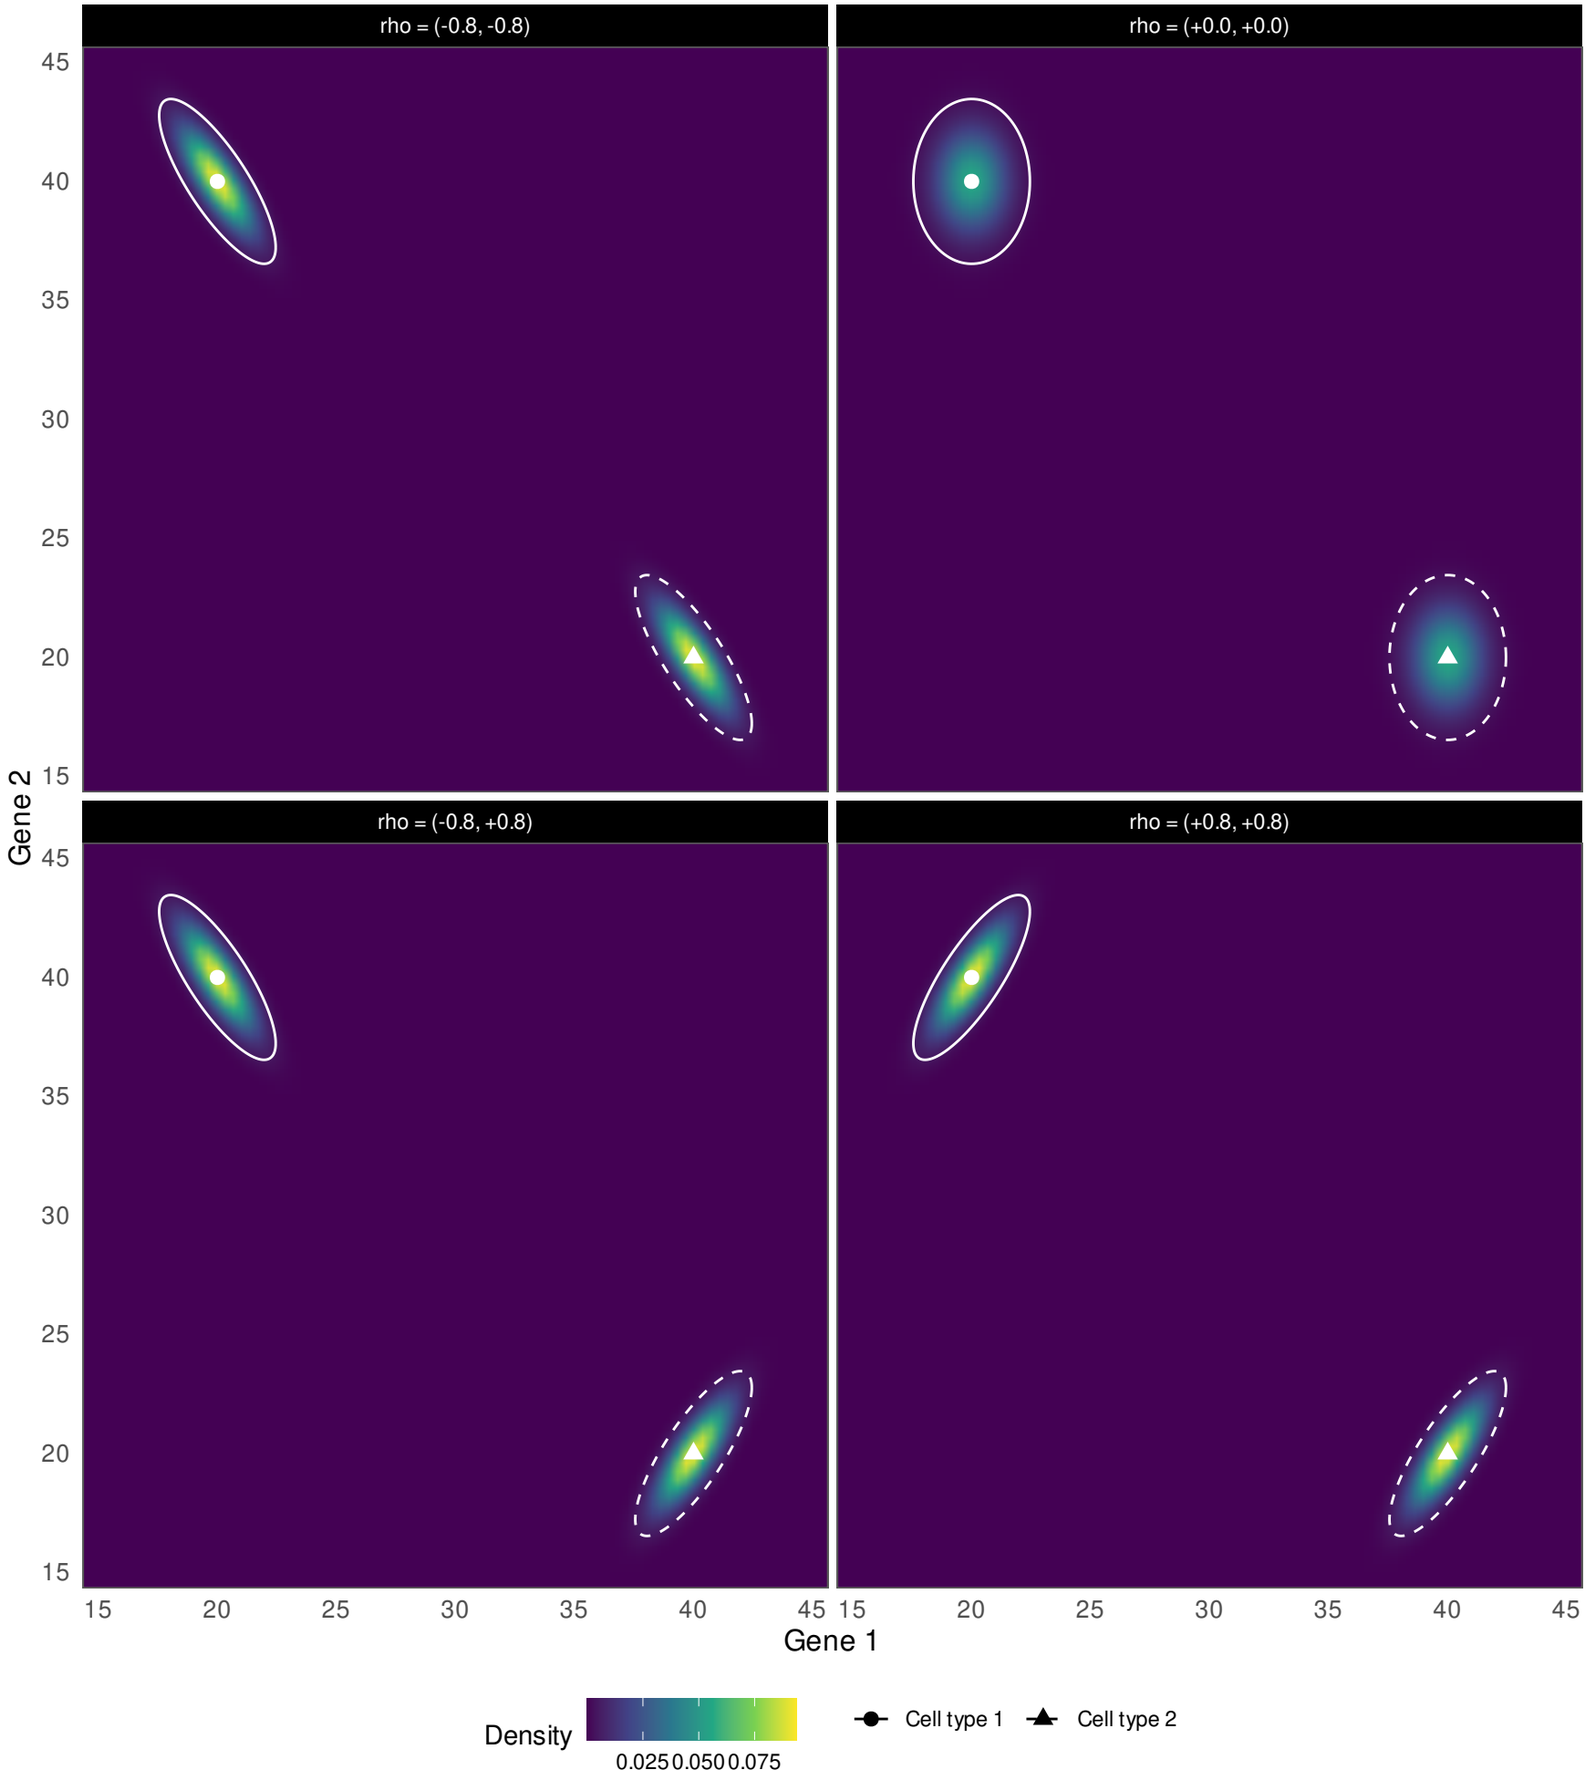

large centroid gap / homoscedastic / highly unbalanced

Fill: exact density of sum_j p_j N(mu_j, Sigma_j), not the bulk law. Outlines: 95% regions of each purified type; points: centroids.

Purified cell-type laws, weighted by the composition

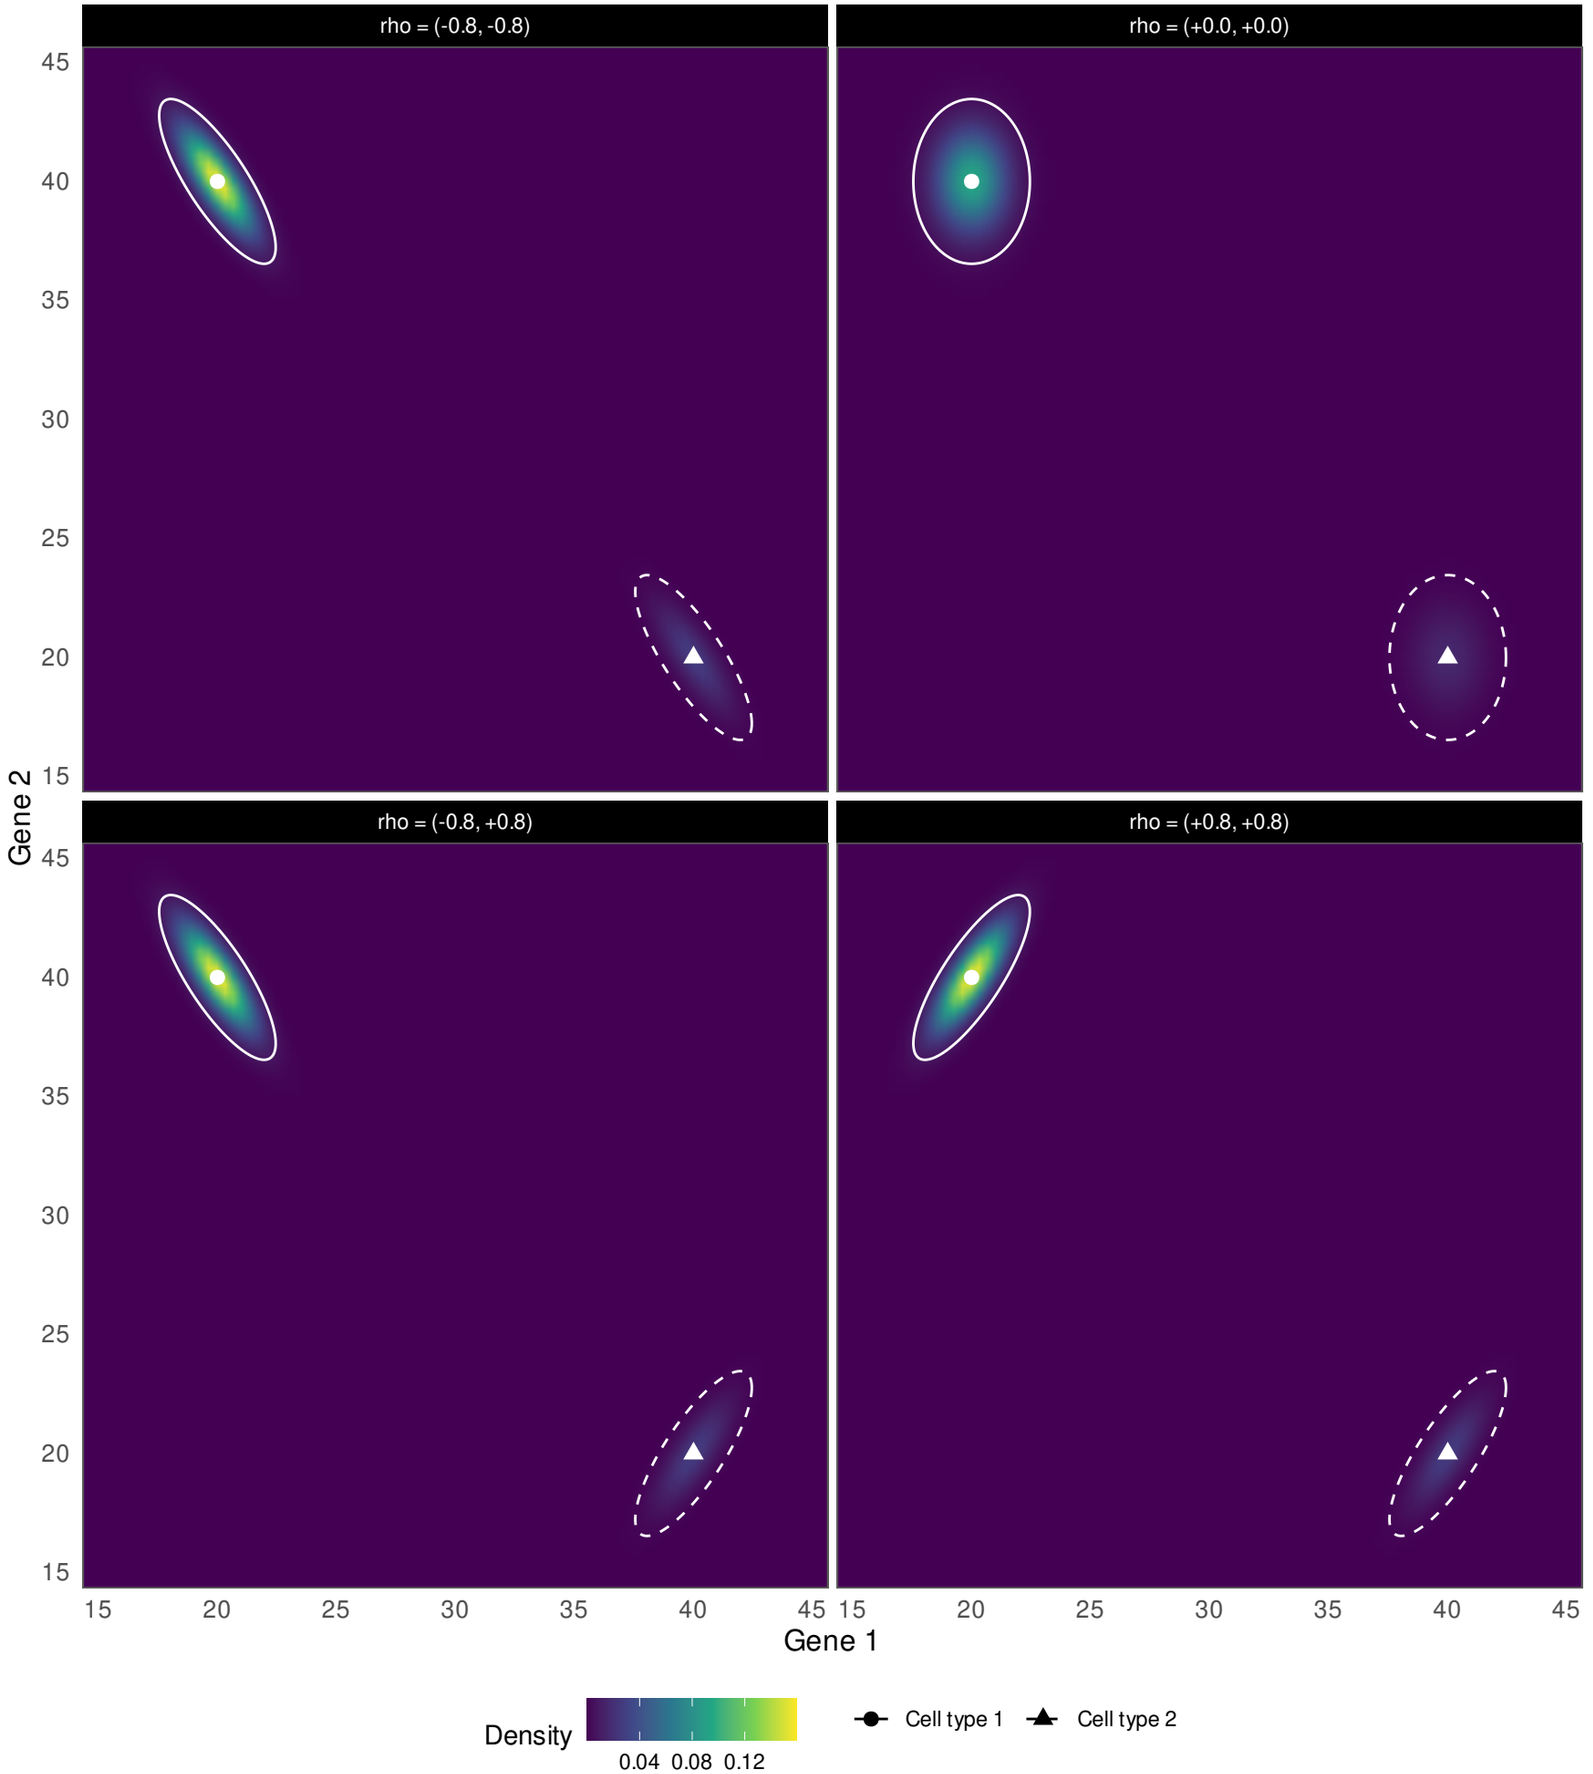

large centroid gap / heteroscedastic / balanced
