Accuracy of every method: colour RMSE, size Aitchison distance

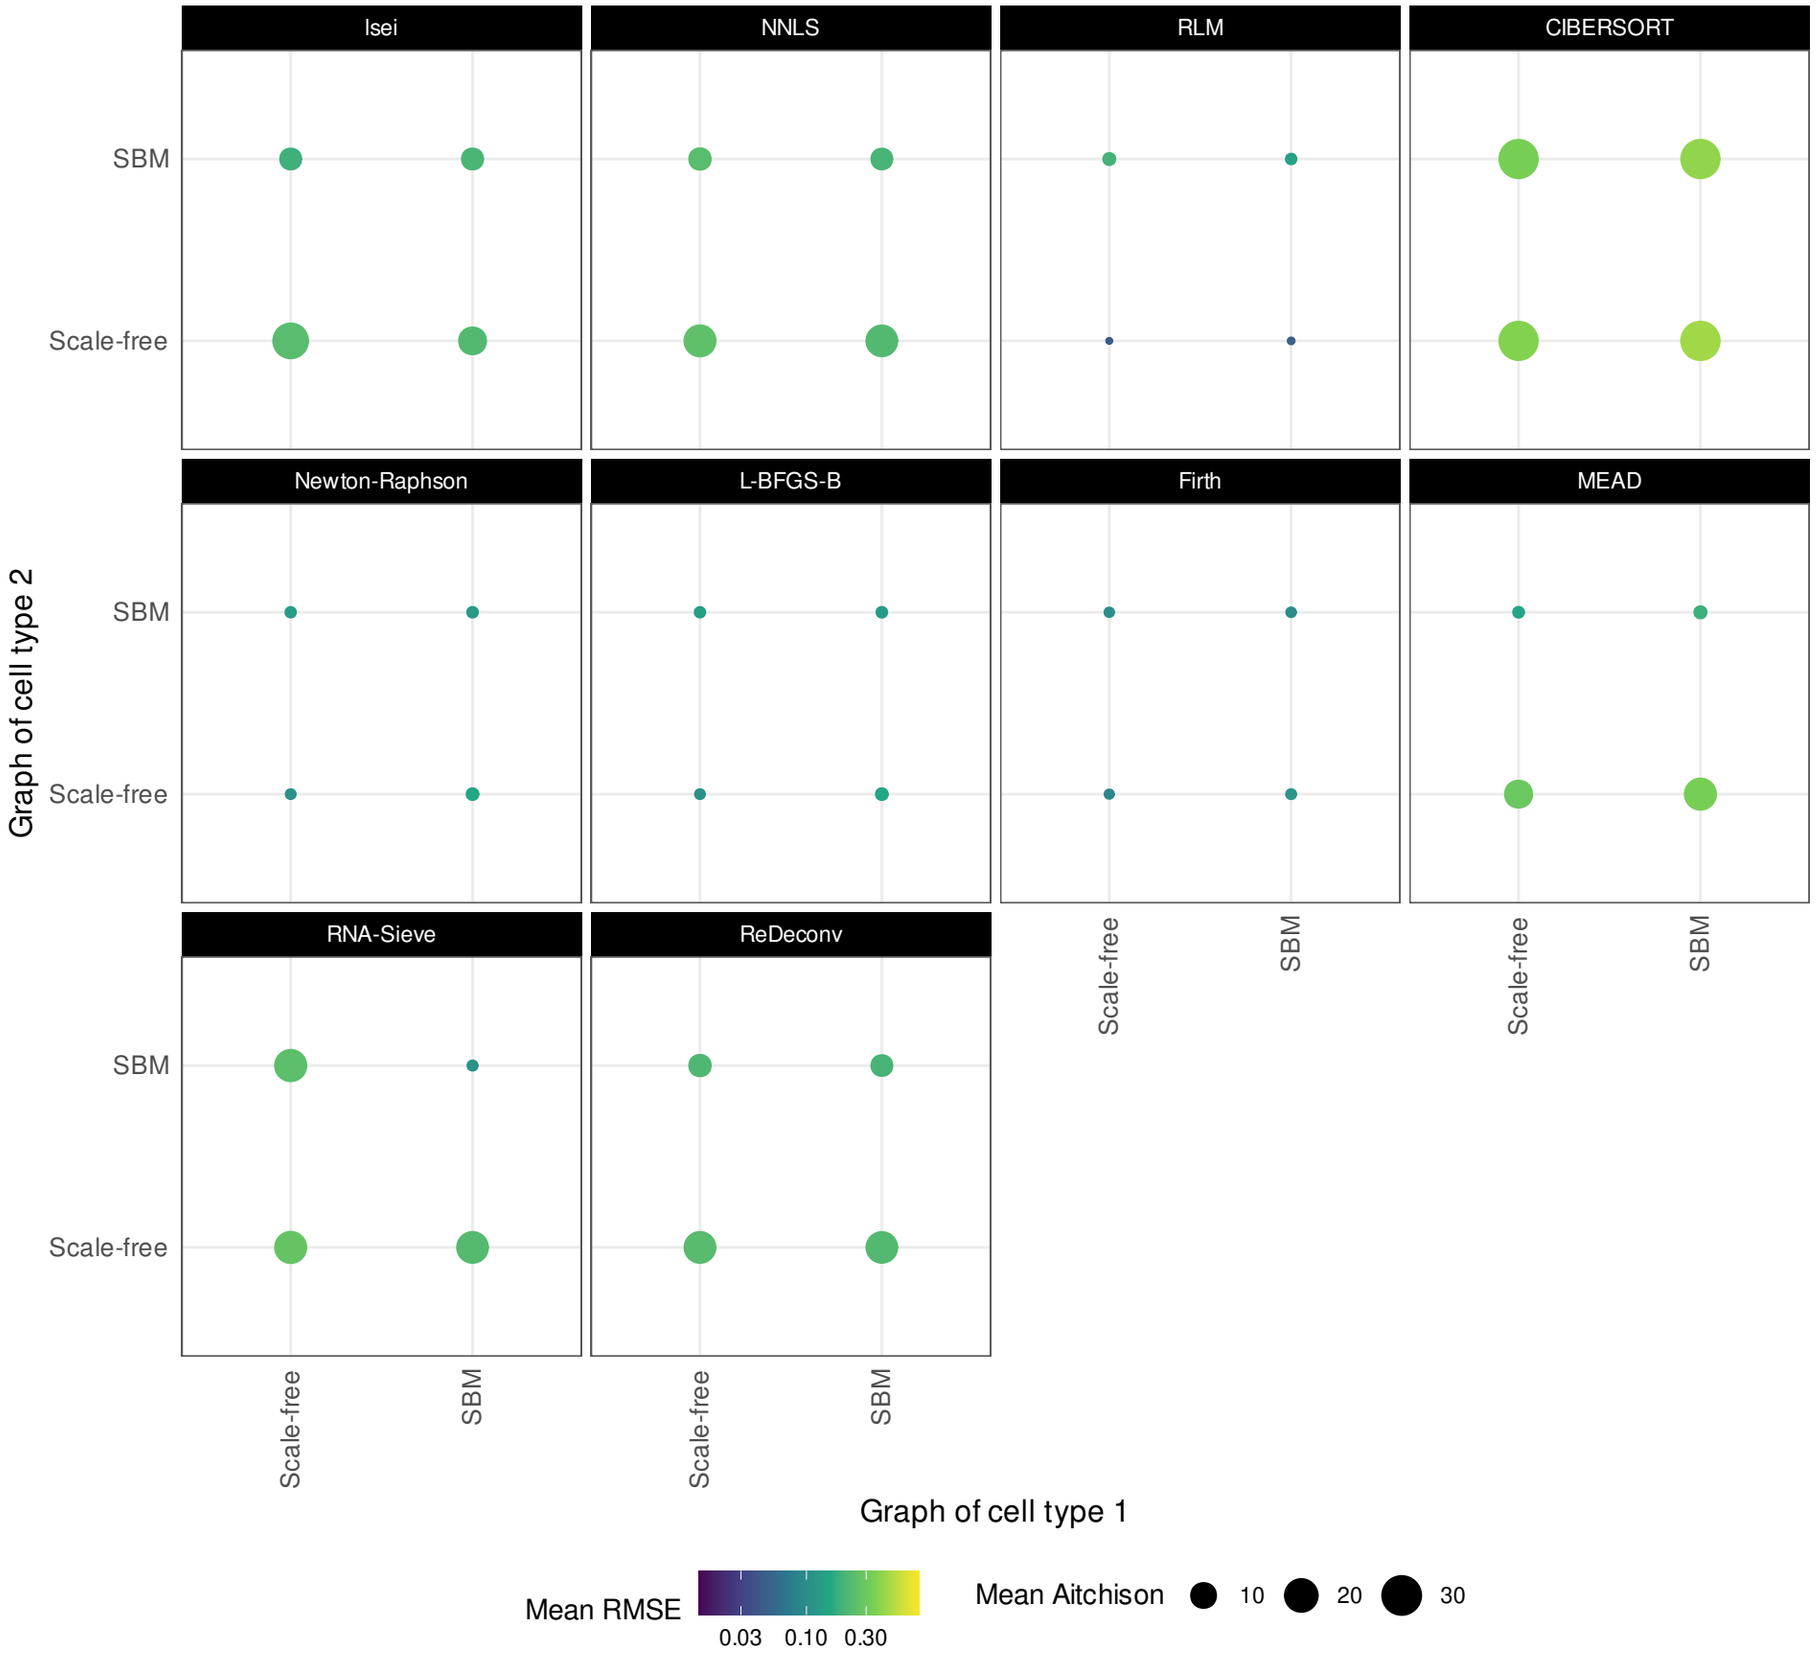

balanced / low overlap

Means over the simulated bulks; colour and size scales shared by every page.
Cross: the method returned no finite estimate for any bulk of that scenario (solver failure).

Accuracy of every method: colour RMSE, size Aitchison distance

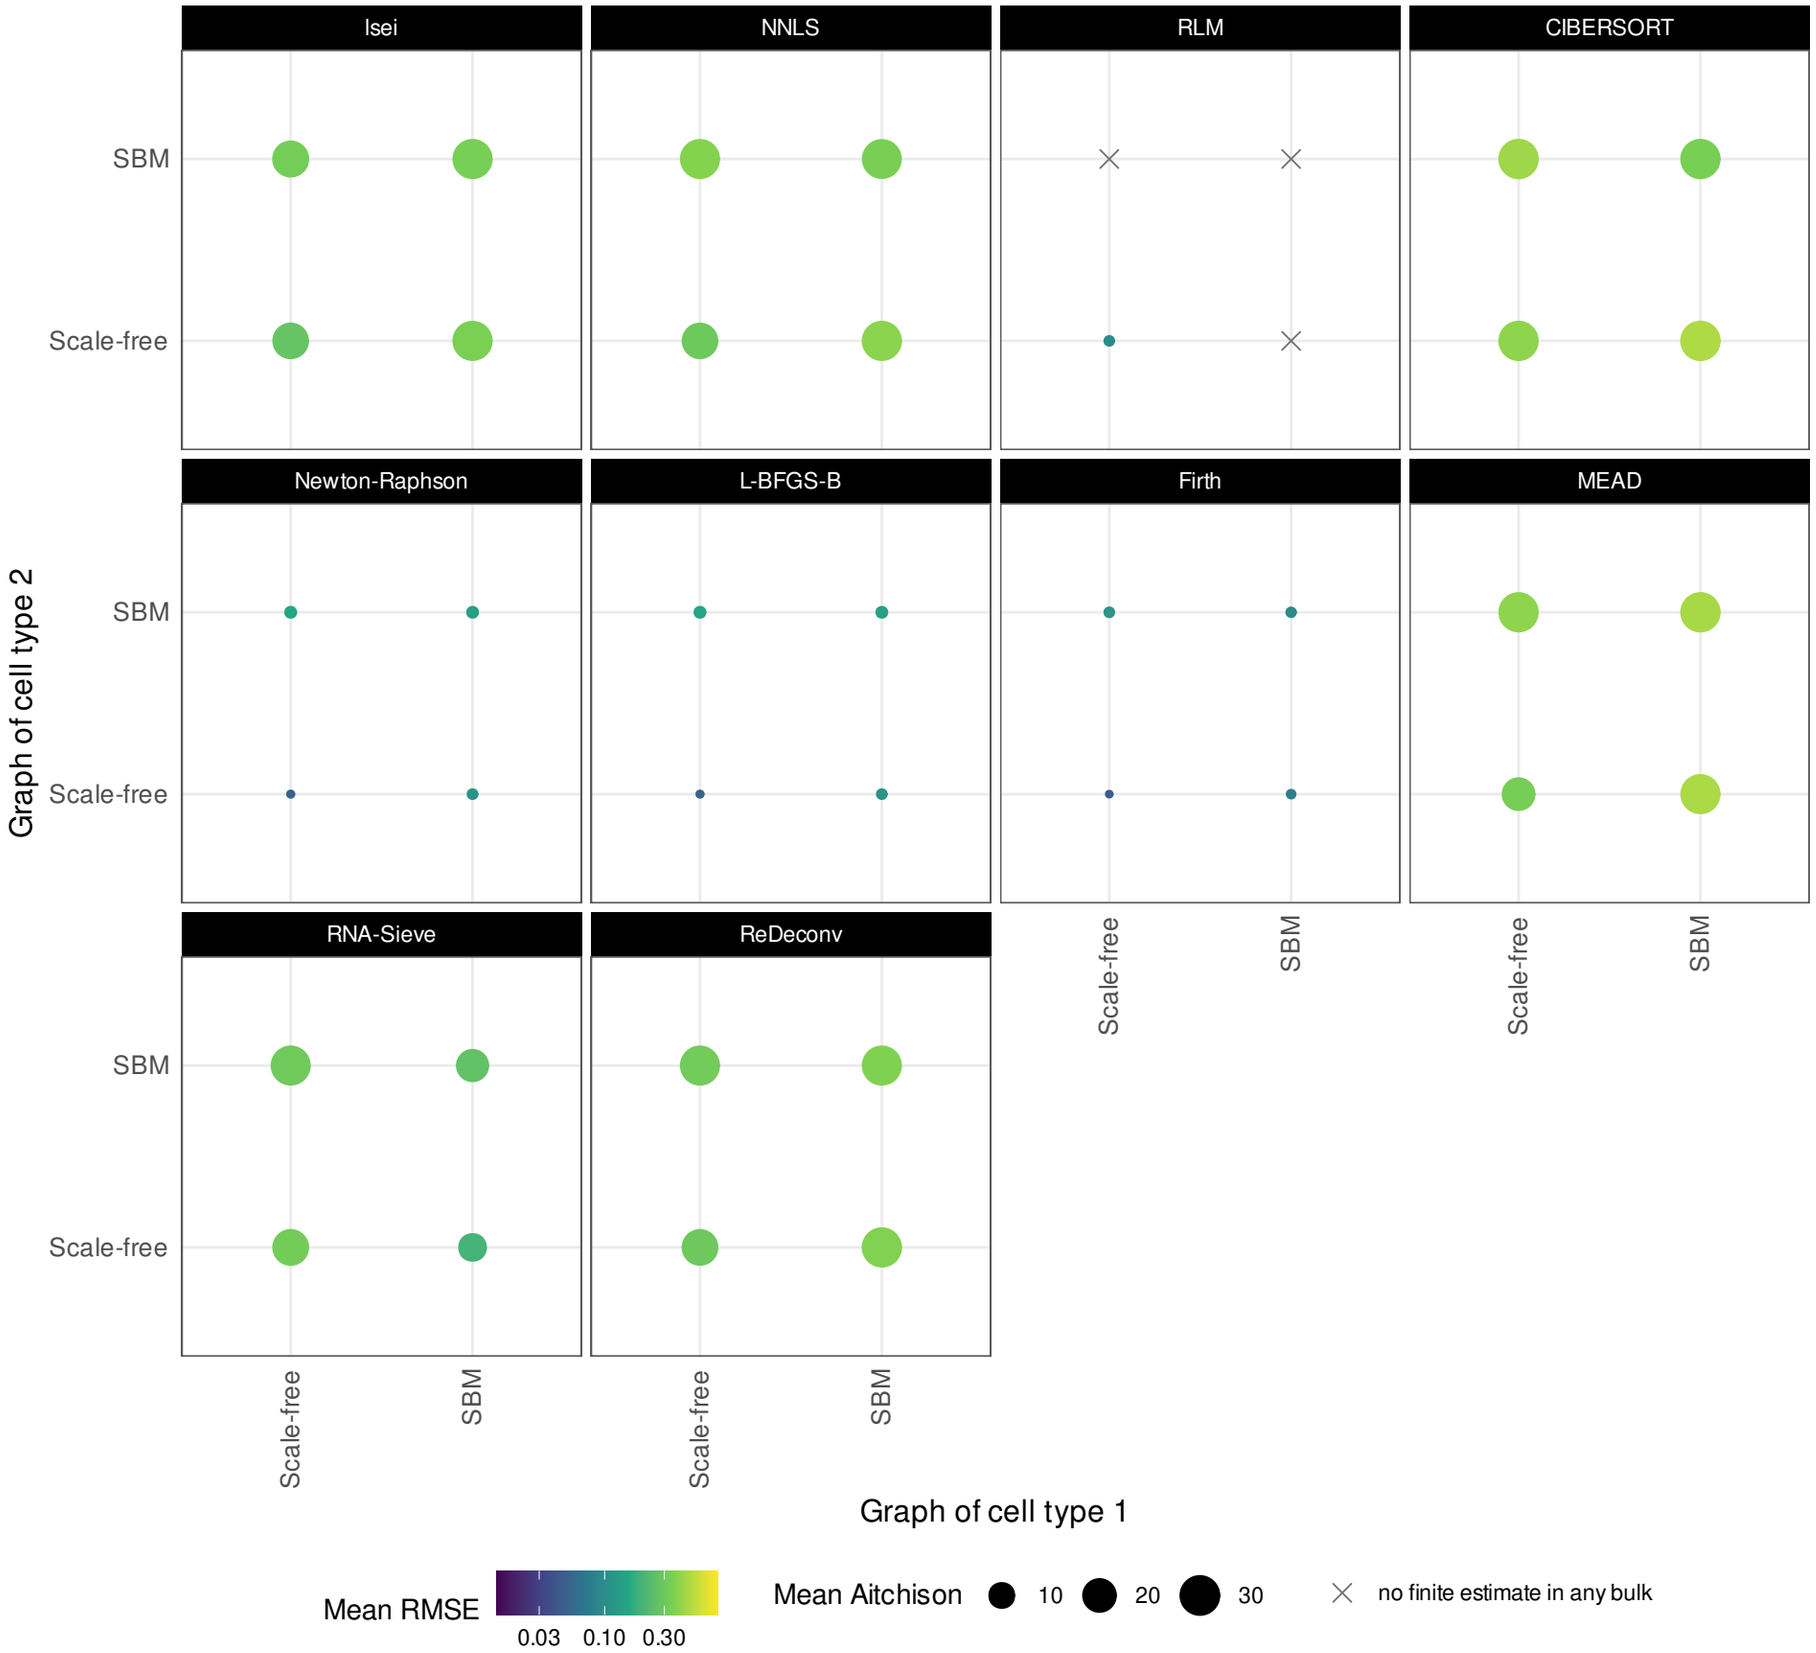

balanced / moderate overlap

Means over the simulated bulks; colour and size scales shared by every page.
Cross: the method returned no finite estimate for any bulk of that scenario (solver failure).

Accuracy of every method: colour RMSE, size Aitchison distance

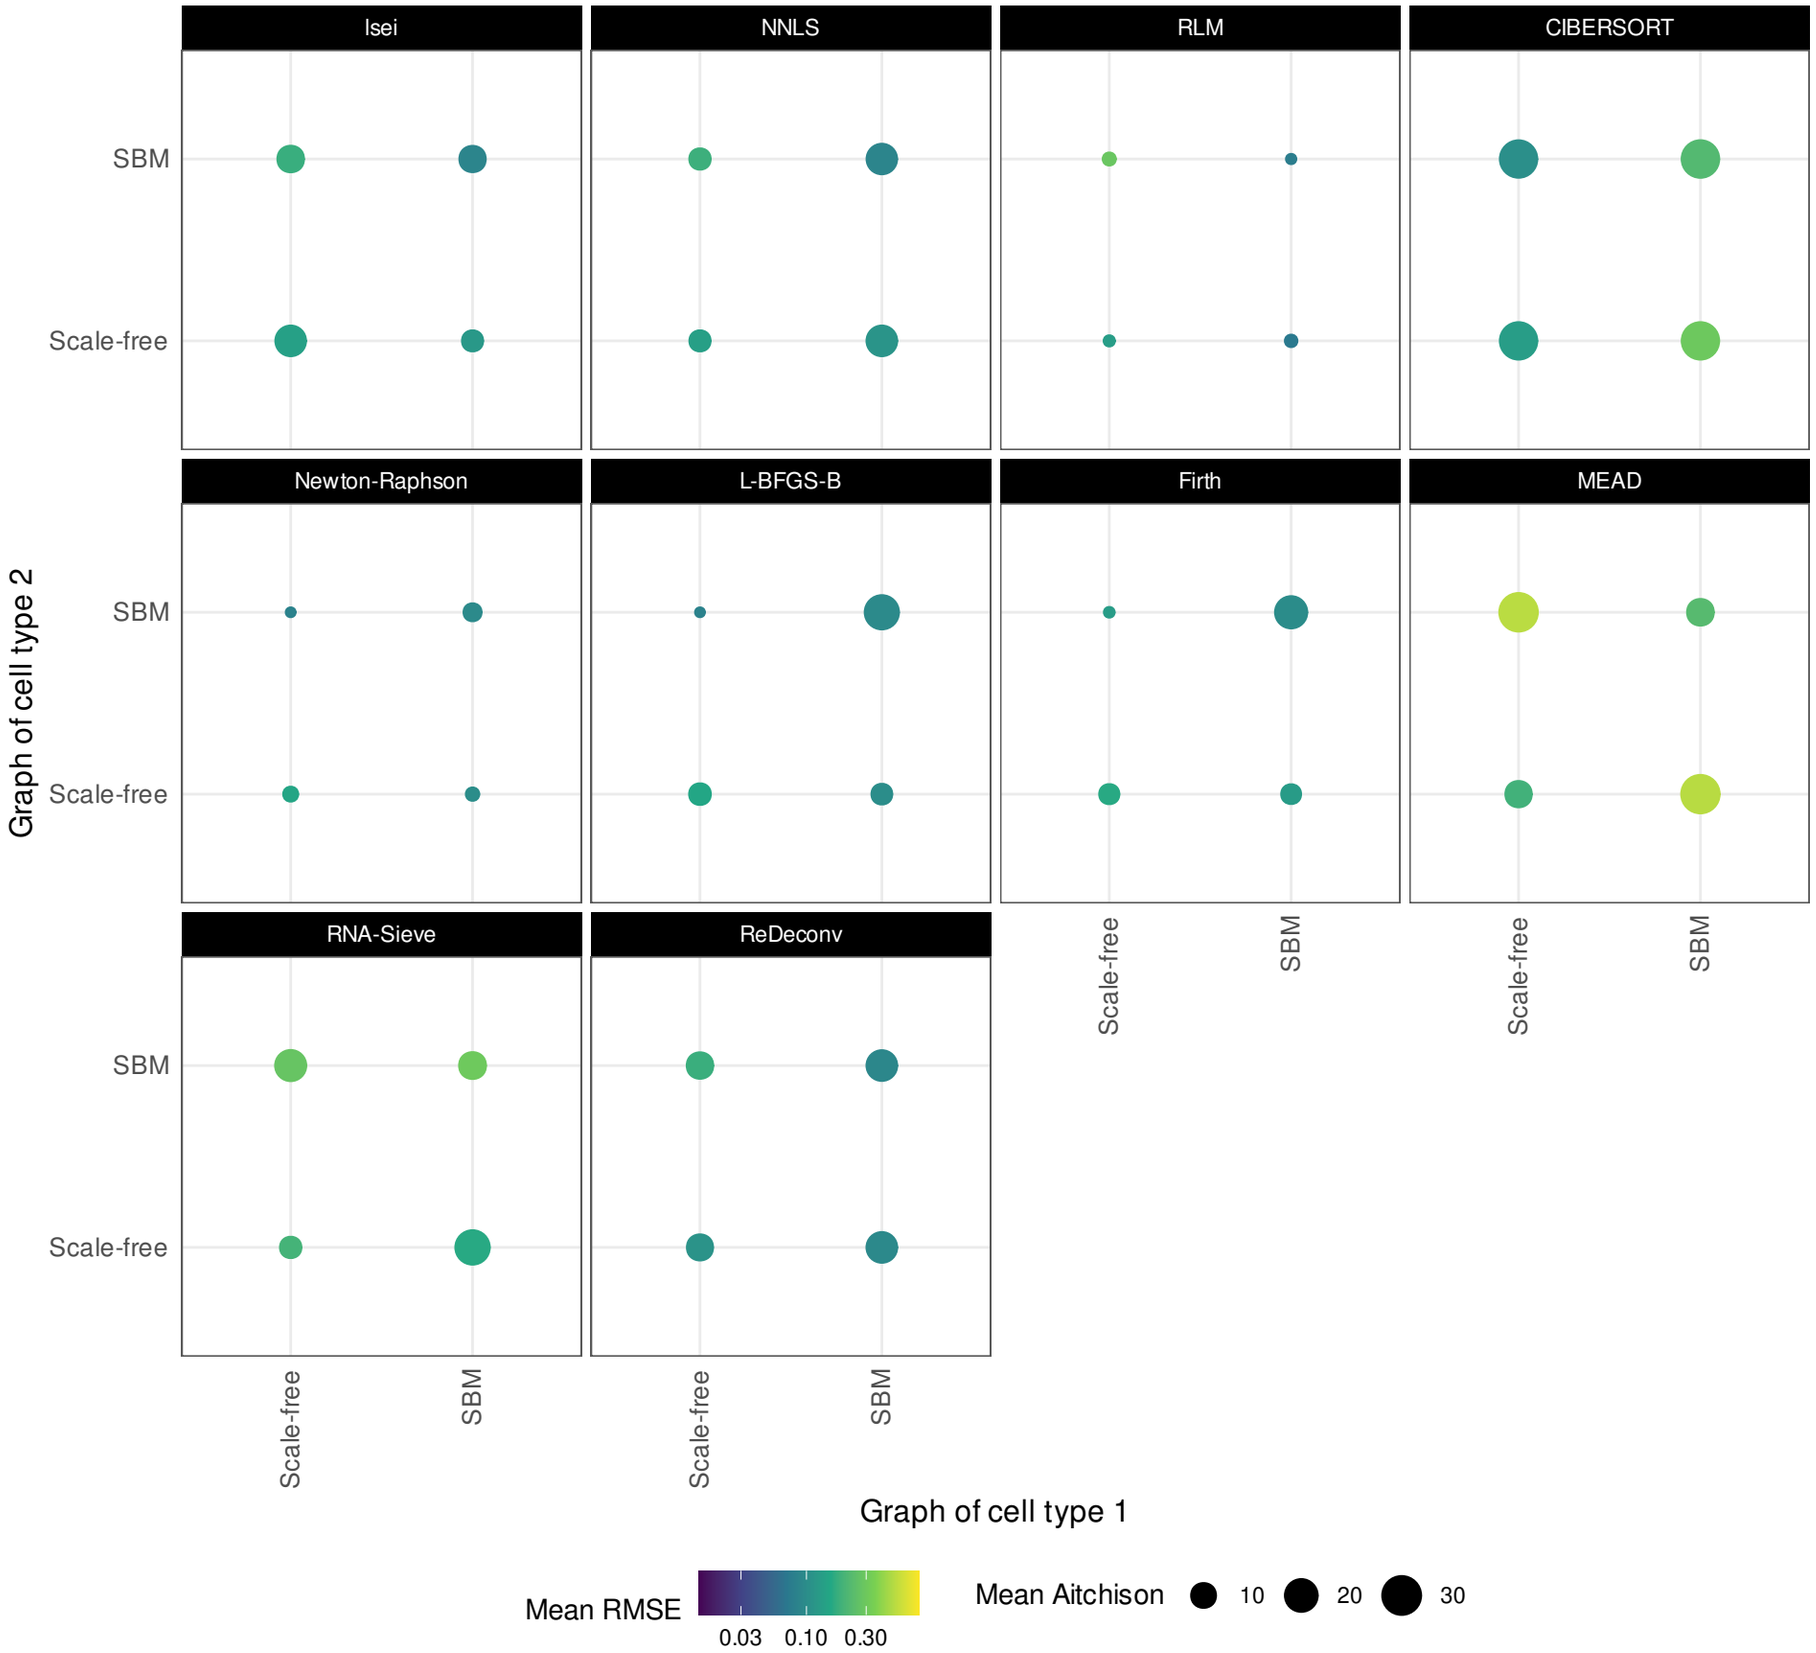

balanced / high overlap

Means over the simulated bulks; colour and size scales shared by every page.
Cross: the method returned no finite estimate for any bulk of that scenario (solver failure).

Accuracy of every method: colour RMSE, size Aitchison distance

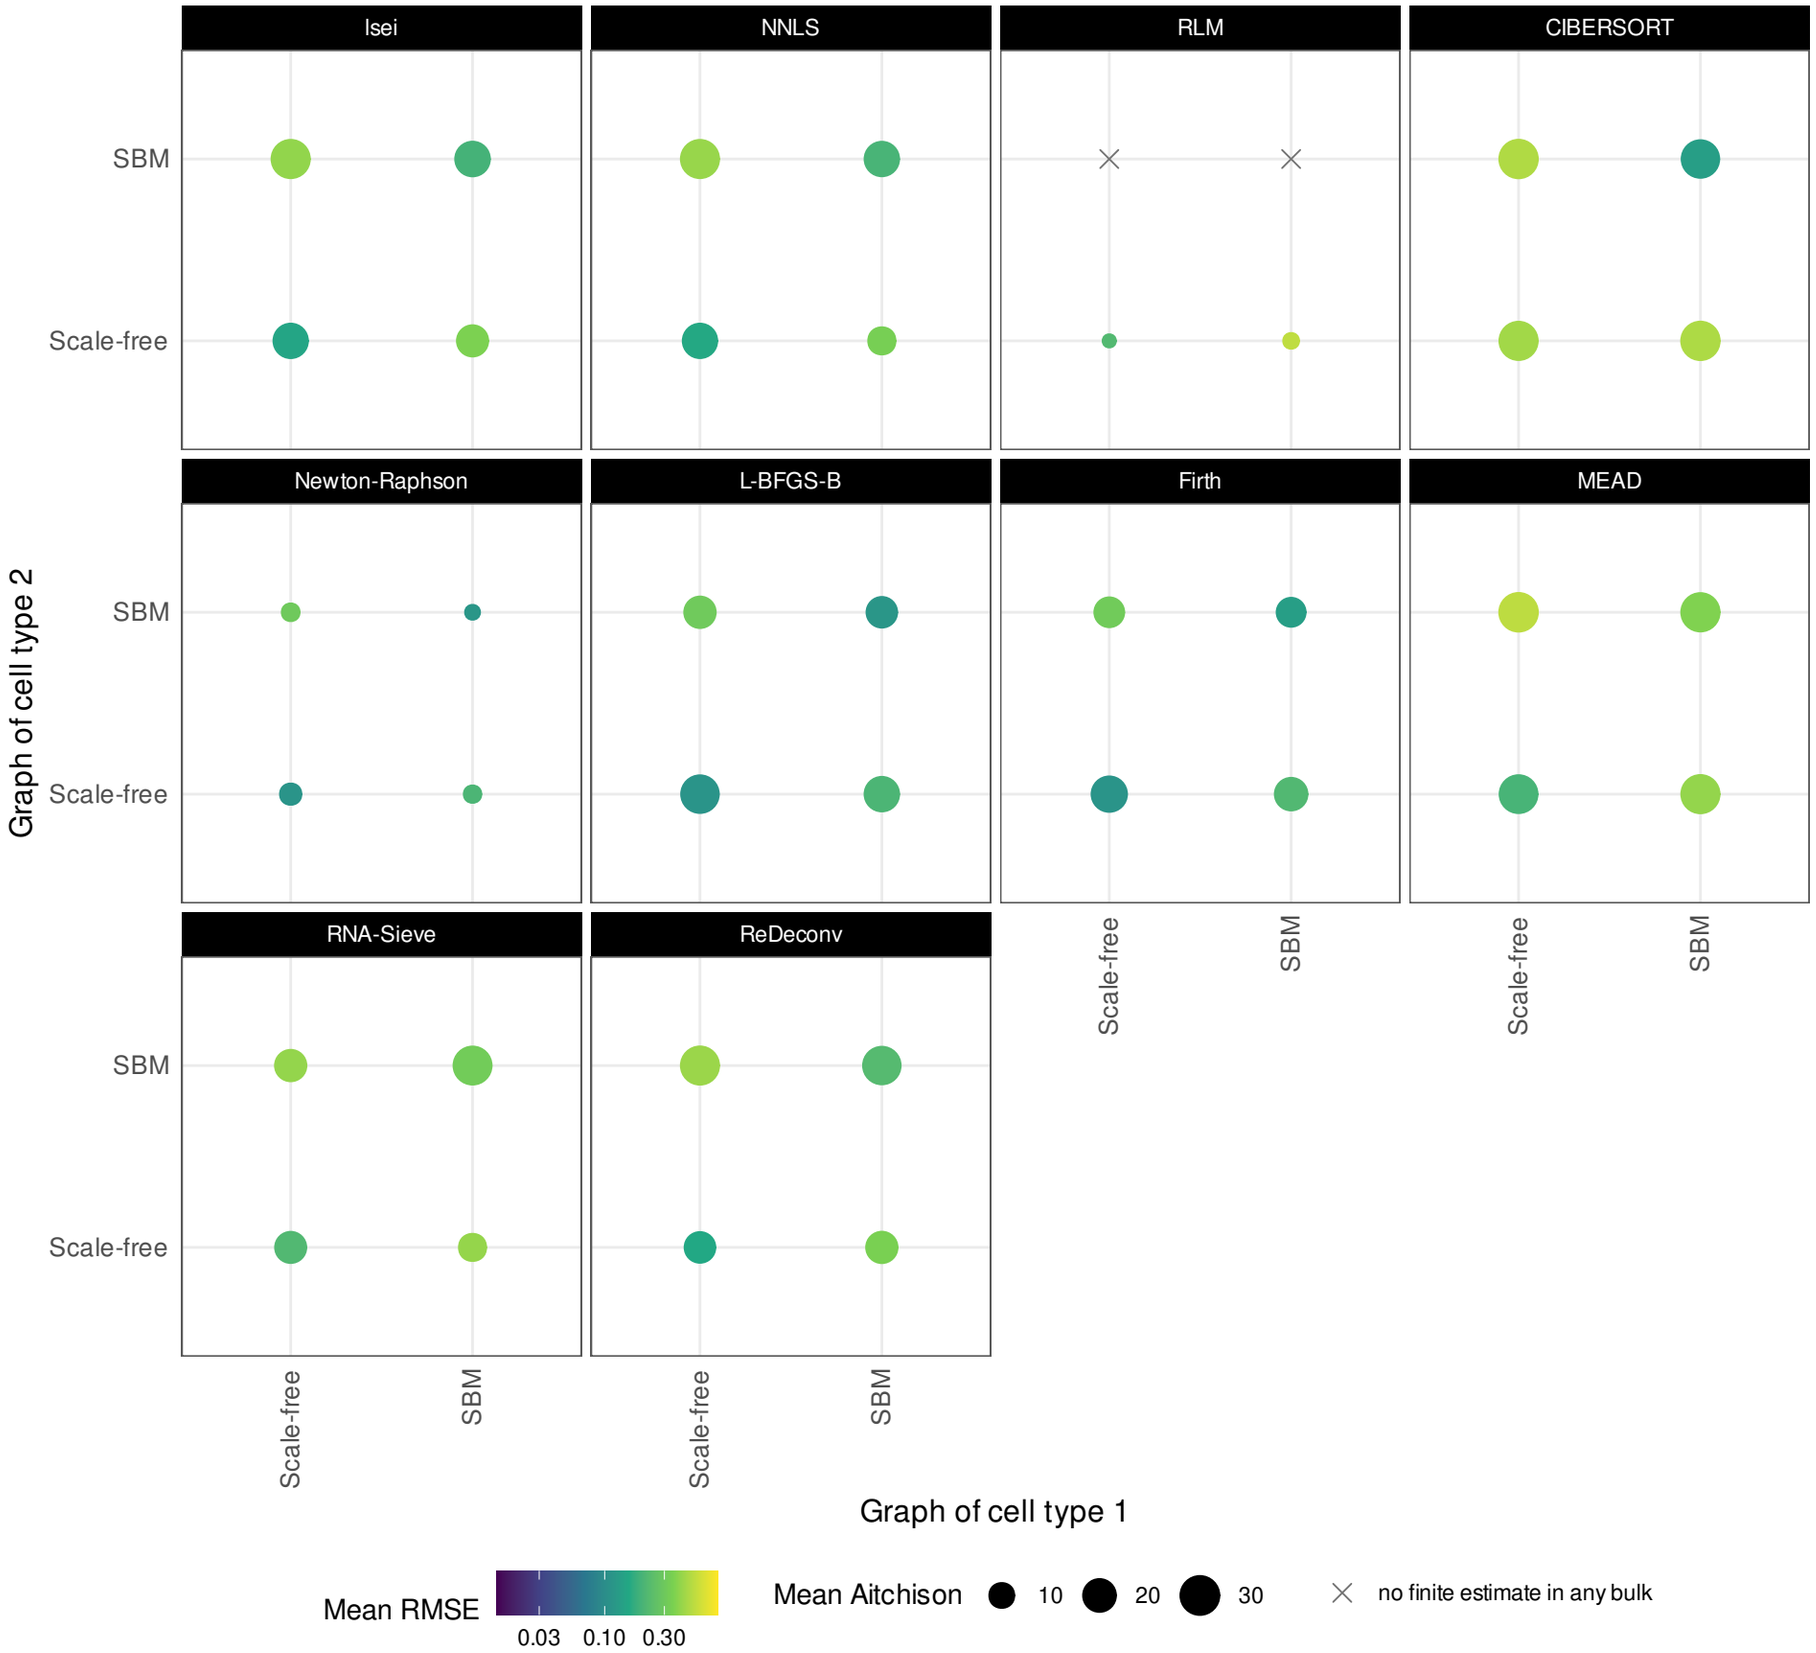

moderately unbalanced / low overlap

Means over the simulated bulks; colour and size scales shared by every page.
Cross: the method returned no finite estimate for any bulk of that scenario (solver failure).

Accuracy of every method: colour RMSE, size Aitchison distance

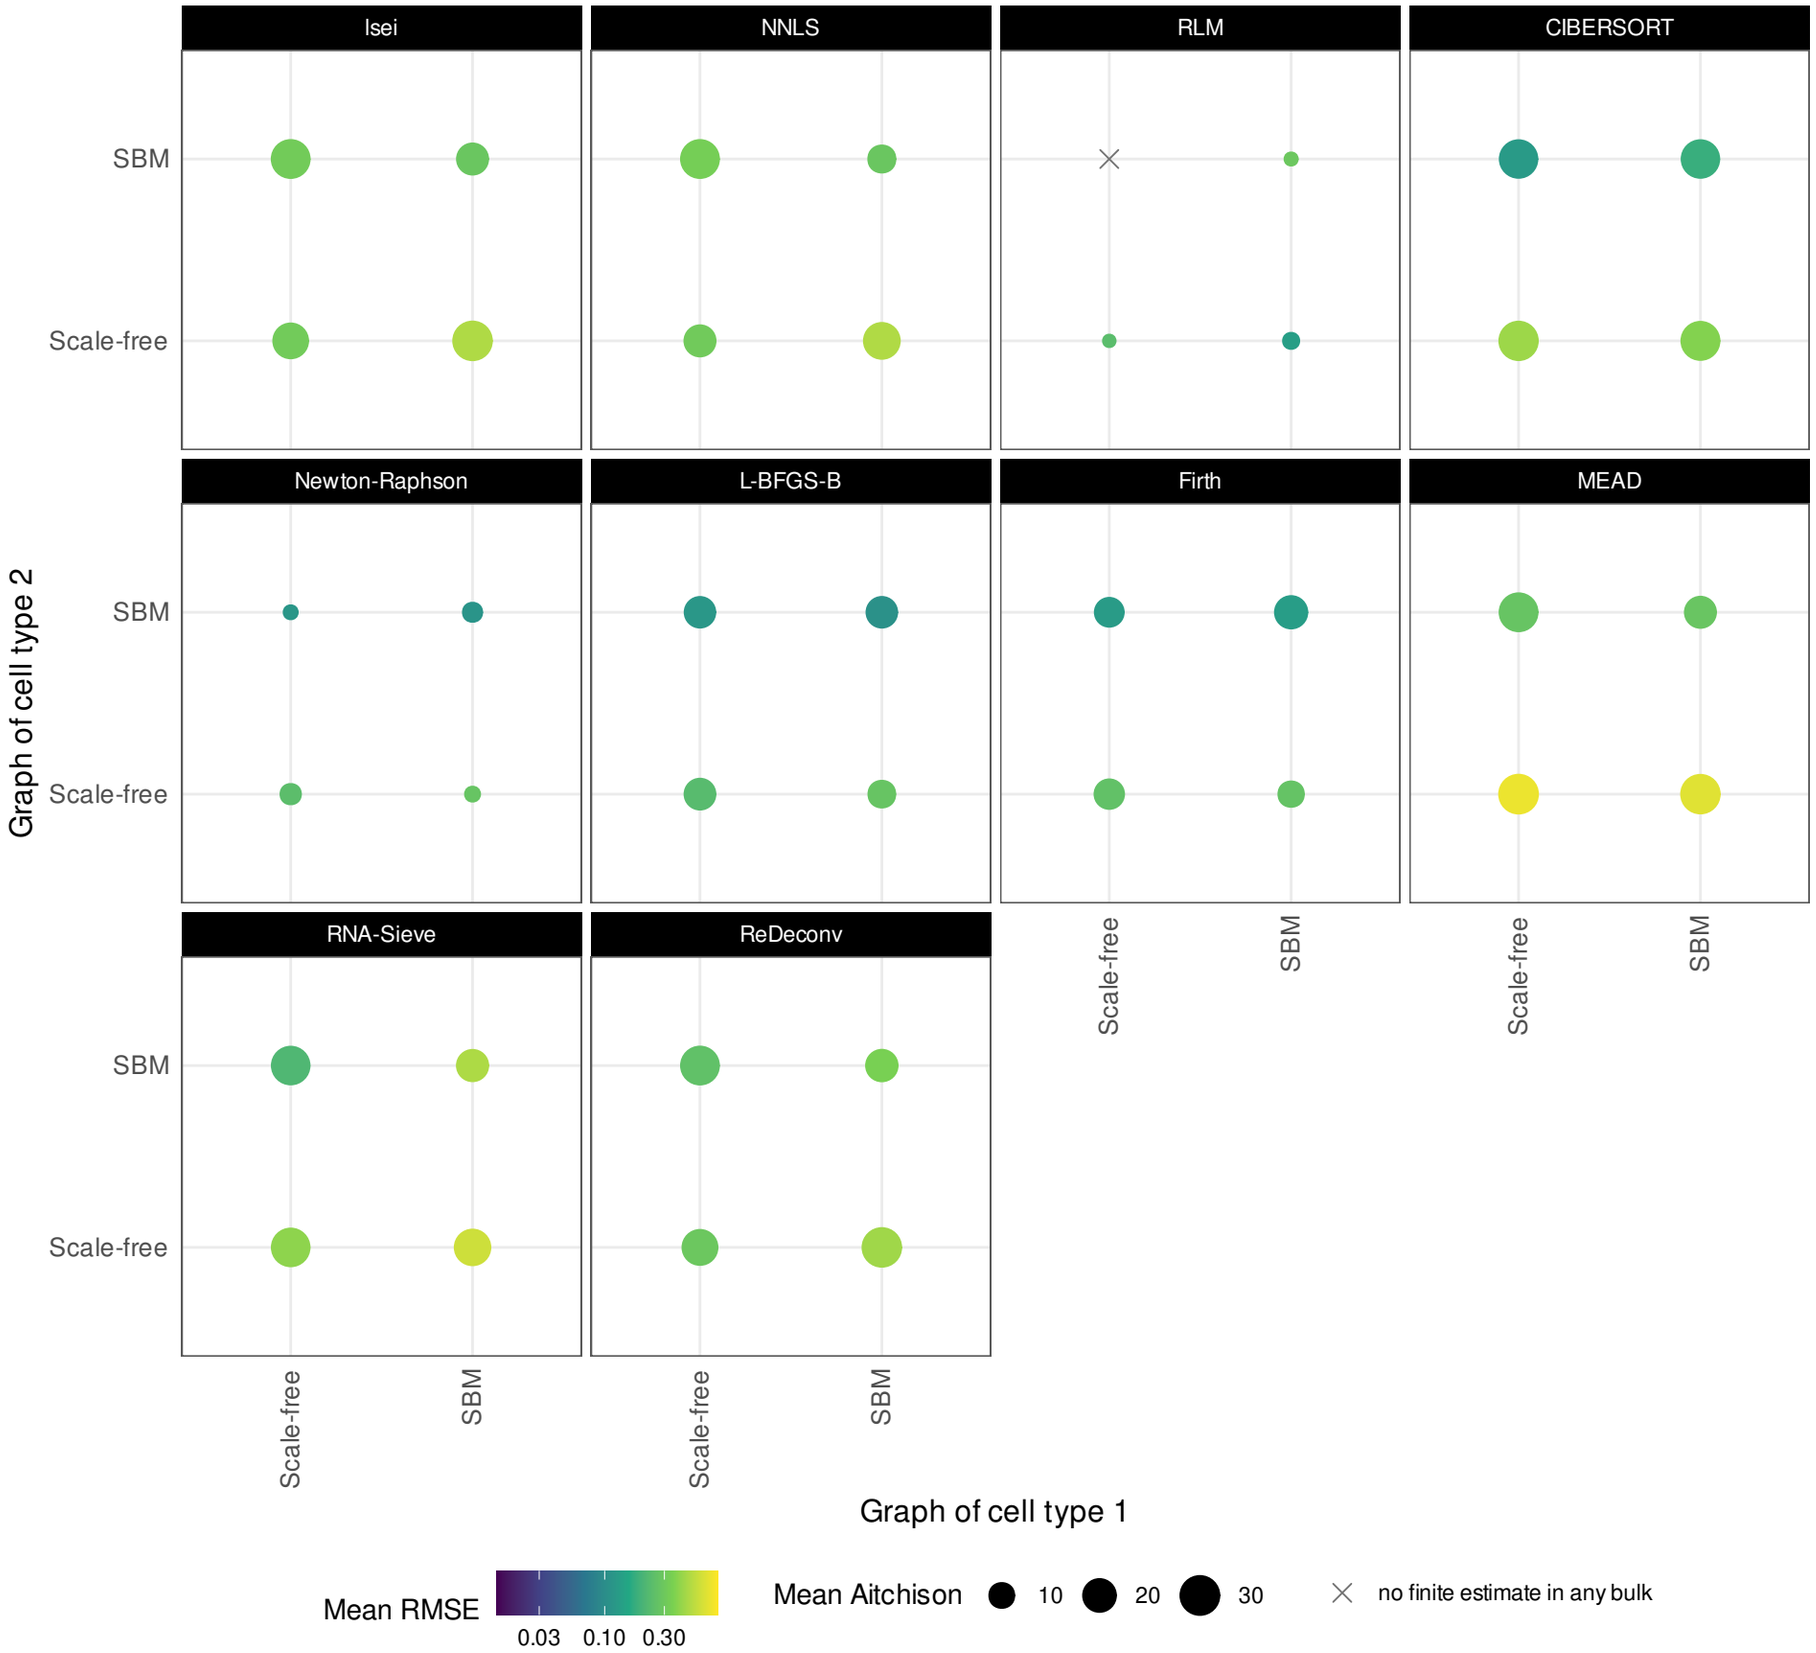

moderately unbalanced / moderate overlap

Means over the simulated bulks; colour and size scales shared by every page.
Cross: the method returned no finite estimate for any bulk of that scenario (solver failure).

Accuracy of every method: colour RMSE, size Aitchison distance

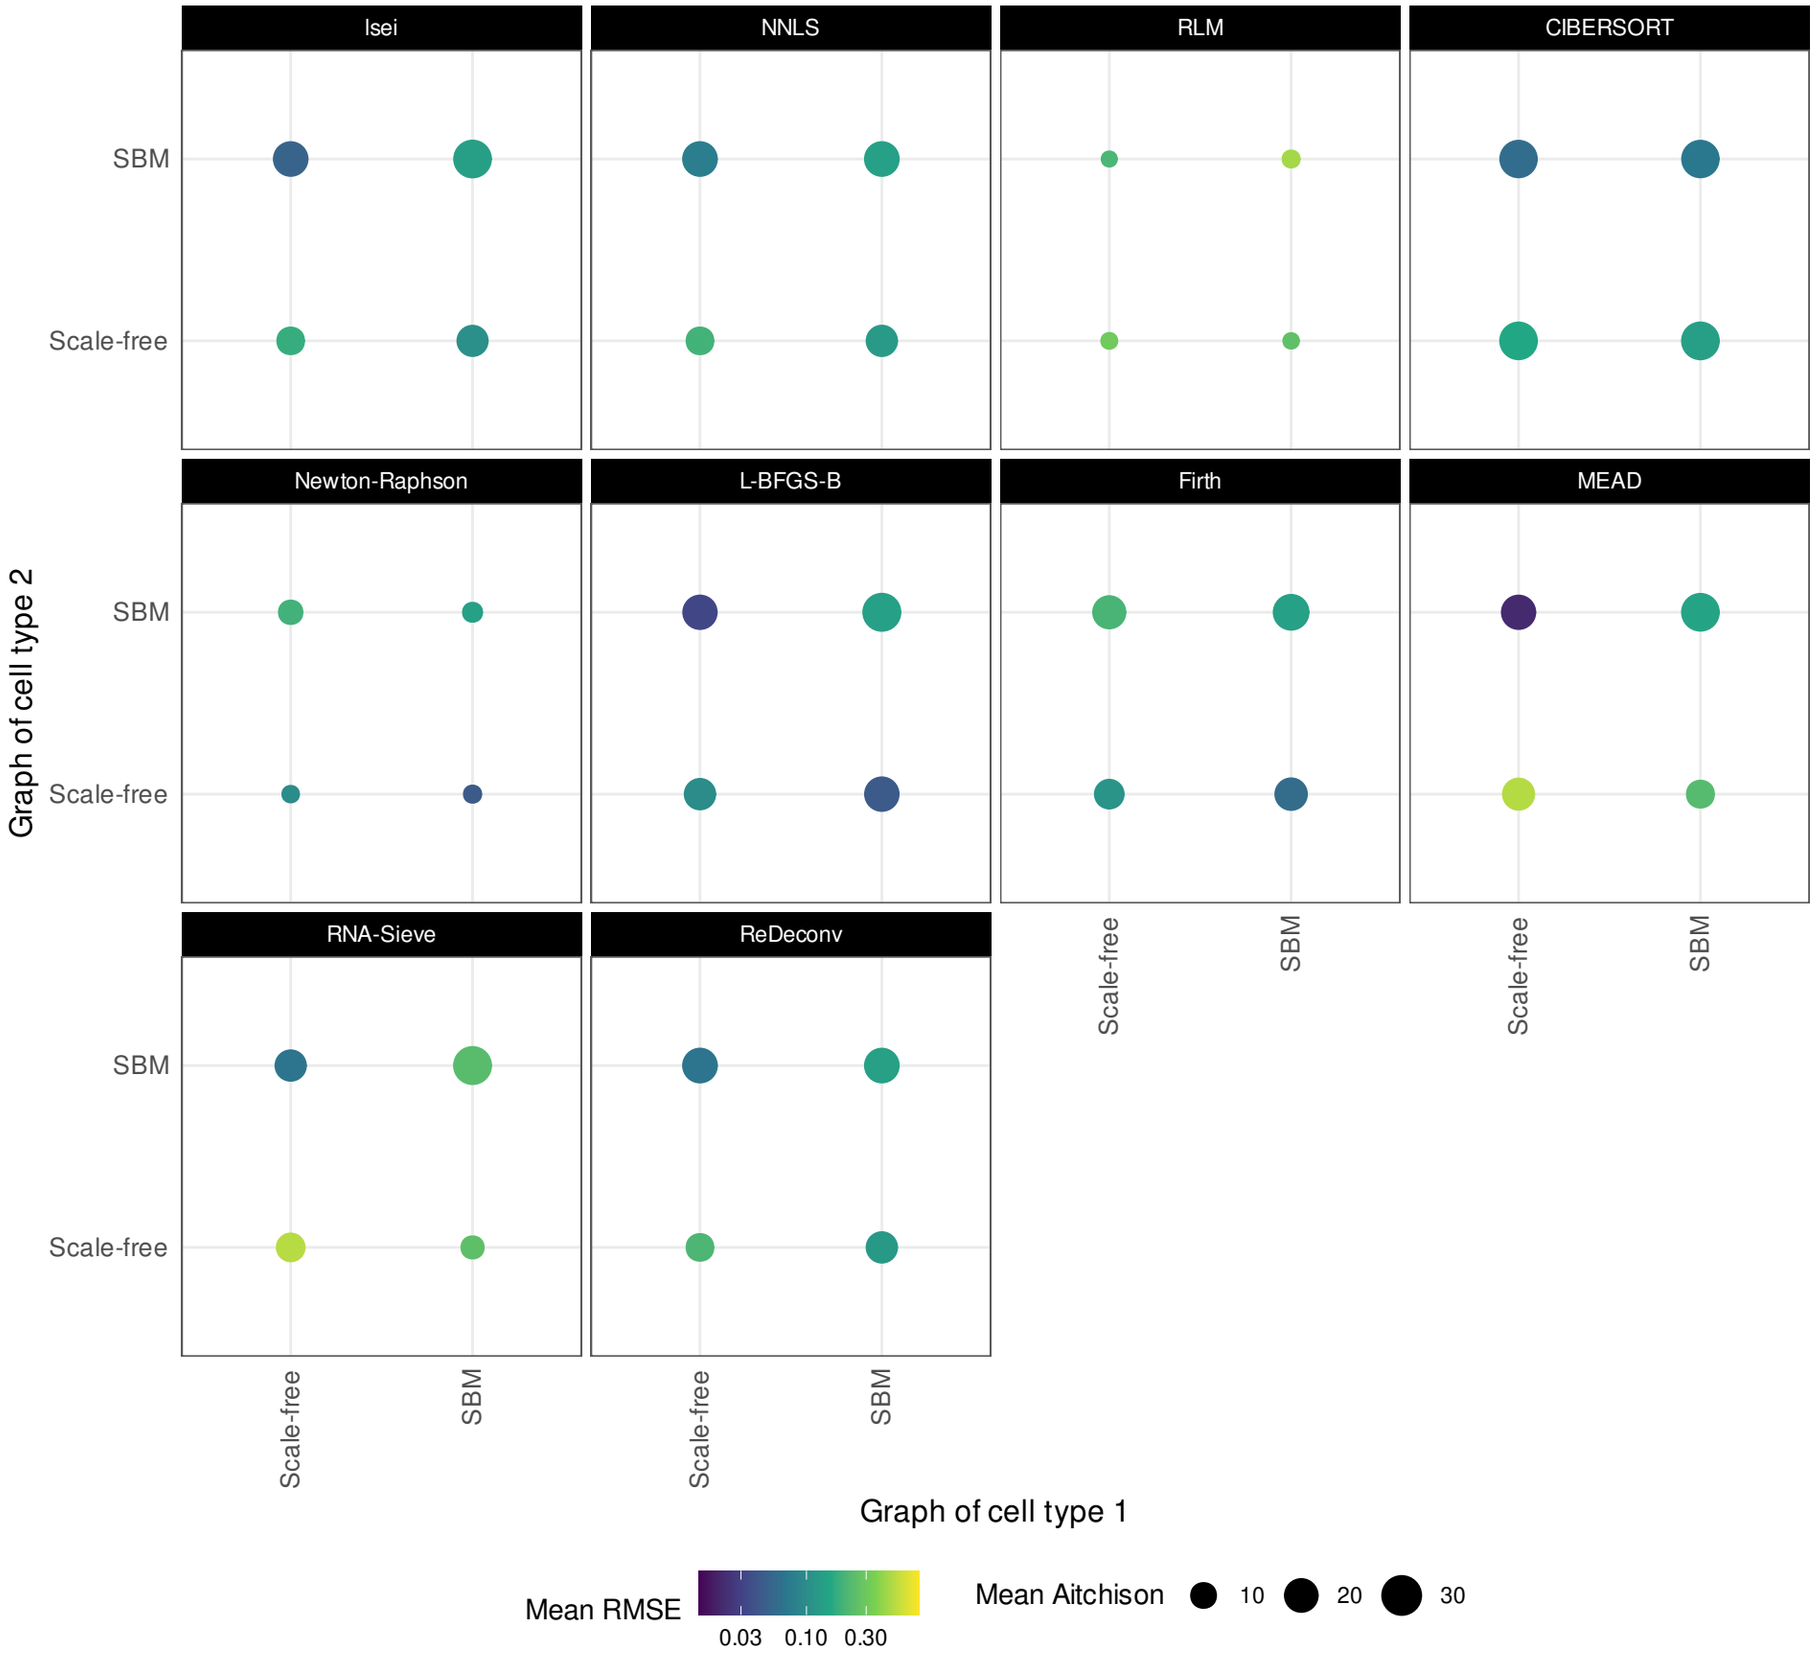

moderately unbalanced / high overlap

Means over the simulated bulks; colour and size scales shared by every page.
Cross: the method returned no finite estimate for any bulk of that scenario (solver failure).

Accuracy of every method: colour RMSE, size Aitchison distance

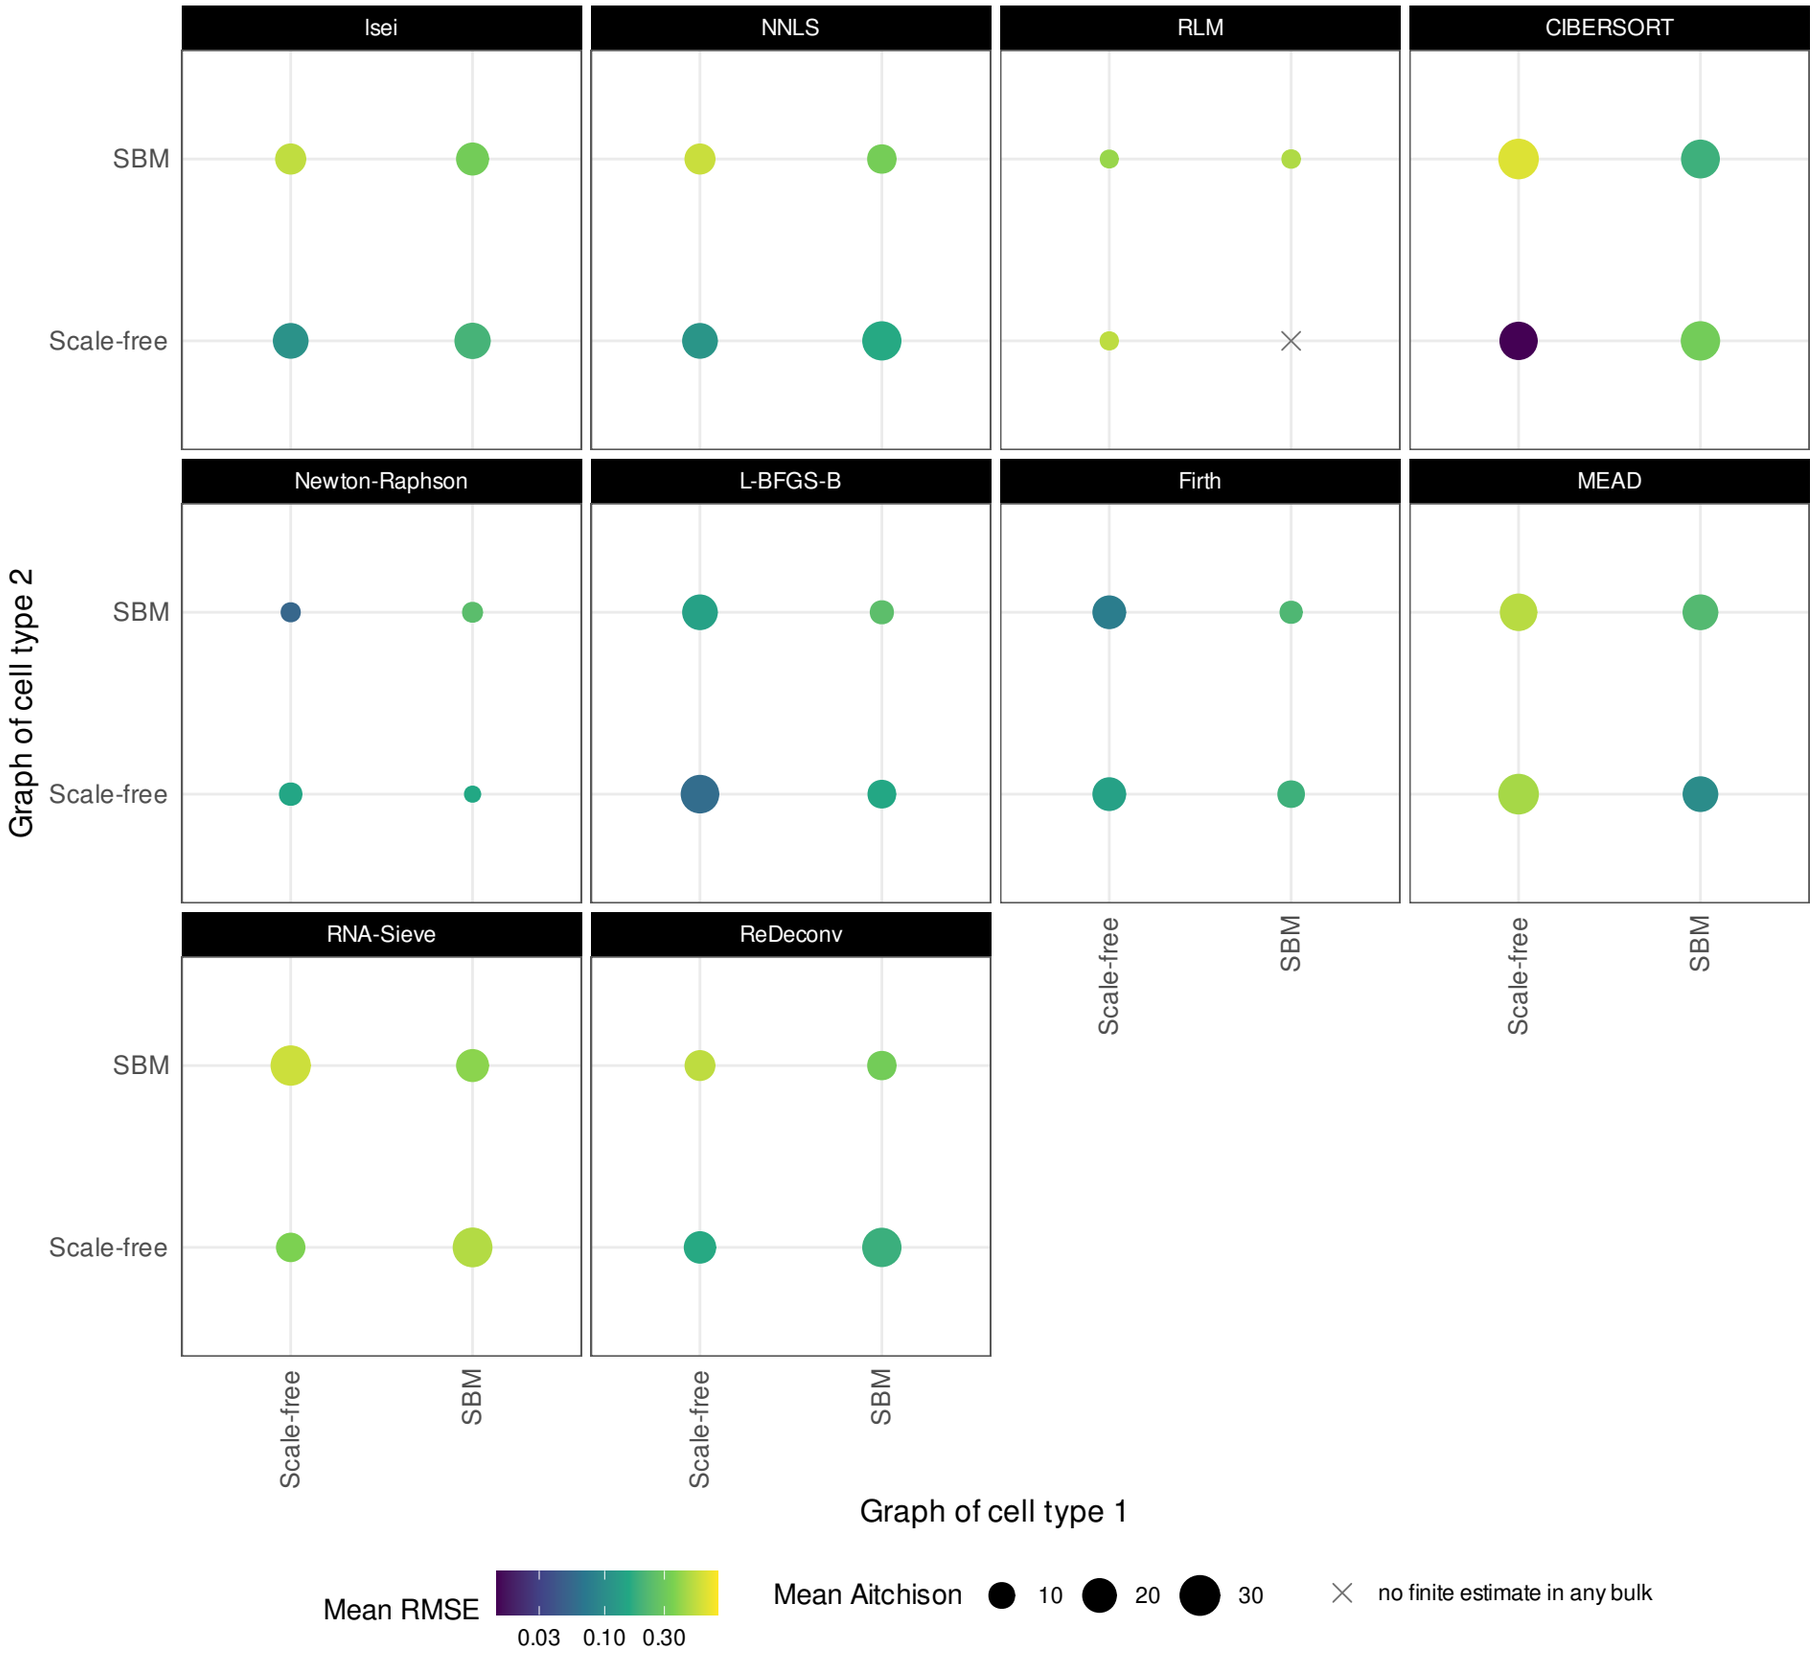

highly unbalanced / low overlap

Means over the simulated bulks; colour and size scales shared by every page.
Cross: the method returned no finite estimate for any bulk of that scenario (solver failure).

Accuracy of every method: colour RMSE, size Aitchison distance

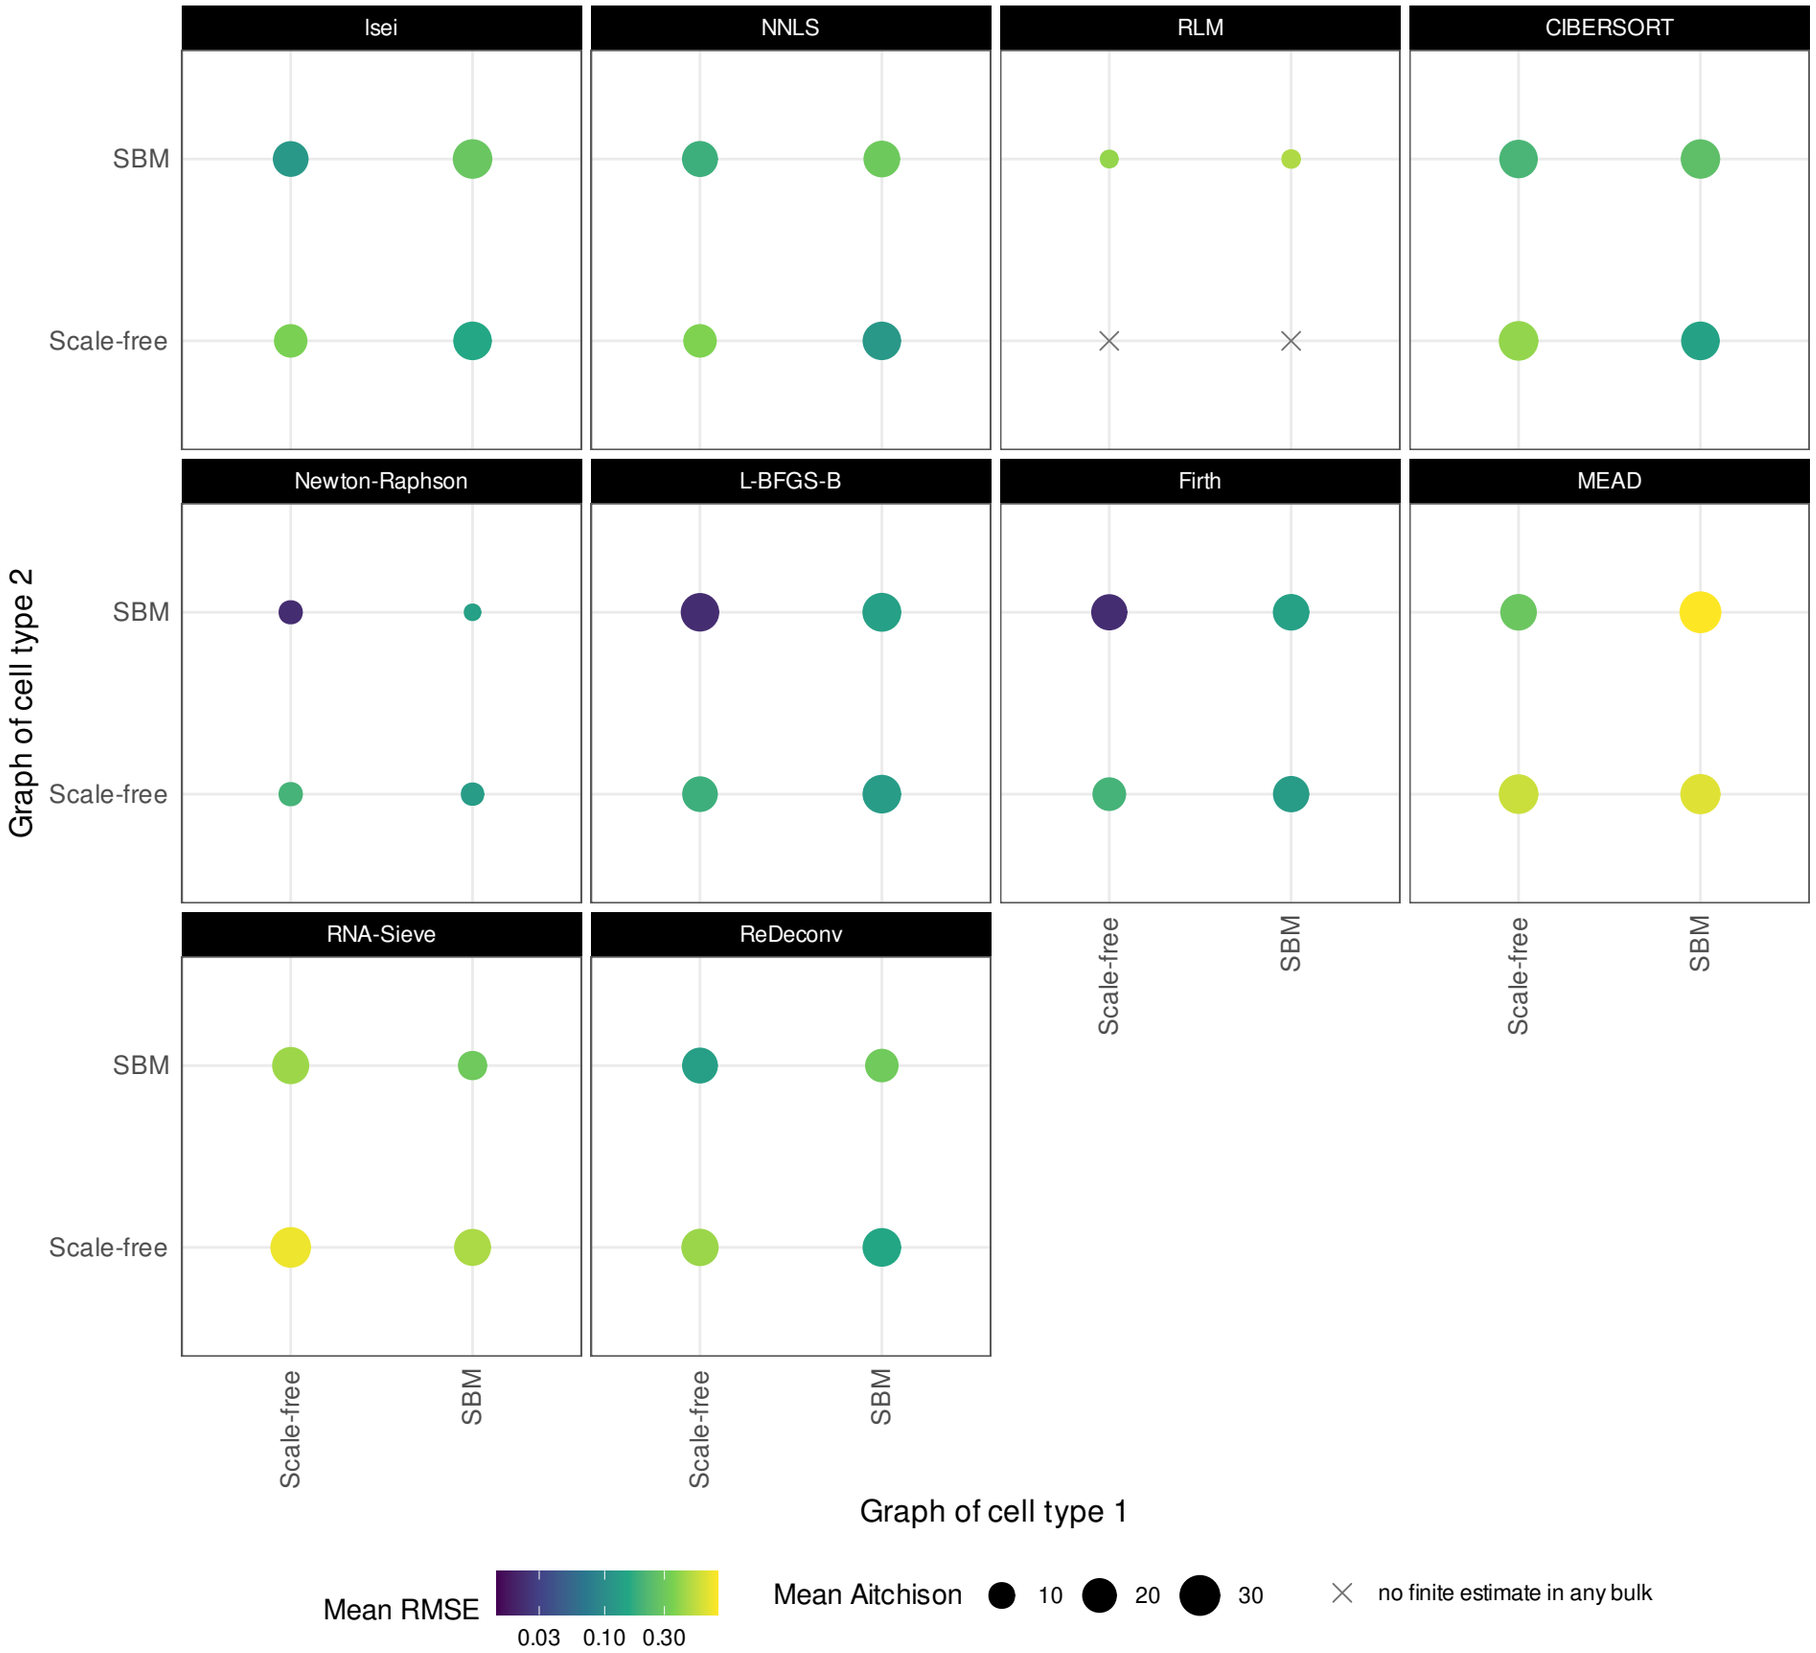

highly unbalanced / moderate overlap

Means over the simulated bulks; colour and size scales shared by every page.
Cross: the method returned no finite estimate for any bulk of that scenario (solver failure).

Accuracy of every method: colour RMSE, size Aitchison distance

highly unbalanced / high overlap

Means over the simulated bulks; colour and size scales shared by every page.
Cross: the method returned no finite estimate for any bulk of that scenario (solver failure).
