Observed log-likelihood along the simplex

small centroid gap / homoscedastic / balanced

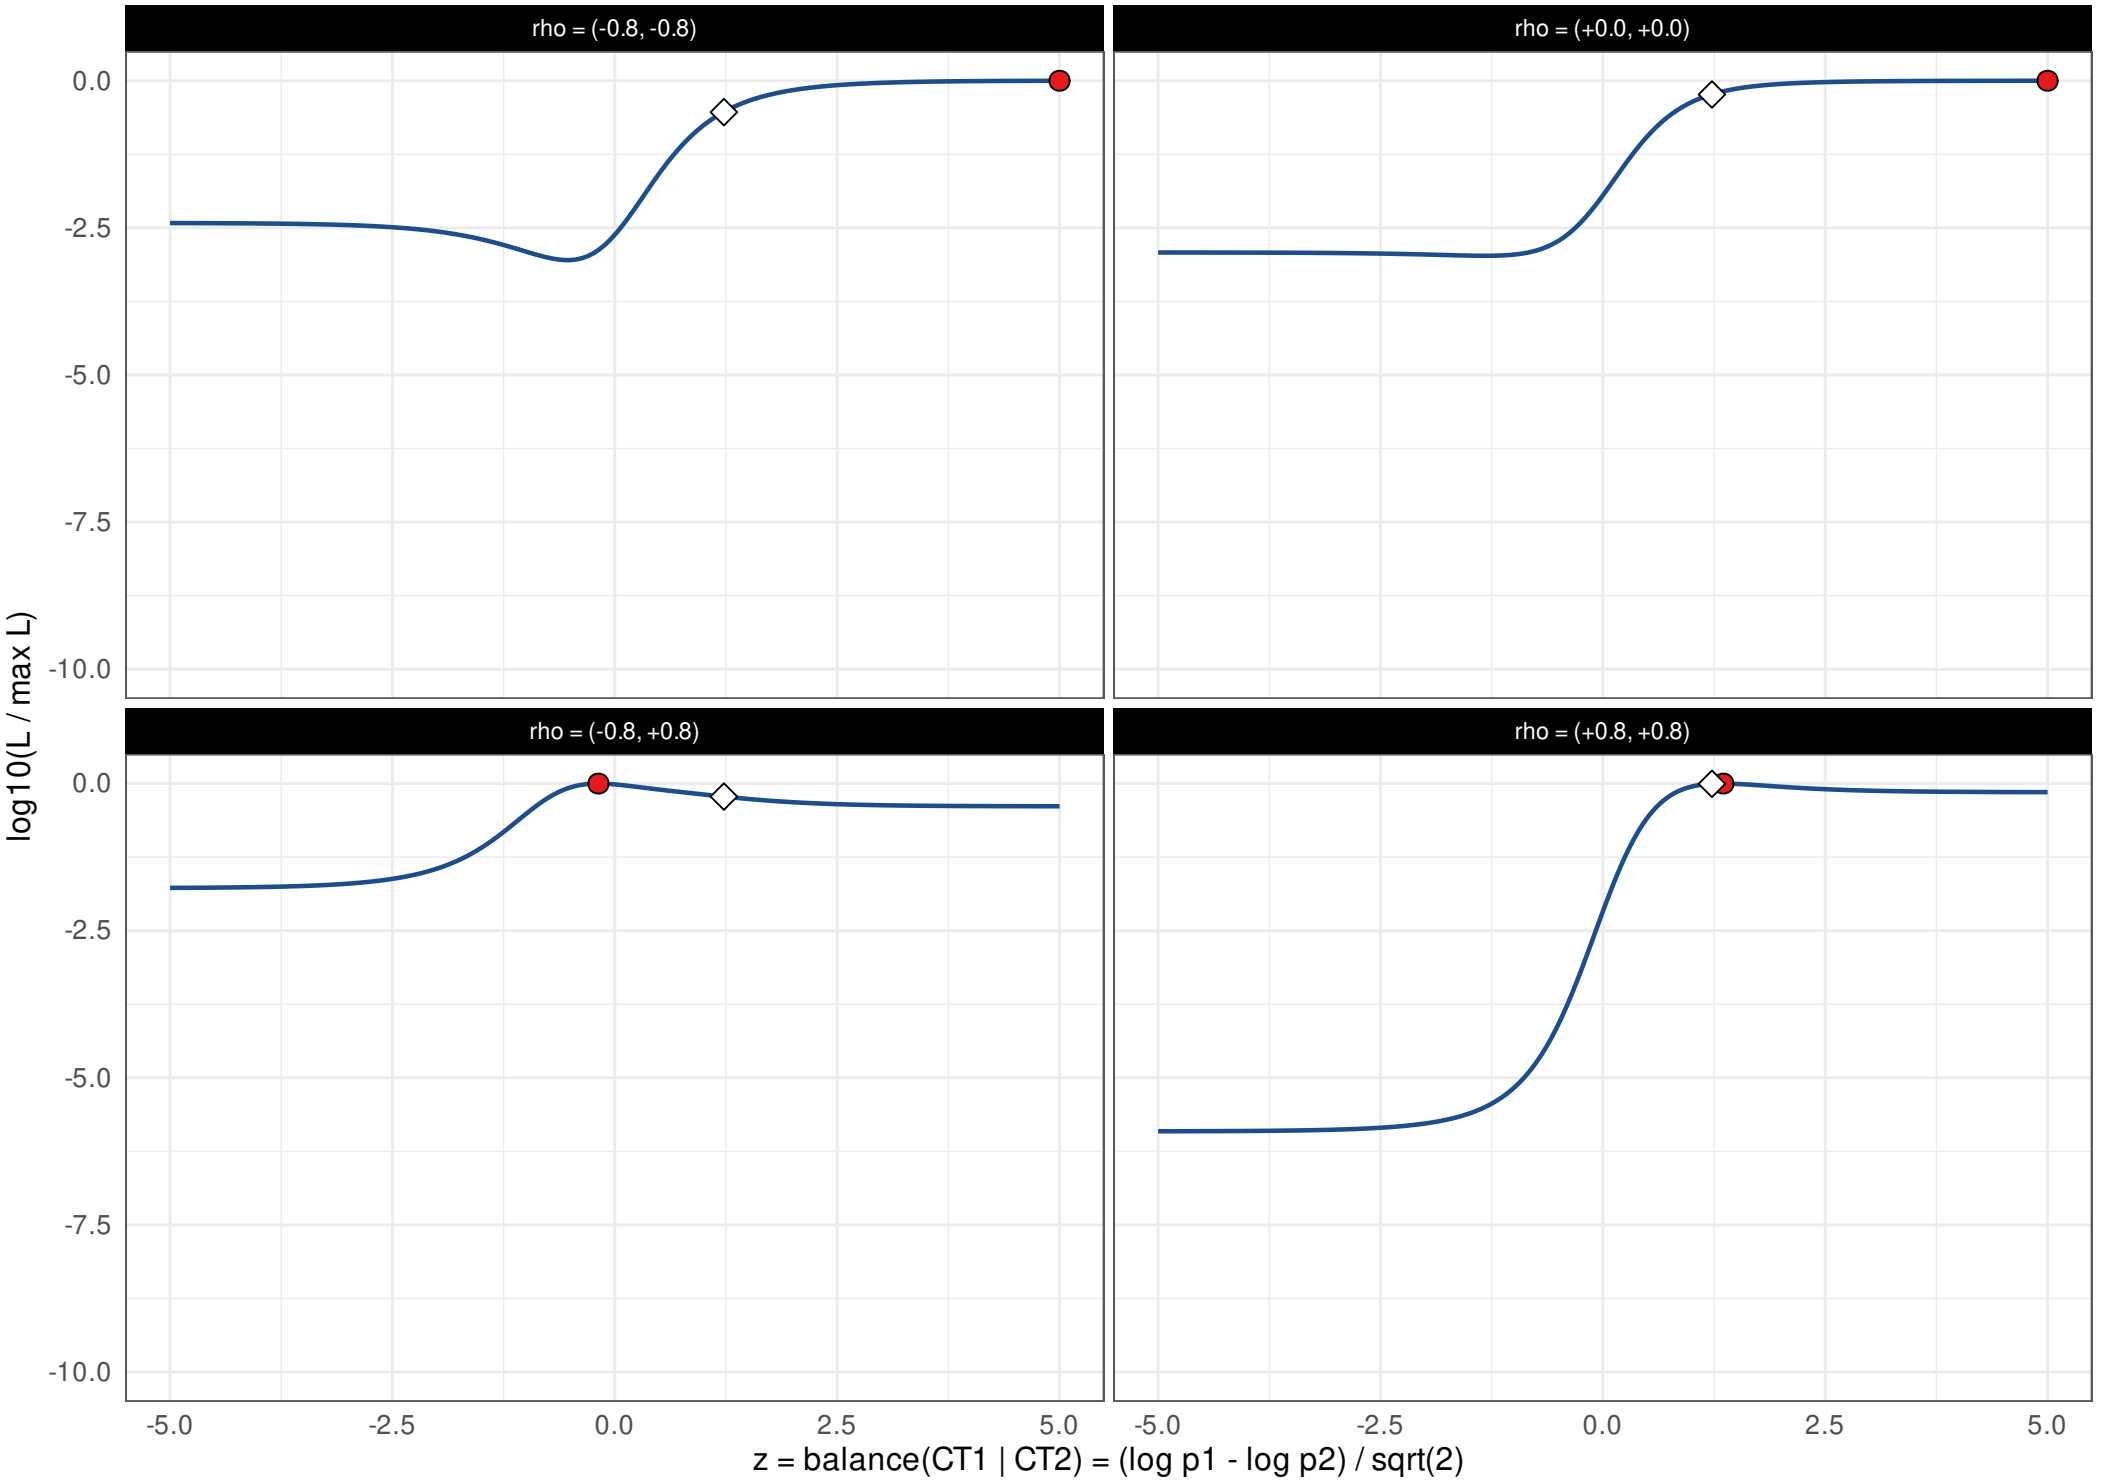

First simulated bulk. Same axes on every panel and page.

◇ true p* ● maximum

Observed log-likelihood along the simplex

small centroid gap / homoscedastic / moderately unbalanced

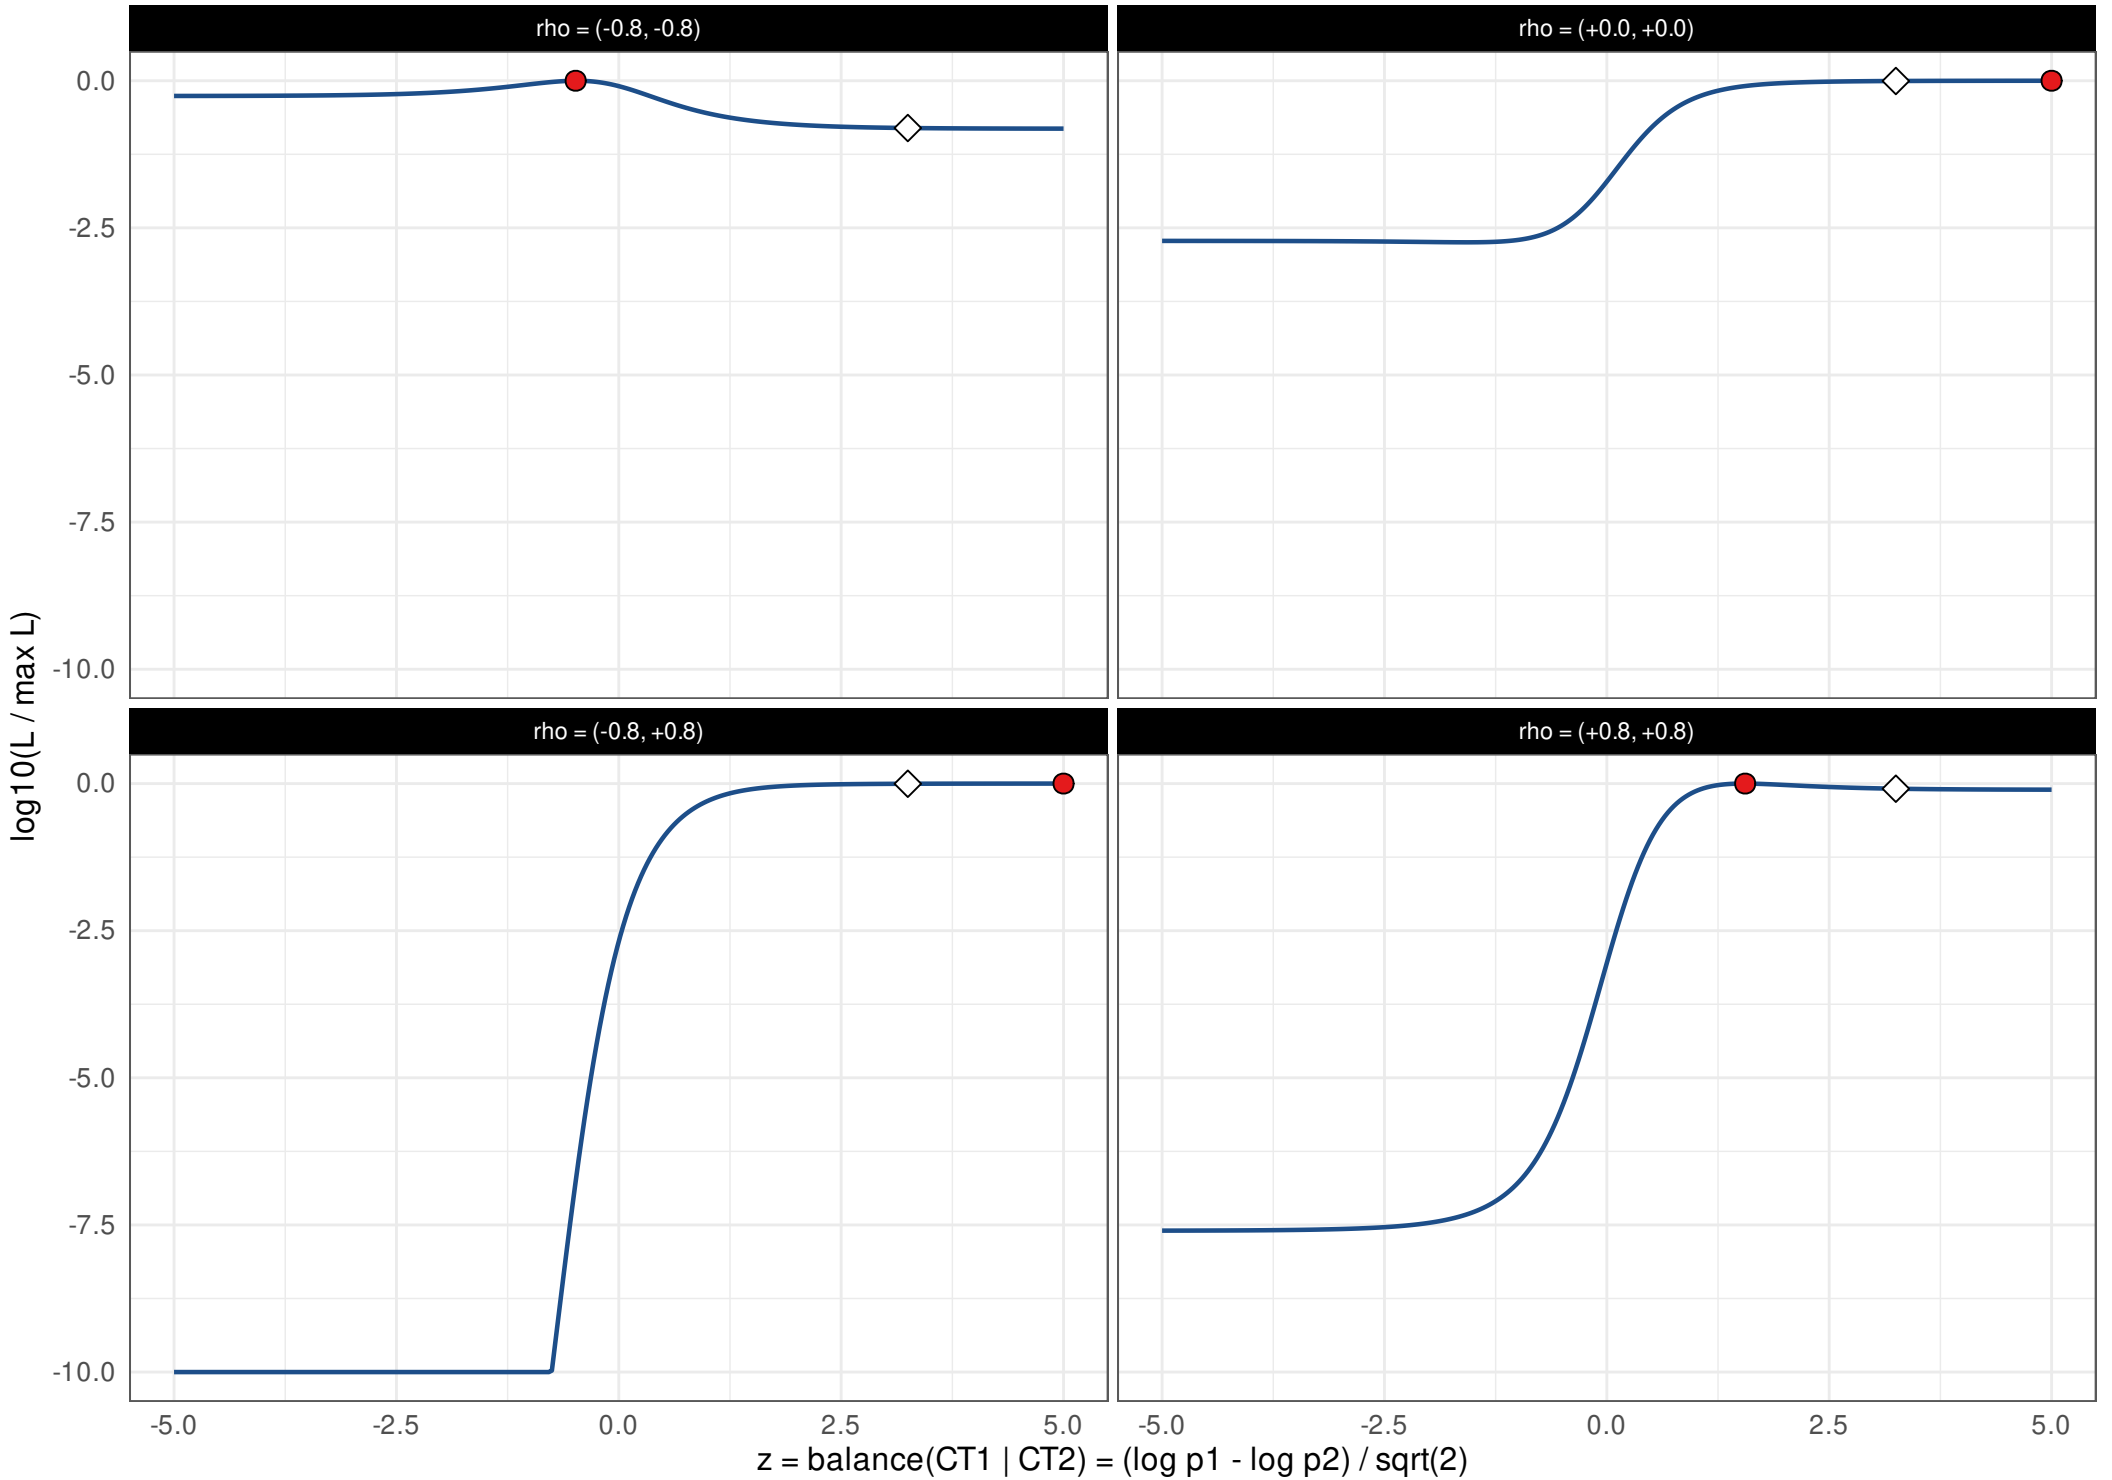

First simulated bulk. Same axes on every panel and page.

◇ true p* ● maximum

Observed log-likelihood along the simplex

small centroid gap / homoscedastic / highly unbalanced

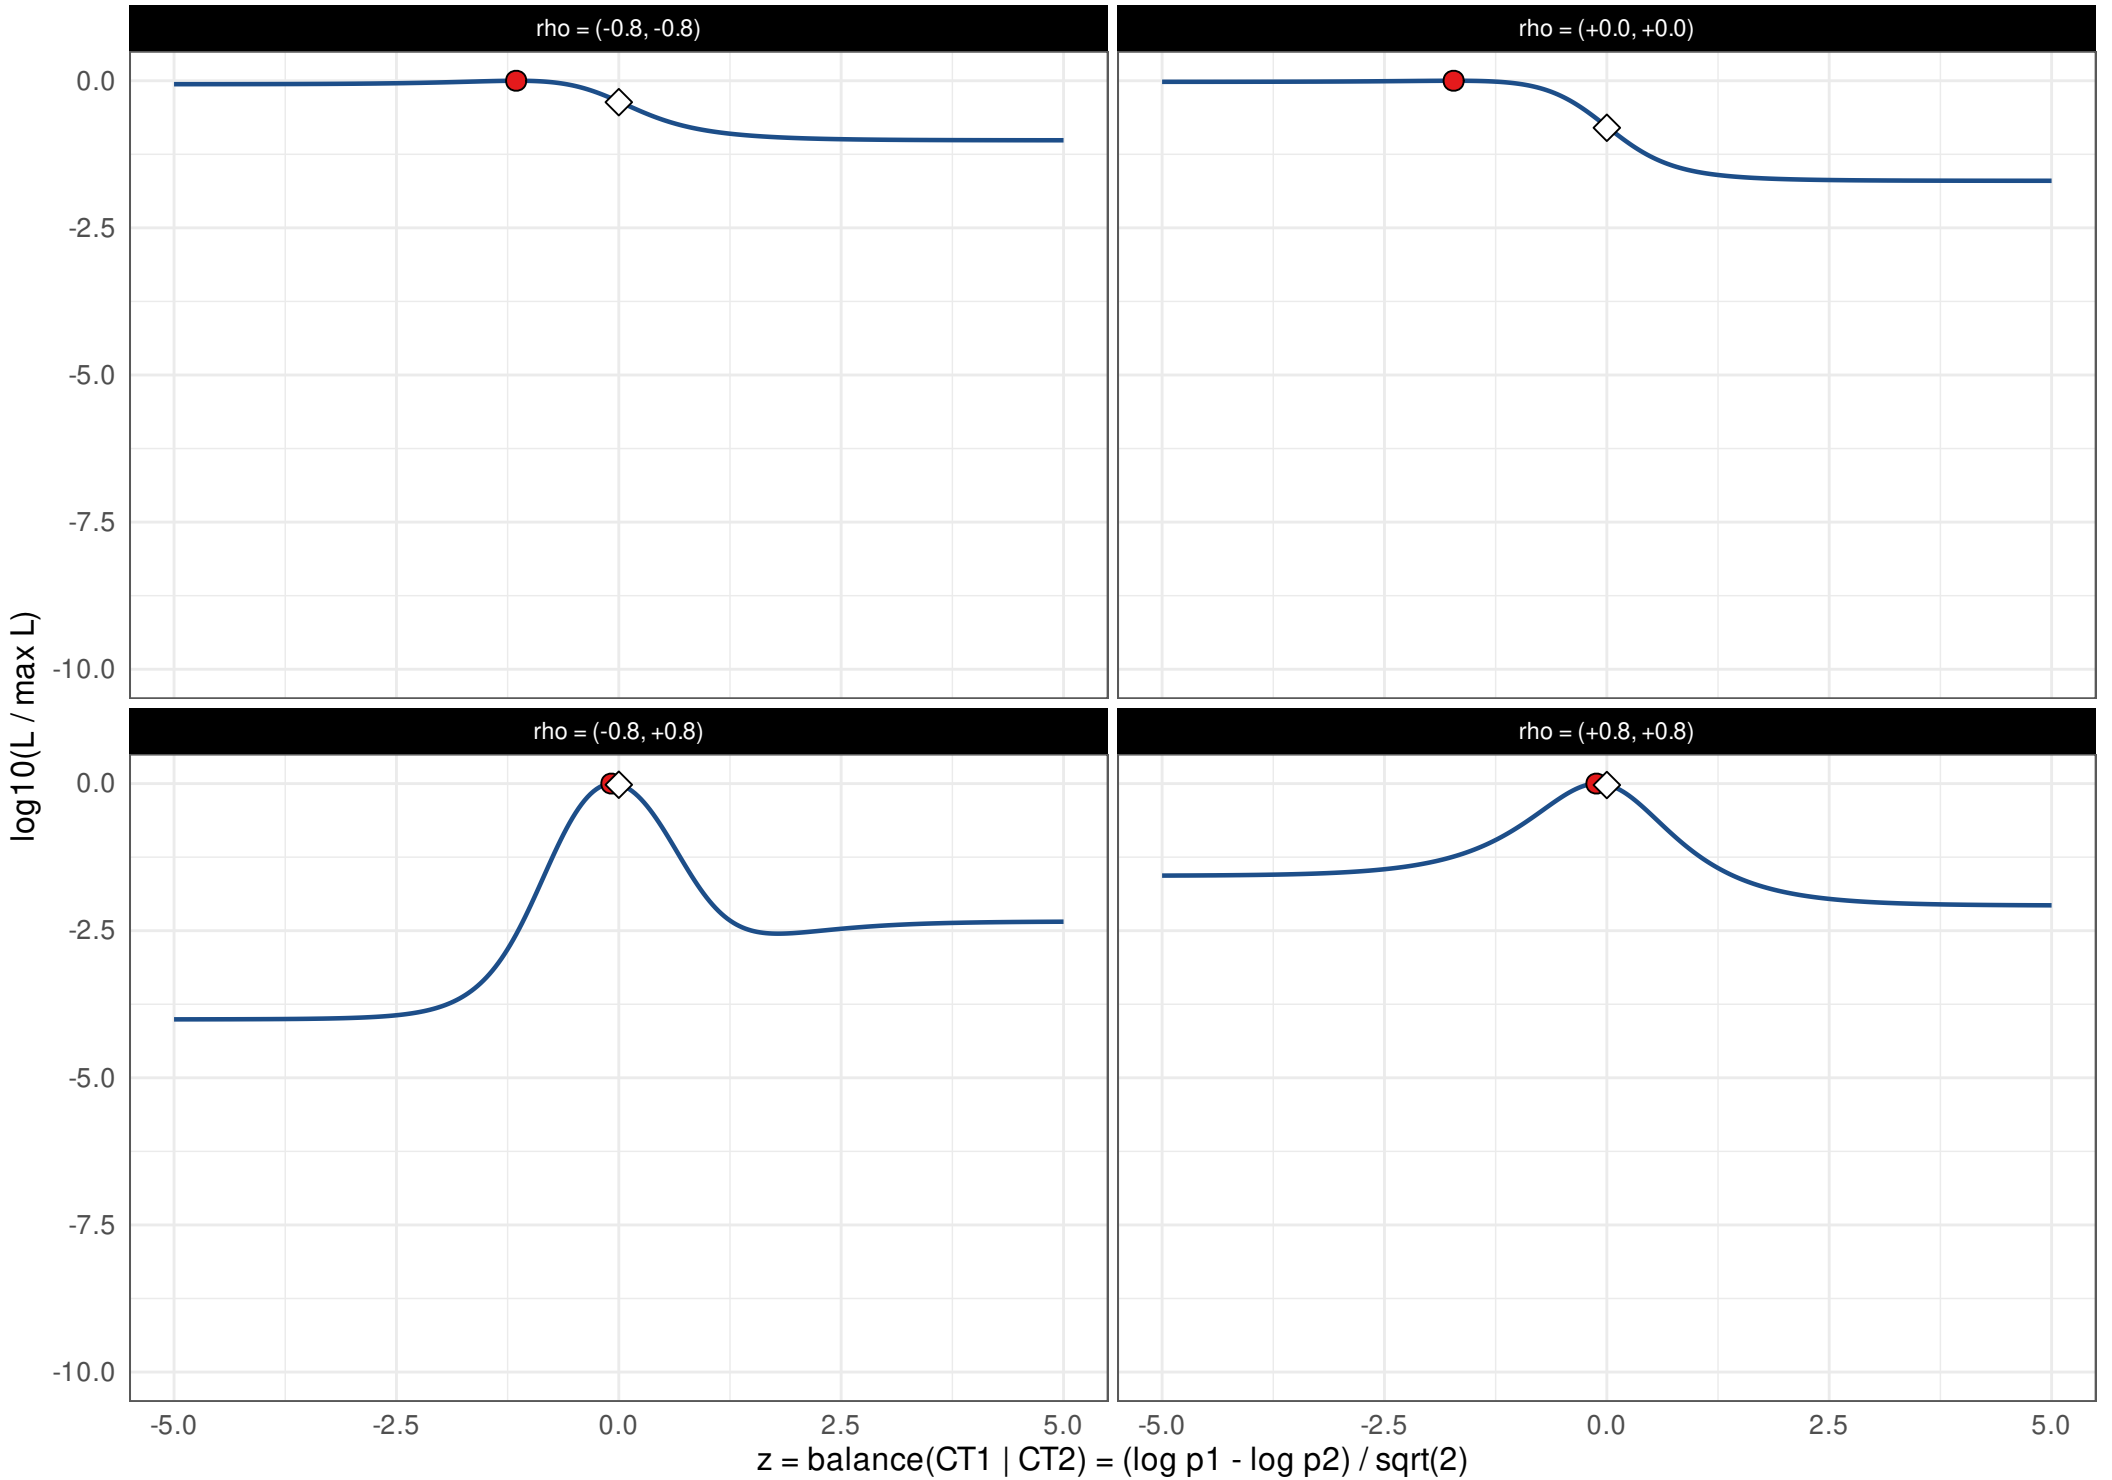

First simulated bulk. Same axes on every panel and page.

◇ true p* ● maximum

Observed log-likelihood along the simplex

small centroid gap / heteroscedastic / balanced

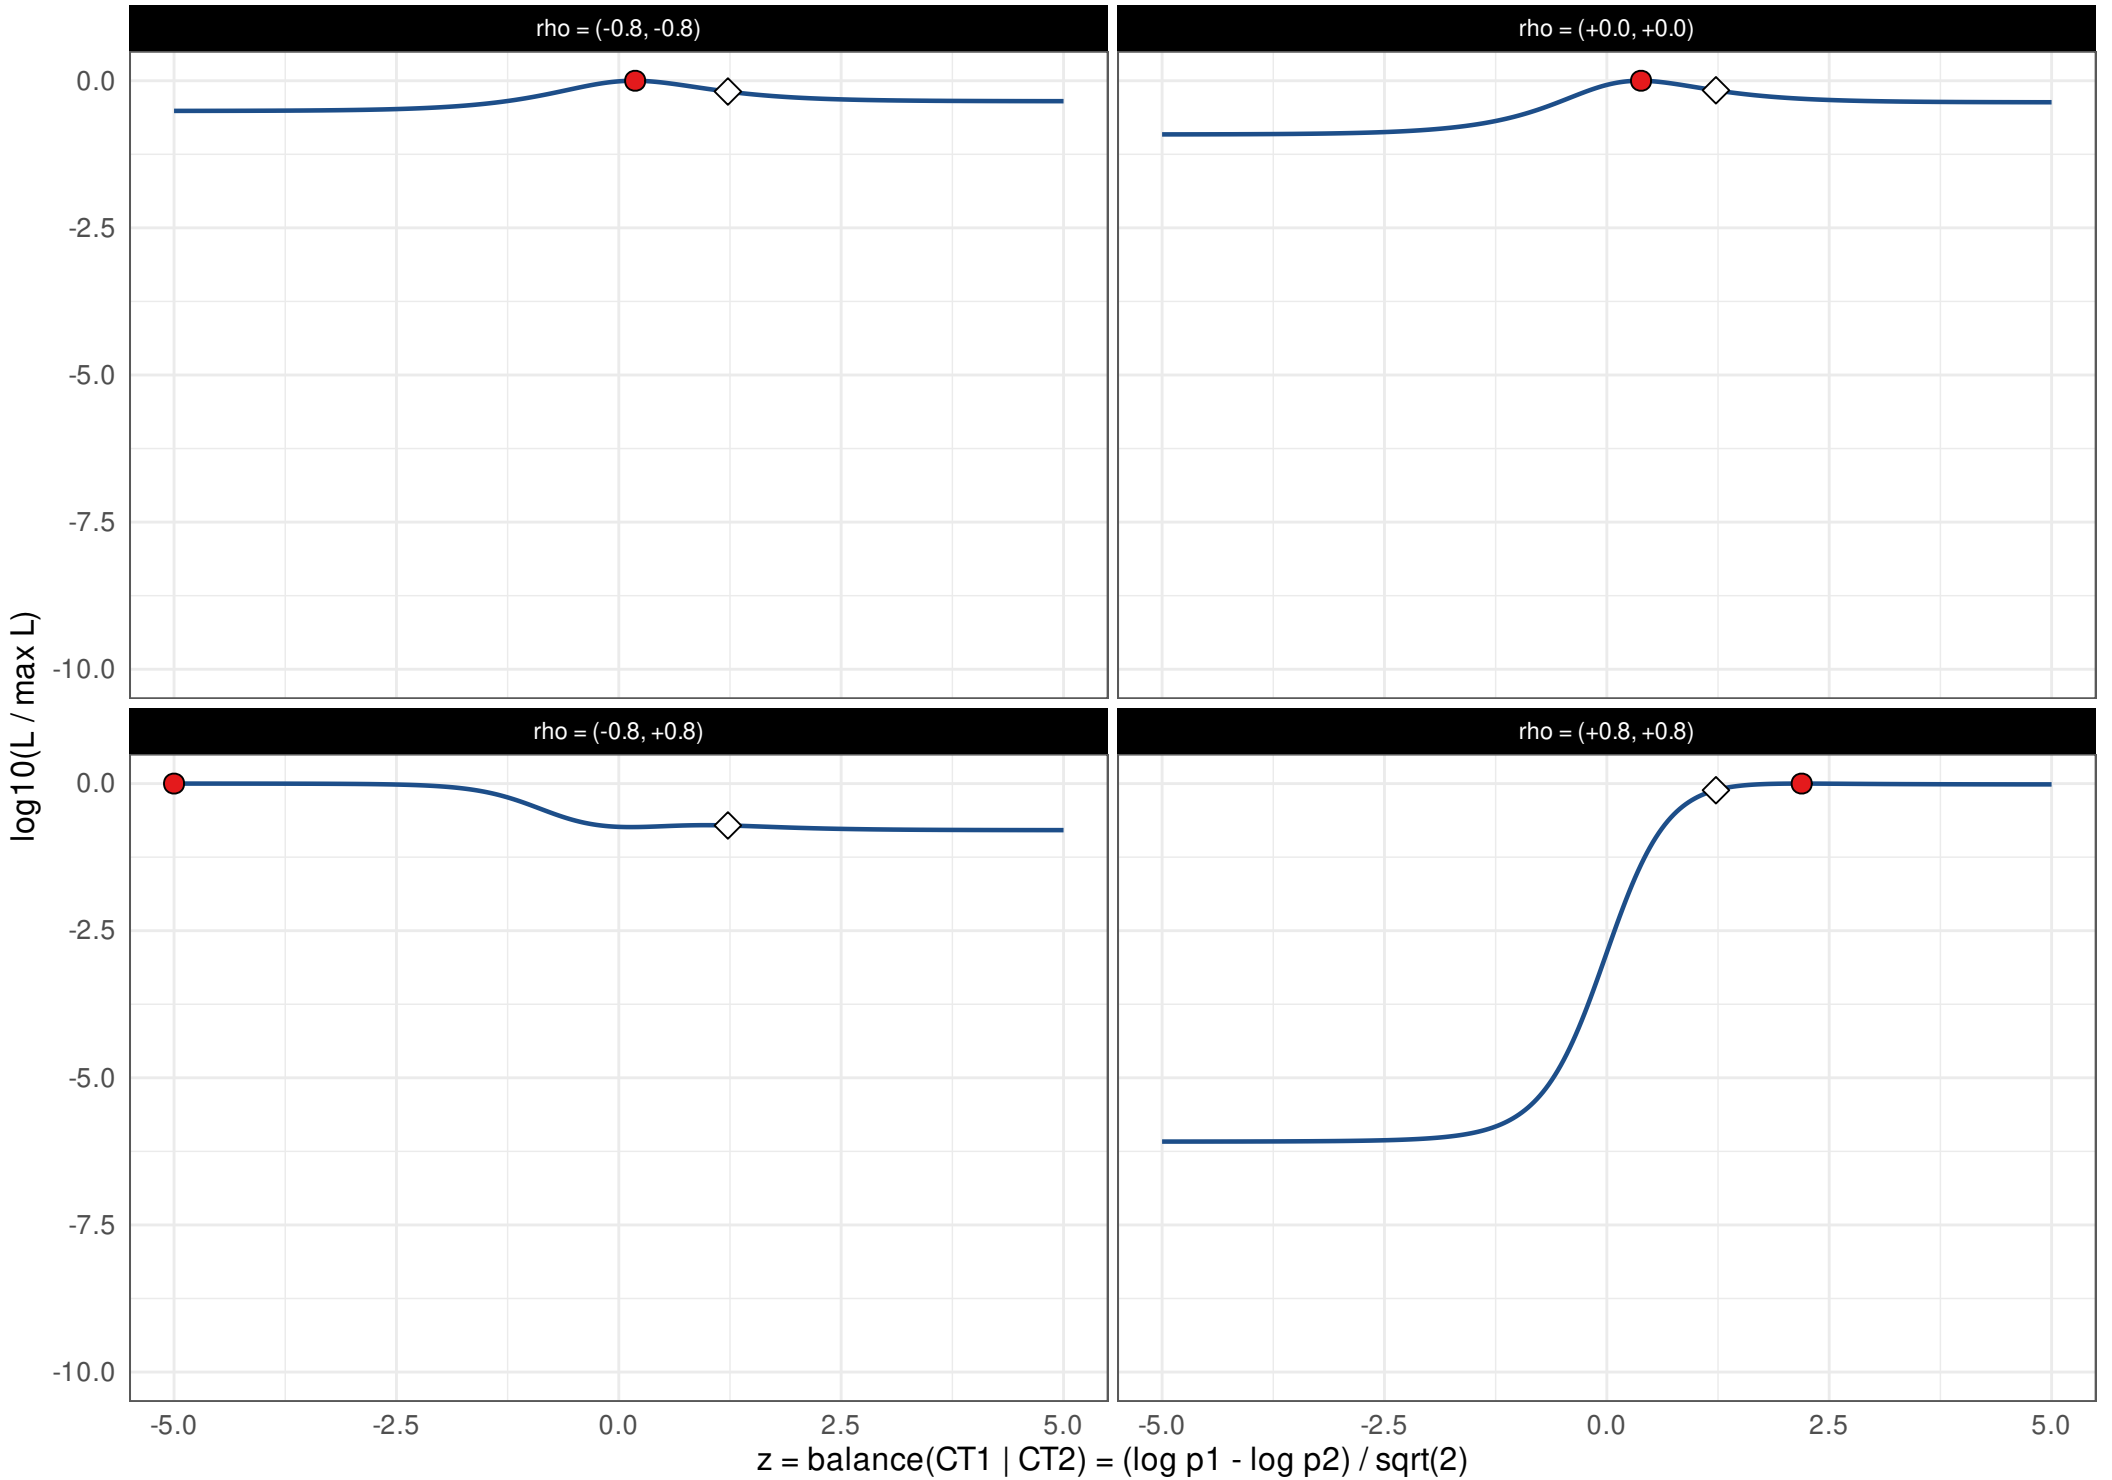

First simulated bulk. Same axes on every panel and page.

◇ true p* ● maximum

Observed log-likelihood along the simplex

small centroid gap / heteroscedastic / moderately unbalanced

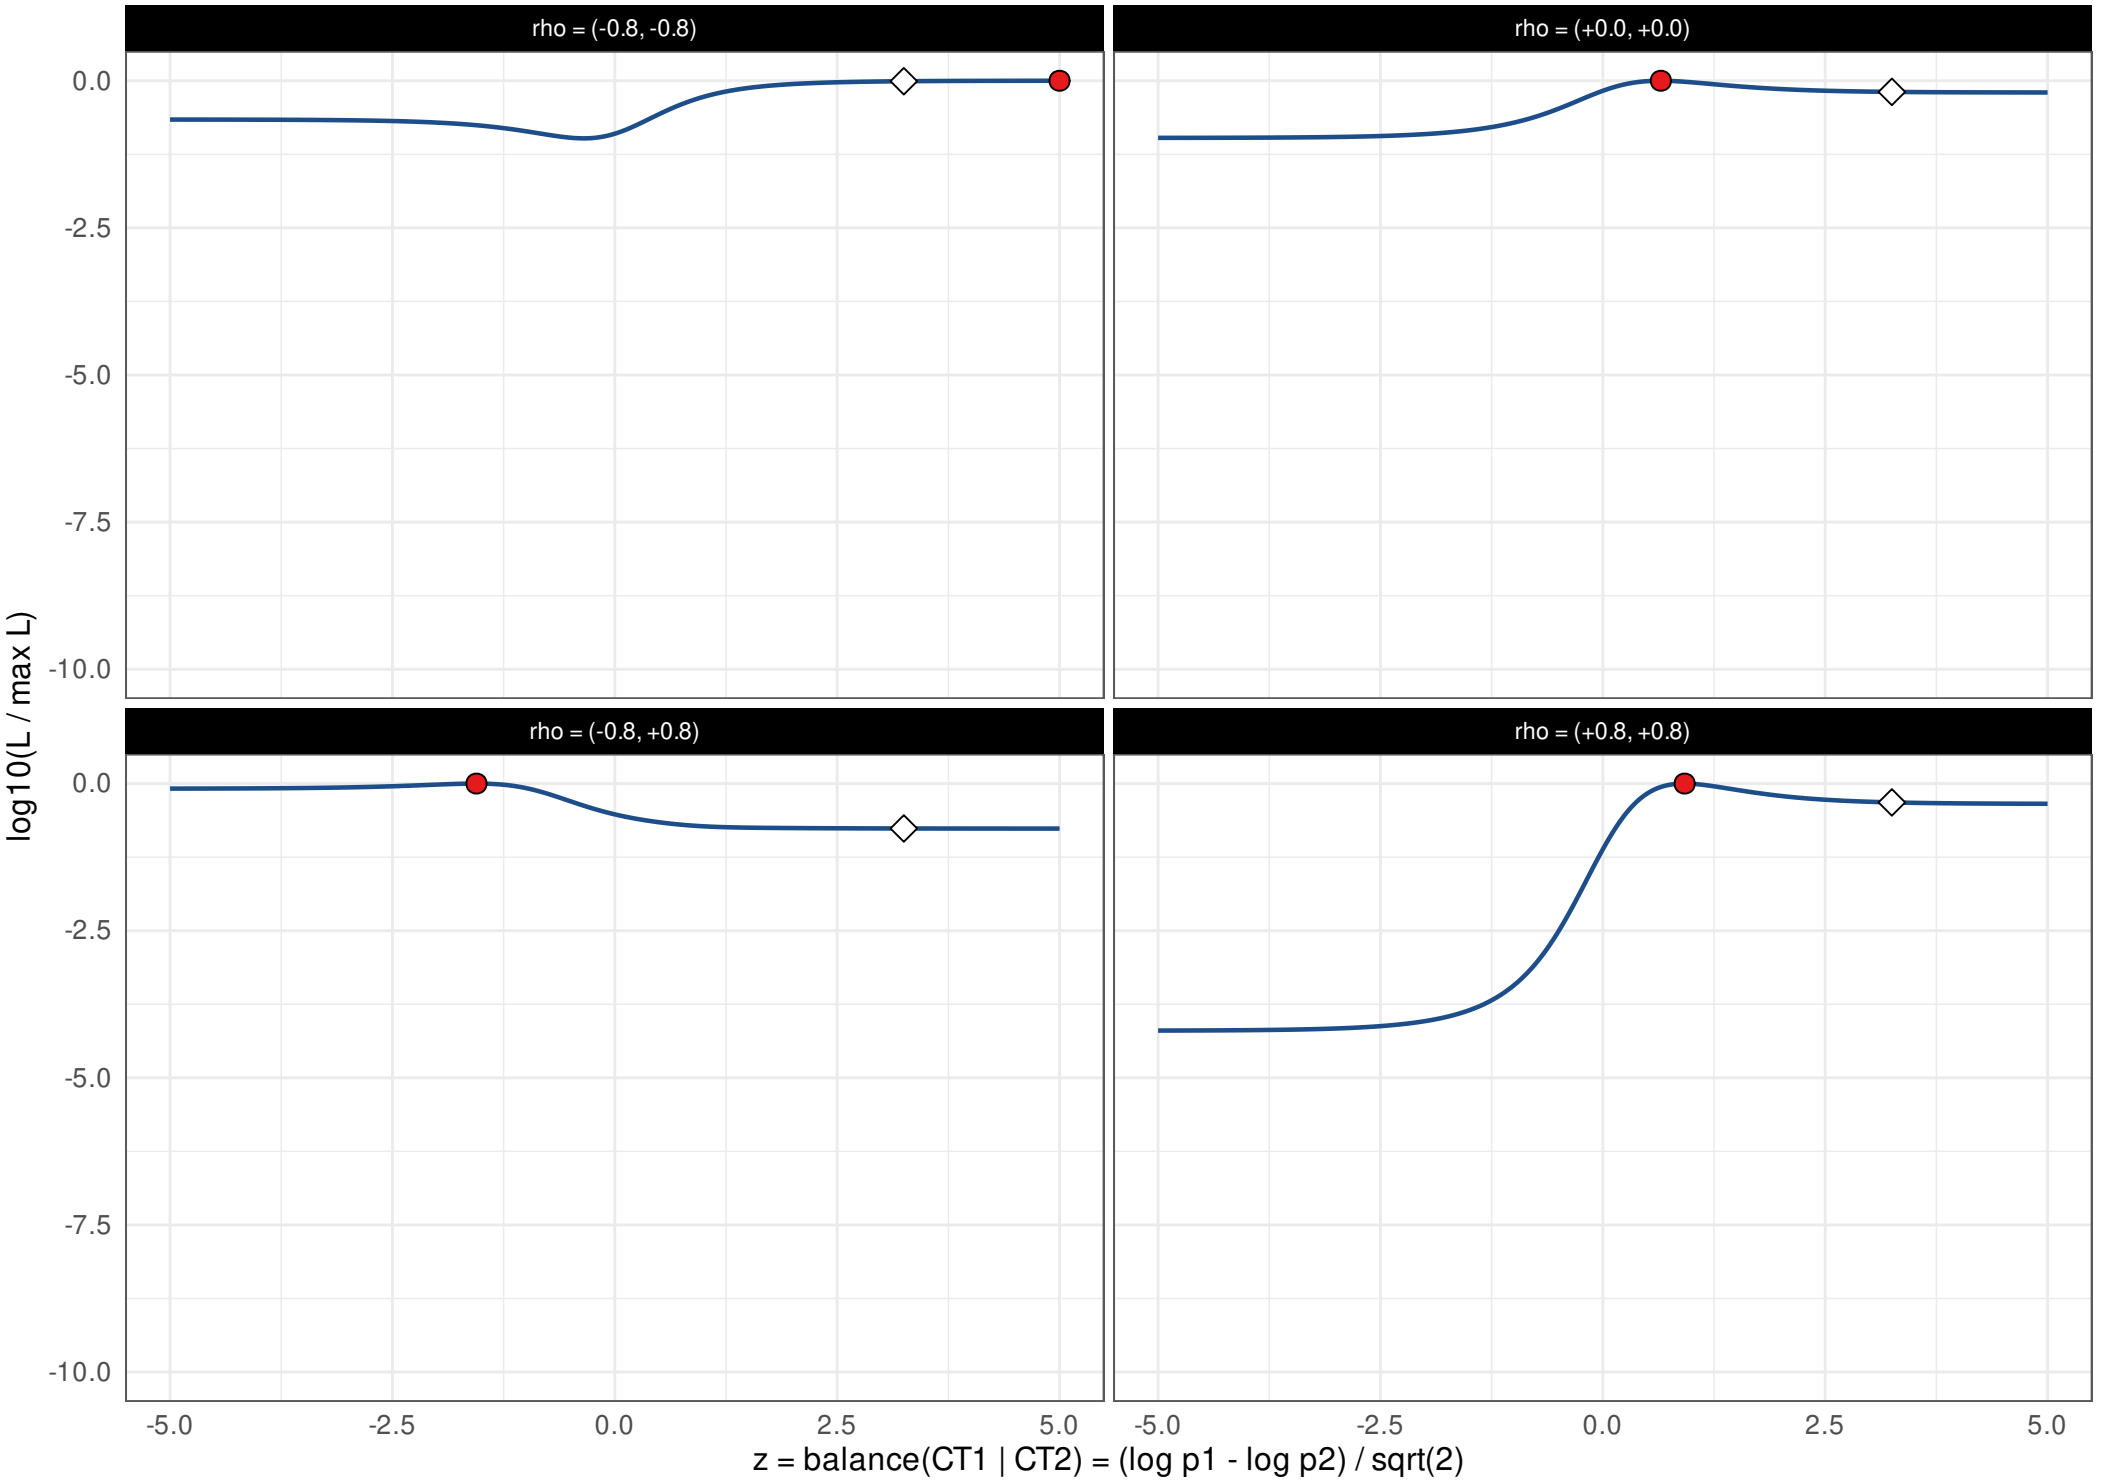

First simulated bulk. Same axes on every panel and page.

◇ true p* ● maximum

Observed log-likelihood along the simplex

small centroid gap / heteroscedastic / highly unbalanced

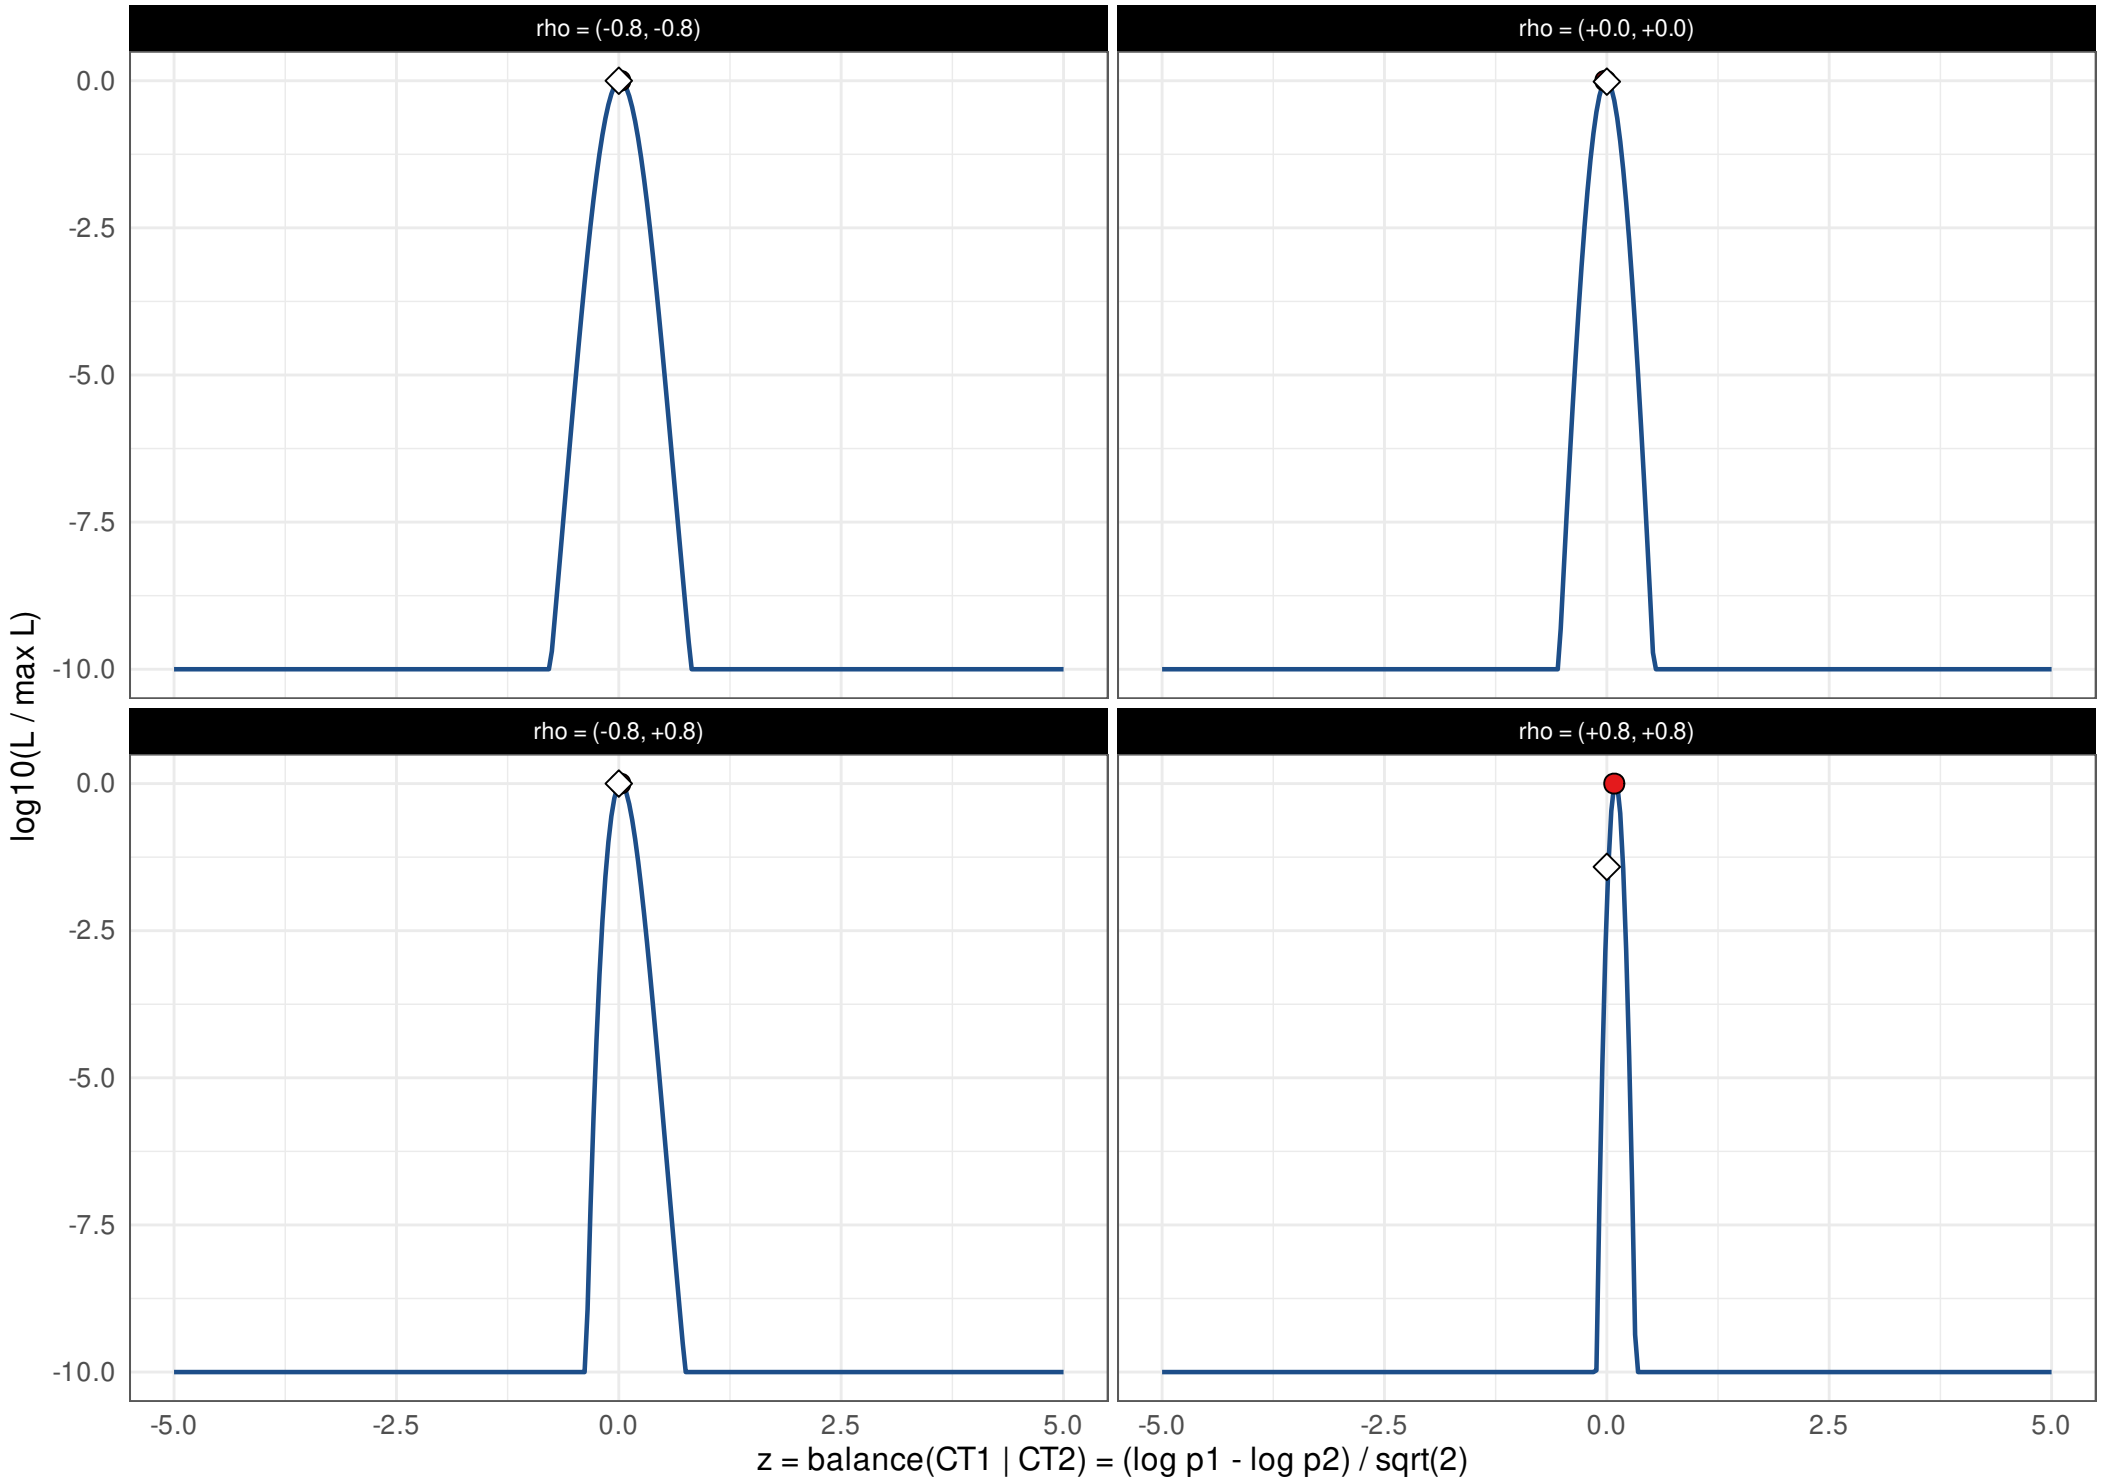

First simulated bulk. Same axes on every panel and page.

◇ true p* ● maximum

Observed log-likelihood along the simplex

large centroid gap / homoscedastic / balanced

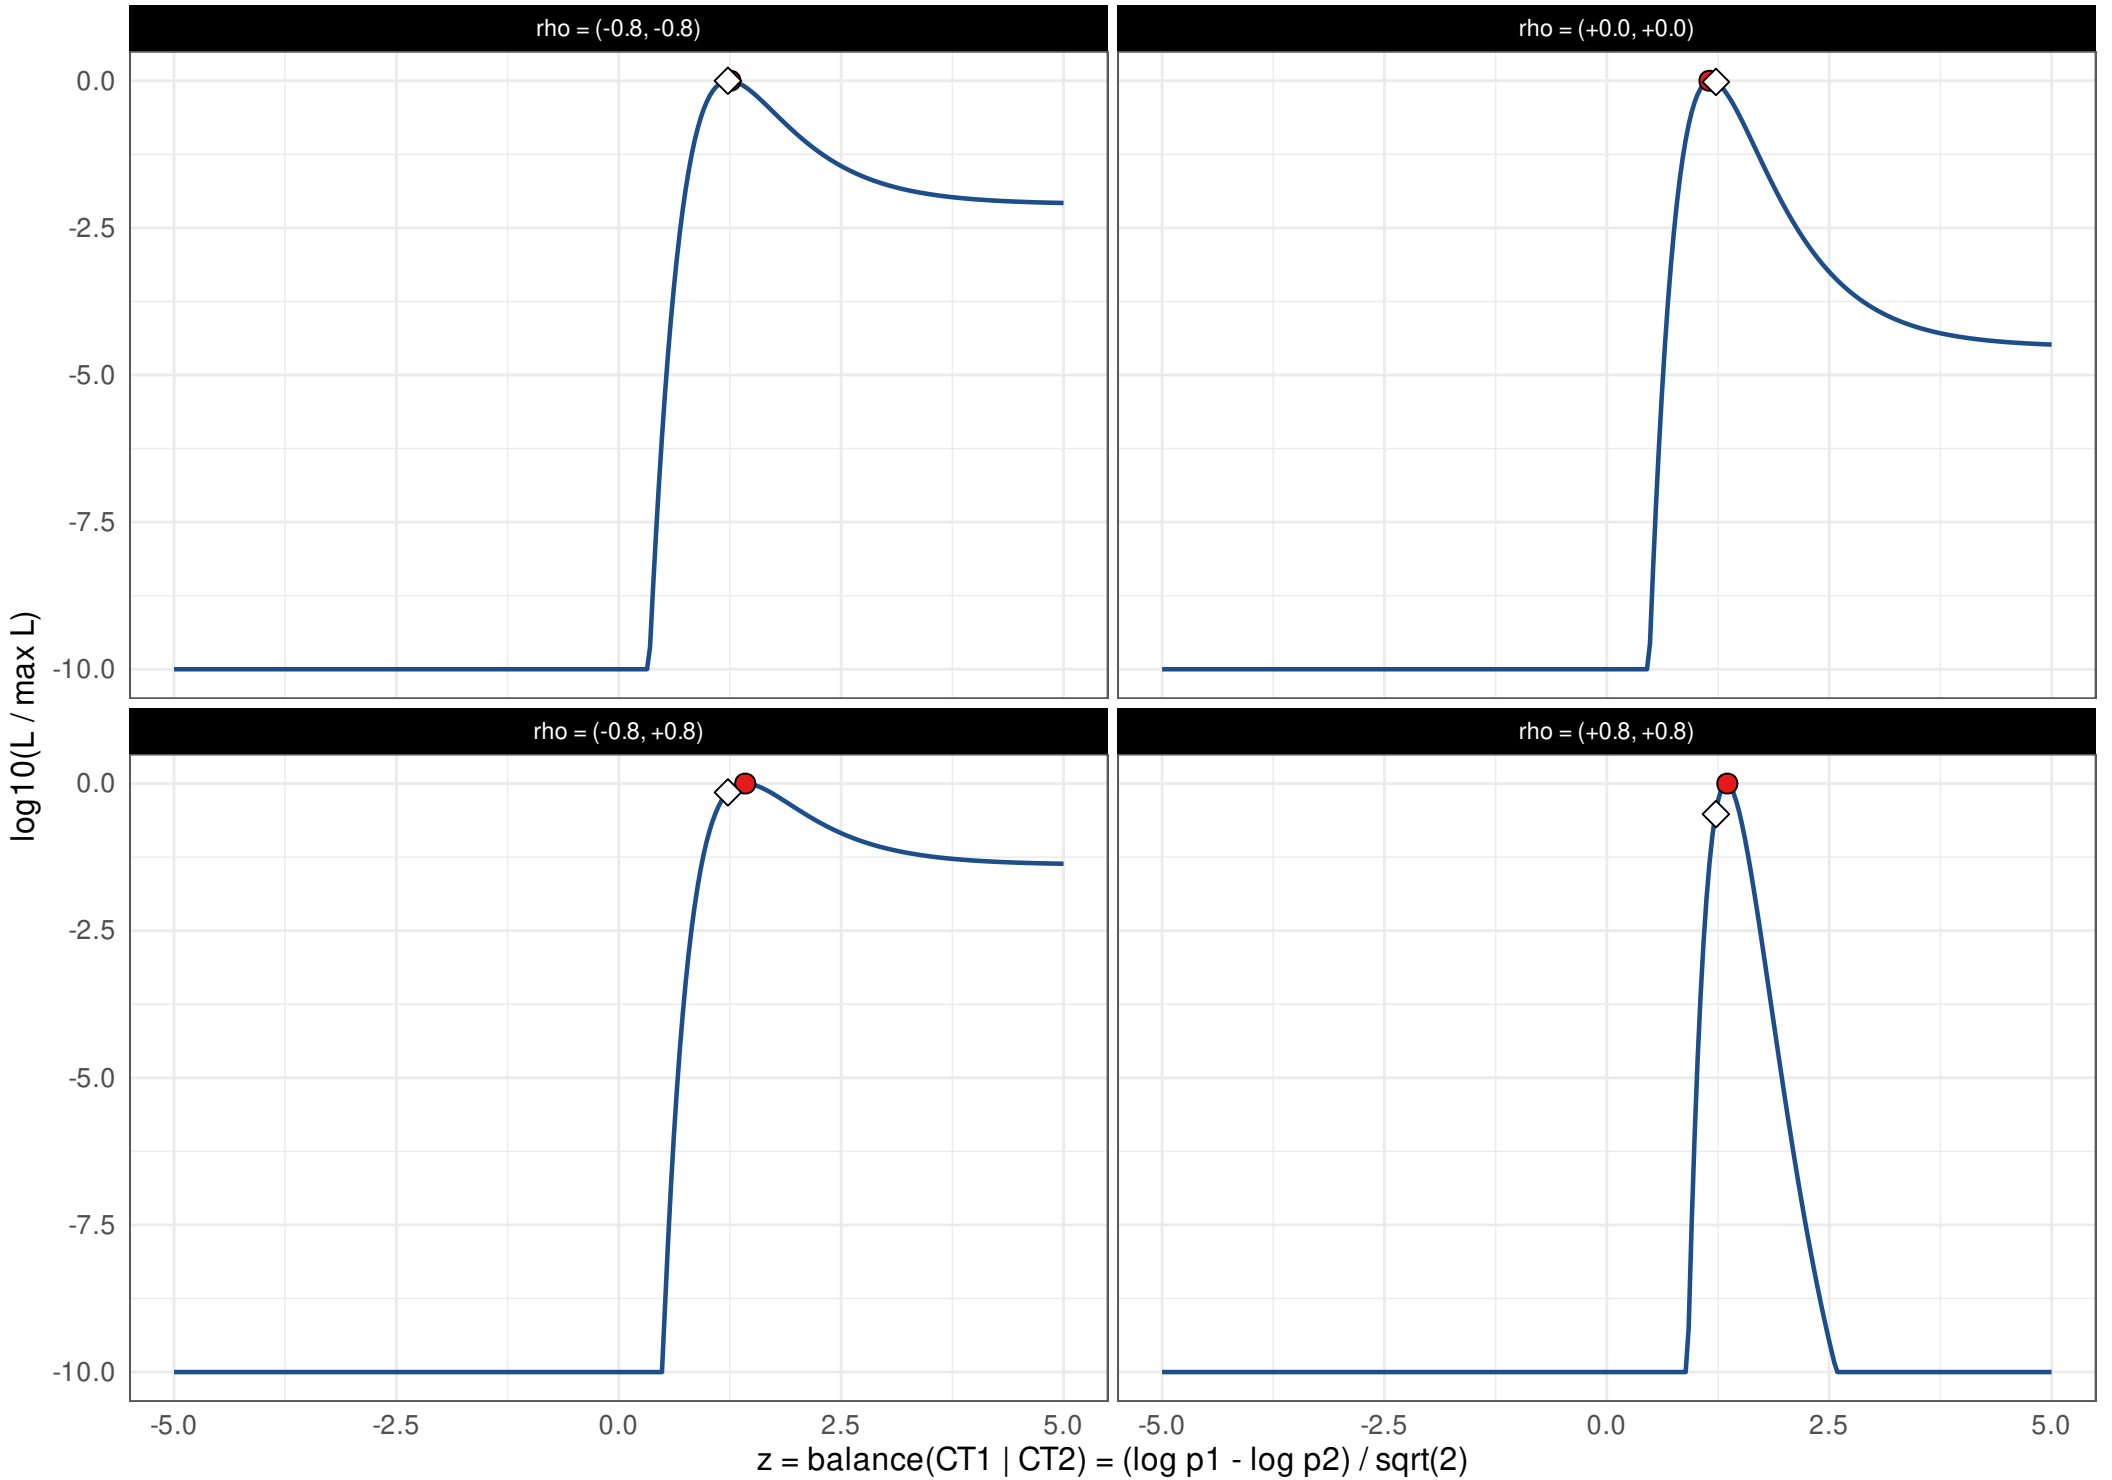

First simulated bulk. Same axes on every panel and page.

◇ true p* ● maximum

Observed log-likelihood along the simplex

large centroid gap / homoscedastic / moderately unbalanced

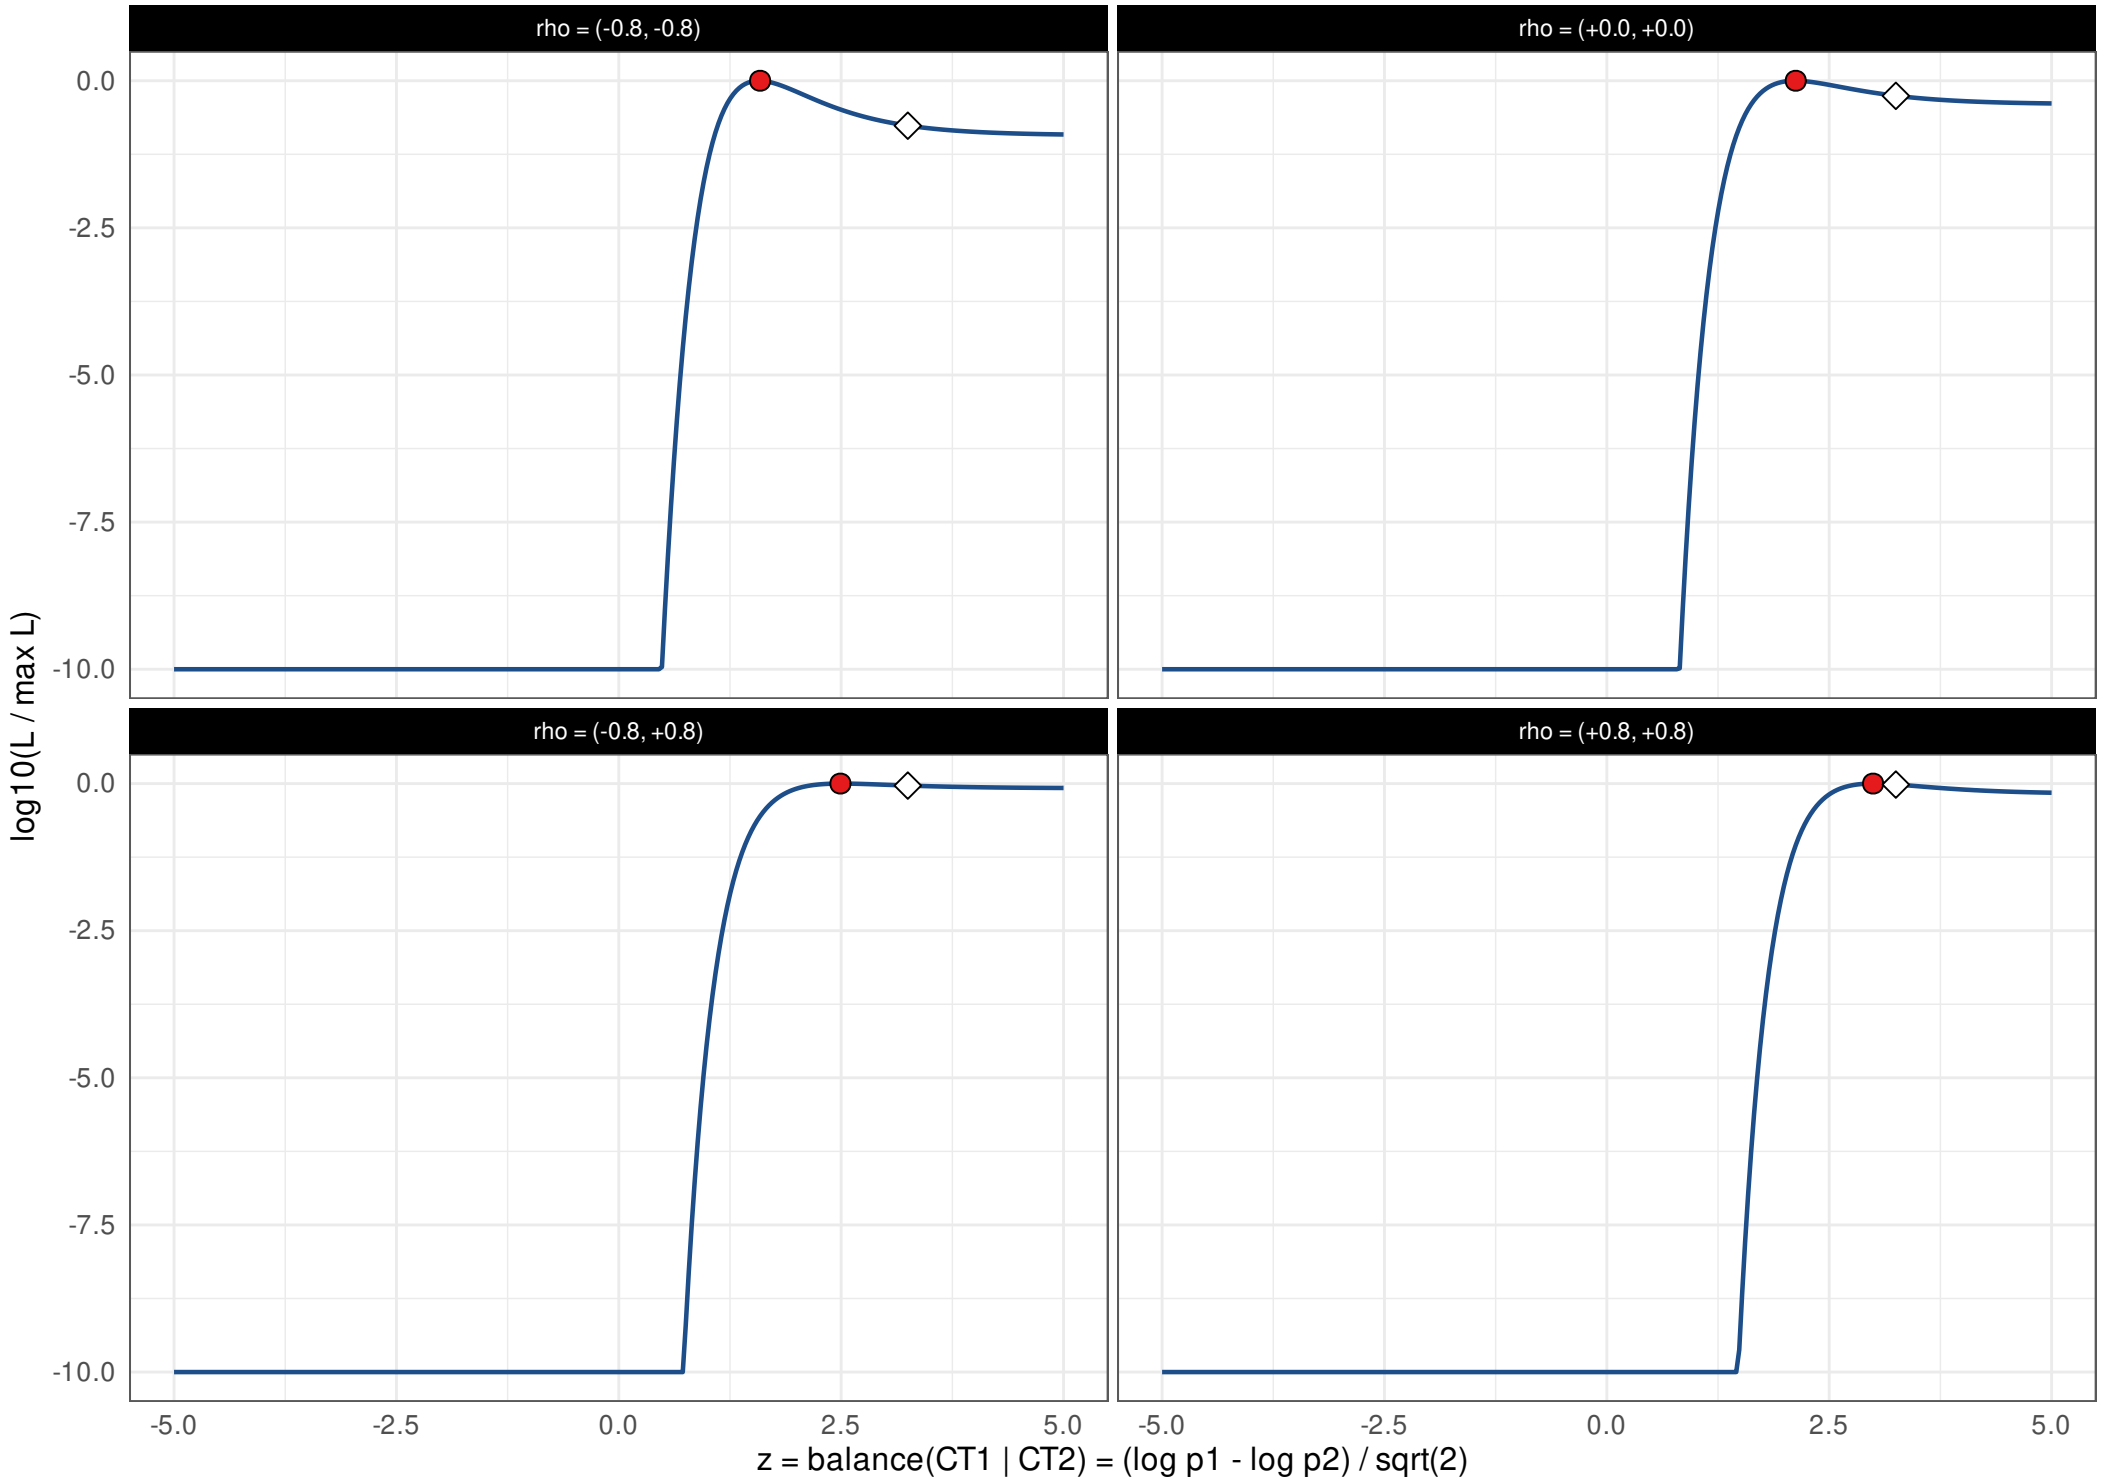

First simulated bulk. Same axes on every panel and page.

◇ true p* ● maximum

Observed log-likelihood along the simplex

large centroid gap / homoscedastic / highly unbalanced

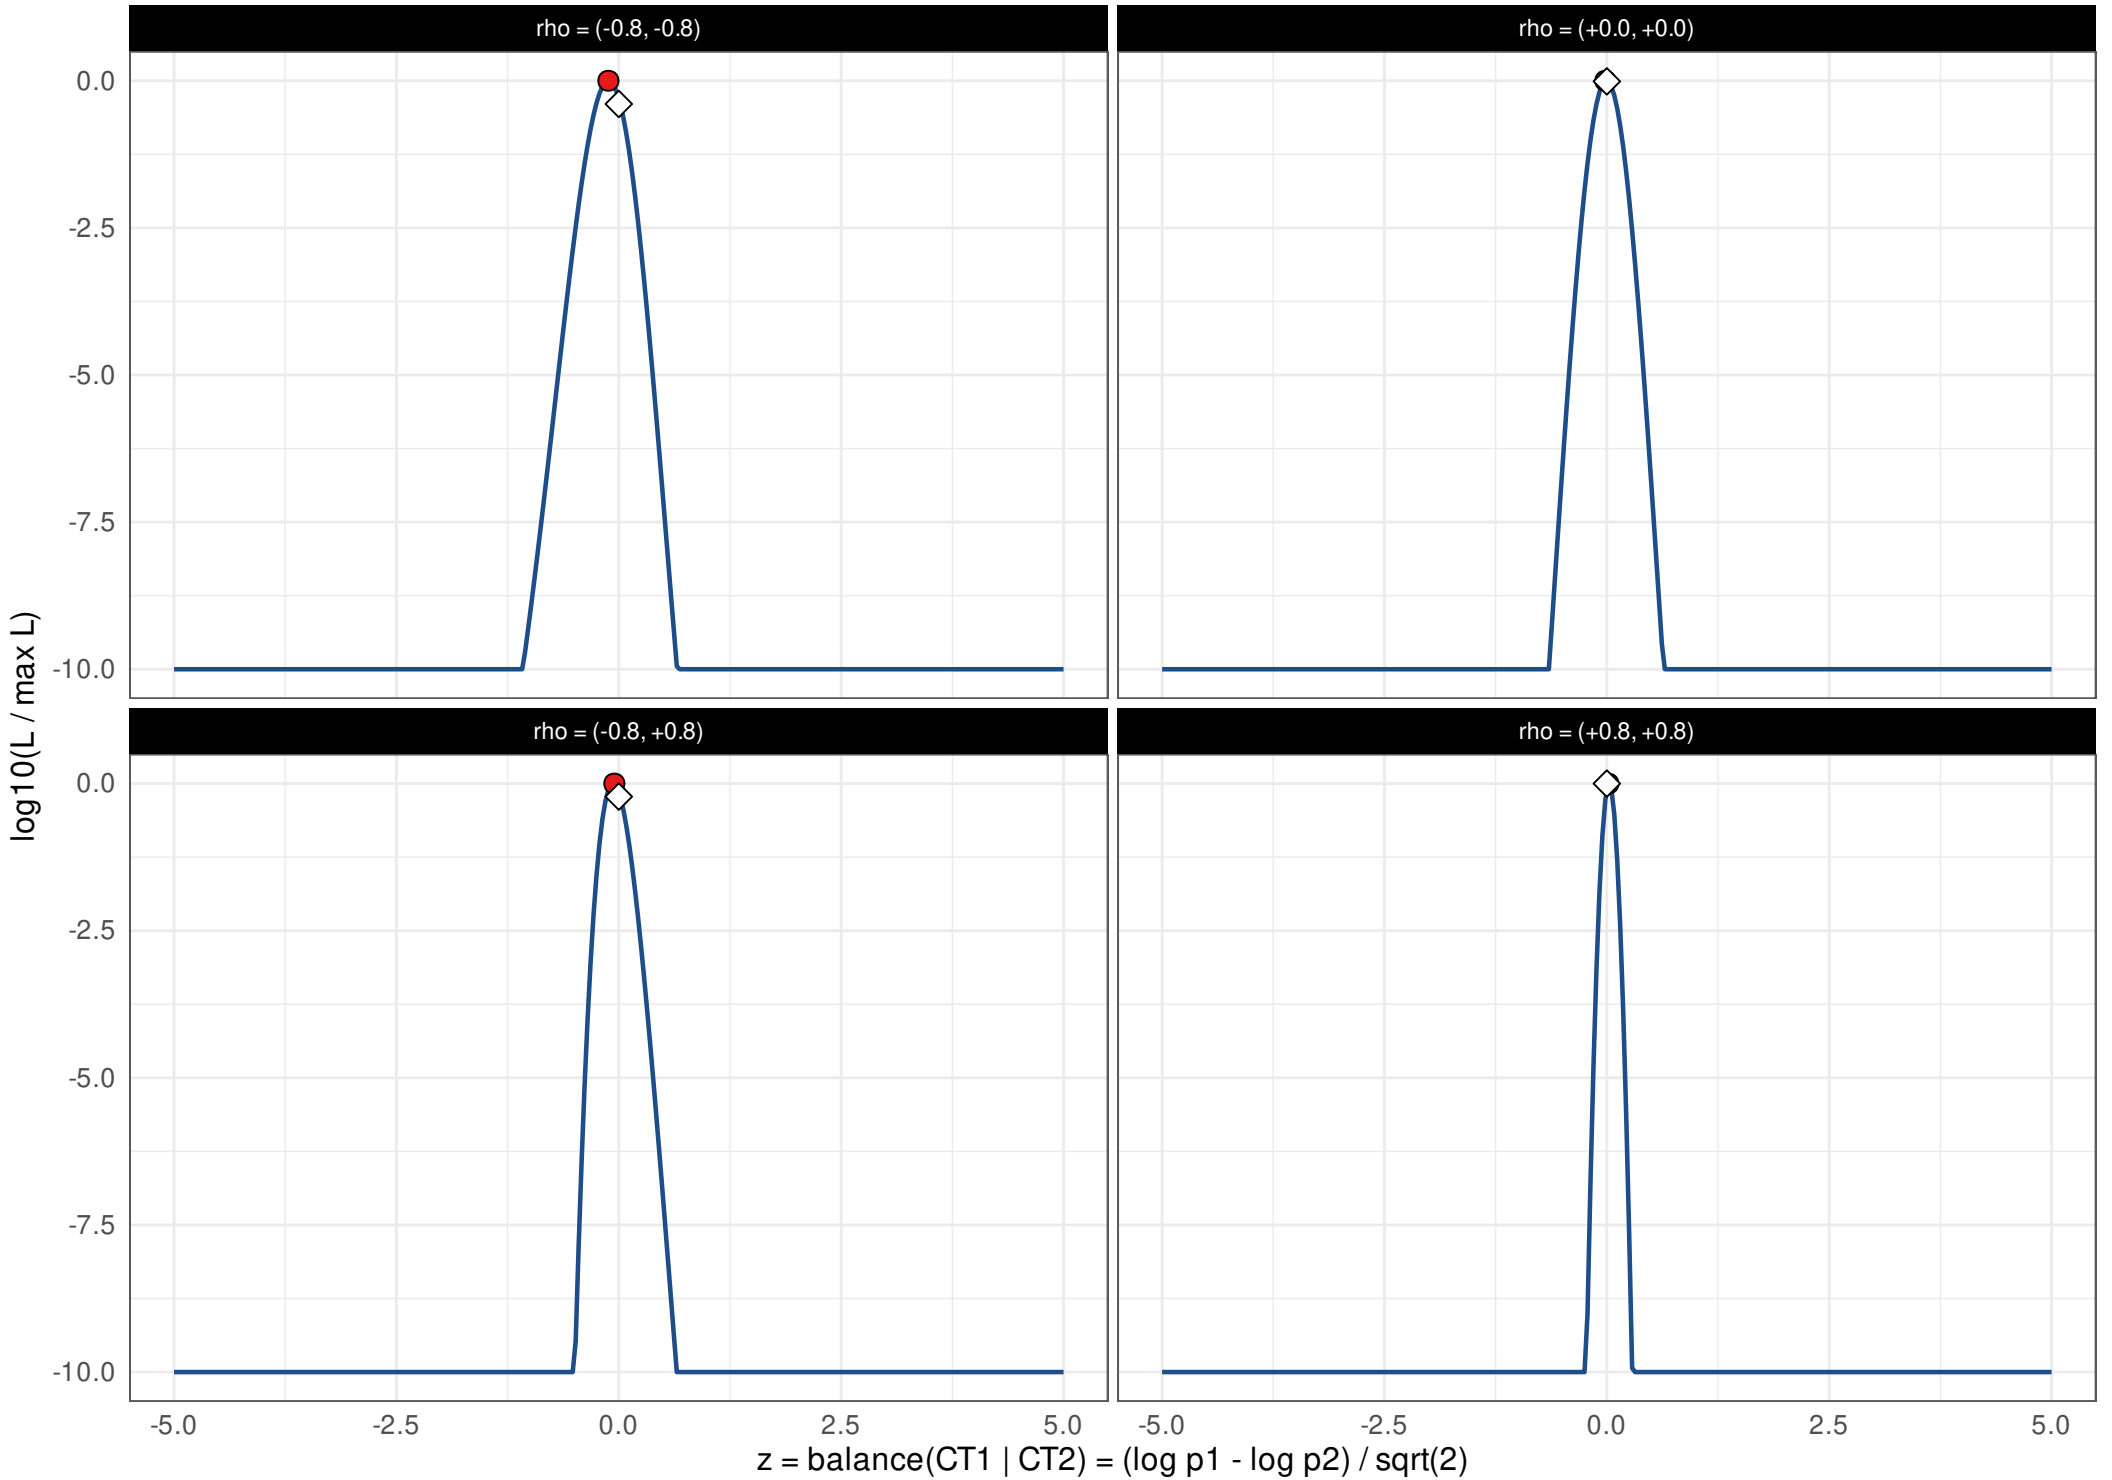

First simulated bulk. Same axes on every panel and page.

◇ true p* ● maximum

Observed log-likelihood along the simplex

large centroid gap / heteroscedastic / balanced

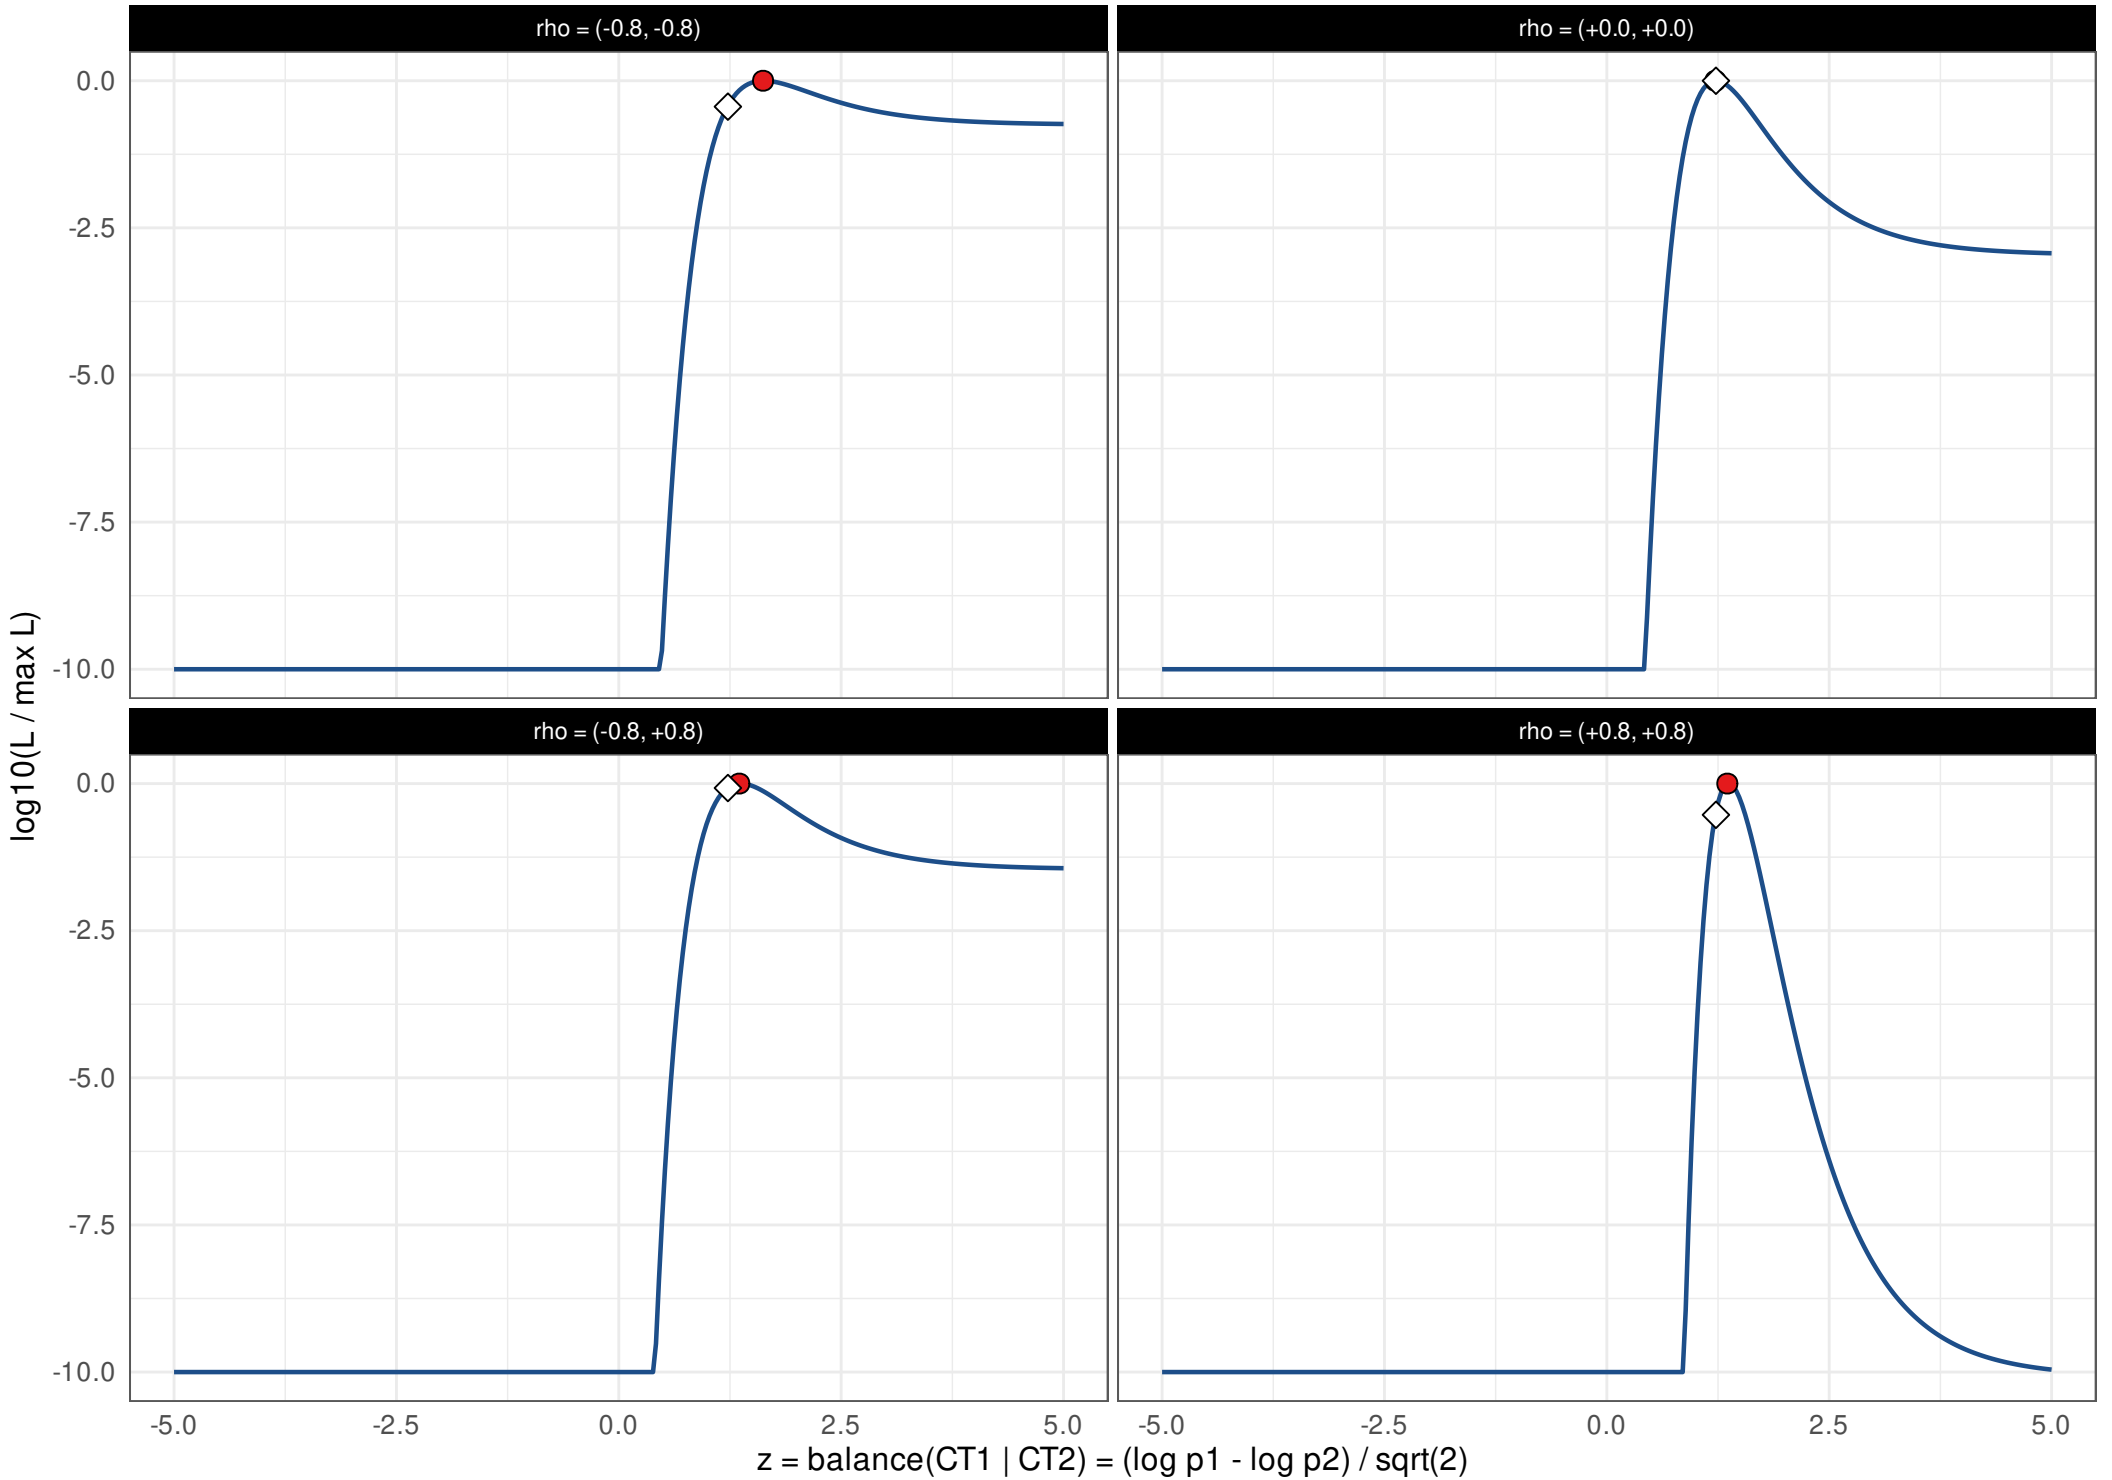

First simulated bulk. Same axes on every panel and page.

◇ true p* ● maximum

Observed log-likelihood along the simplex

large centroid gap / heteroscedastic / moderately unbalanced

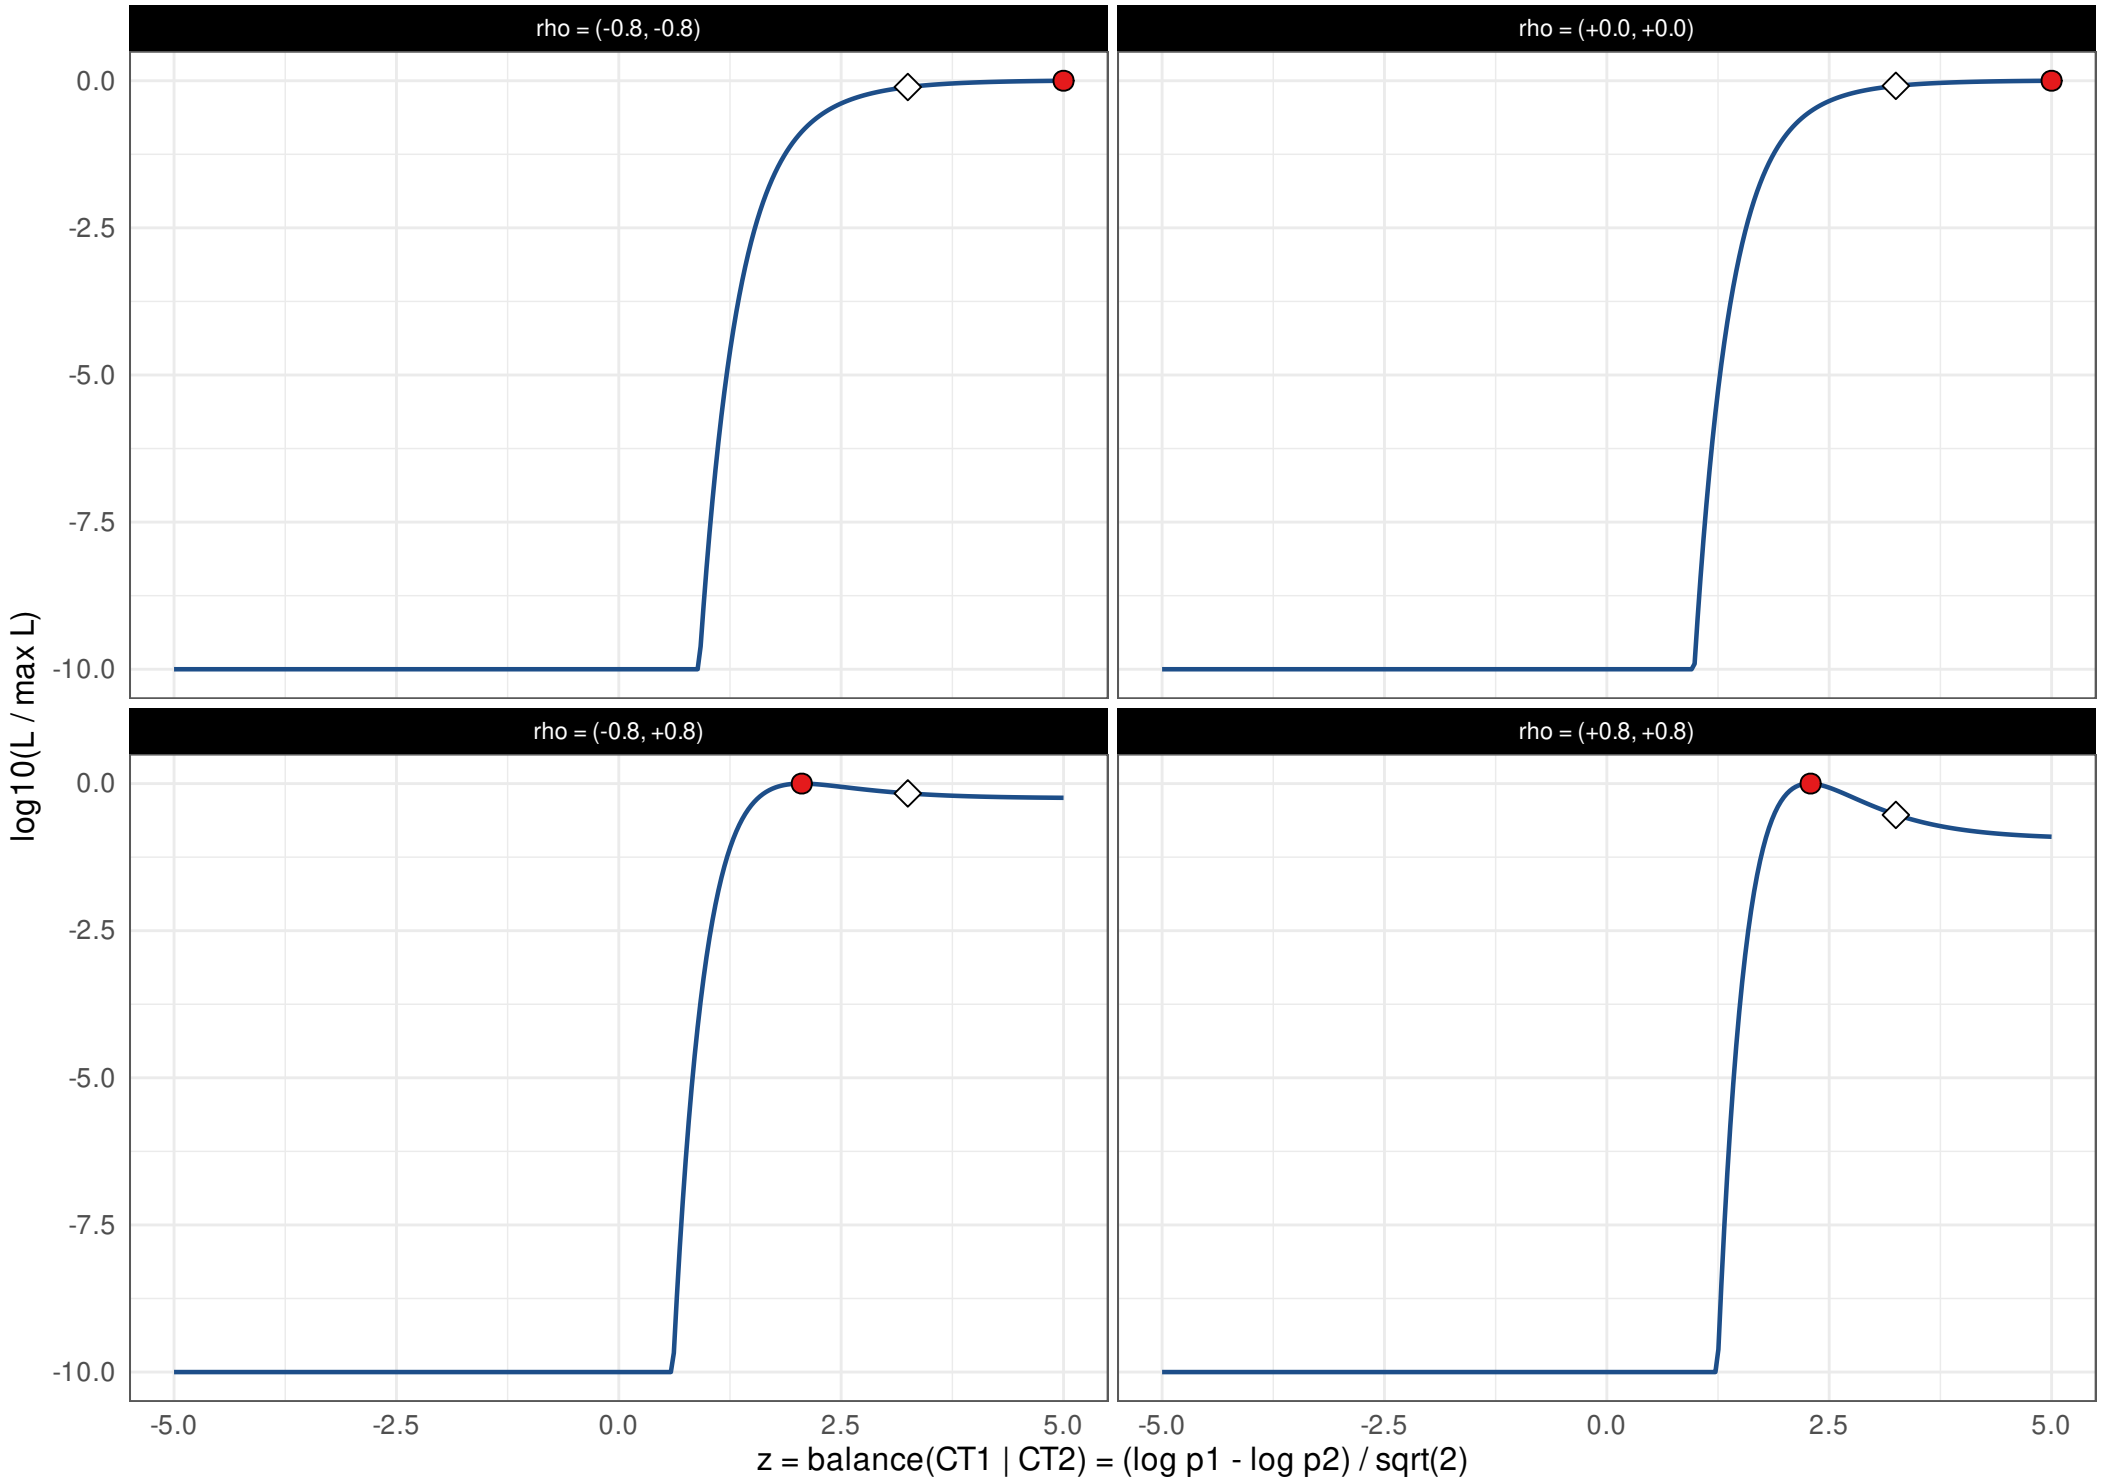

First simulated bulk. Same axes on every panel and page.

◇ true p* ● maximum

Observed log-likelihood along the simplex

large centroid gap / heteroscedastic / highly unbalanced

First simulated bulk. Same axes on every panel and page.

◇ true p* ● maximum
