

small_CLD / homoscedastic / balanced

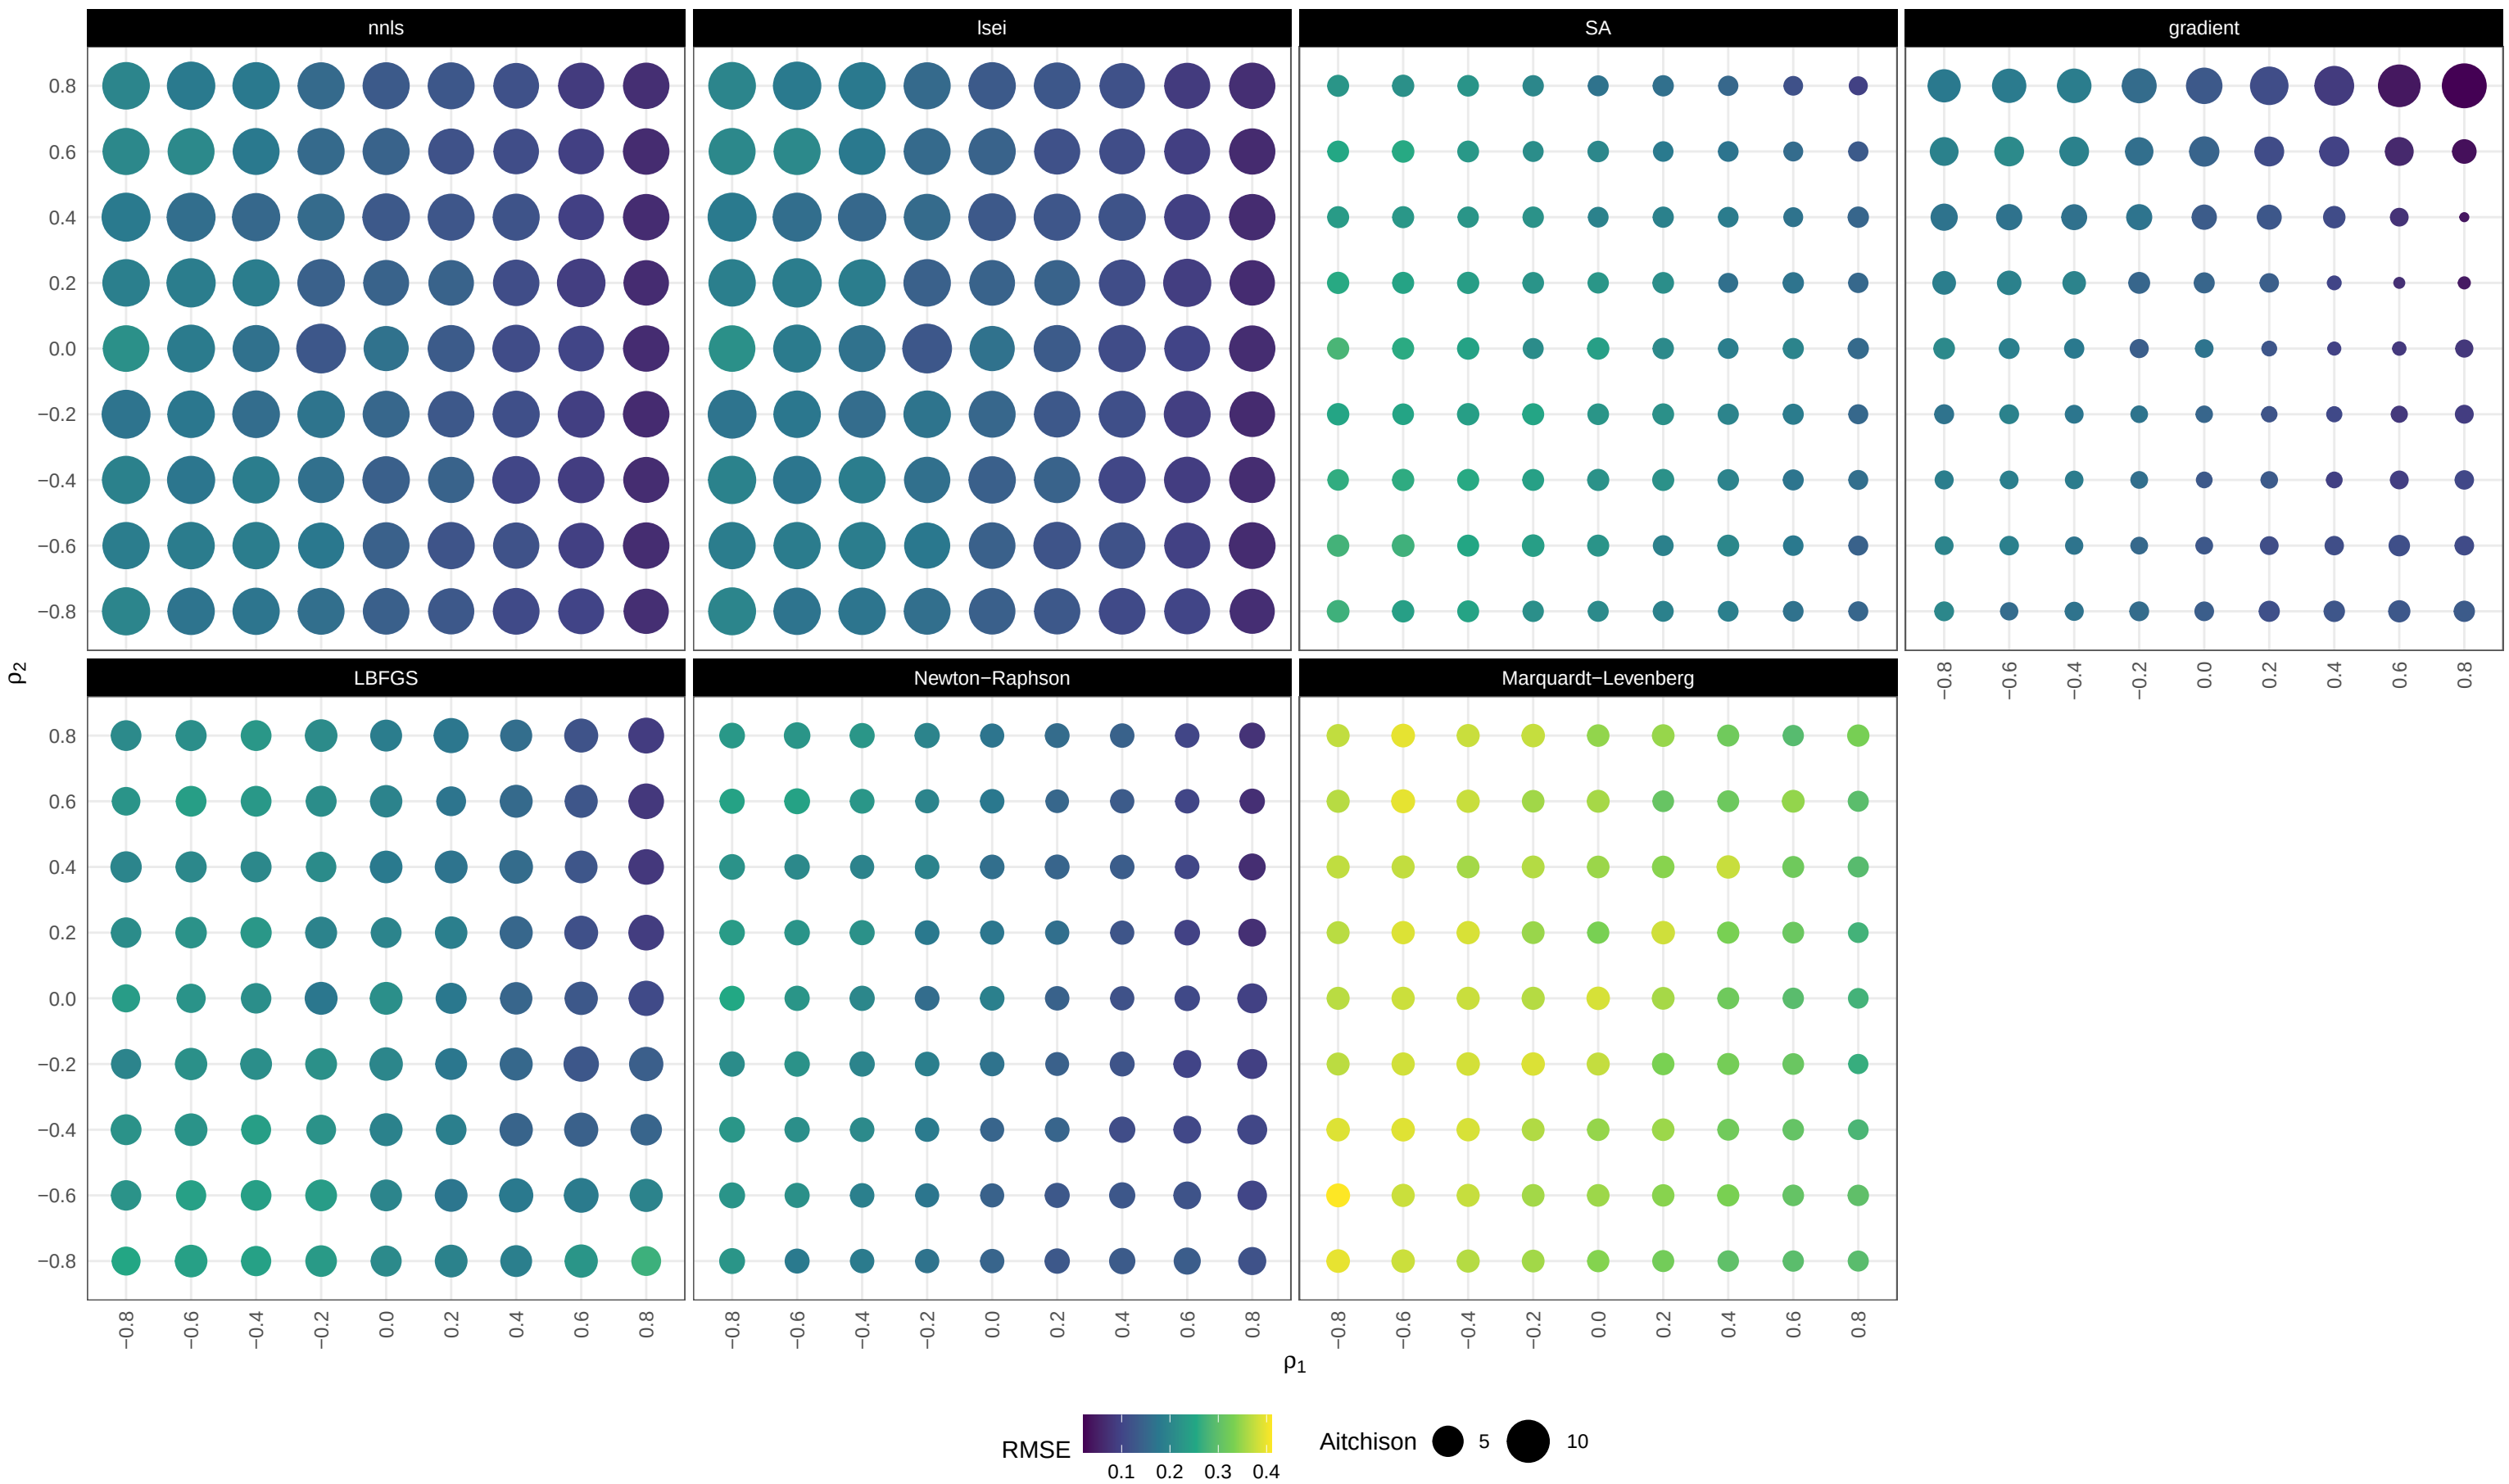

Each panel is the 9-by-9 correlation factorial (81 cells). Colour: mean RMSE; size: mean Aitchison distance.

small_CLD / homoscedastic / moderately unbalanced

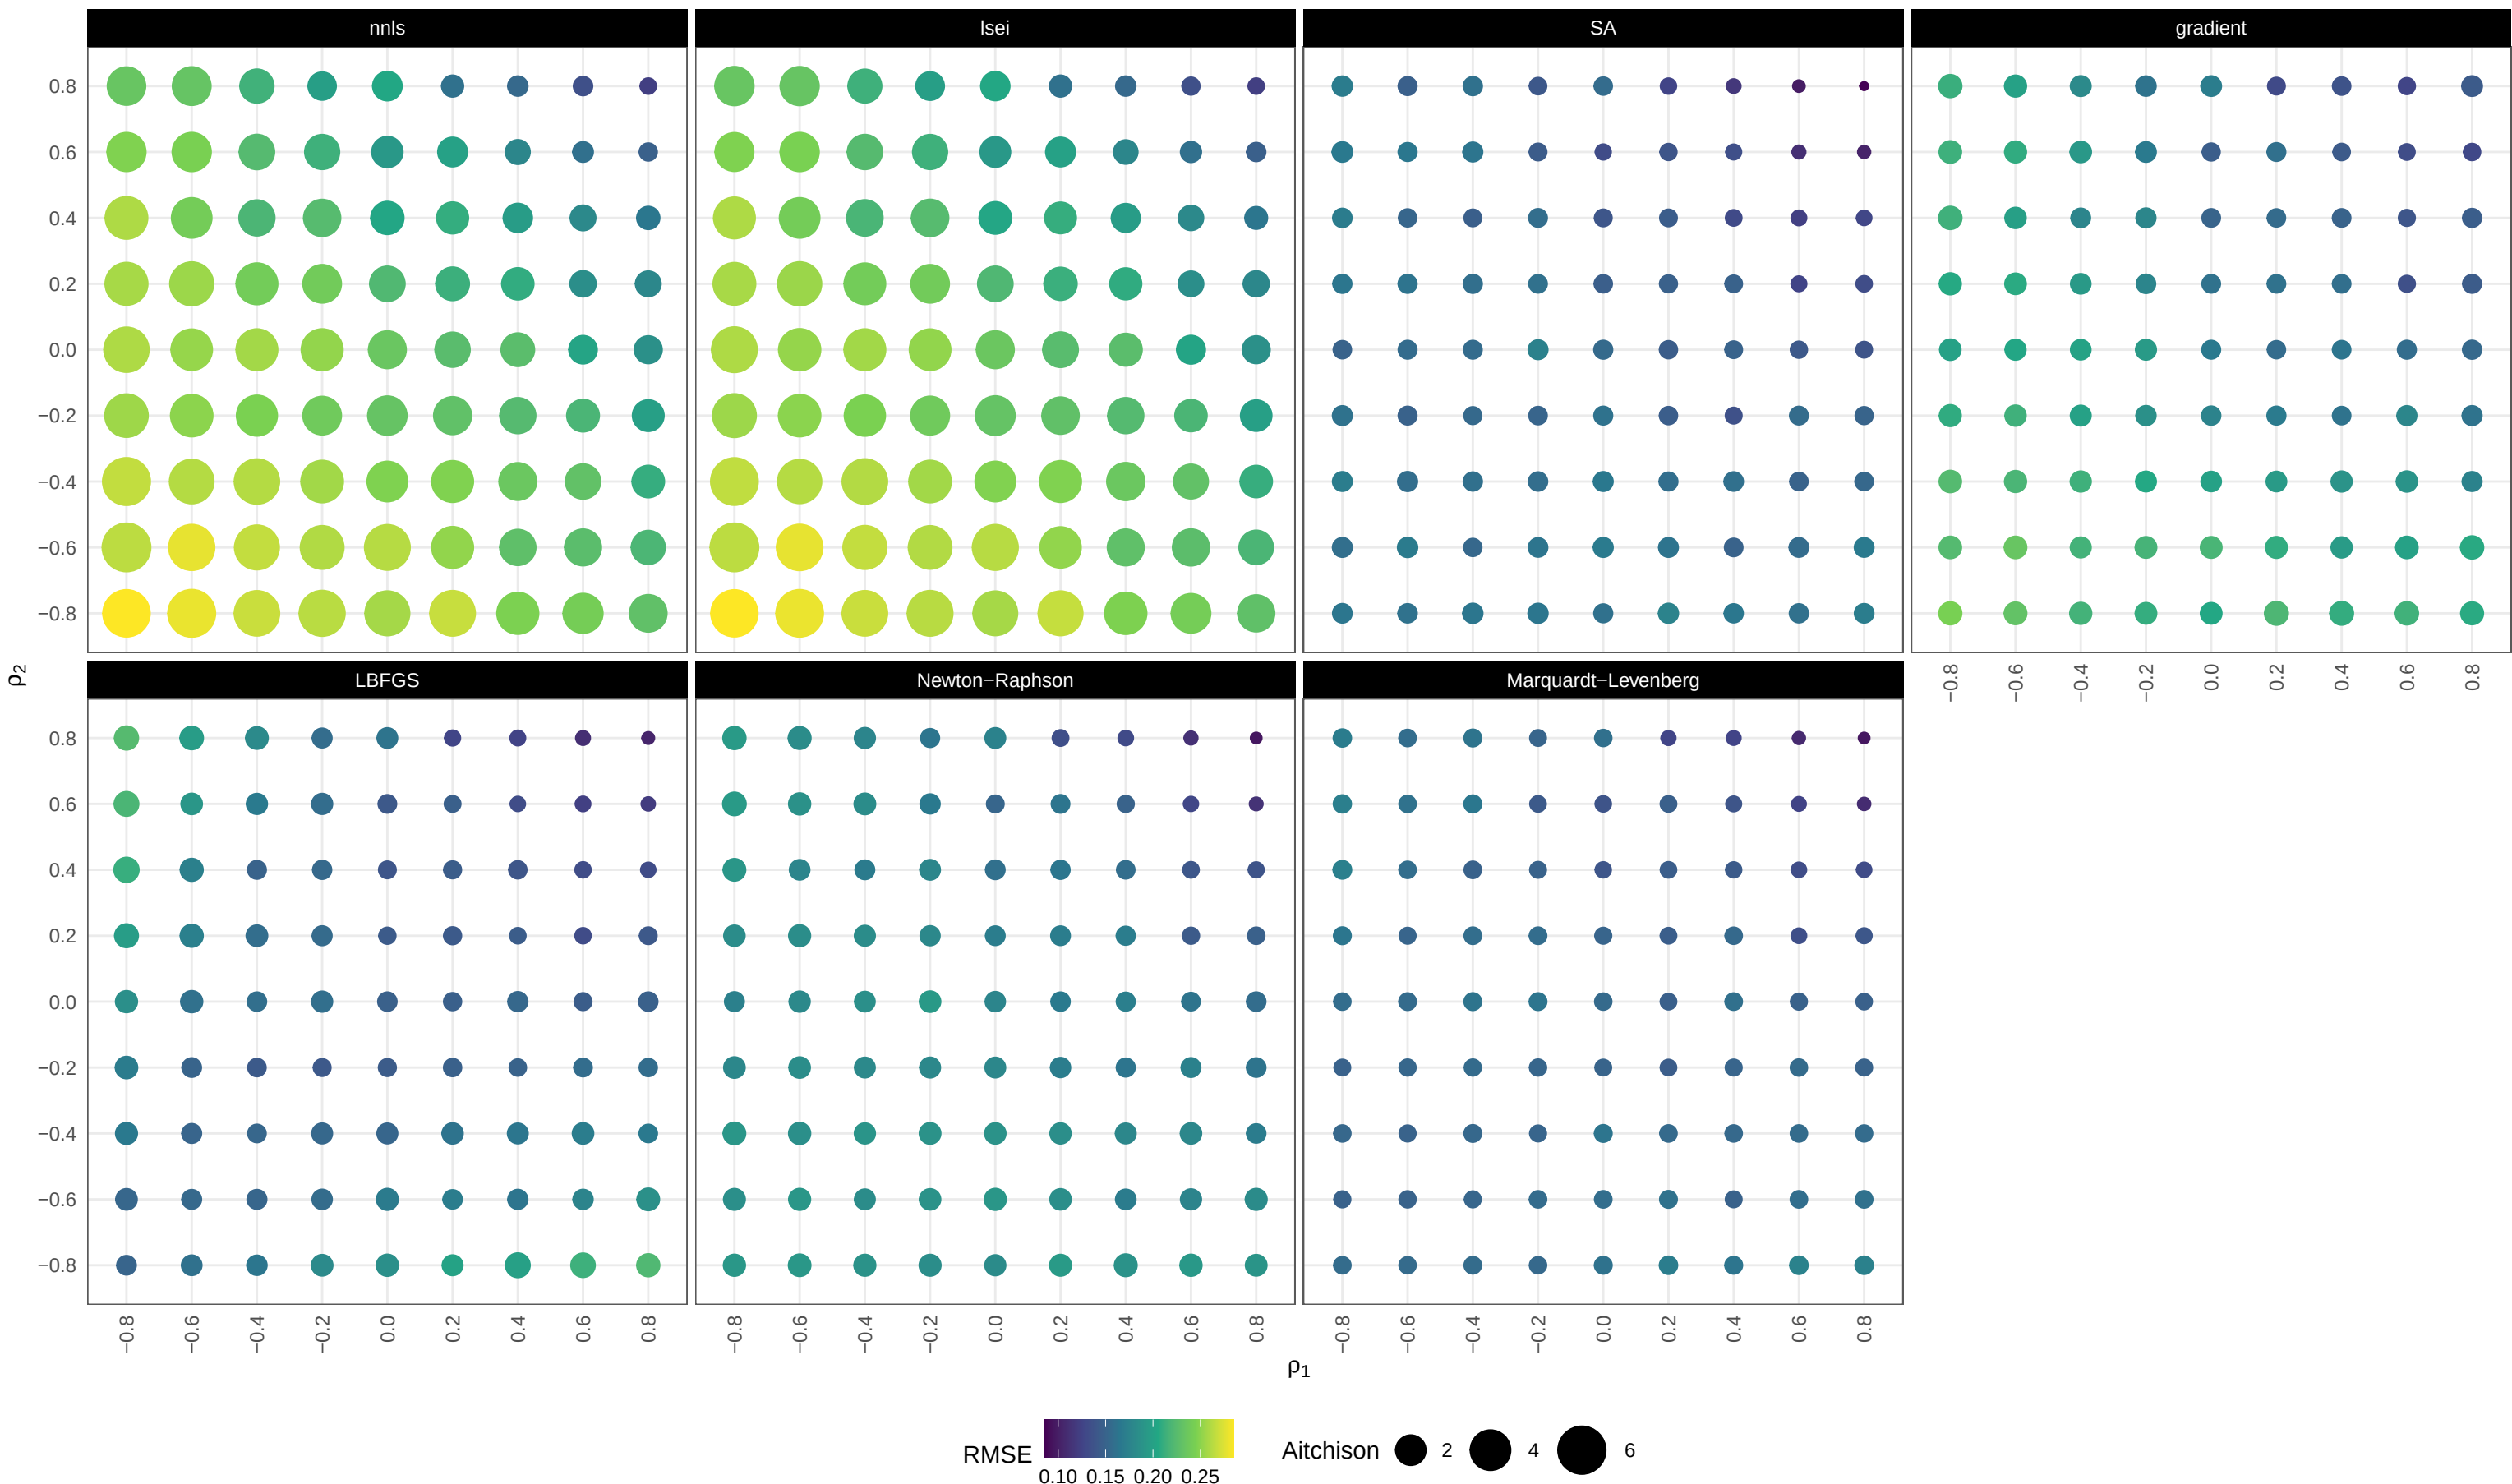

Each panel is the 9-by-9 correlation factorial (81 cells). Colour: mean RMSE; size: mean Aitchison distance.

small_CLD / homoscedastic / highly unbalanced

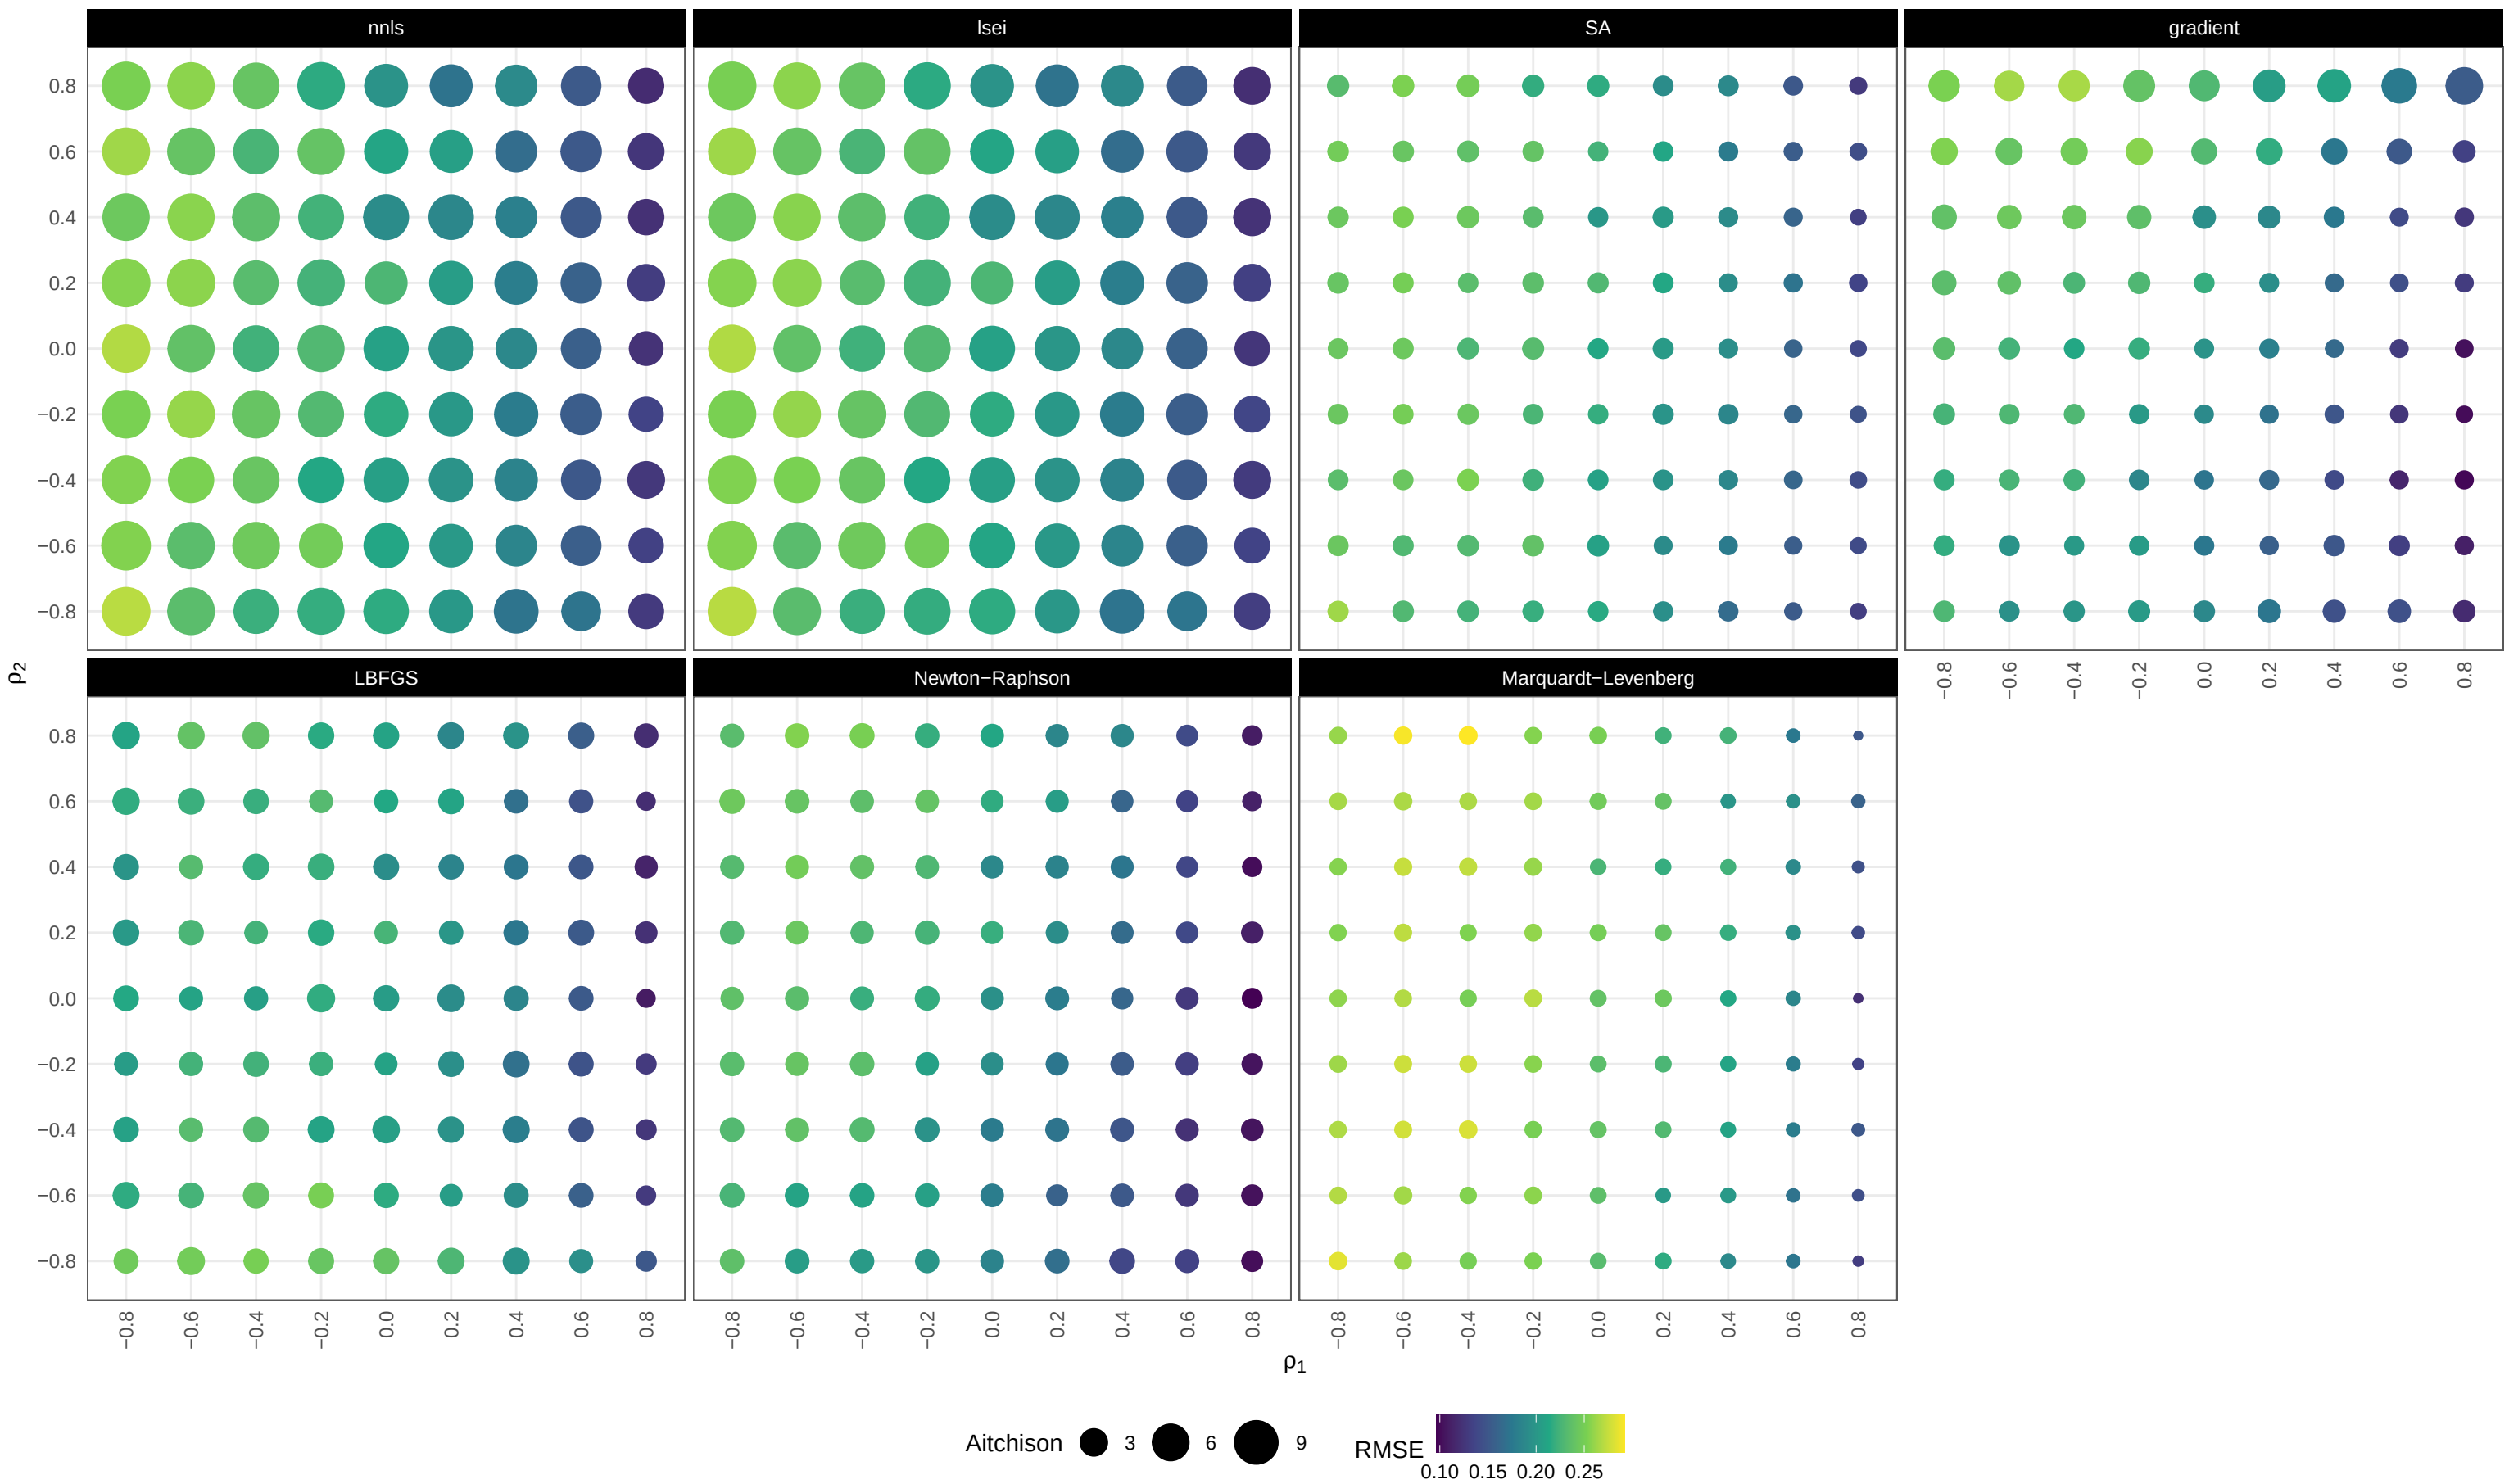

Each panel is the 9-by-9 correlation factorial (81 cells). Colour: mean RMSE; size: mean Aitchison distance.

small_CLD / heteroscedastic / balanced

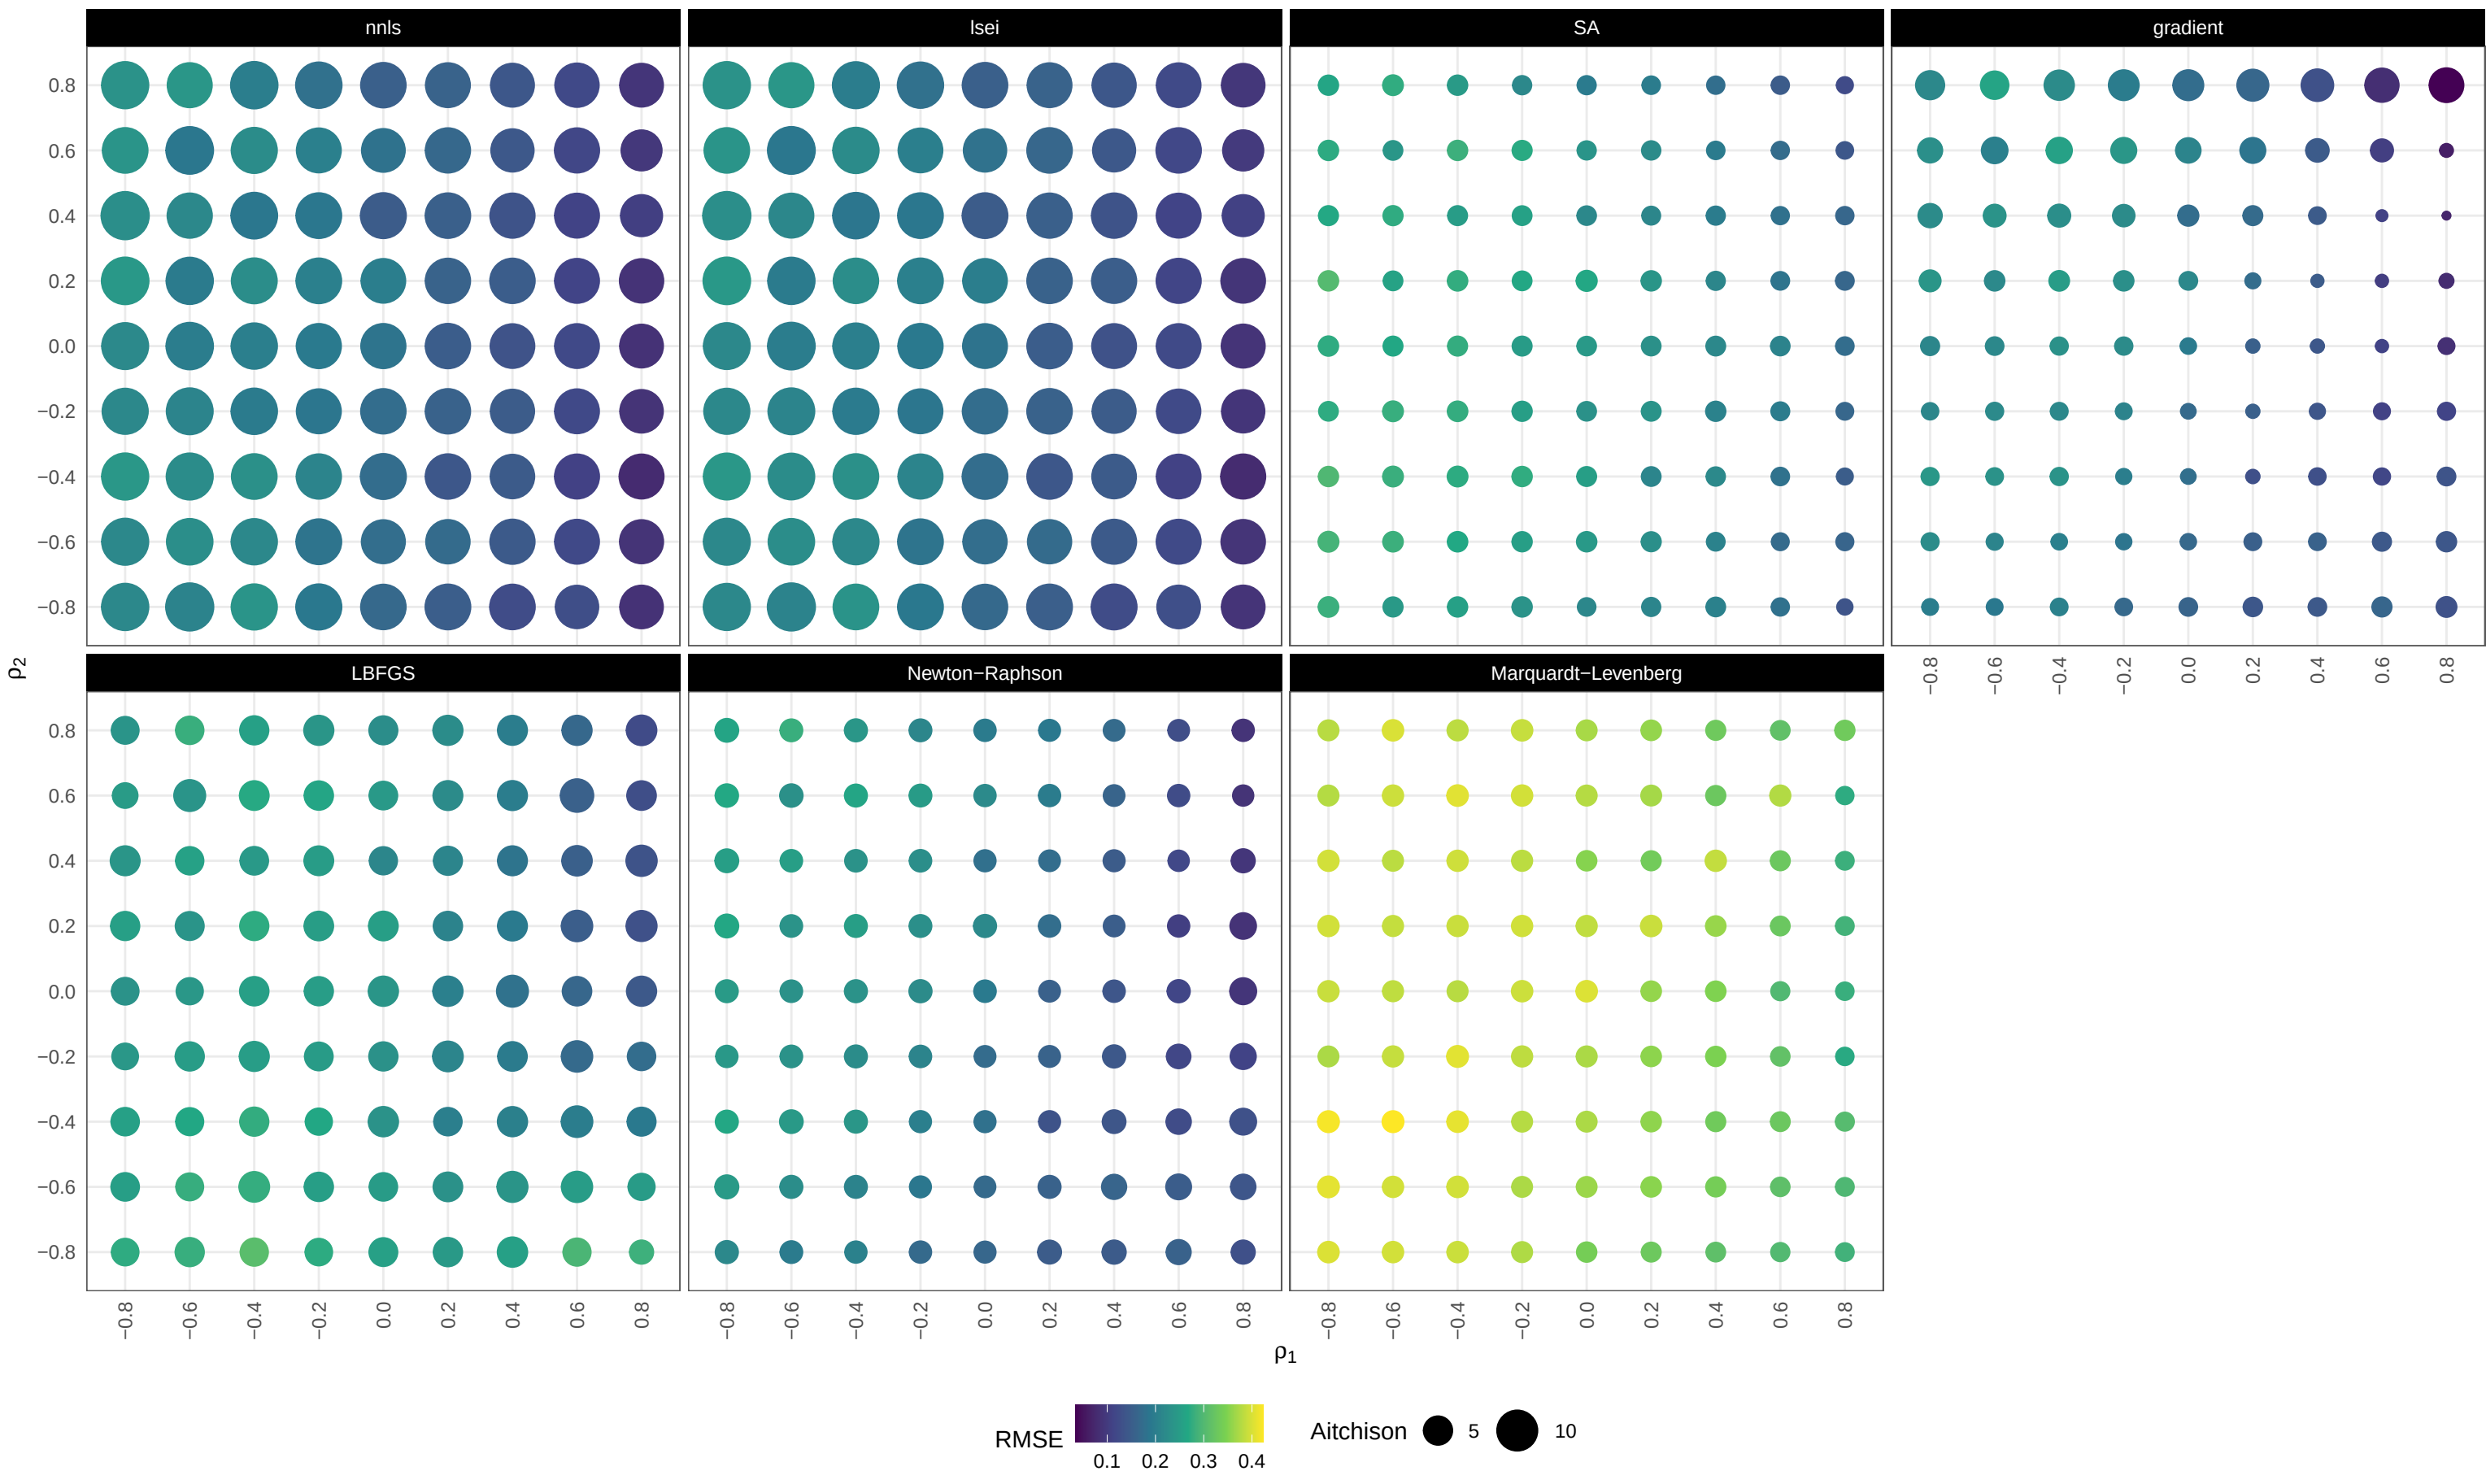

Each panel is the 9-by-9 correlation factorial (81 cells). Colour: mean RMSE; size: mean Aitchison distance.

small_CLD / heteroscedastic / moderately unbalanced

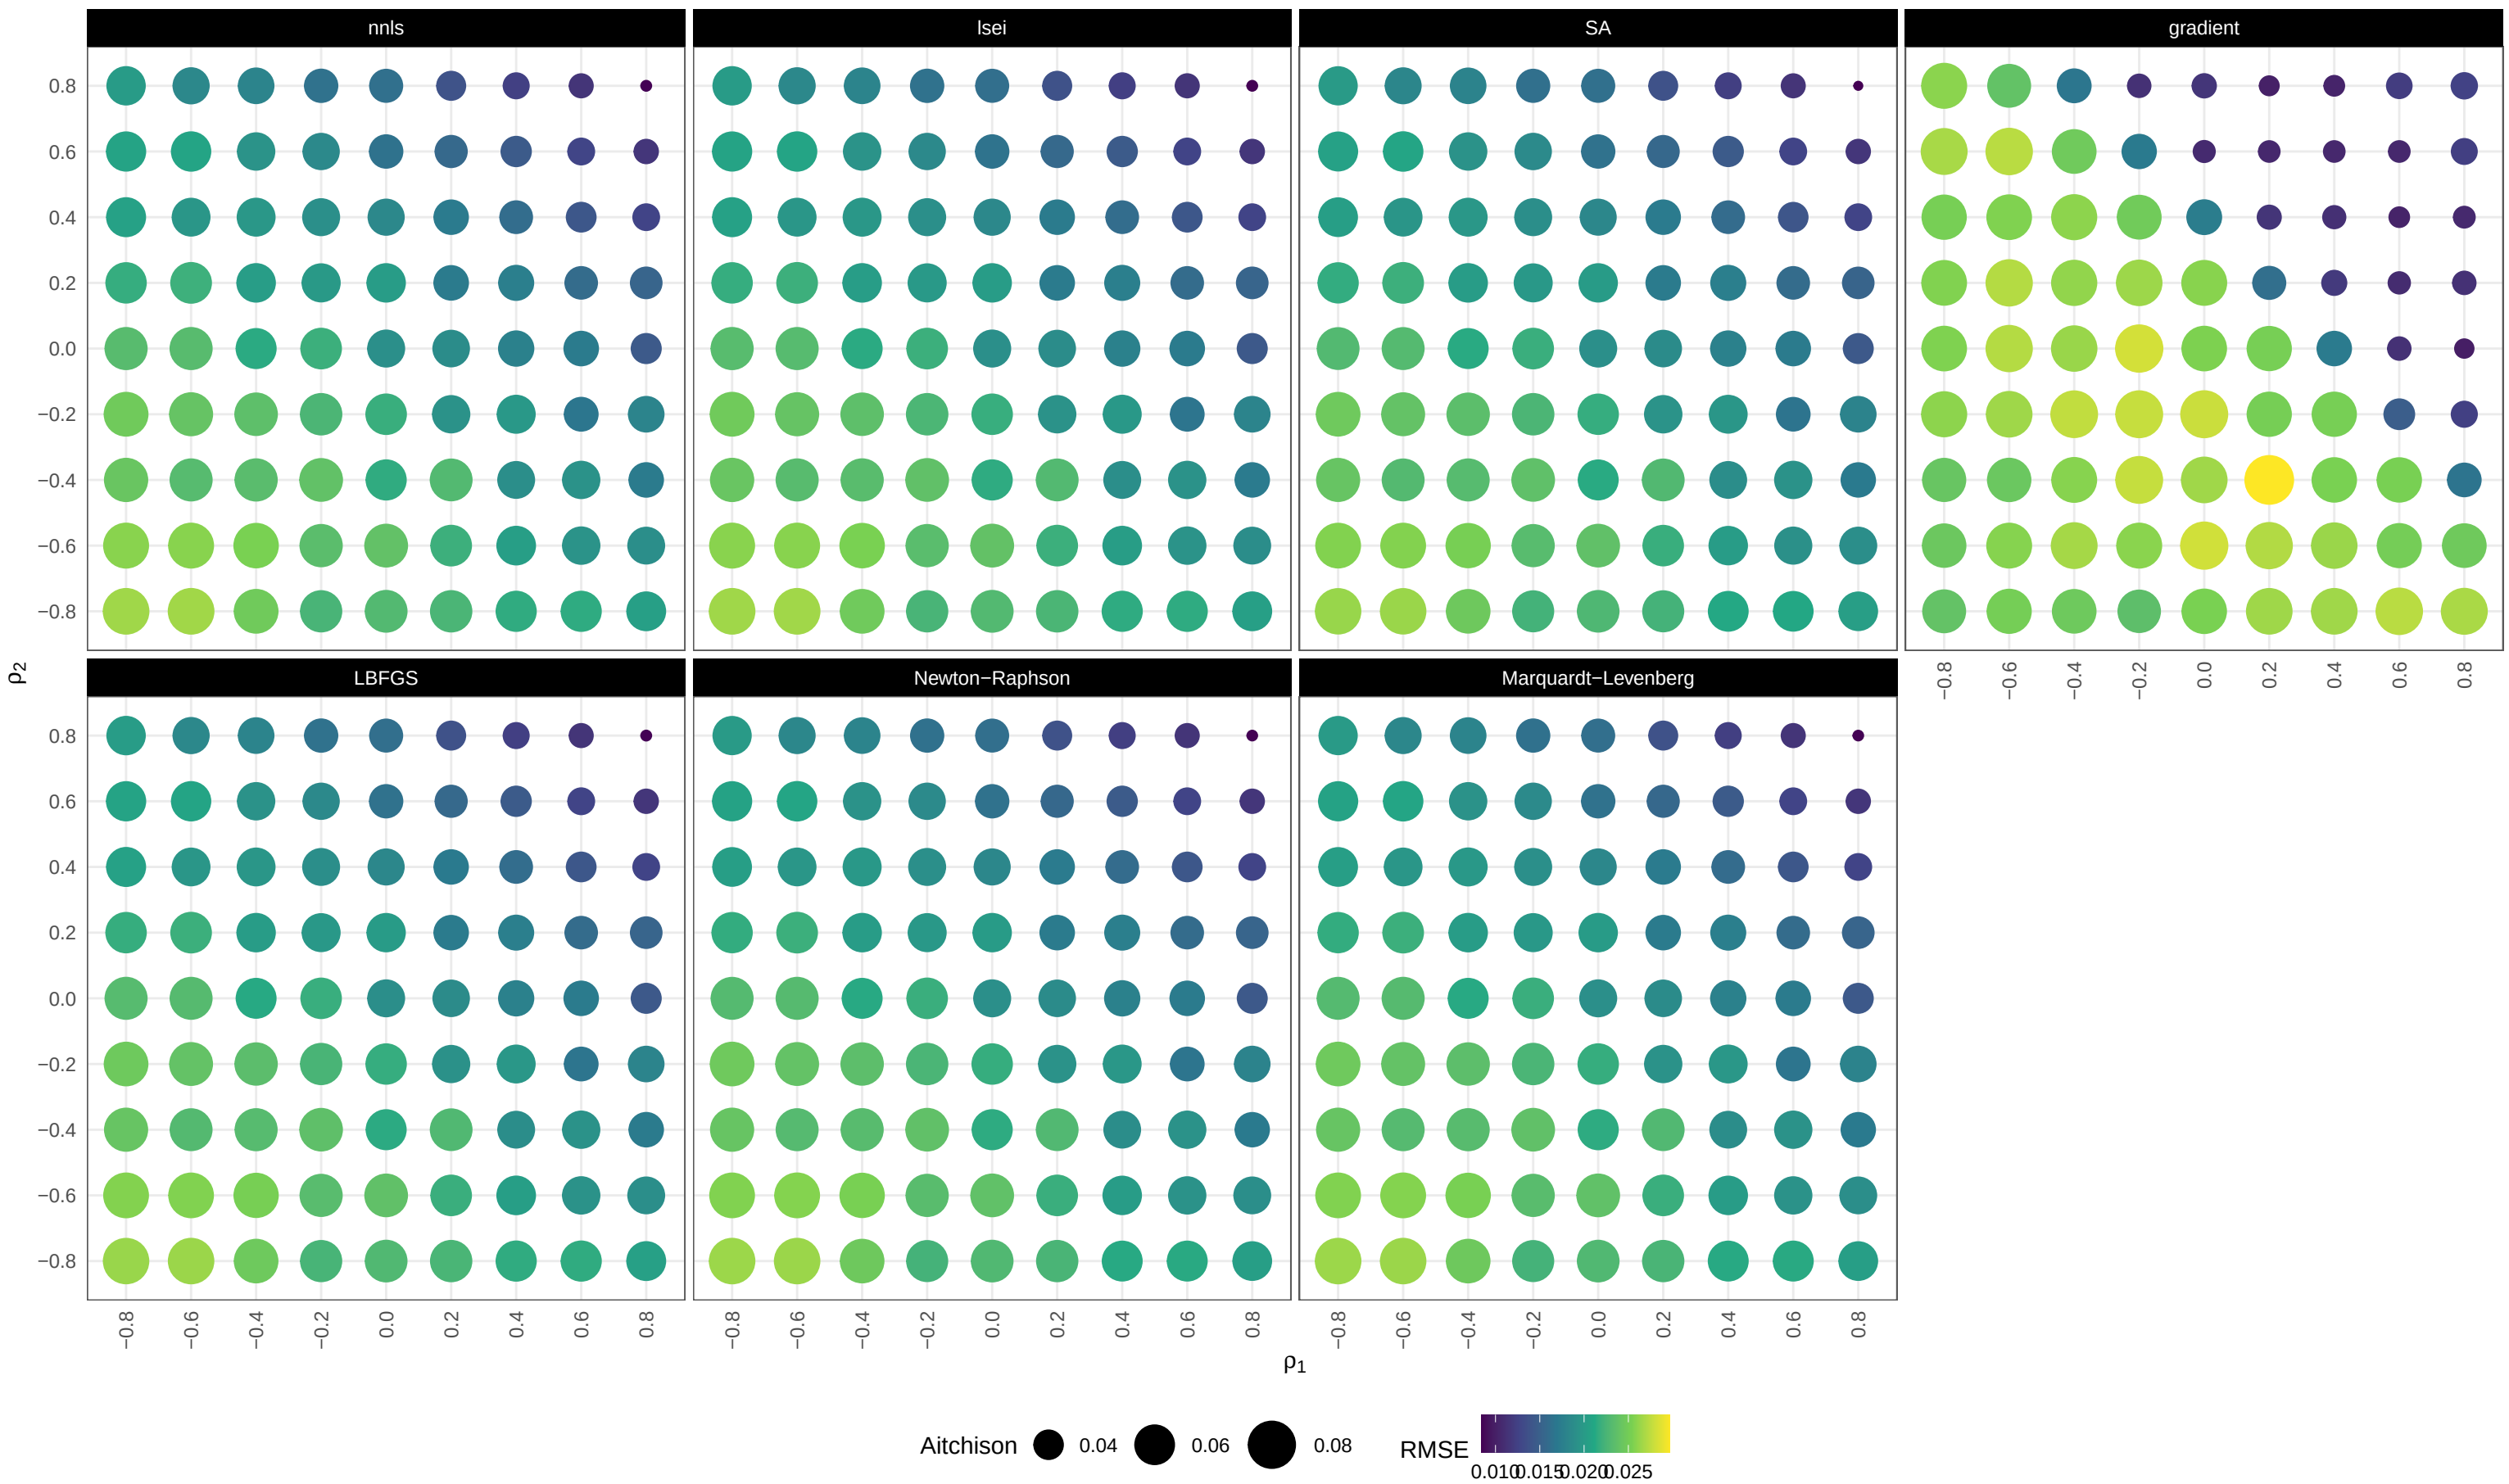

small_CLD / heteroscedastic / highly unbalanced

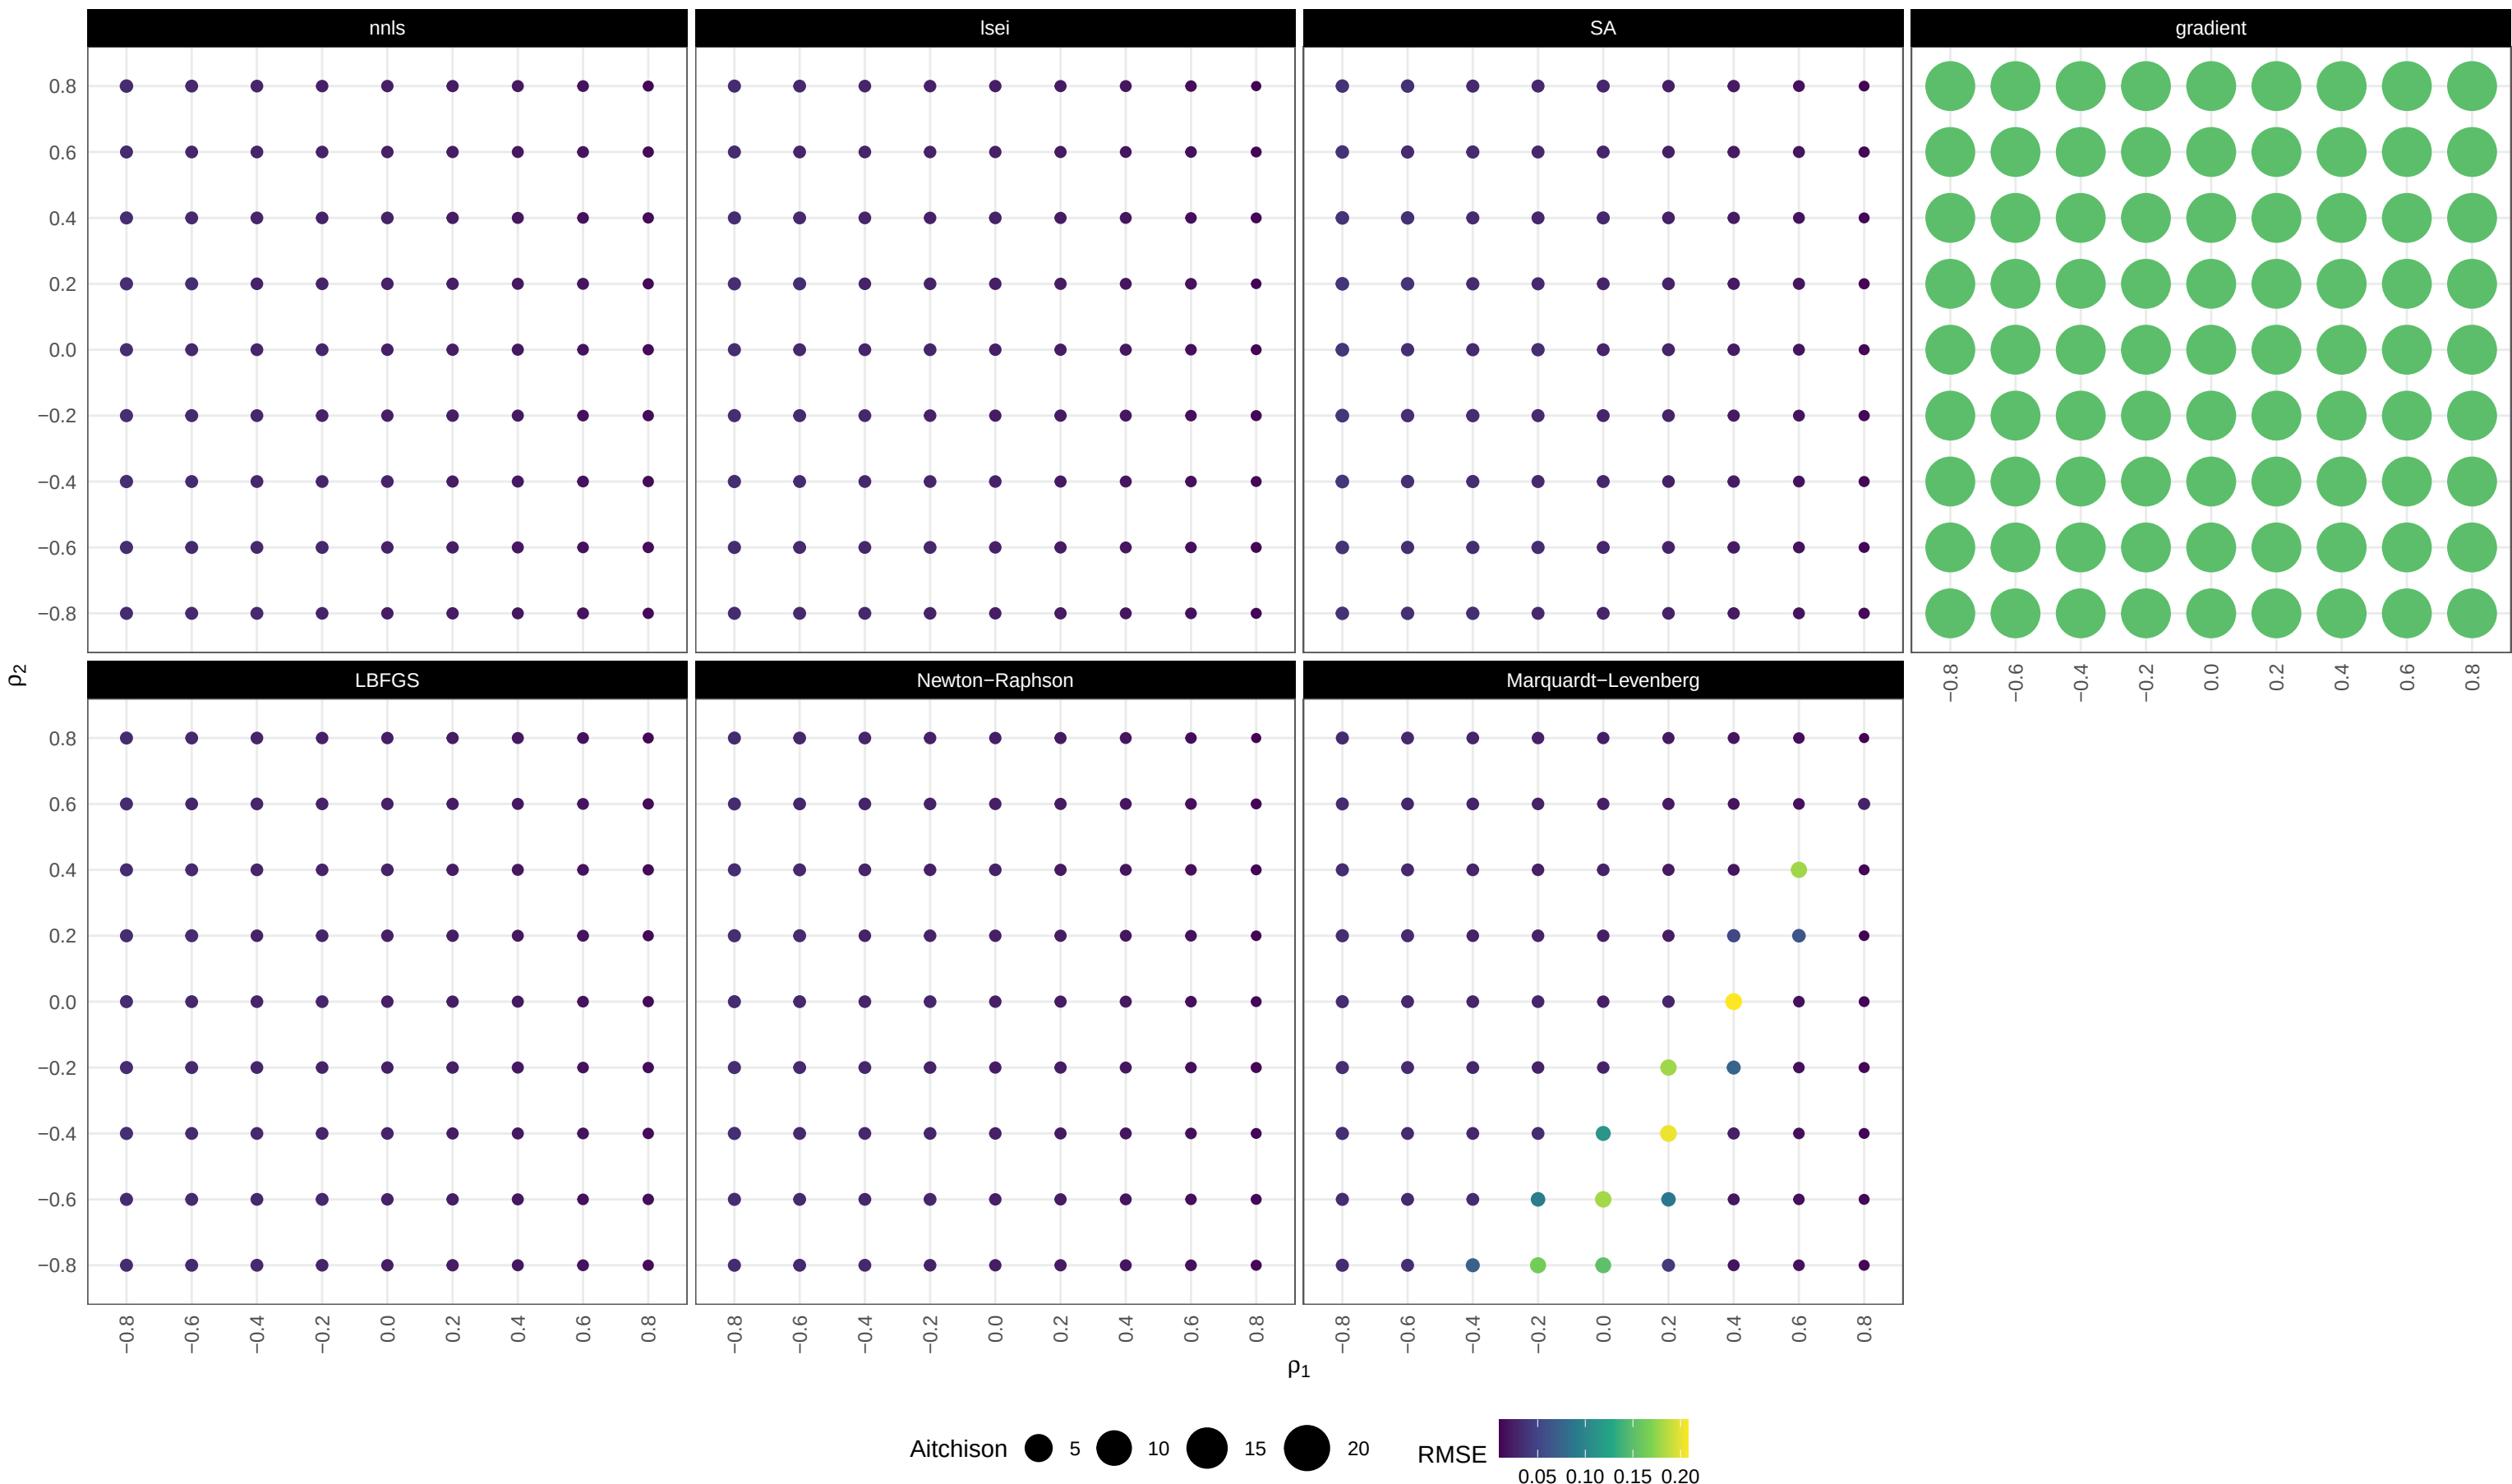

Each panel is the 9-by-9 correlation factorial (81 cells). Colour: mean RMSE; size: mean Aitchison distance.

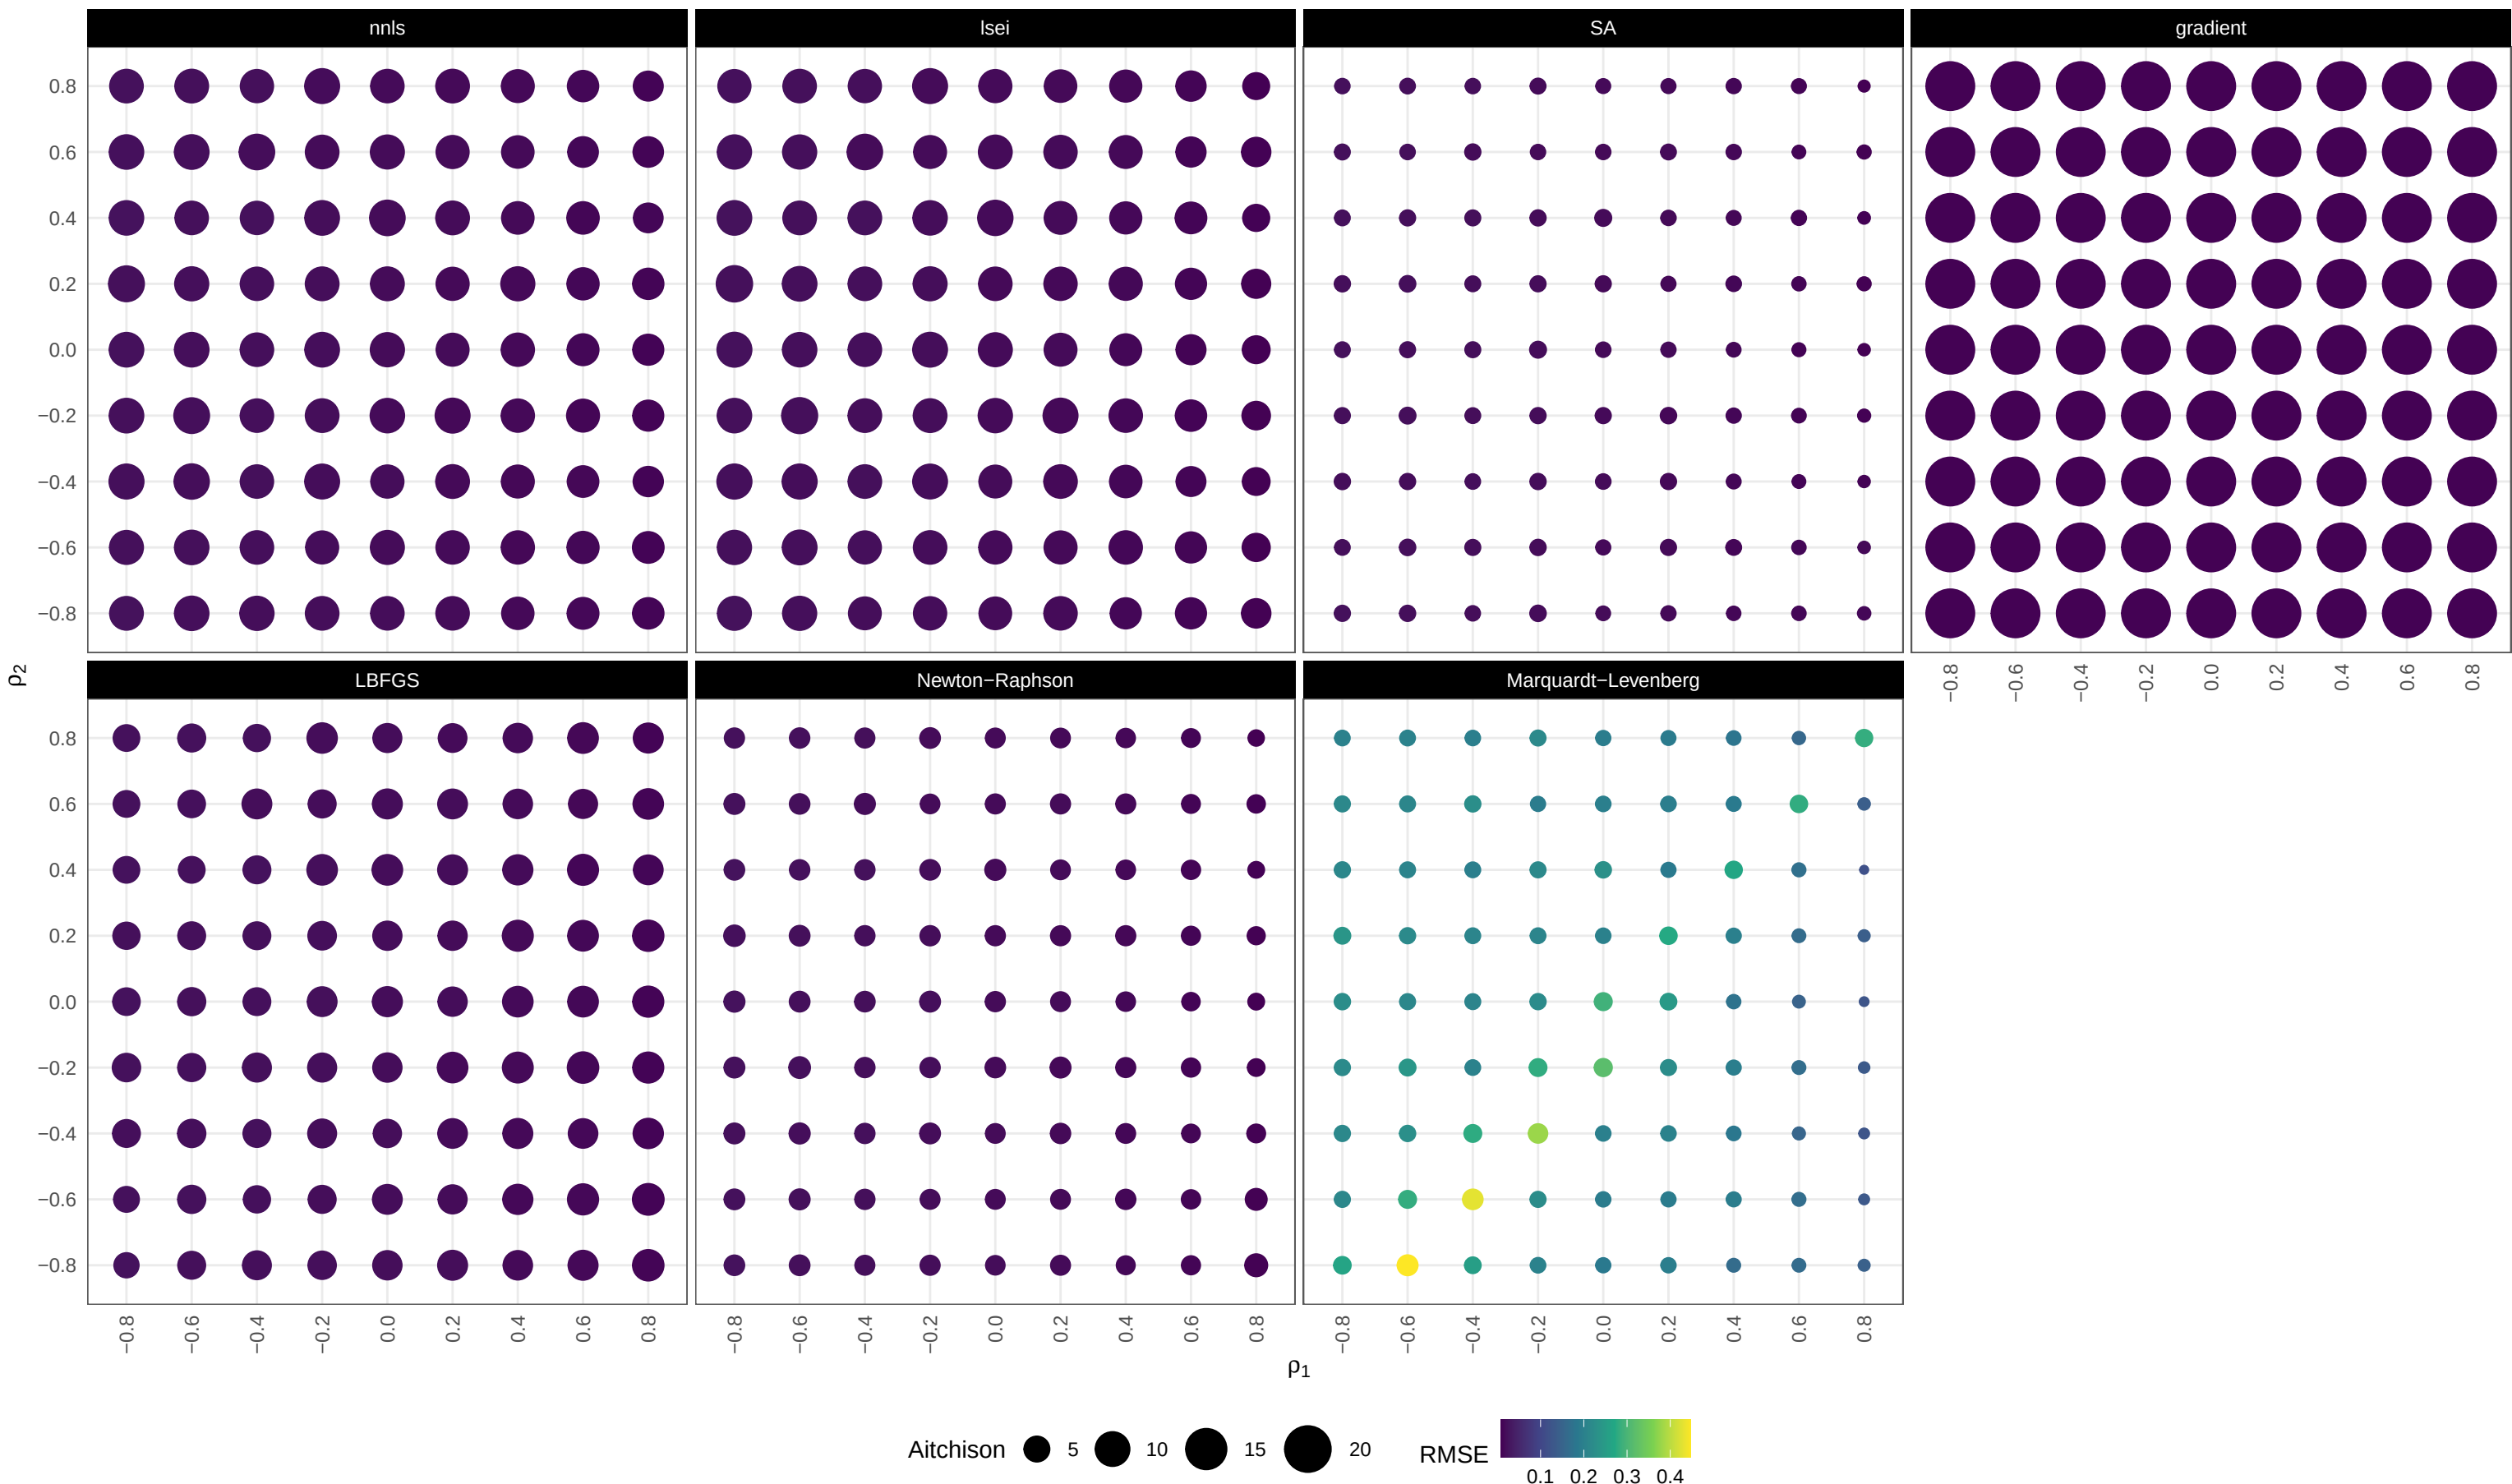

large_CLD / homoscedastic / balanced

large_CLD / homoscedastic / moderately unbalanced

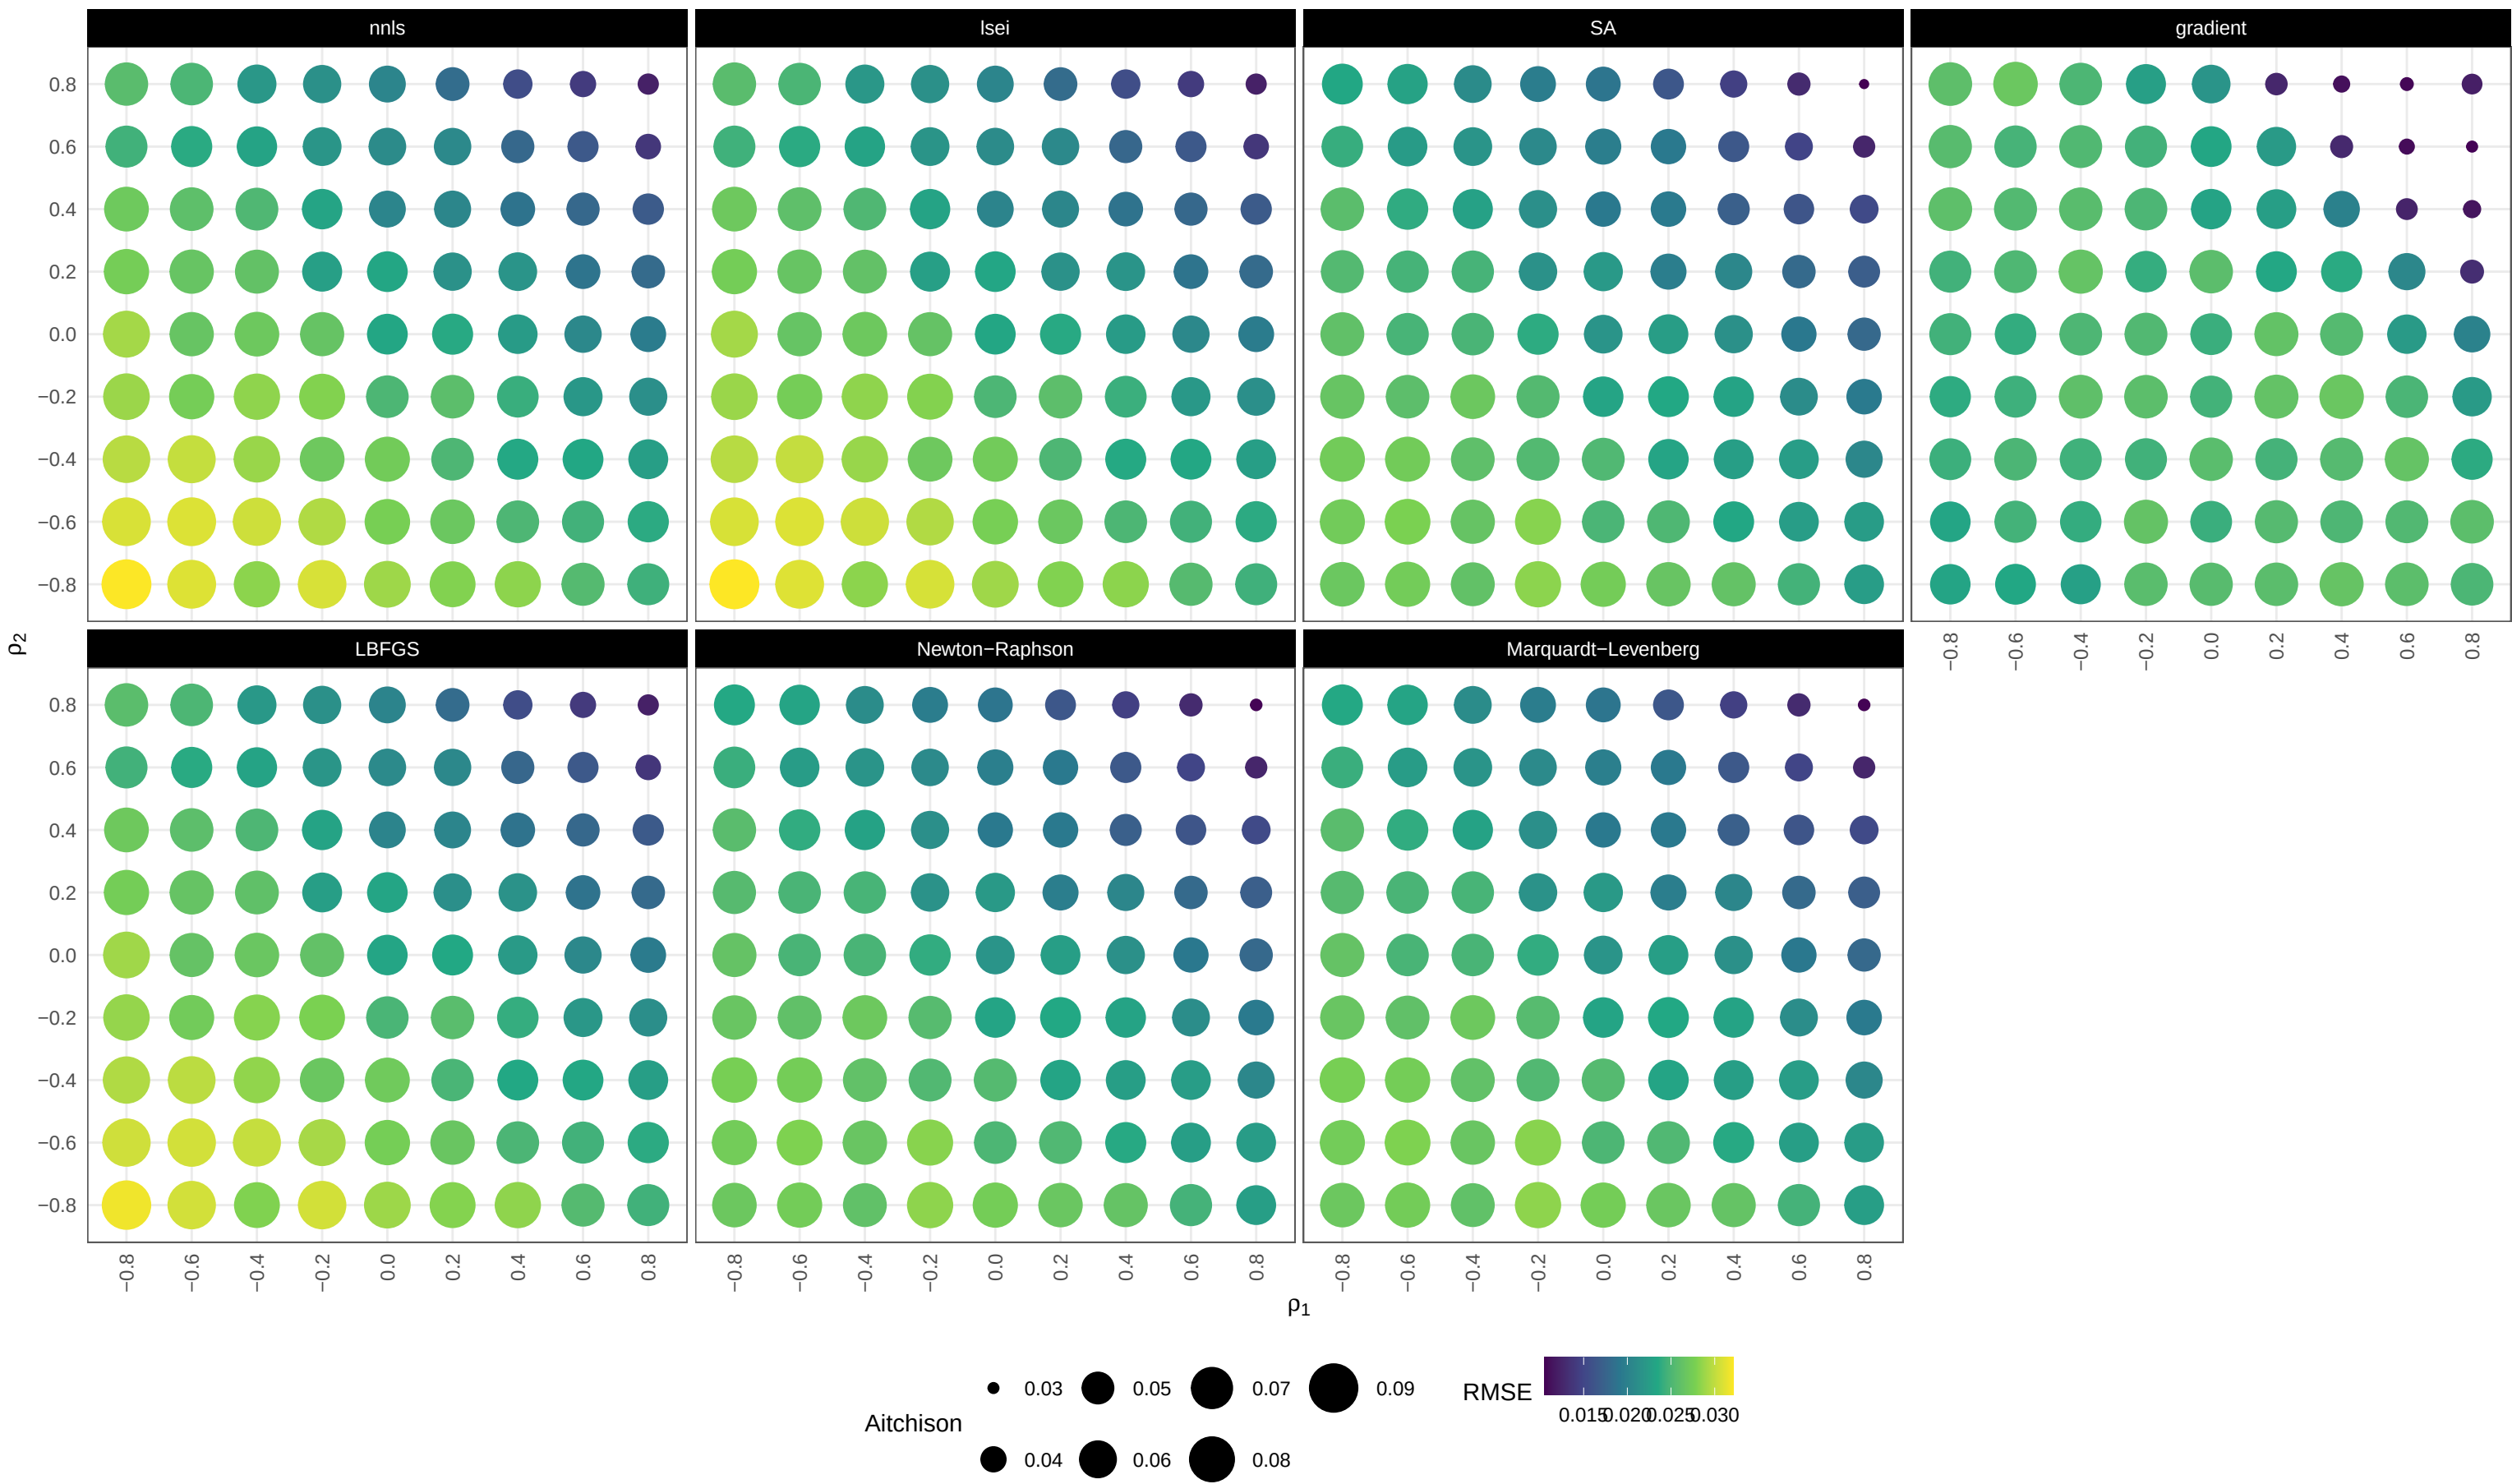

large_CLD / homoscedastic / highly unbalanced

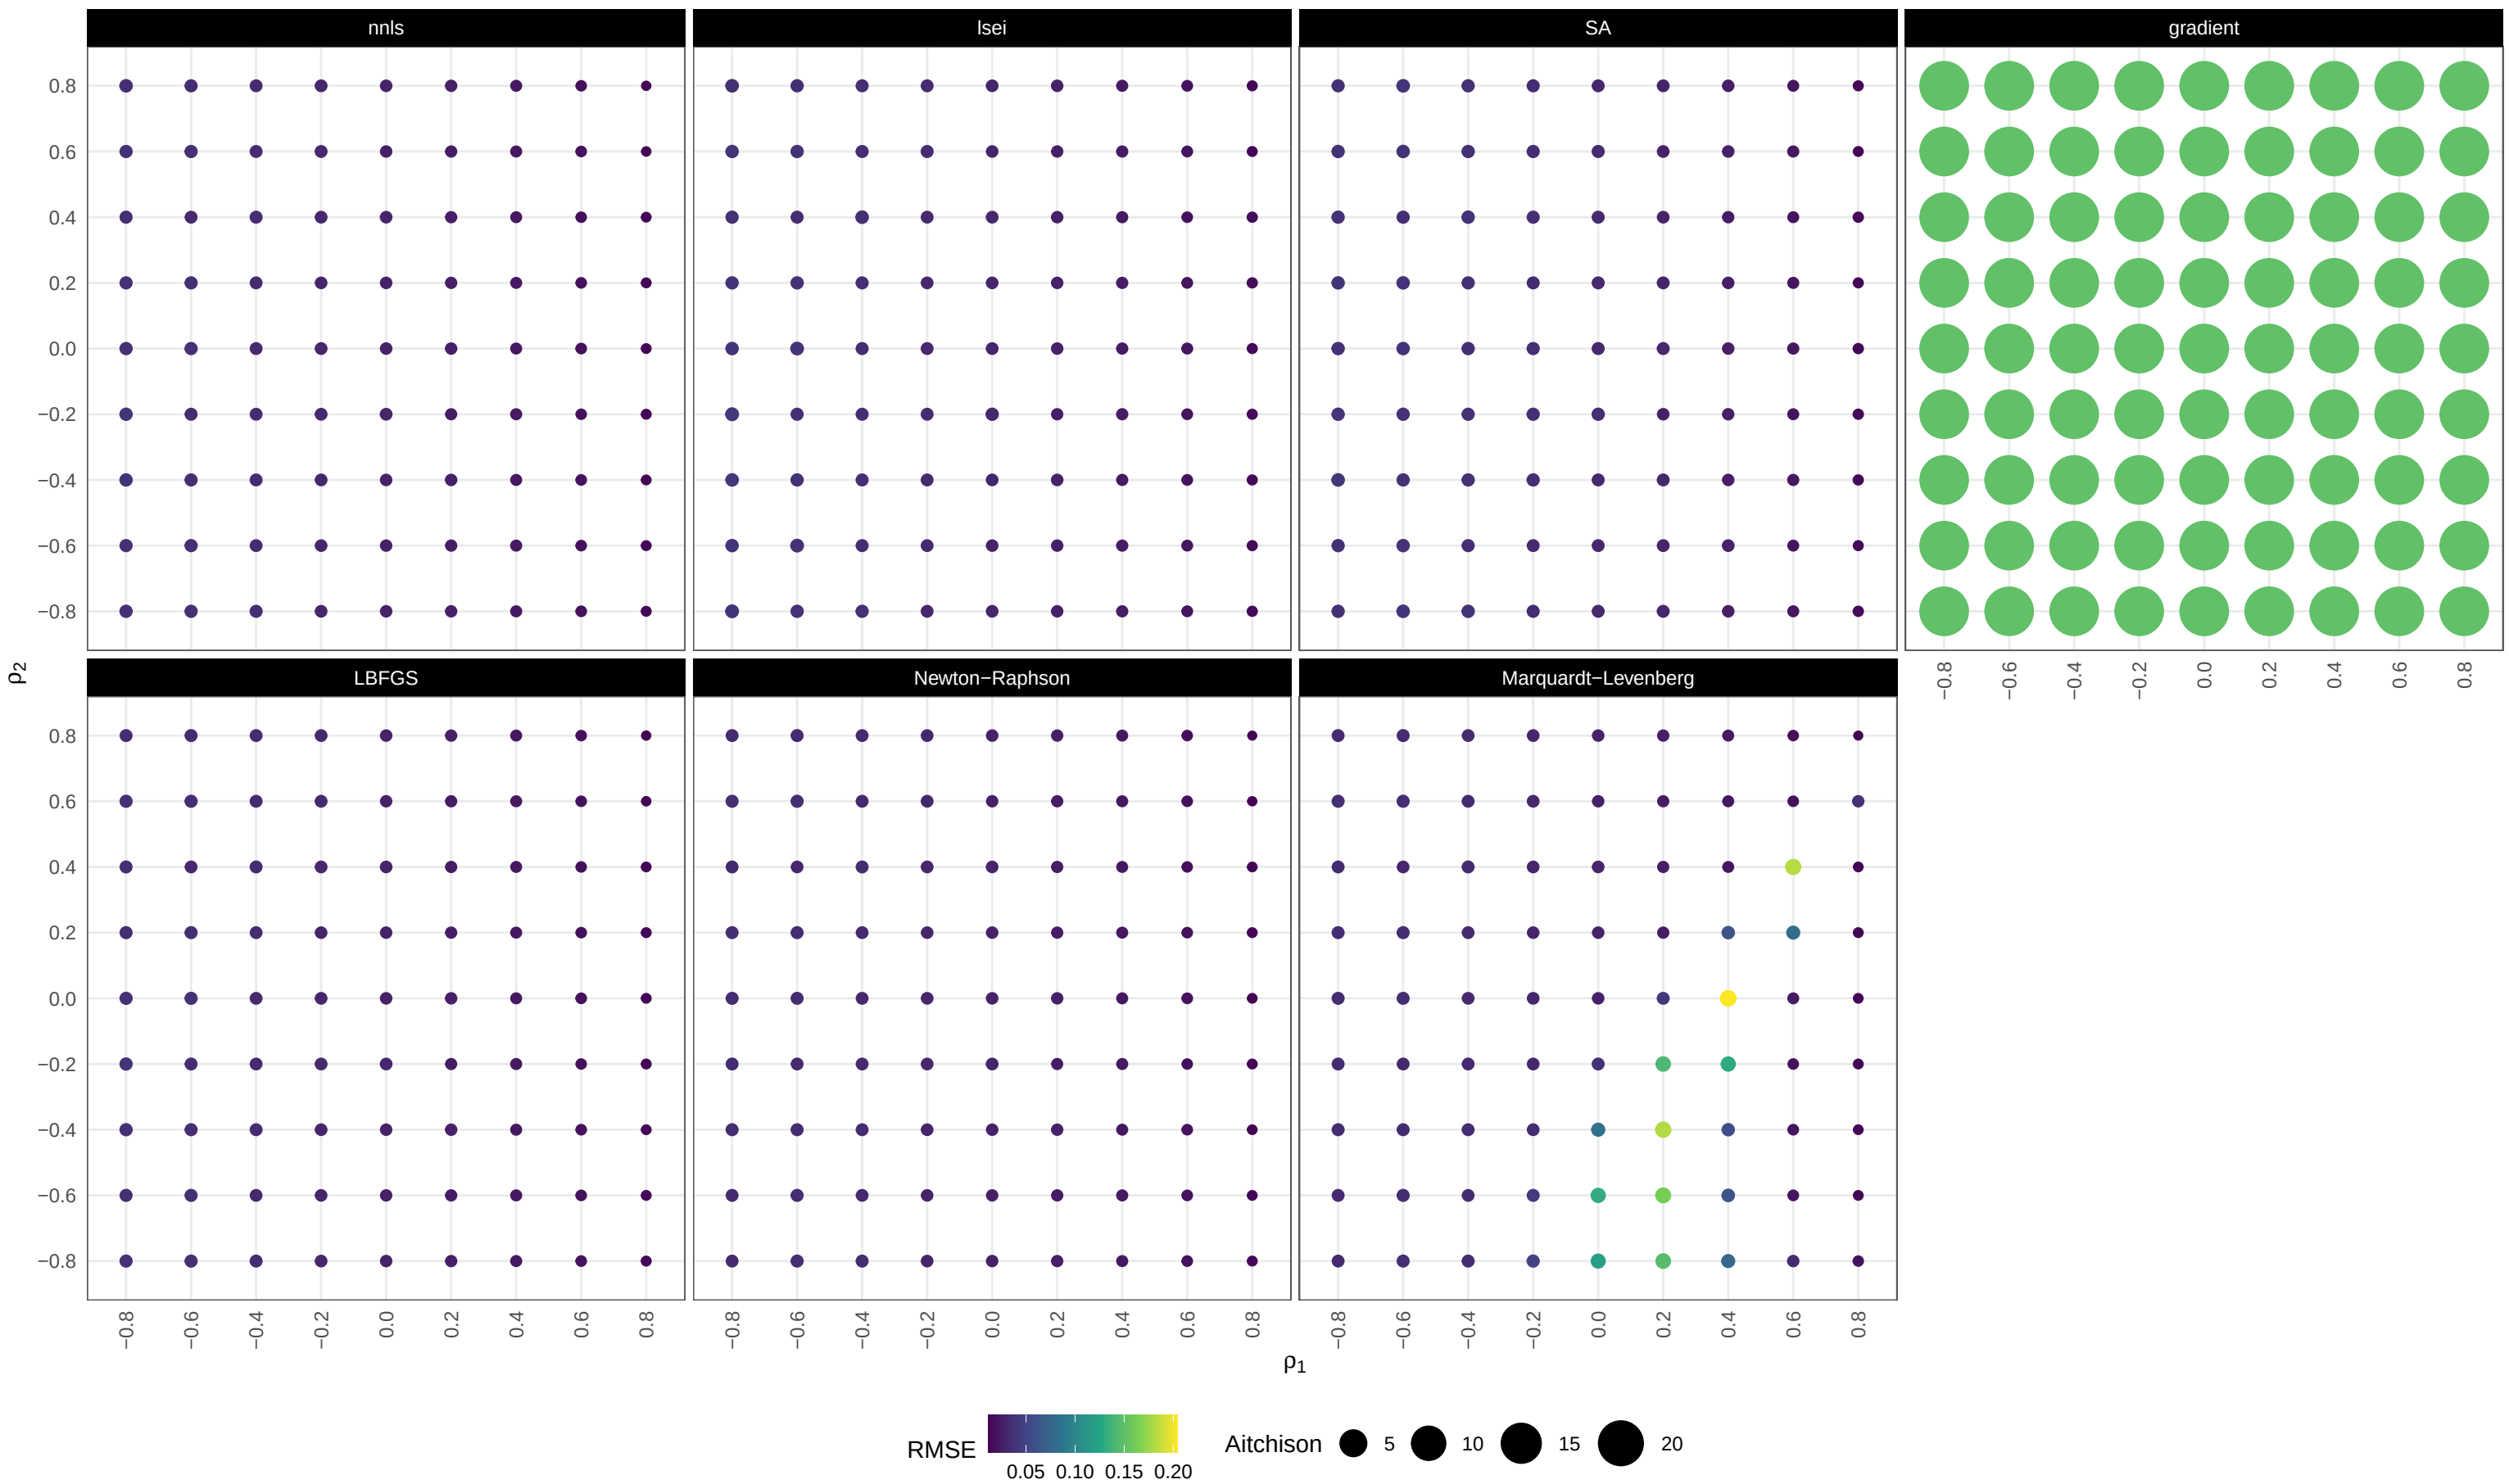

Each panel is the 9-by-9 correlation factorial (81 cells). Colour: mean RMSE; size: mean Aitchison distance.

large_CLD / heteroscedastic / balanced

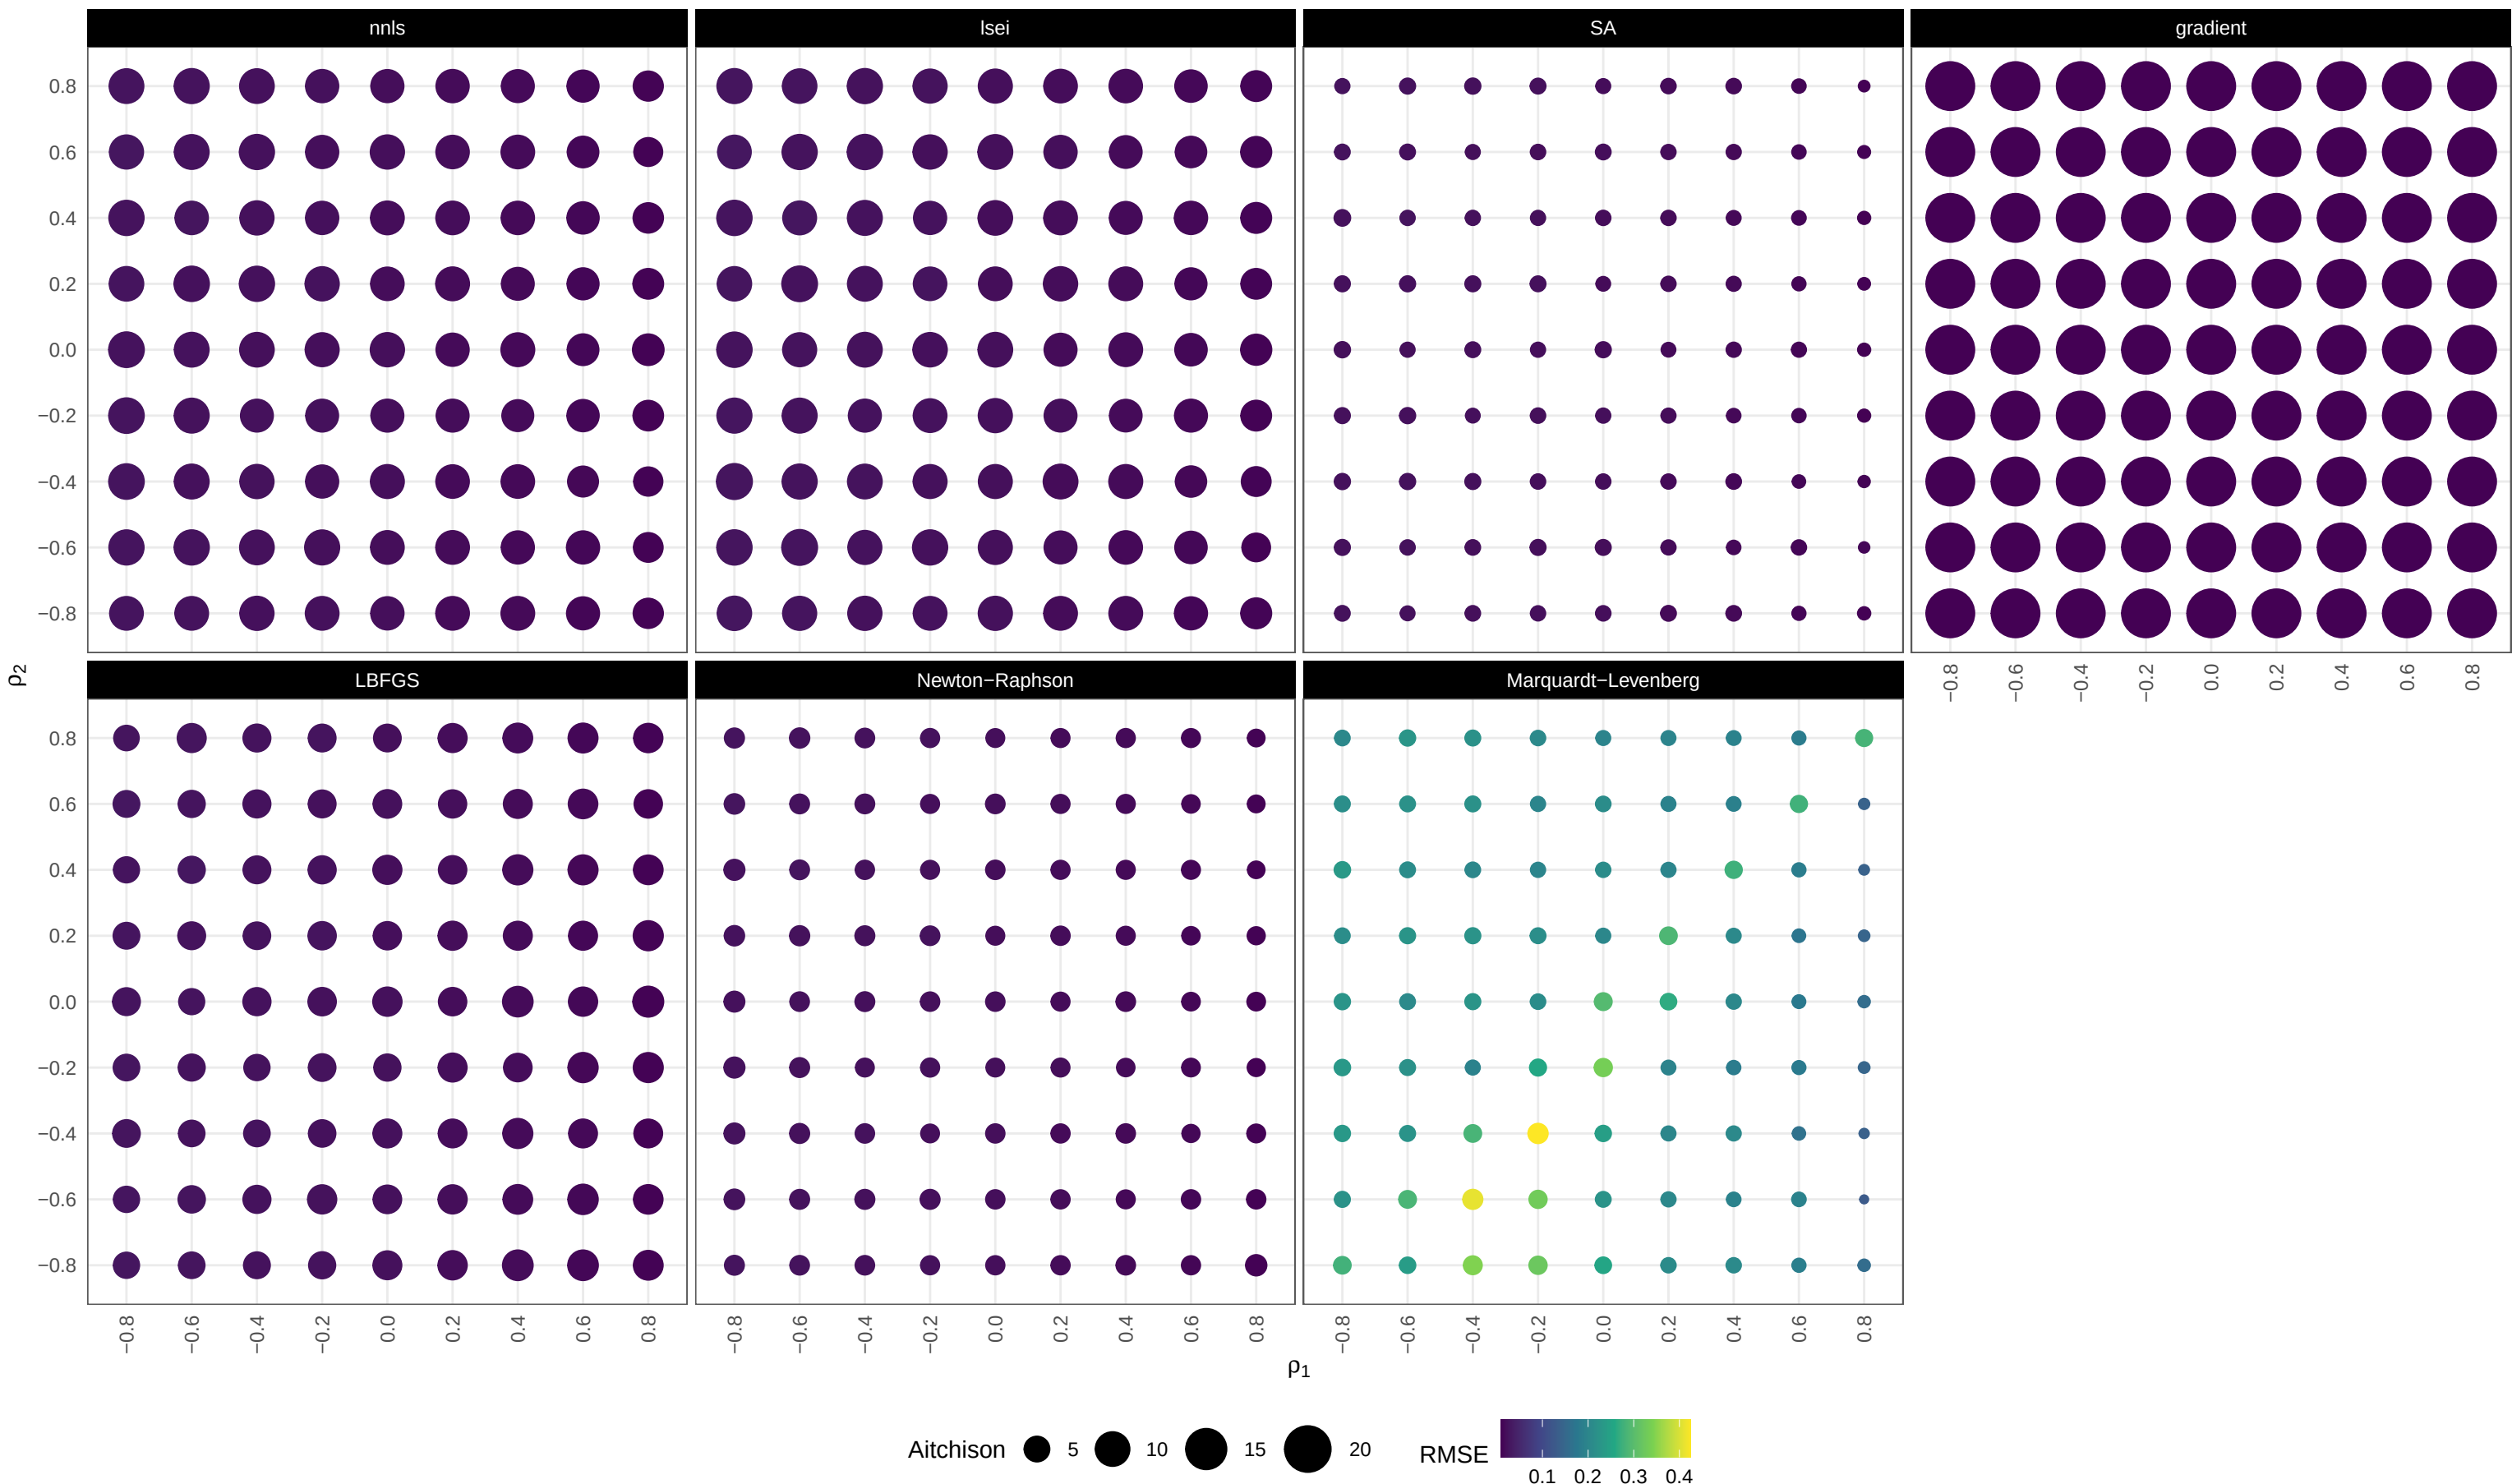

Each panel is the 9-by-9 correlation factorial (81 cells). Colour: mean RMSE; size: mean Aitchison distance.

large_CLD / heteroscedastic / moderately unbalanced

Each panel is the 9-by-9 correlation factorial (81 cells). Colour: mean RMSE; size: mean Aitchison distance.

large_CLD / heteroscedastic / highly unbalanced

Each panel is the 9-by-9 correlation factorial (81 cells). Colour: mean RMSE; size: mean Aitchison distance.
