Edge width: $|\text{Sigma}_{ij}|$ on the undirected skeleton

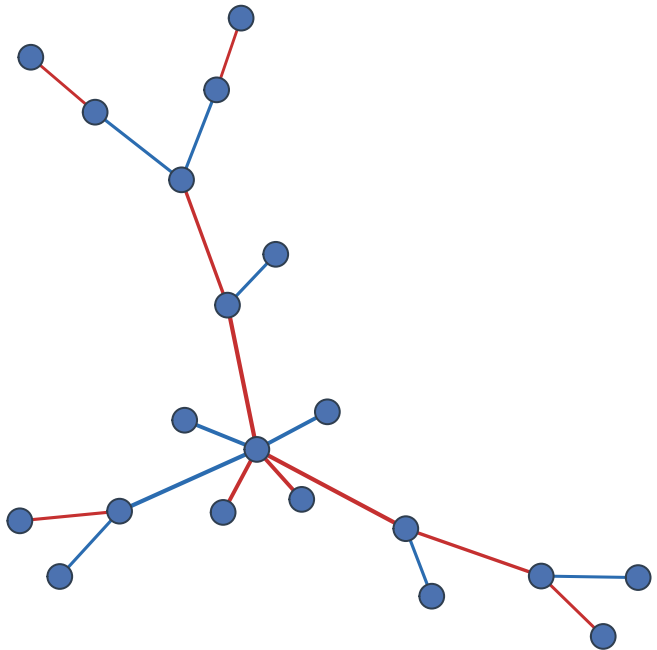

$\text{lwd} = 0.35 + 6 * \sqrt{(|\text{Sigma}| / \text{w_max})}$, $\text{w_max} = 81.31$ (shared).

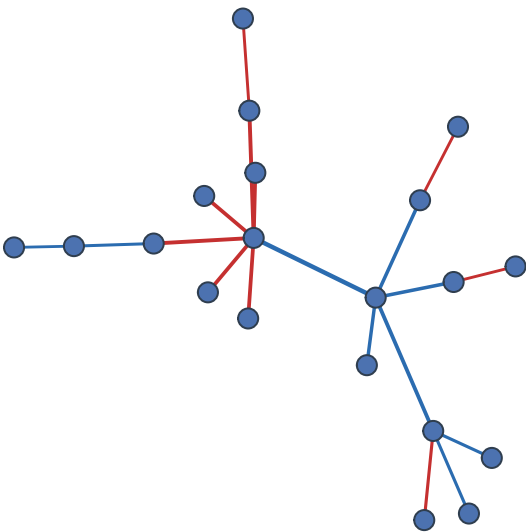

positive Sigma_{ij} negative Sigma_{ij}

Not all edges are positive: 309 positive and 339 negative covariance weights on plotted skeletons (48% positive). Width uses the absolute value; colour encodes the sign.

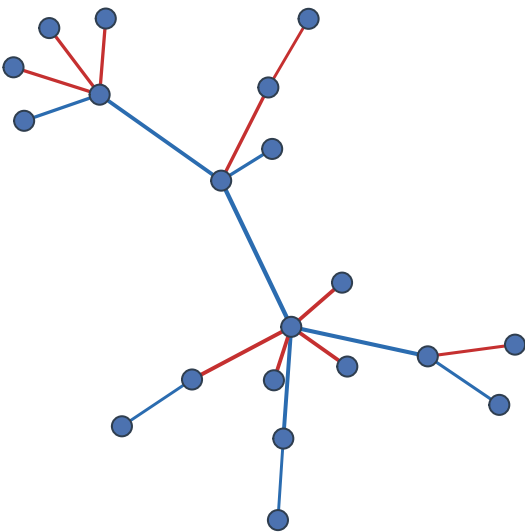

moderate OVL
