

small_CLD / homoscedastic

$\rho = (0, 0)$

White diamond: true p^* . Red circle, black stroke: numerical MLE (grid argmax).

$\rho = (-0.8, -0.8)$

White diamond: true p^* . Red circle, black stroke: numerical MLE (grid argmax).

$\rho = (0.8, 0.8)$

White diamond: true p^* . Red circle, black stroke: numerical MLE (grid argmax).

$\rho = (-0.8, 0.8)$

White diamond: true p^* . Red circle, black stroke: numerical MLE (grid argmax).

small_CLD / homoscedastic / moderately unbalanced

$\rho = (0, 0)$

White diamond: true p^* . Red circle, black stroke: numerical MLE (grid argmax).

$\rho = (-0.8, -0.8)$

White diamond: true p^* . Red circle, black stroke: numerical MLE (grid argmax).

$\rho = (0.8, 0.8)$

White diamond: true p^* . Red circle, black stroke: numerical MLE (grid argmax).

$\rho = (-0.8, 0.8)$

White diamond: true p^* . Red circle, black stroke: numerical MLE (grid argmax).

small_CLD / homoscedastic / highly unbalanced

$\rho = (0, 0)$

White diamond: true p^* . Red circle, black stroke: numerical MLE (grid argmax).

$\rho = (-0.8, -0.8)$

White diamond: true p^* . Red circle, black stroke: numerical MLE (grid argmax).

$\rho = (0.8, 0.8)$

White diamond: true p^* . Red circle, black stroke: numerical MLE (grid argmax).

$\rho = (-0.8, 0.8)$

White diamond: true p^* . Red circle, black stroke: numerical MLE (grid argmax).

small_CLD / heteroscedastic / balanced

$\rho = (0, 0)$

$\rho = (-0.8, -0.8)$

White diamond: true p^* . Red circle, black stroke: numerical MLE (grid argmax).

White diamond: true p^* . Red circle, black stroke: numerical MLE (grid argmax).

$\rho = (0.8, 0.8)$

$\rho = (-0.8, 0.8)$

White diamond: true p^* . Red circle, black stroke: numerical MLE (grid argmax).

White diamond: true p^* . Red circle, black stroke: numerical MLE (grid argmax).

small_CLD / heteroscedastic / moderately unbalanced

$\rho = (0, 0)$

$\rho = (-0.8, -0.8)$

White diamond: true p^* . Red circle, black stroke: numerical MLE (grid argmax).

White diamond: true p^* . Red circle, black stroke: numerical MLE (grid argmax).

$\rho = (0.8, 0.8)$

$\rho = (-0.8, 0.8)$

White diamond: true p^* . Red circle, black stroke: numerical MLE (grid argmax).

White diamond: true p^* . Red circle, black stroke: numerical MLE (grid argmax).

small_CLD / heteroscedastic / highly unbalanced

$\rho = (0, 0)$

White diamond: true p^* . Red circle, black stroke: numerical MLE (grid argmax).

$\rho = (-0.8, -0.8)$

White diamond: true p^* . Red circle, black stroke: numerical MLE (grid argmax).

$\rho = (0.8, 0.8)$

White diamond: true p^* . Red circle, black stroke: numerical MLE (grid argmax).

$\rho = (-0.8, 0.8)$

White diamond: true p^* . Red circle, black stroke: numerical MLE (grid argmax).

large_CLD / homoscedastic / balanced

$\rho = (0, 0)$

$\rho = (-0.8, -0.8)$

White diamond: true p^* . Red circle, black stroke: numerical MLE (grid argmax).

$\rho = (0.8, 0.8)$

$\rho = (-0.8, 0.8)$

White diamond: true p^* . Red circle, black stroke: numerical MLE (grid argmax).

White diamond: true p^* . Red circle, black stroke: numerical MLE (grid argmax).

large_CLD / homoscedastic / moderately unbalanced

$\rho = (0, 0)$

$\rho = (-0.8, -0.8)$

White diamond: true p^* . Red circle, black stroke: numerical MLE (grid argmax).

White diamond: true p^* . Red circle, black stroke: numerical MLE (grid argmax).

$\rho = (0.8, 0.8)$

$\rho = (-0.8, 0.8)$

White diamond: true p^* . Red circle, black stroke: numerical MLE (grid argmax).

White diamond: true p^* . Red circle, black stroke: numerical MLE (grid argmax).

large_CLD / homoscedastic / highly unbalanced

$\rho = (0, 0)$

$\rho = (-0.8, -0.8)$

White diamond: true p^* . Red circle, black stroke: numerical MLE (grid argmax).

$\rho = (0.8, 0.8)$

White diamond: true p^* . Red circle, black stroke: numerical MLE (grid argmax).

$\rho = (-0.8, 0.8)$

White diamond: true p^* . Red circle, black stroke: numerical MLE (grid argmax).

large_CLD / heteroscedastic / balanced

$\rho = (0, 0)$

$\rho = (-0.8, -0.8)$

White diamond: true p^* . Red circle, black stroke: numerical MLE (grid argmax).

$\rho = (0.8, 0.8)$

$\rho = (-0.8, 0.8)$

White diamond: true p^* . Red circle, black stroke: numerical MLE (grid argmax).

White diamond: true p^* . Red circle, black stroke: numerical MLE (grid argmax).

large_CLD / heteroscedastic / moderately unbalanced

$\rho = (0, 0)$

$\rho = (-0.8, -0.8)$

White diamond: true p^* . Red circle, black stroke: numerical MLE (grid argmax).

White diamond: true p^* . Red circle, black stroke: numerical MLE (grid argmax).

$\rho = (0.8, 0.8)$

$\rho = (-0.8, 0.8)$

White diamond: true p^* . Red circle, black stroke: numerical MLE (grid argmax).

White diamond: true p^* . Red circle, black stroke: numerical MLE (grid argmax).

large_CLD / heteroscedastic / highly unbalanced

$\rho = (0, 0)$

$\rho = (-0.8, -0.8)$

White diamond: true p^* . Red circle, black stroke: numerical MLE (grid argmax).

White diamond: true p^* . Red circle, black stroke: numerical MLE (grid argmax).

$\rho = (0.8, 0.8)$

$\rho = (-0.8, 0.8)$

White diamond: true p^* . Red circle, black stroke: numerical MLE (grid argmax).

White diamond: true p^* . Red circle, black stroke: numerical MLE (grid argmax).
