

Statistic

100100010000

SF: Scale-free (Barabasi-Albert) on the named cell type; SBM: Cluster stochastic block model. Row tags are CT1/CT2; CT3 is always Scale-free. Circles are min-max scaled within each column (column min to column max); not a shared unit across families. Column-group colours already encode the metric family; only the Statistical information size scale is shown.
