Run time of every method

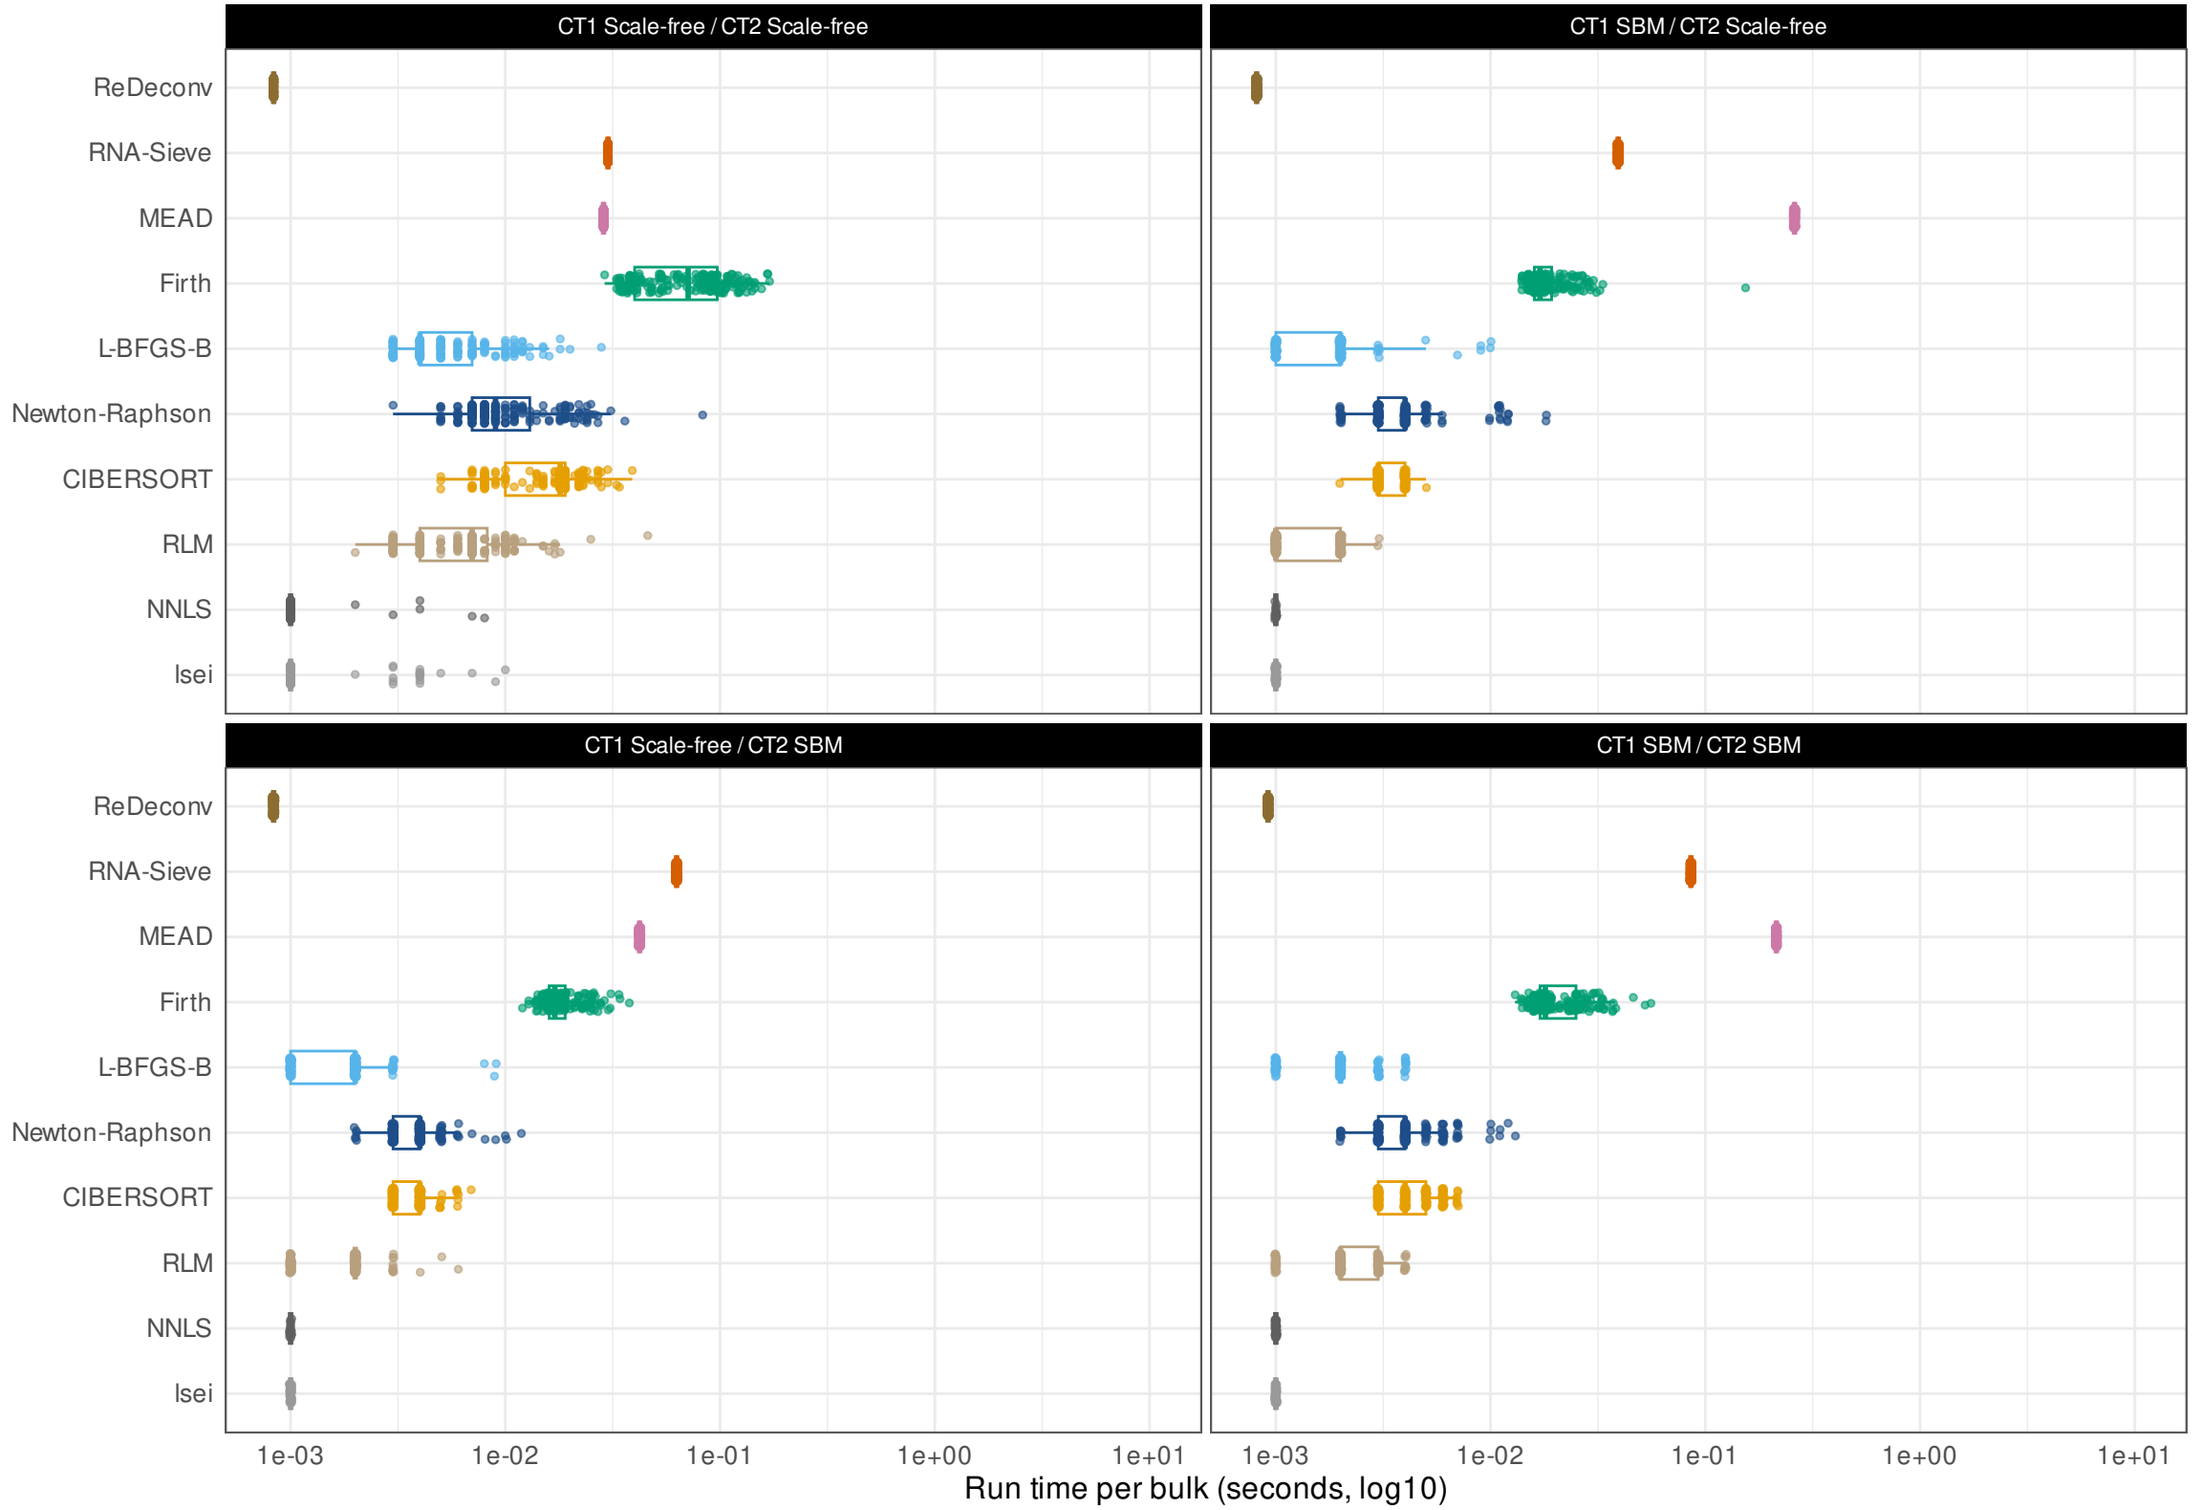

balanced / low overlap

Point estimate only; interval computations are not included. Competitors: batch time divided by the bulks.

Run time of every method

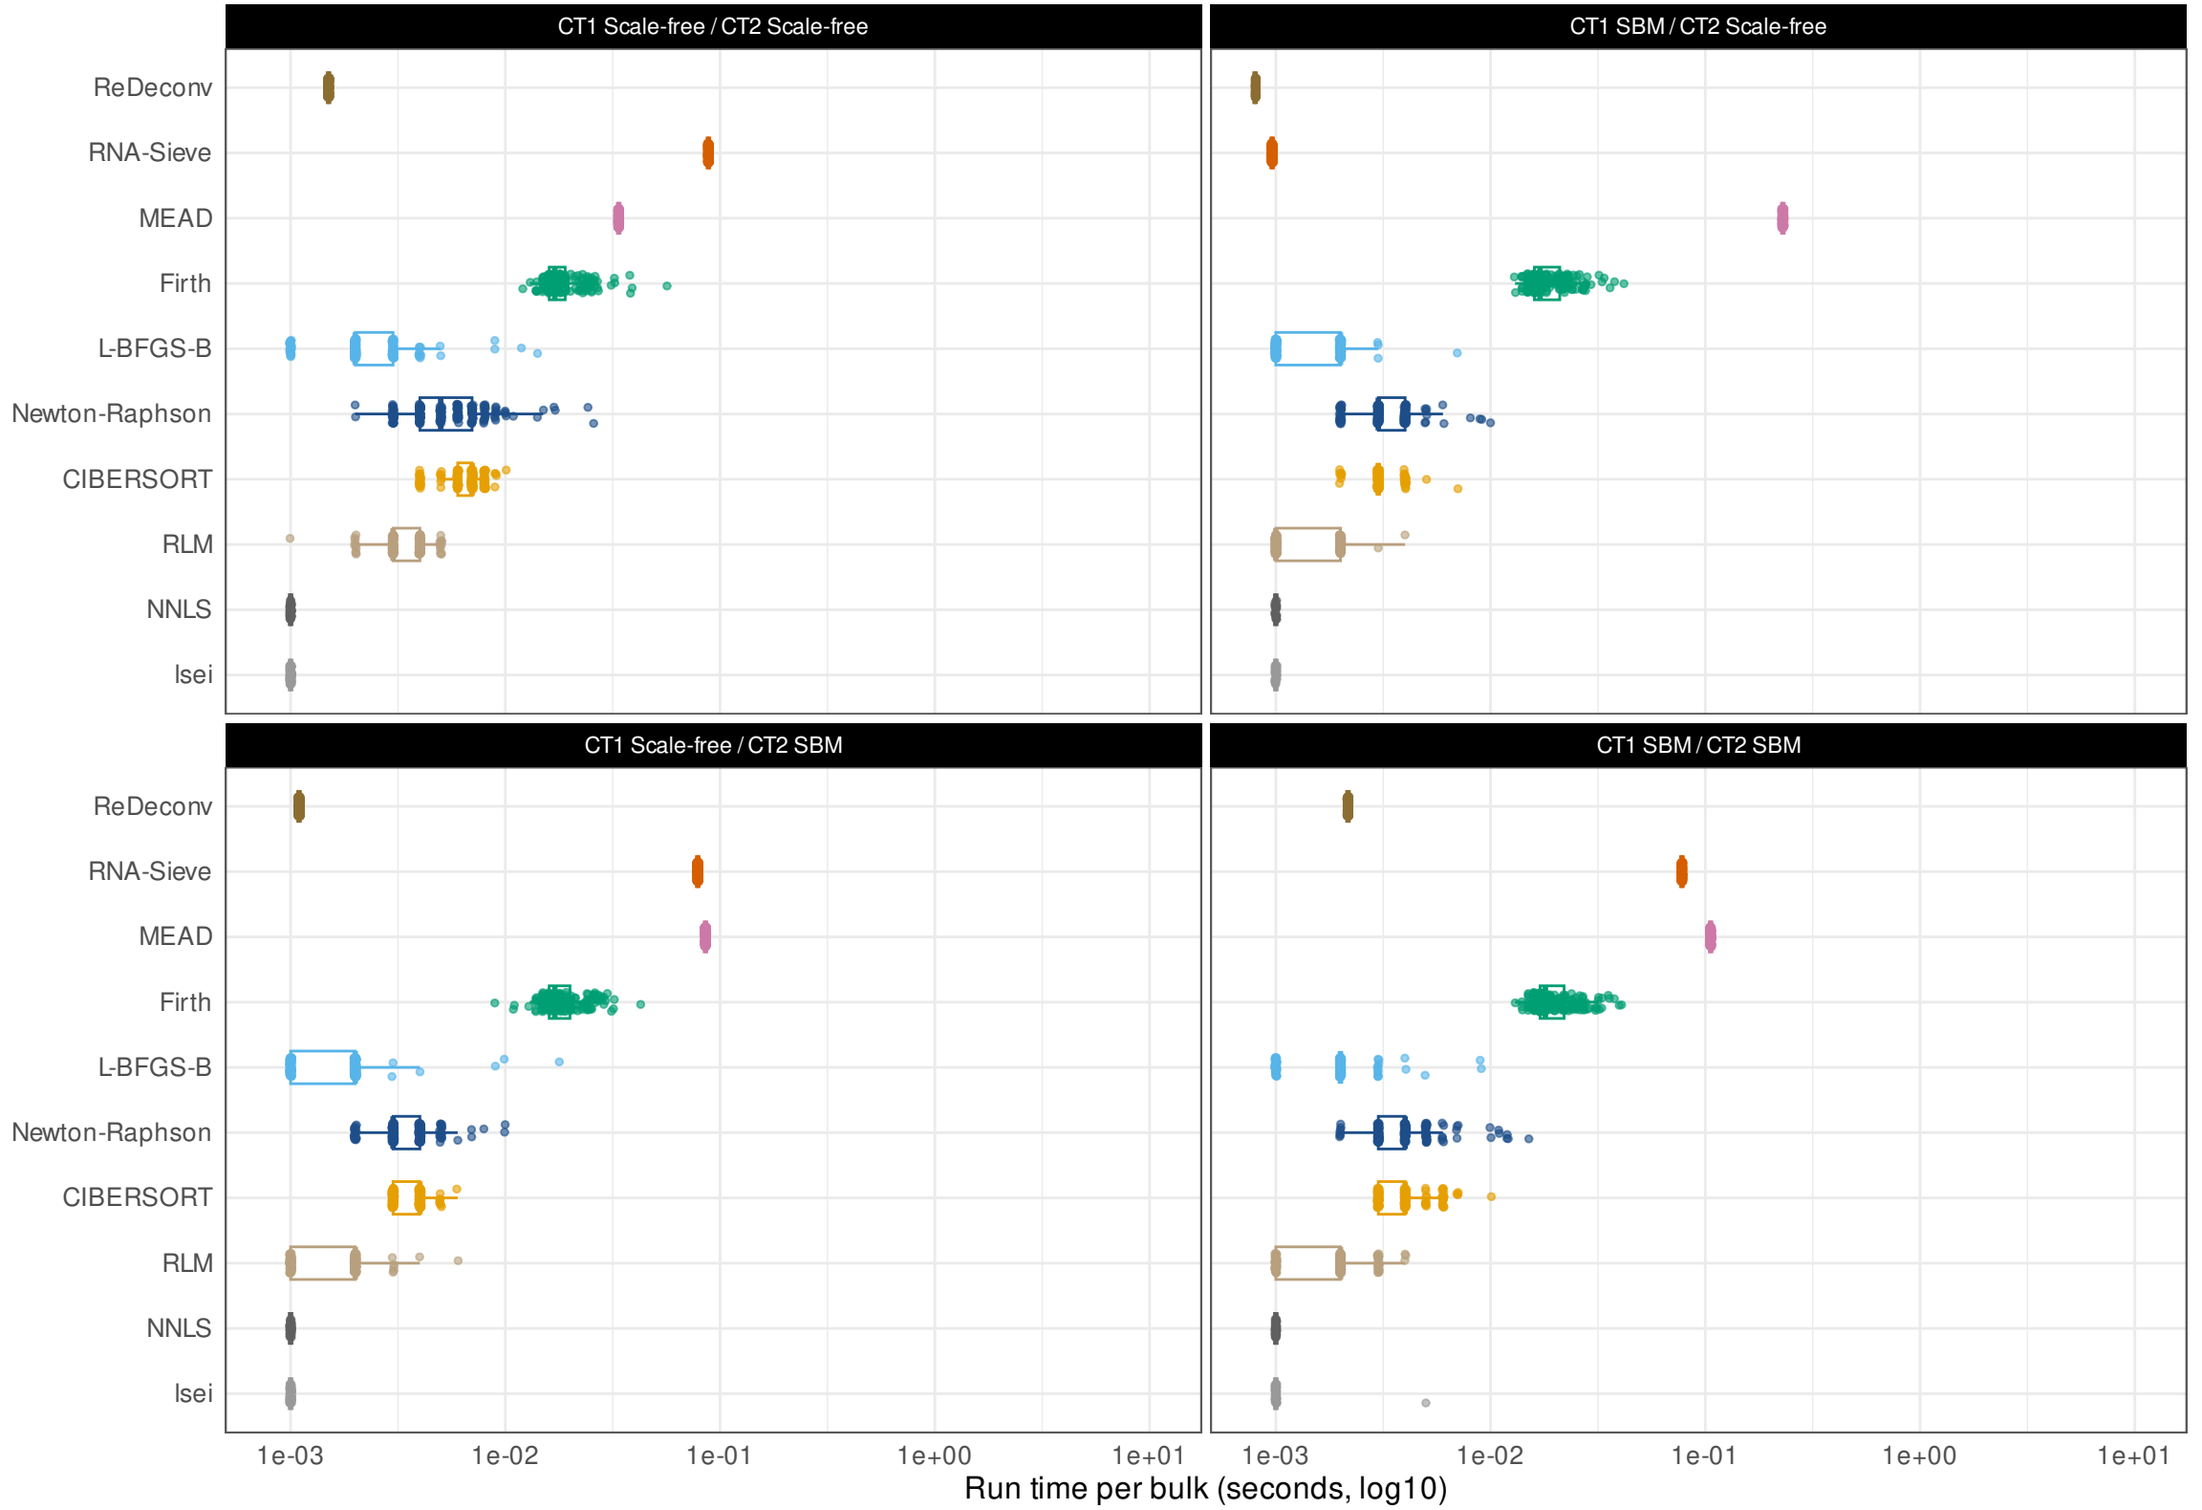

balanced / moderate overlap

Point estimate only; interval computations are not included. Competitors: batch time divided by the bulks.

Run time of every method

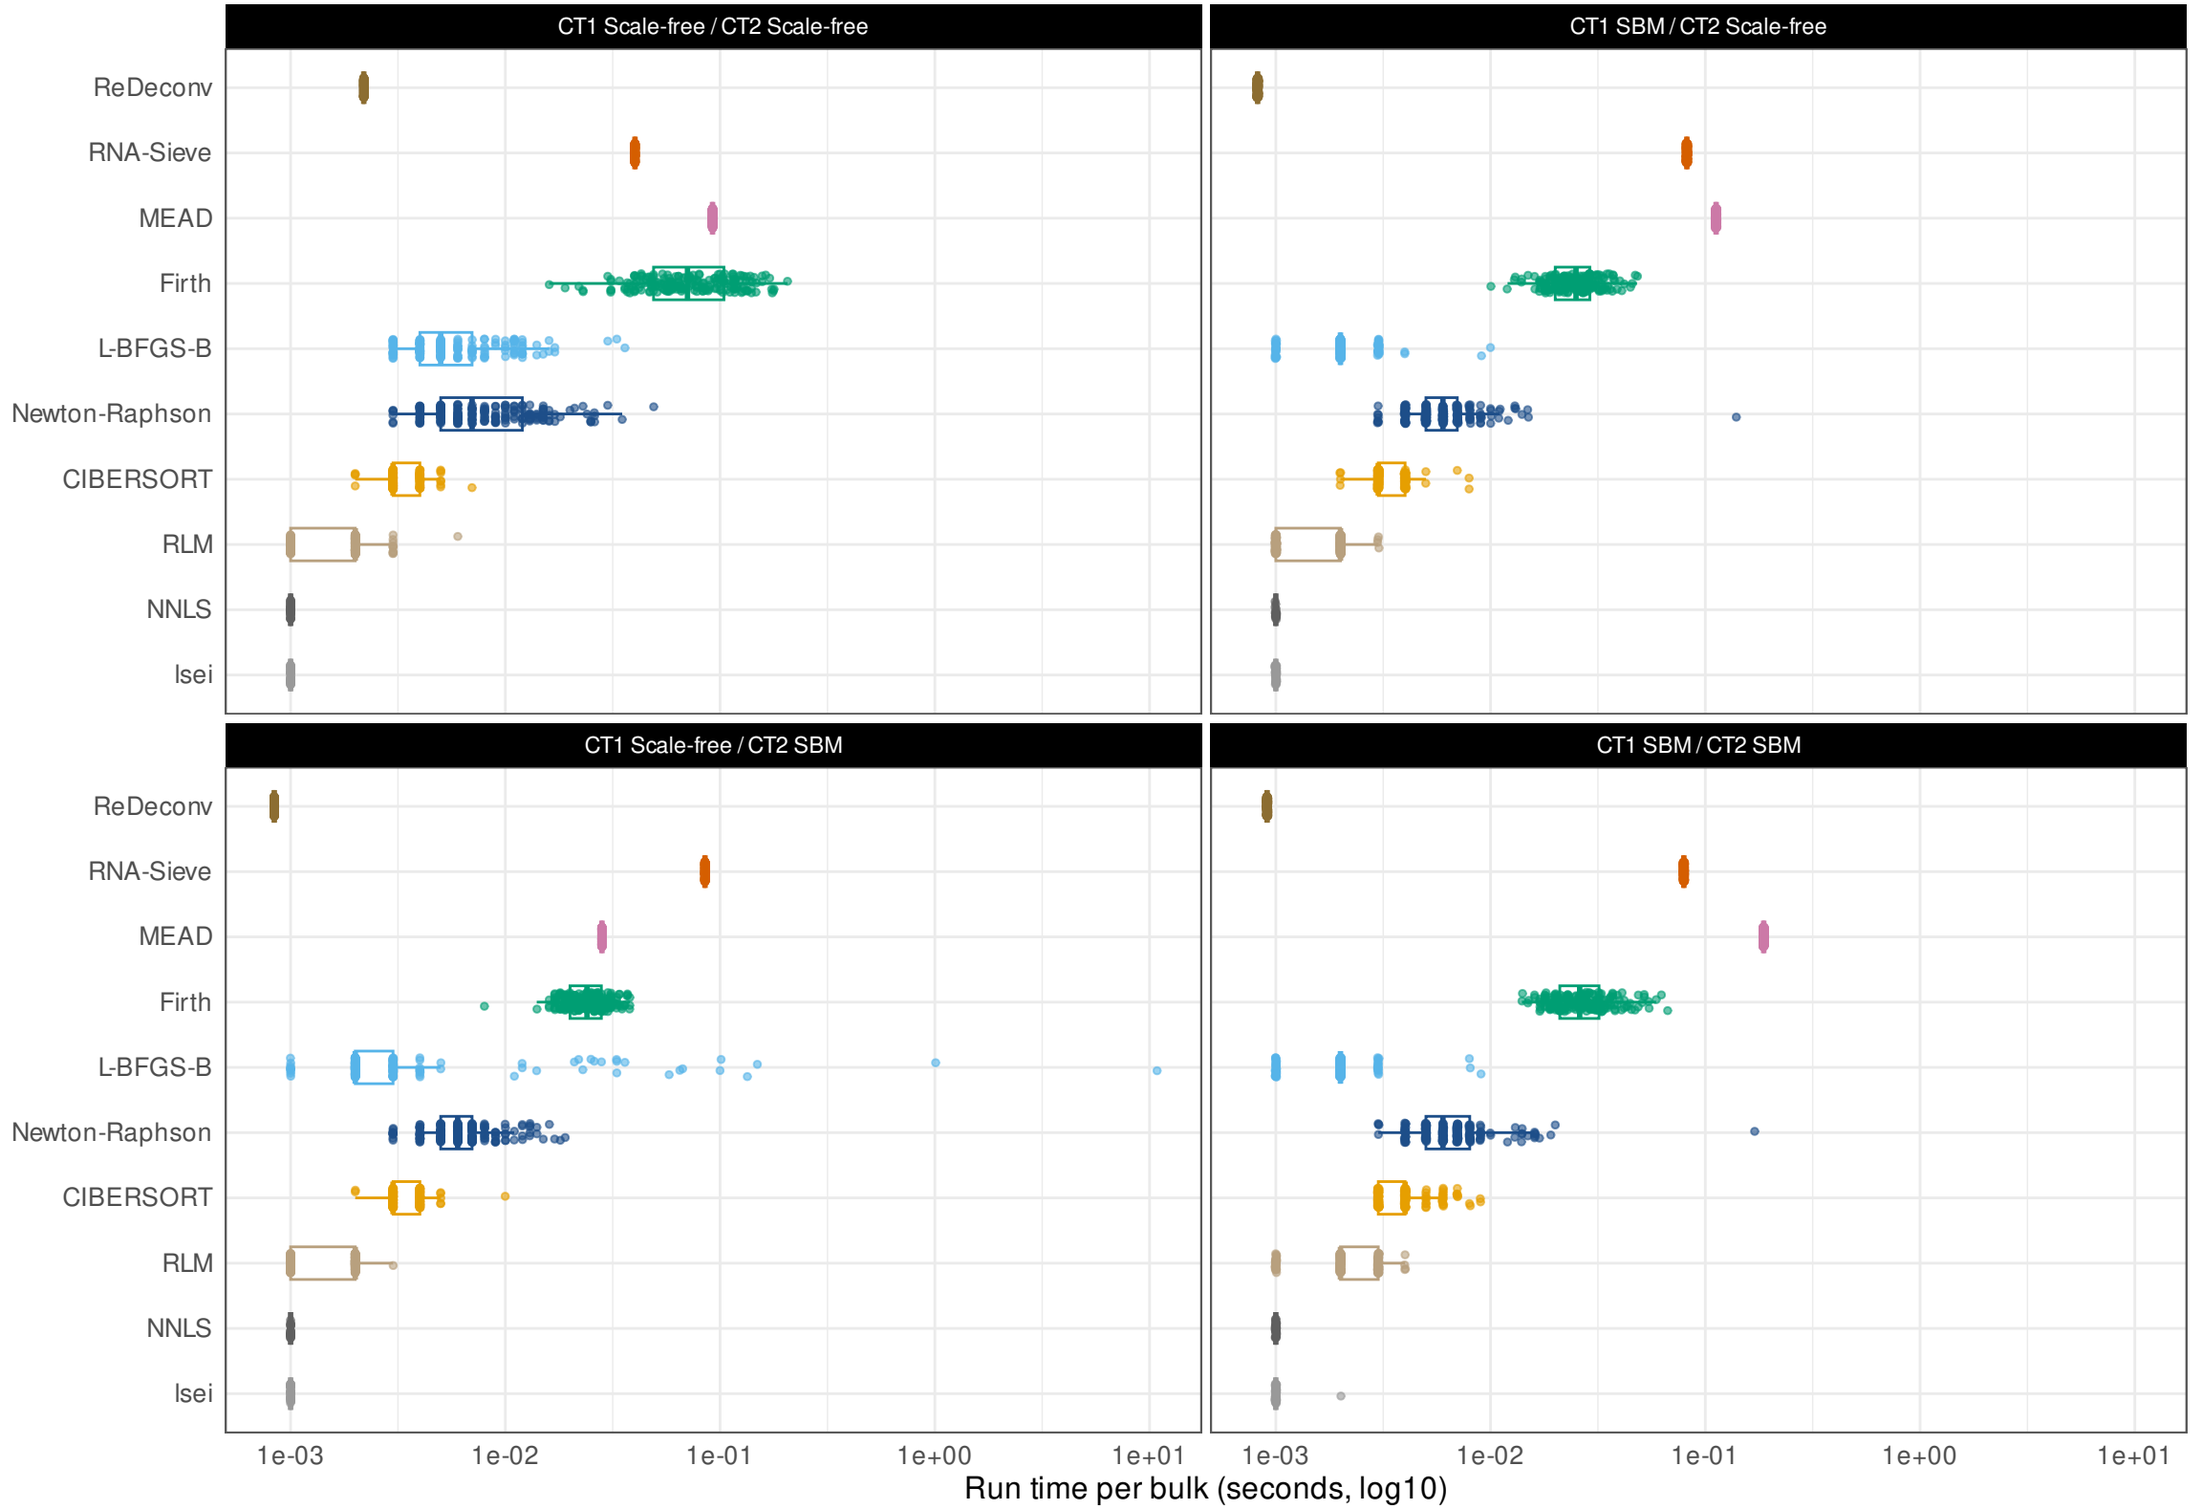

balanced / high overlap

Point estimate only; interval computations are not included. Competitors: batch time divided by the bulks.

Run time of every method

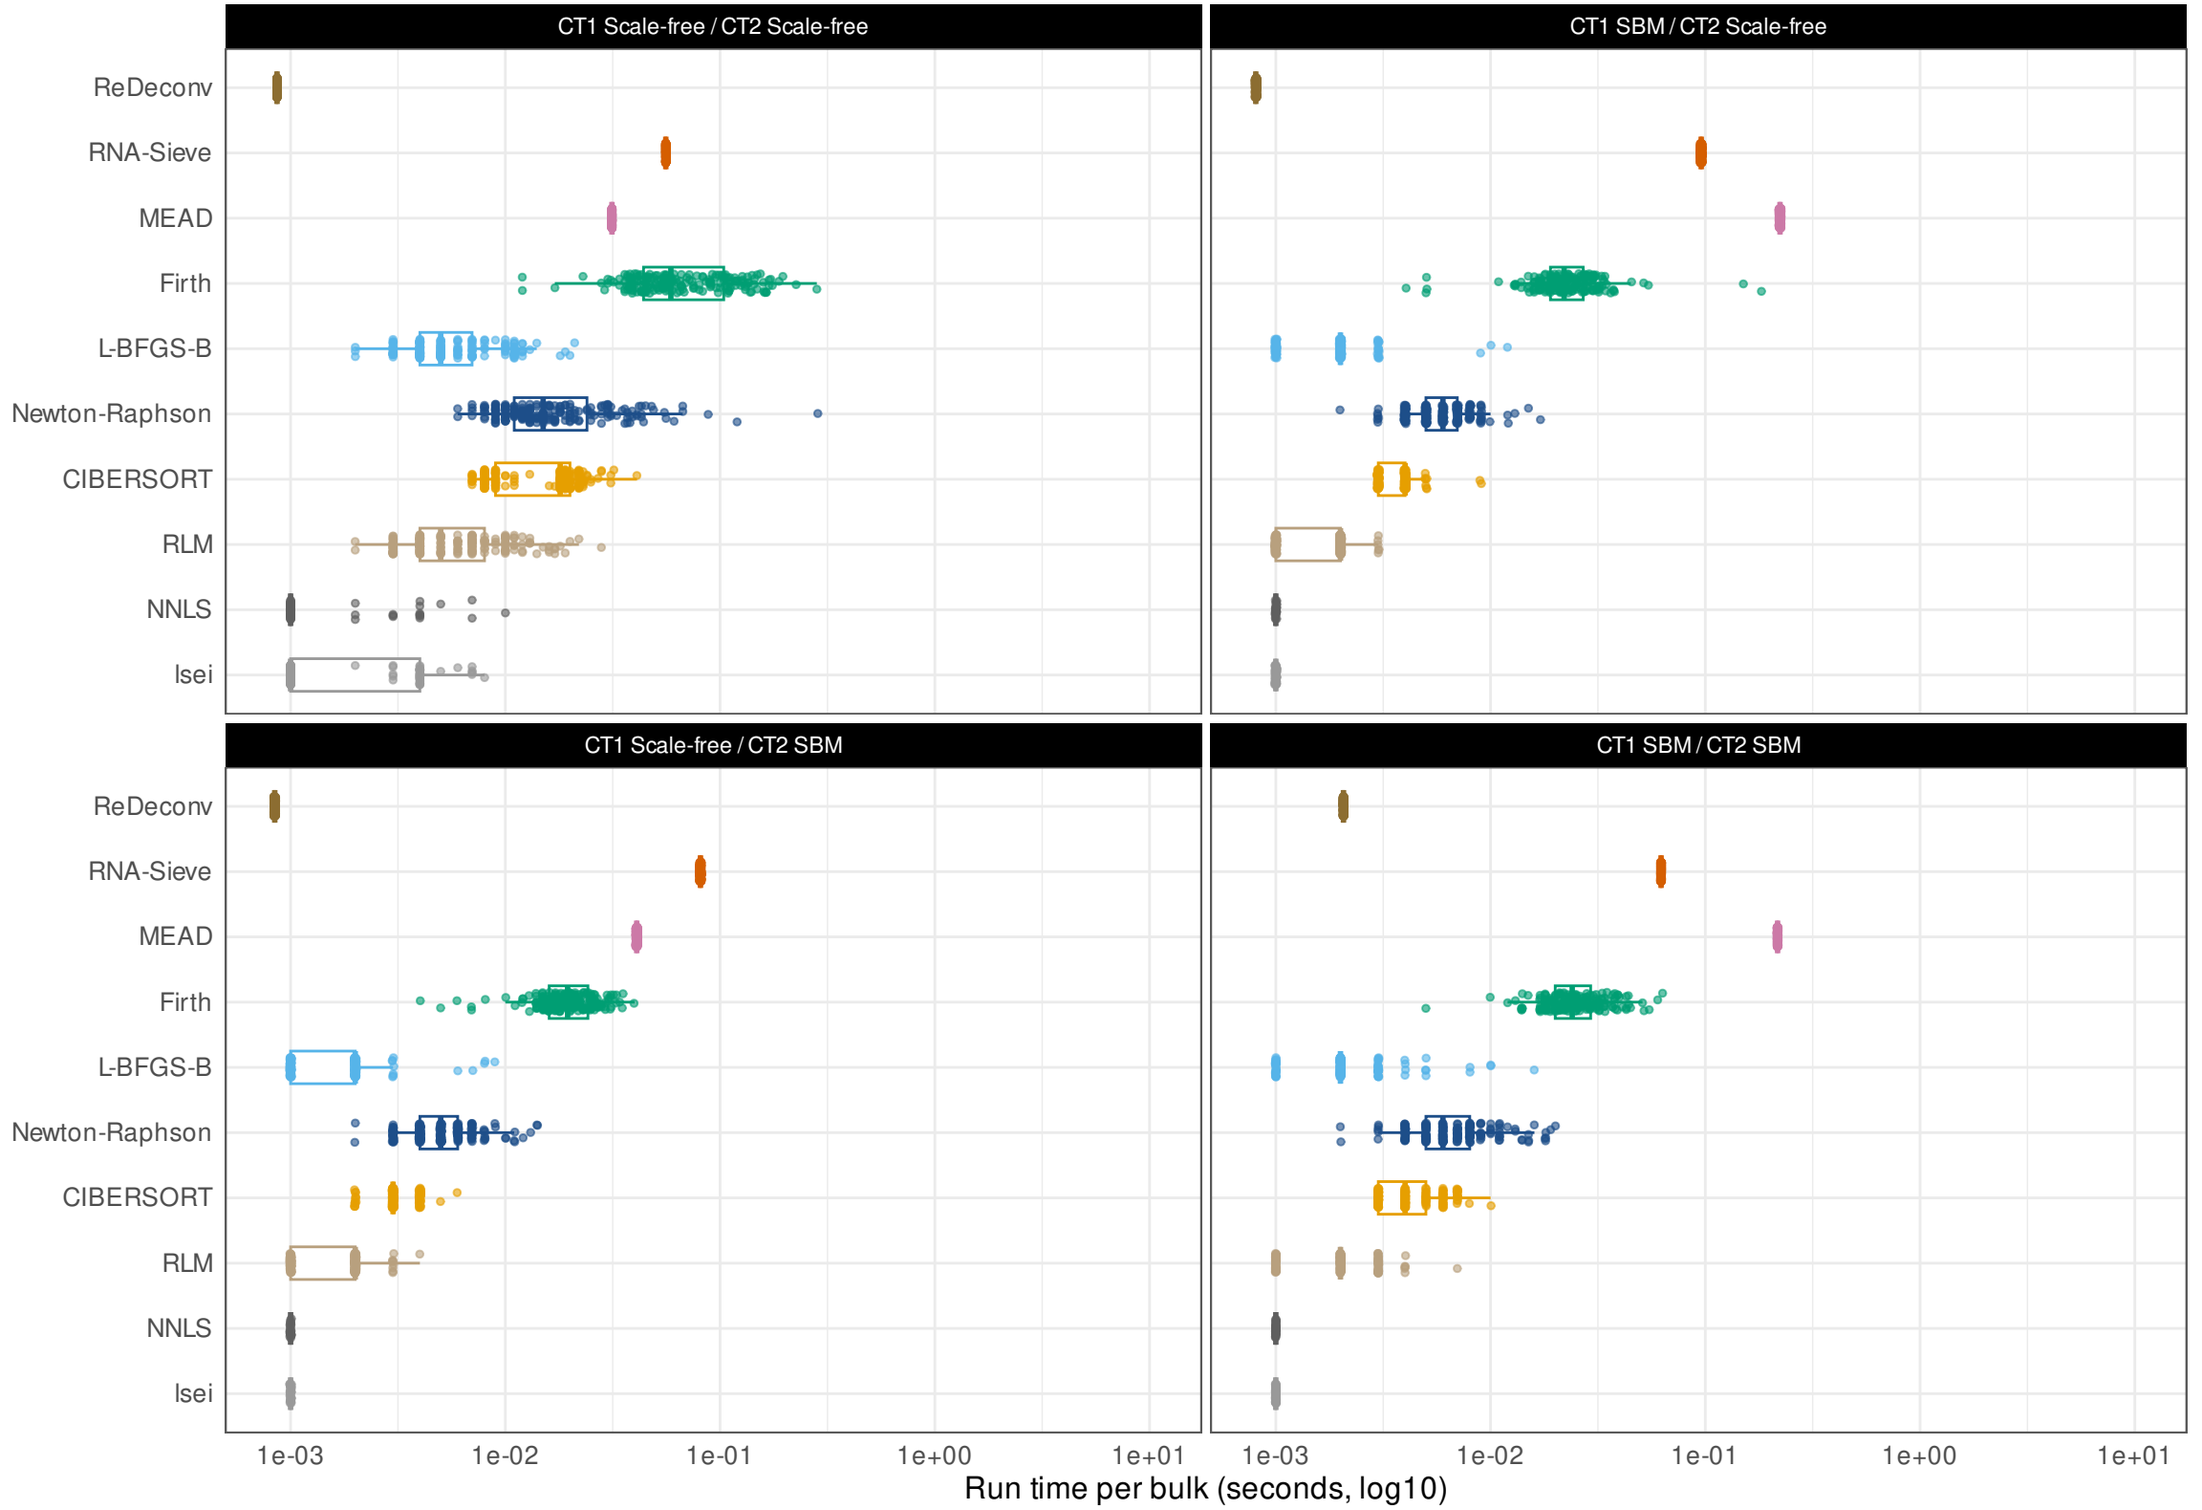

moderately unbalanced / low overlap

Point estimate only; interval computations are not included. Competitors: batch time divided by the bulks.

Run time of every method

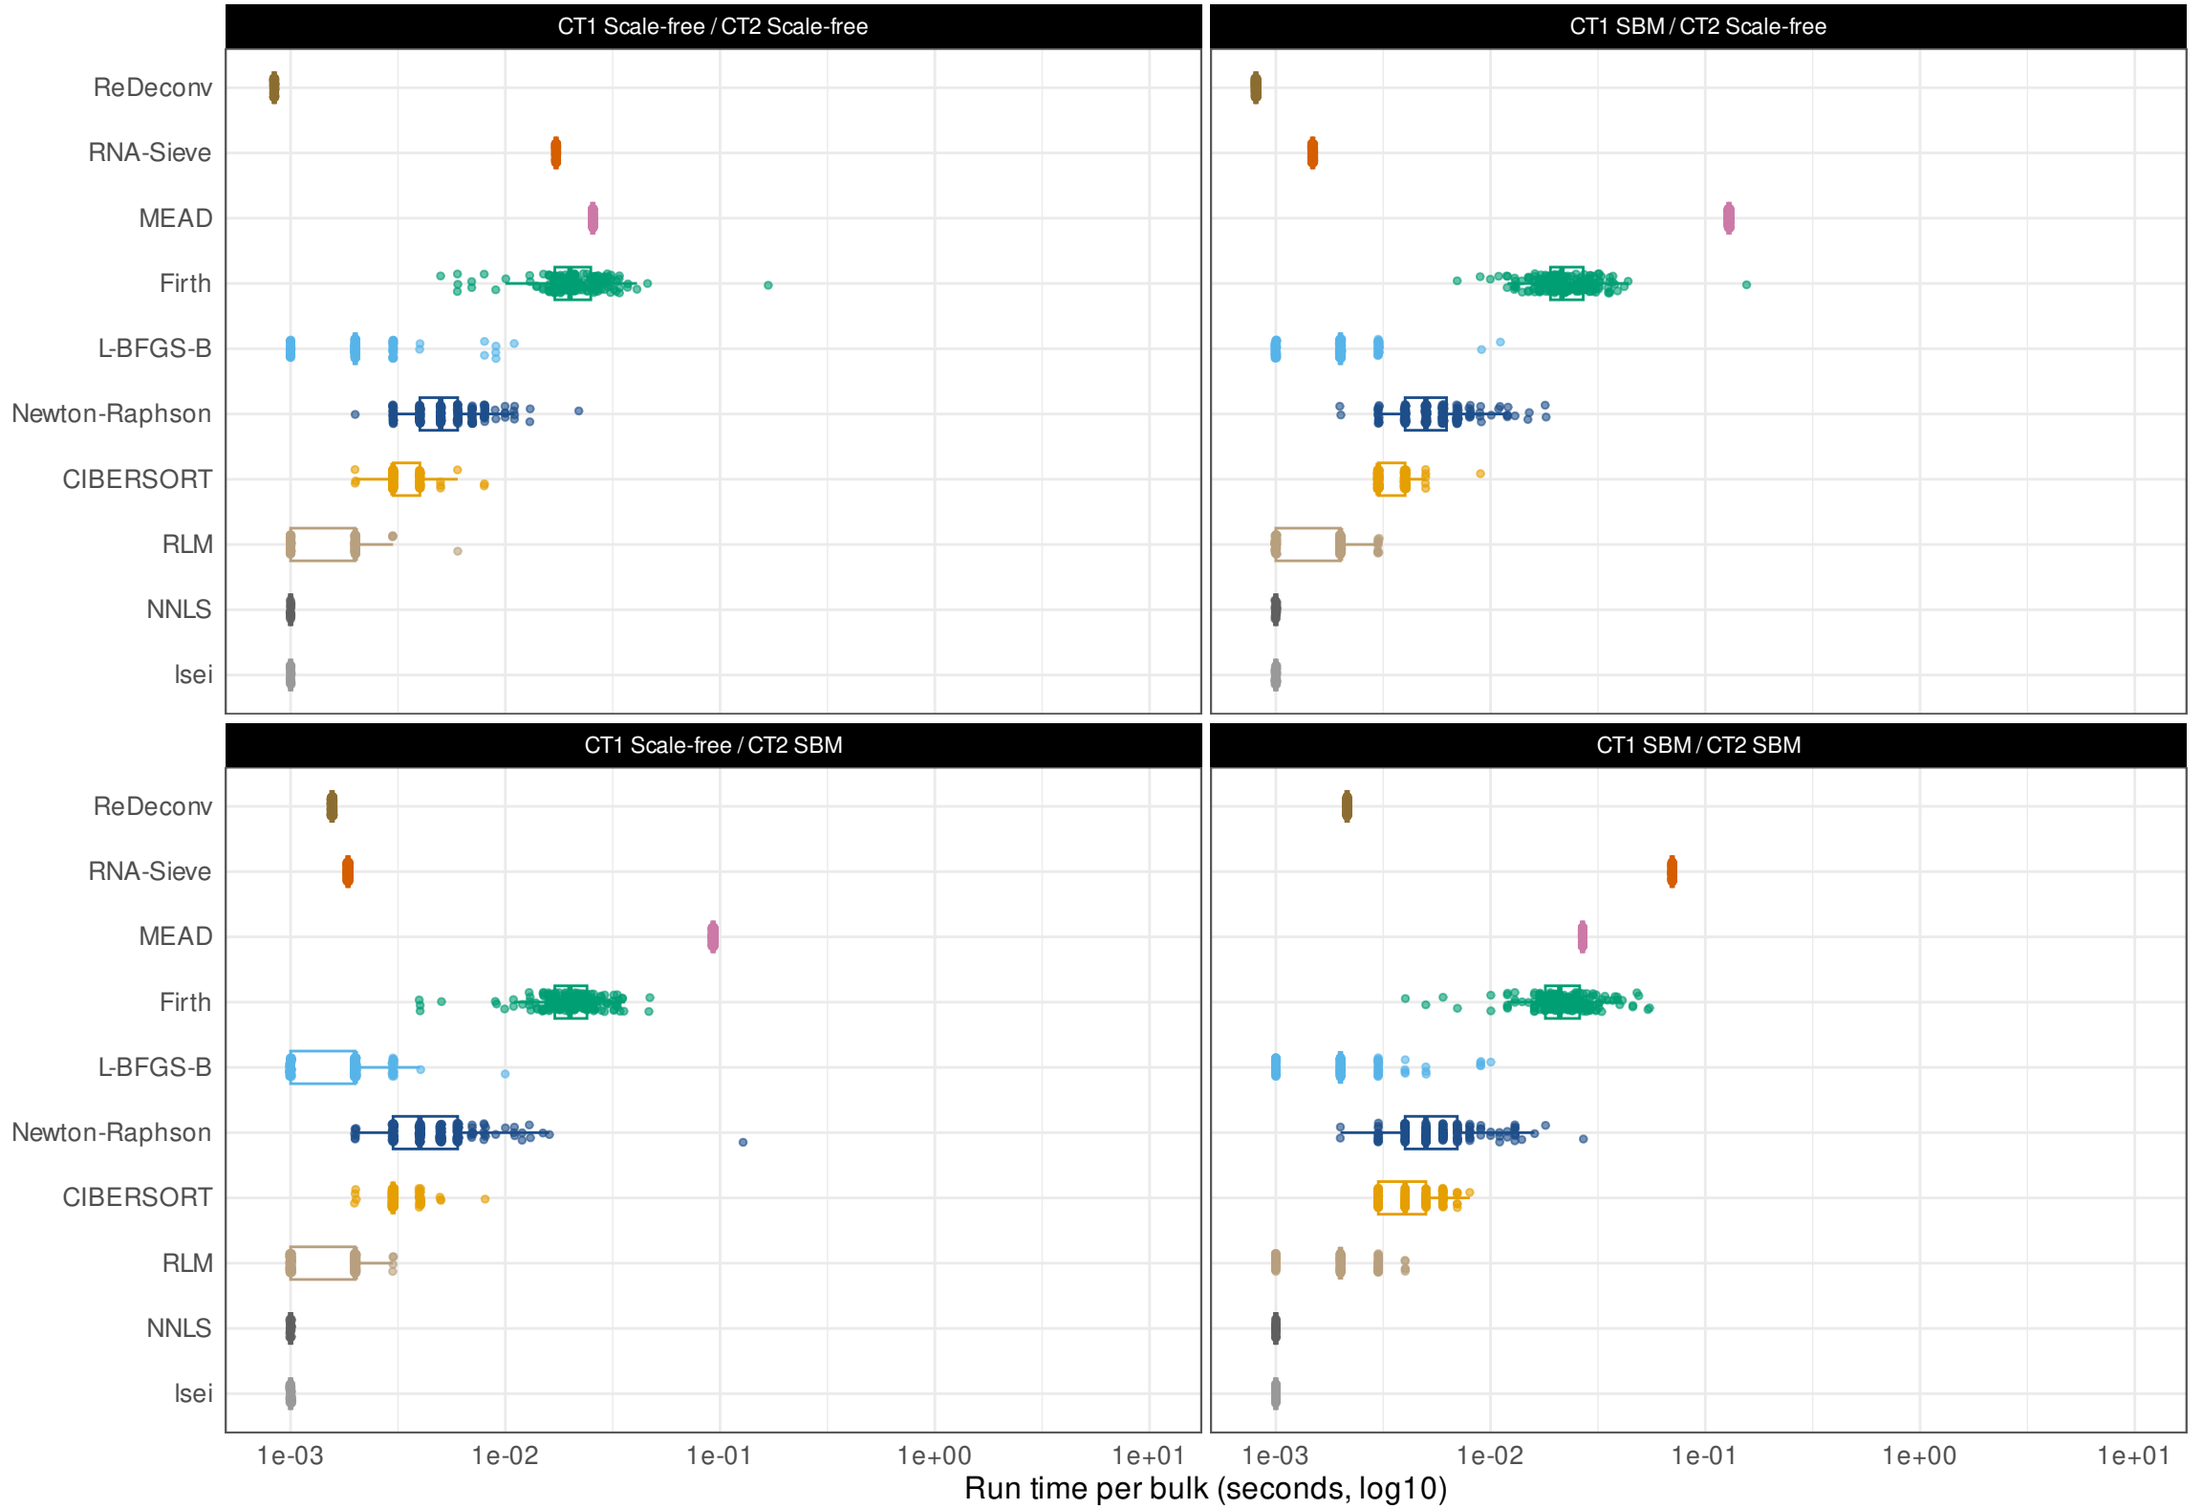

moderately unbalanced / moderate overlap

Point estimate only; interval computations are not included. Competitors: batch time divided by the bulks.

Run time of every method

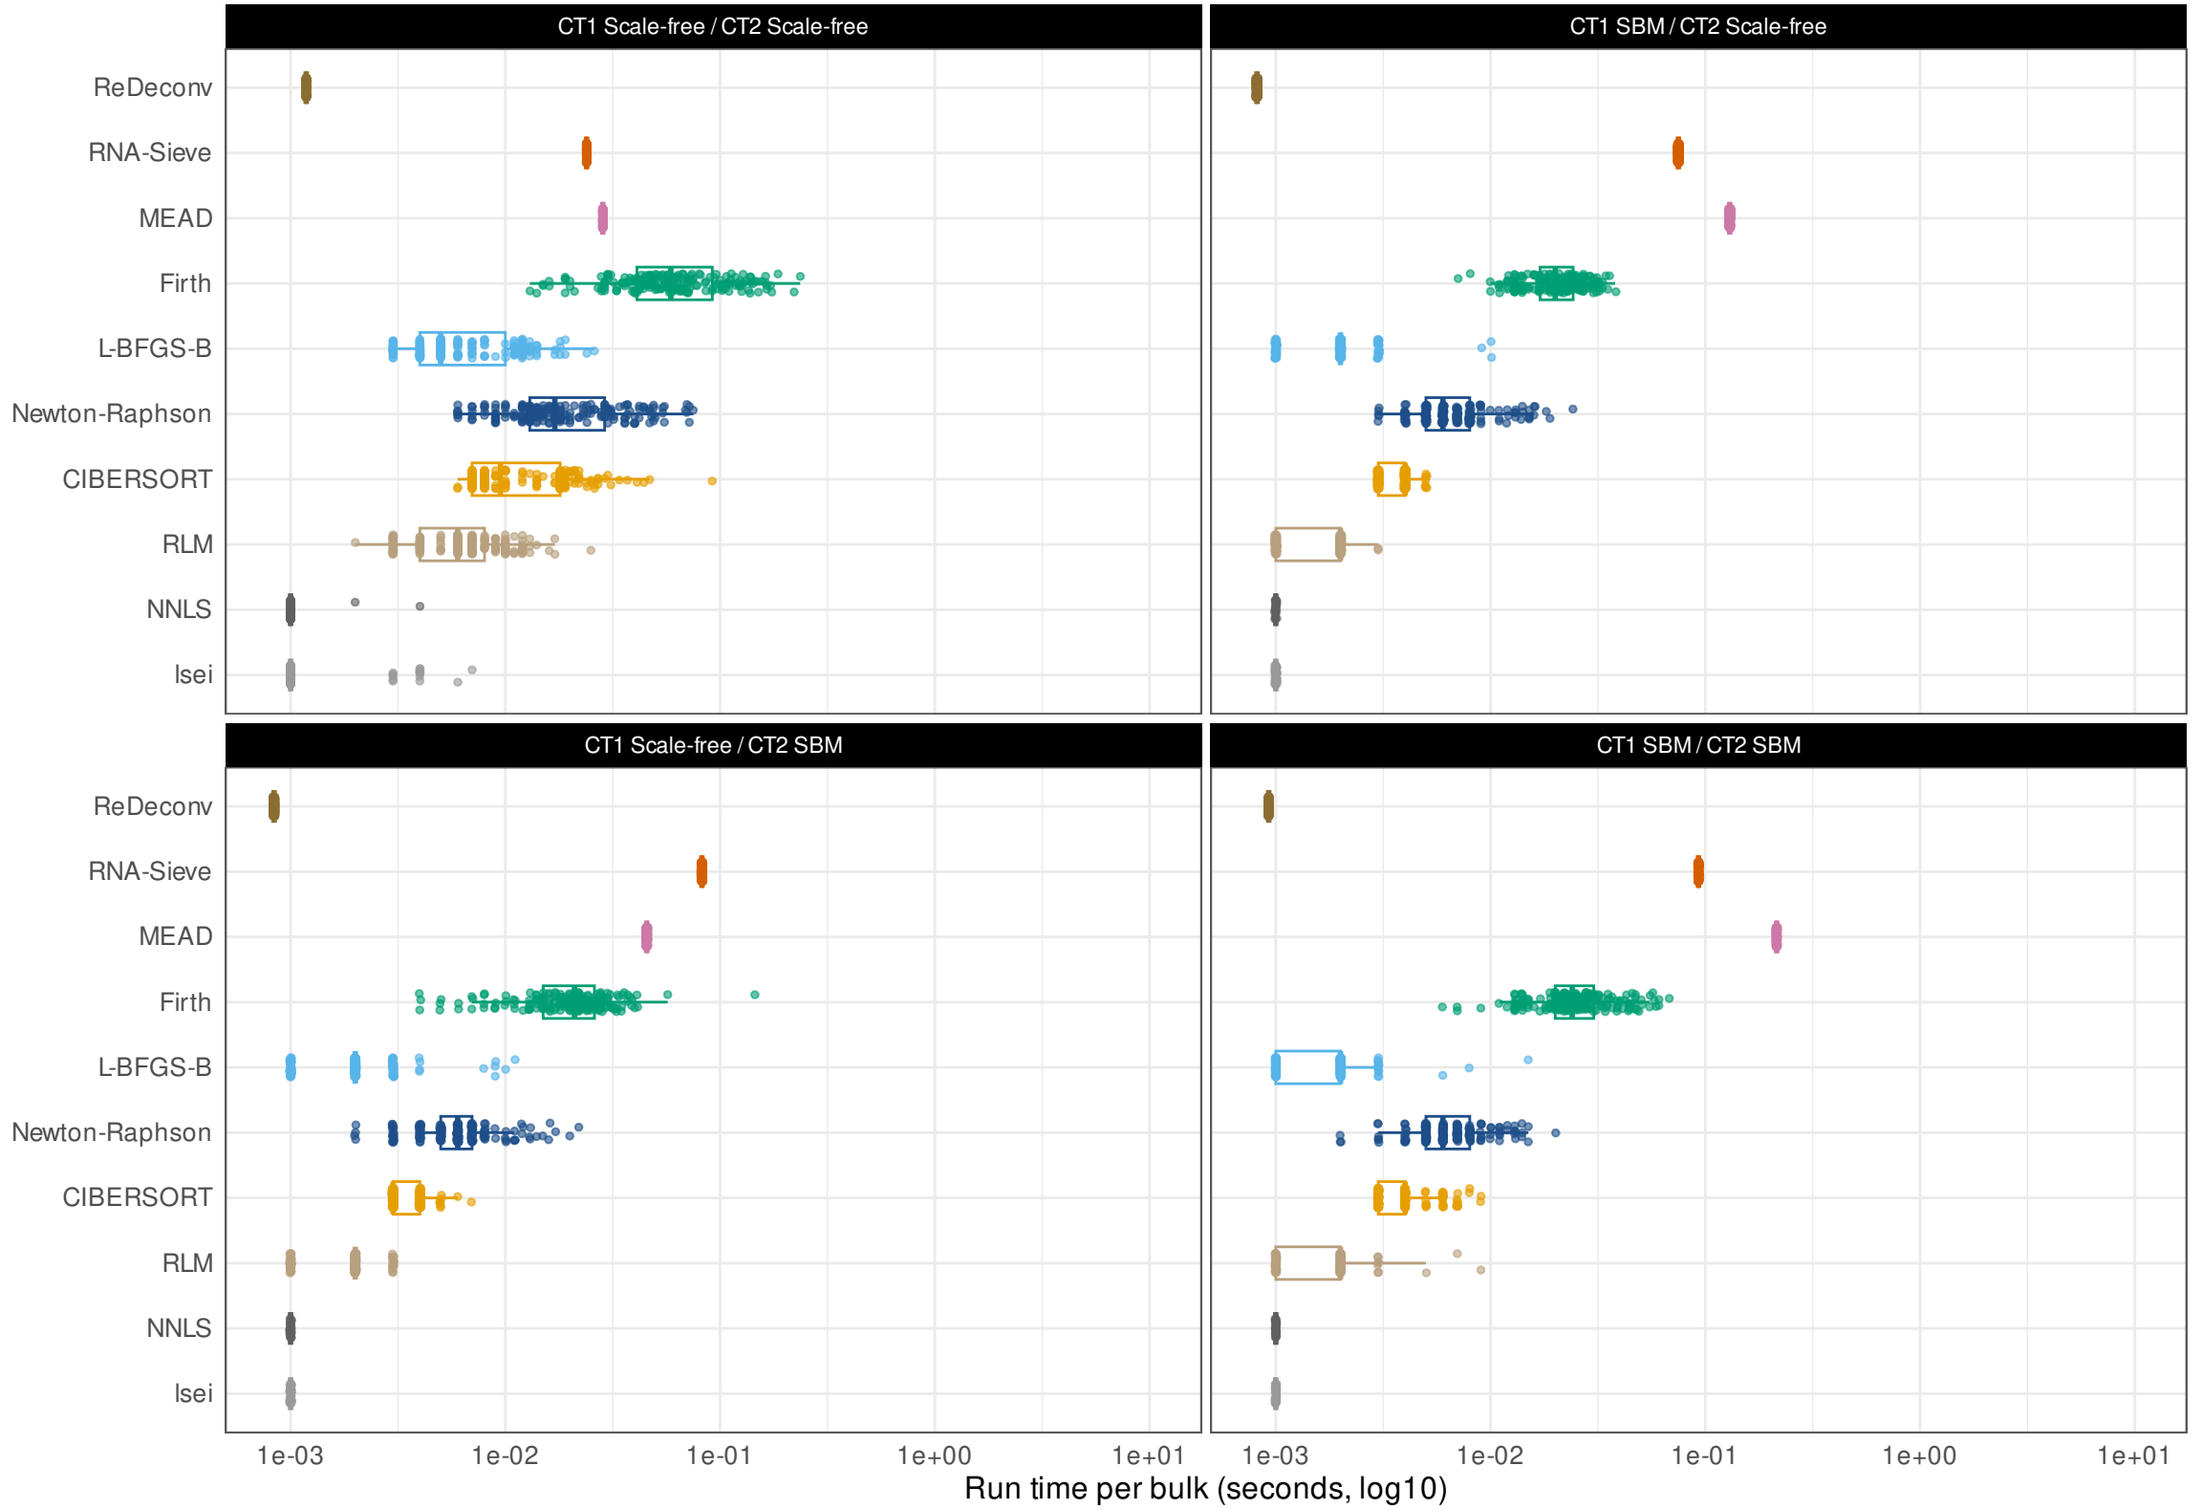

moderately unbalanced / high overlap

Point estimate only; interval computations are not included. Competitors: batch time divided by the bulks.

Run time of every method

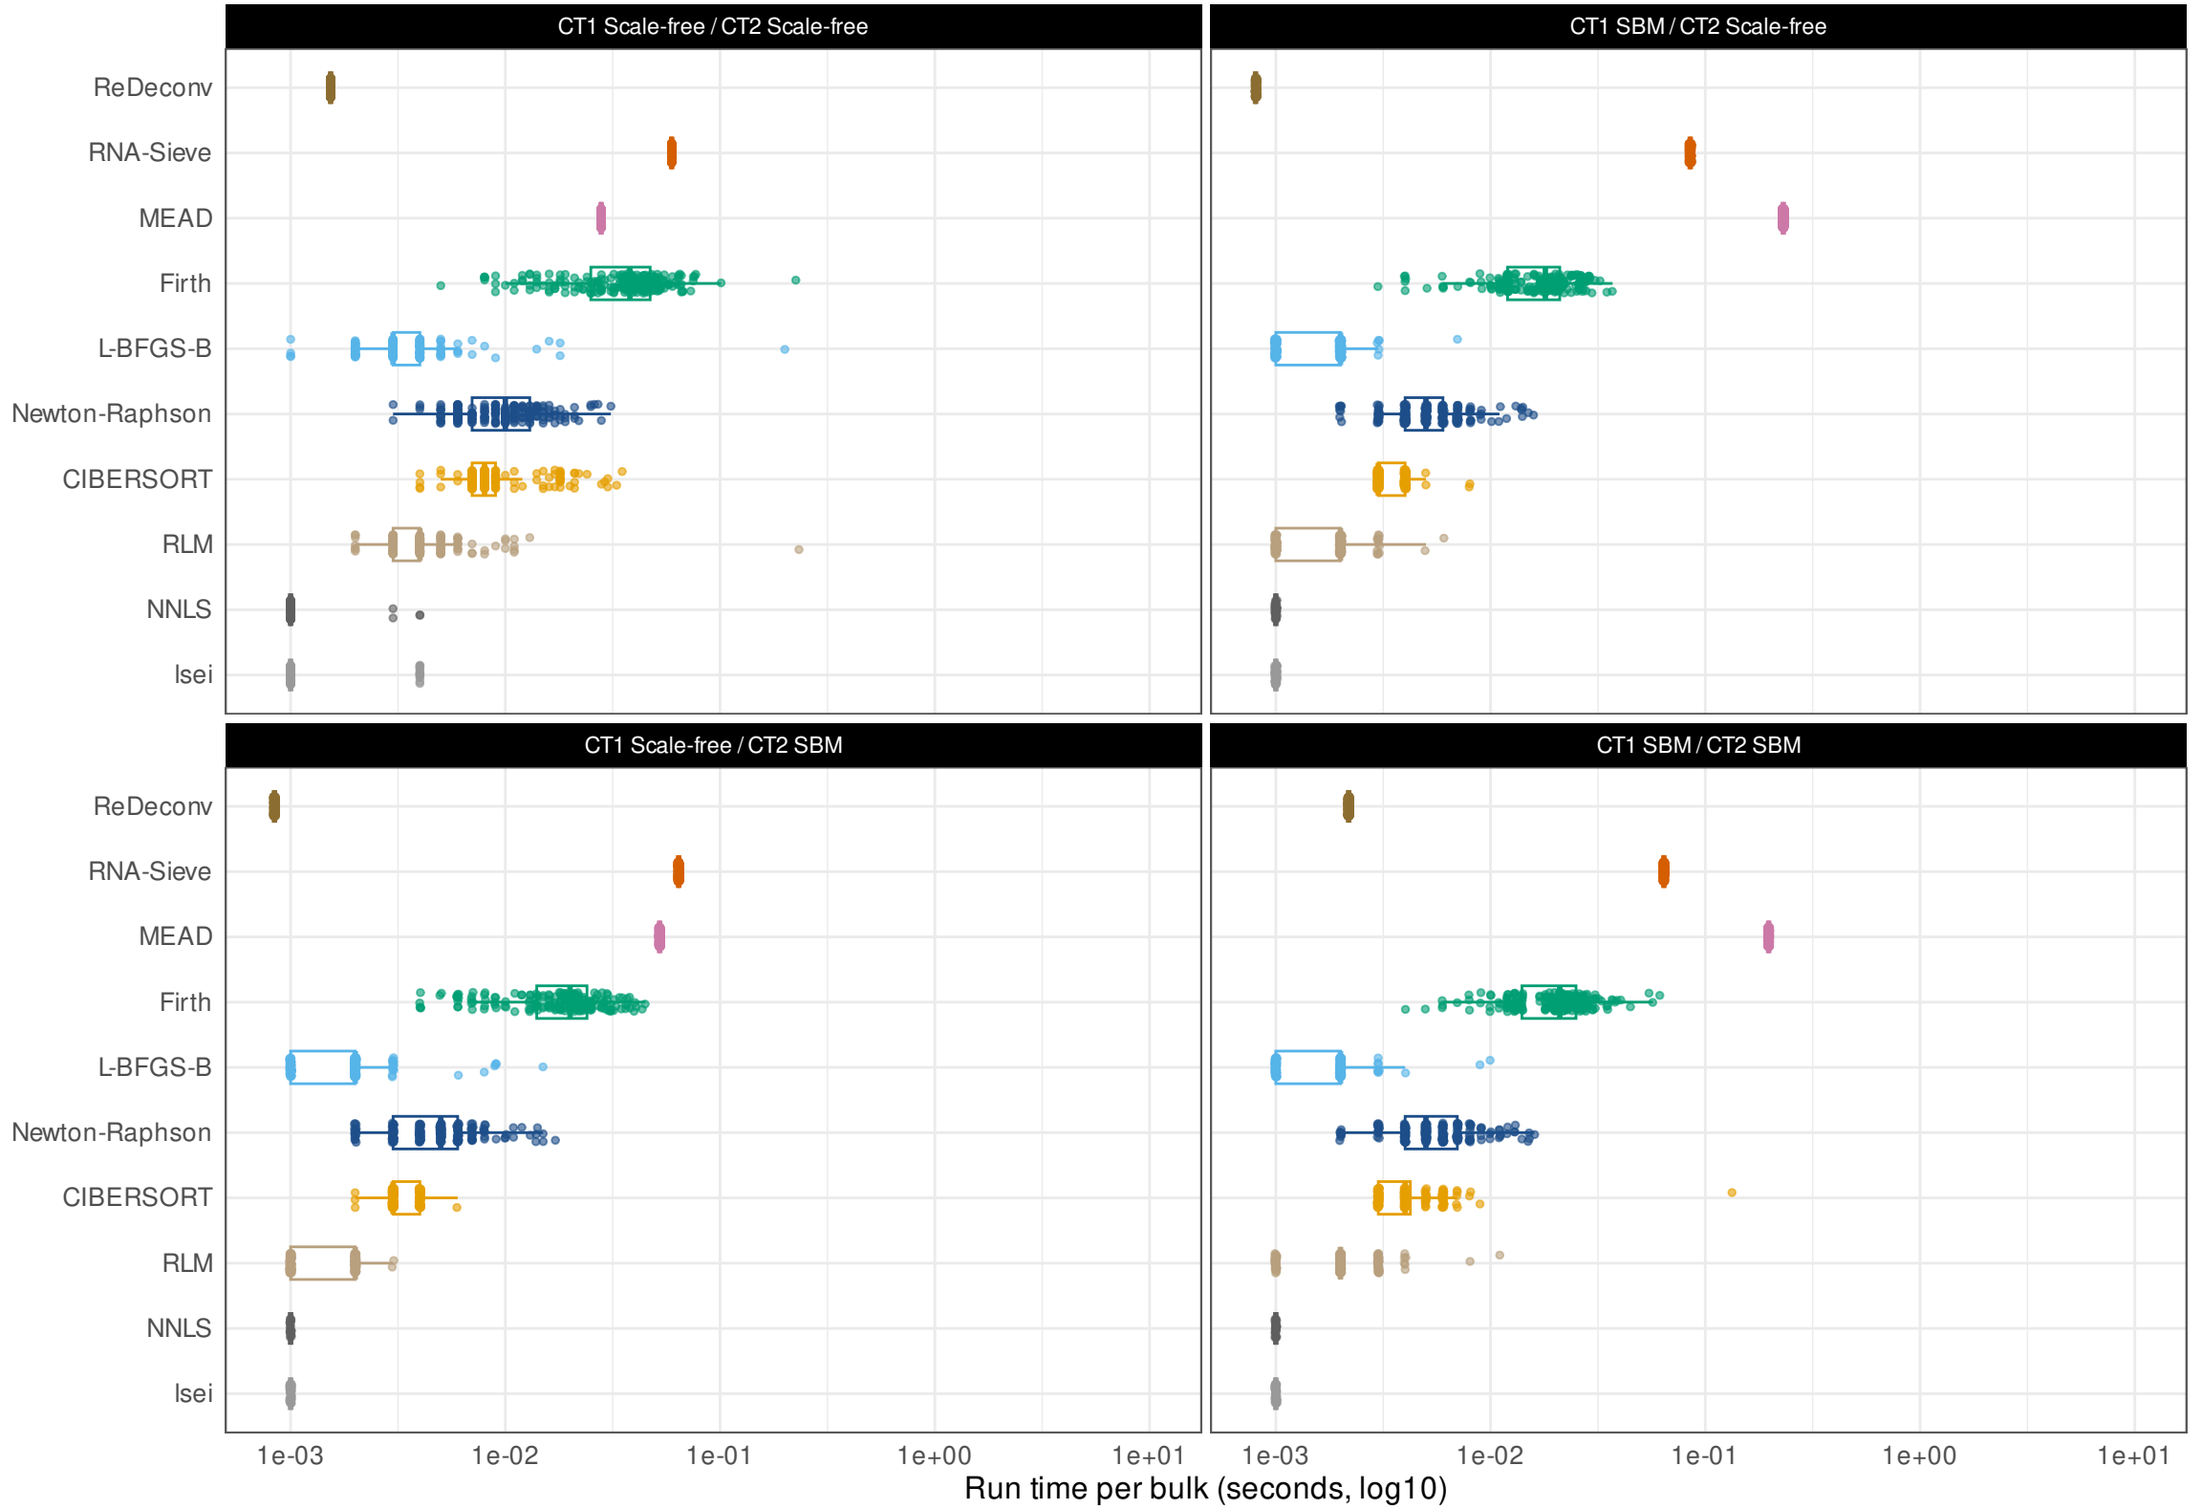

highly unbalanced / low overlap

Point estimate only; interval computations are not included. Competitors: batch time divided by the bulks.

Run time of every method

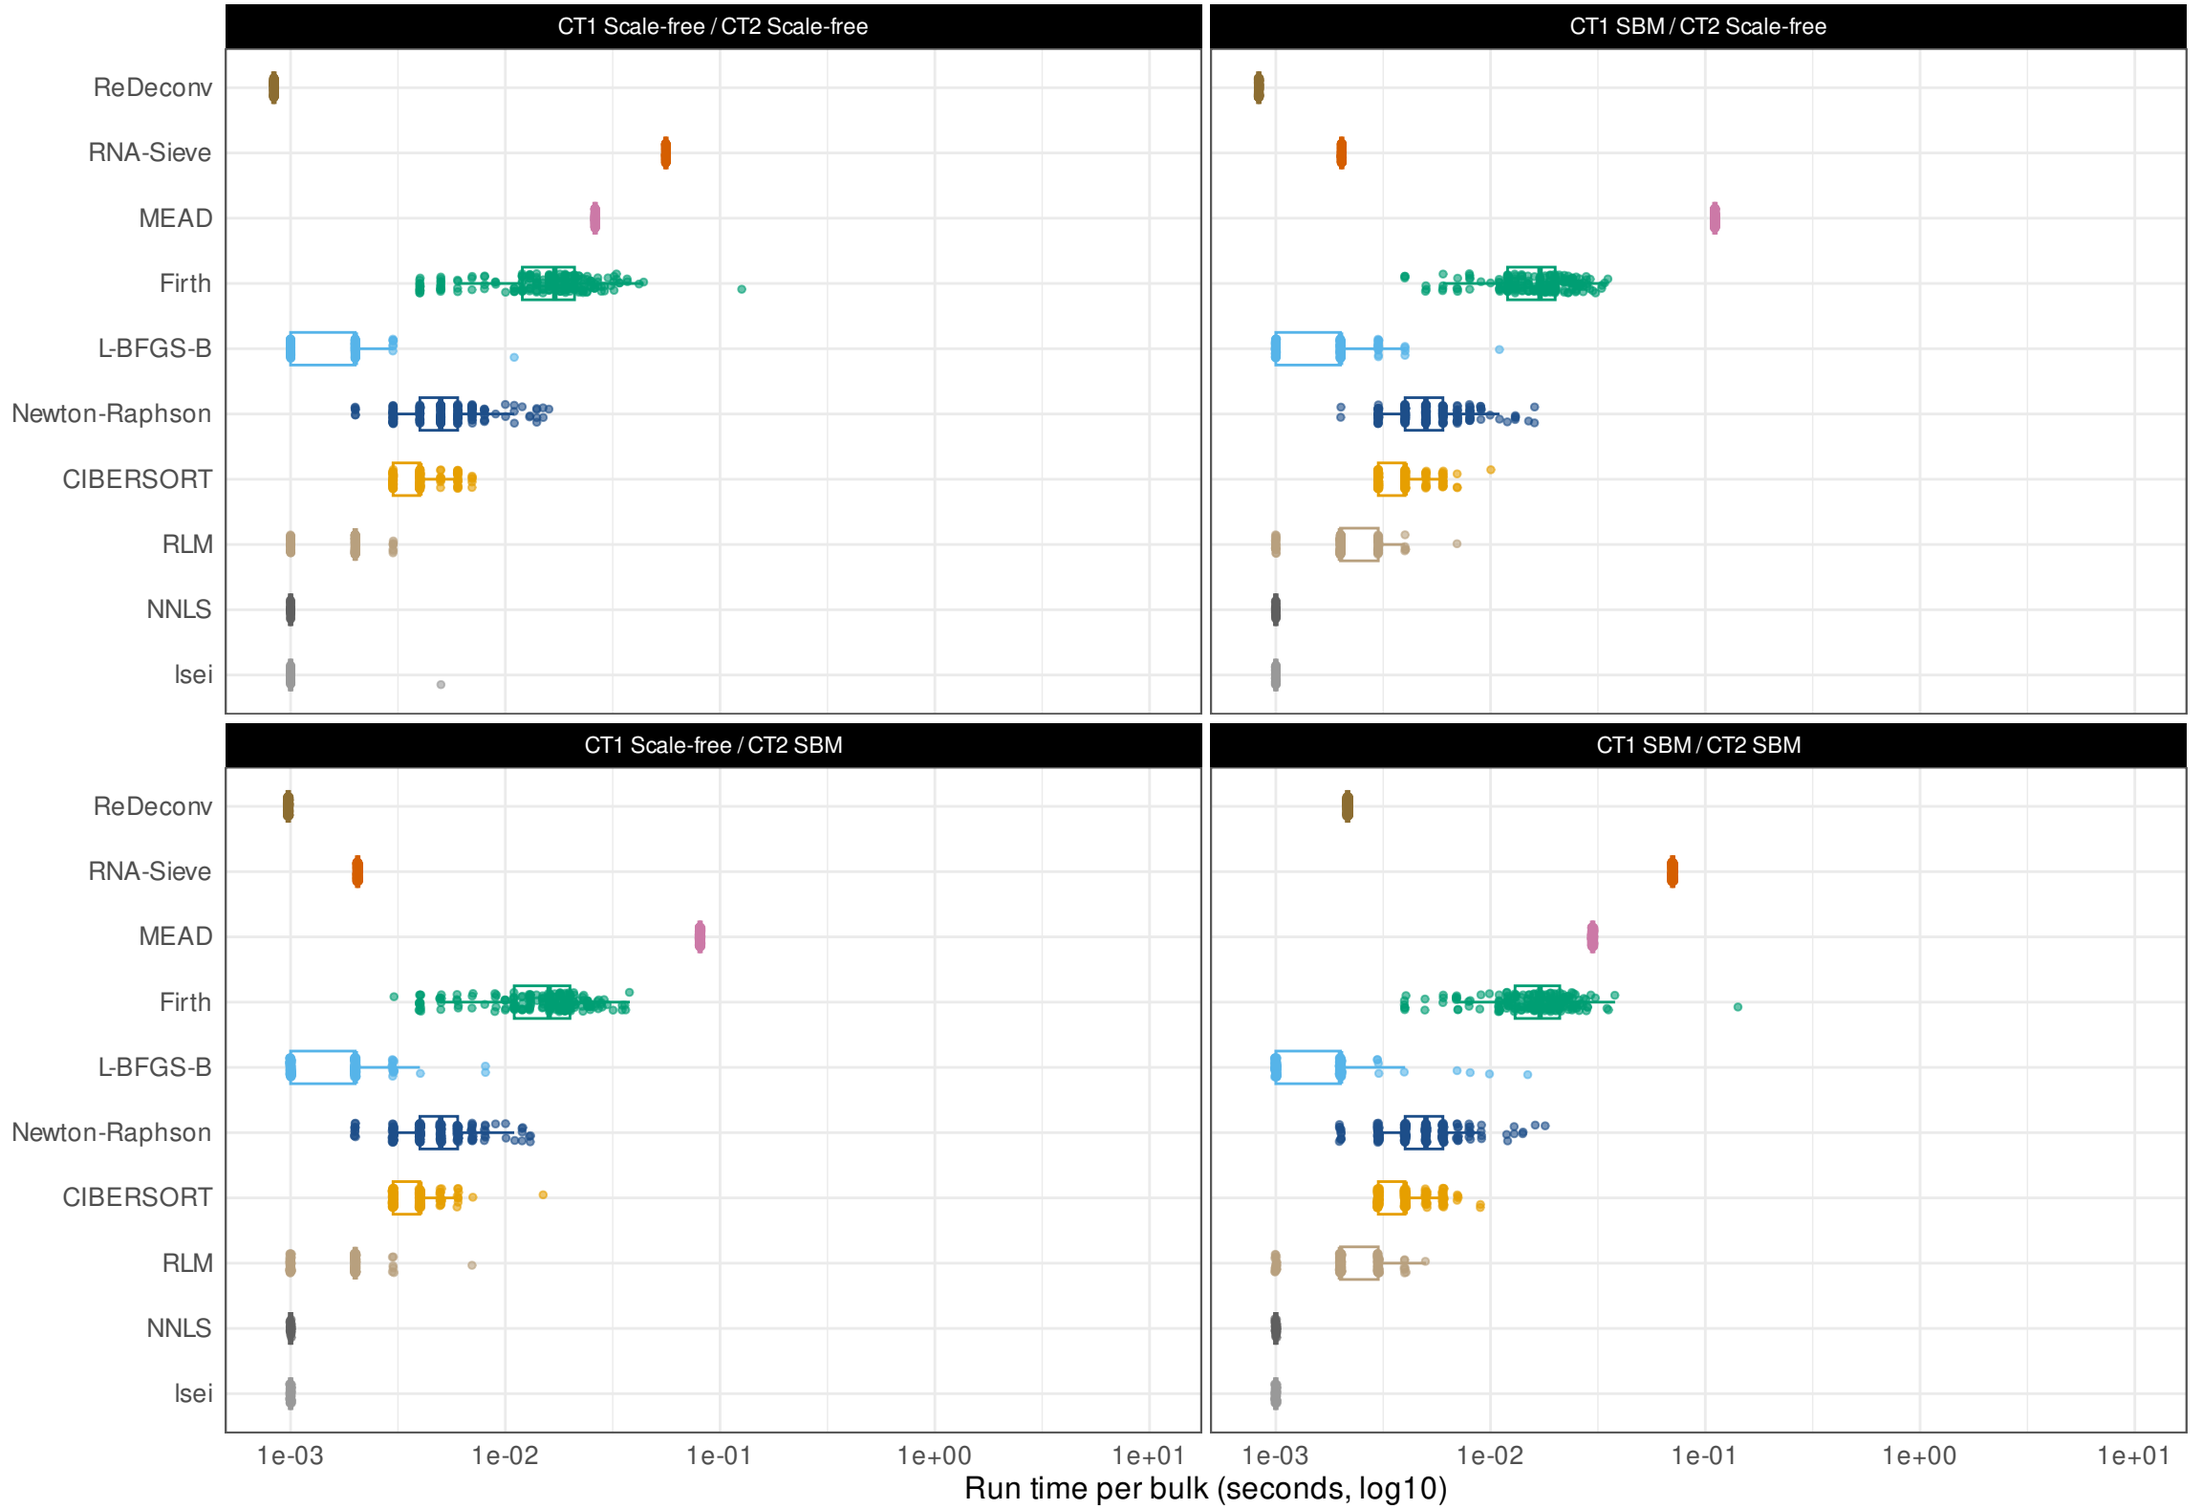

highly unbalanced / moderate overlap

Point estimate only; interval computations are not included. Competitors: batch time divided by the bulks.

Run time of every method

highly unbalanced / high overlap

Point estimate only; interval computations are not included. Competitors: batch time divided by the bulks.
