

small_CLD / homoscedastic / moderately unbalanced

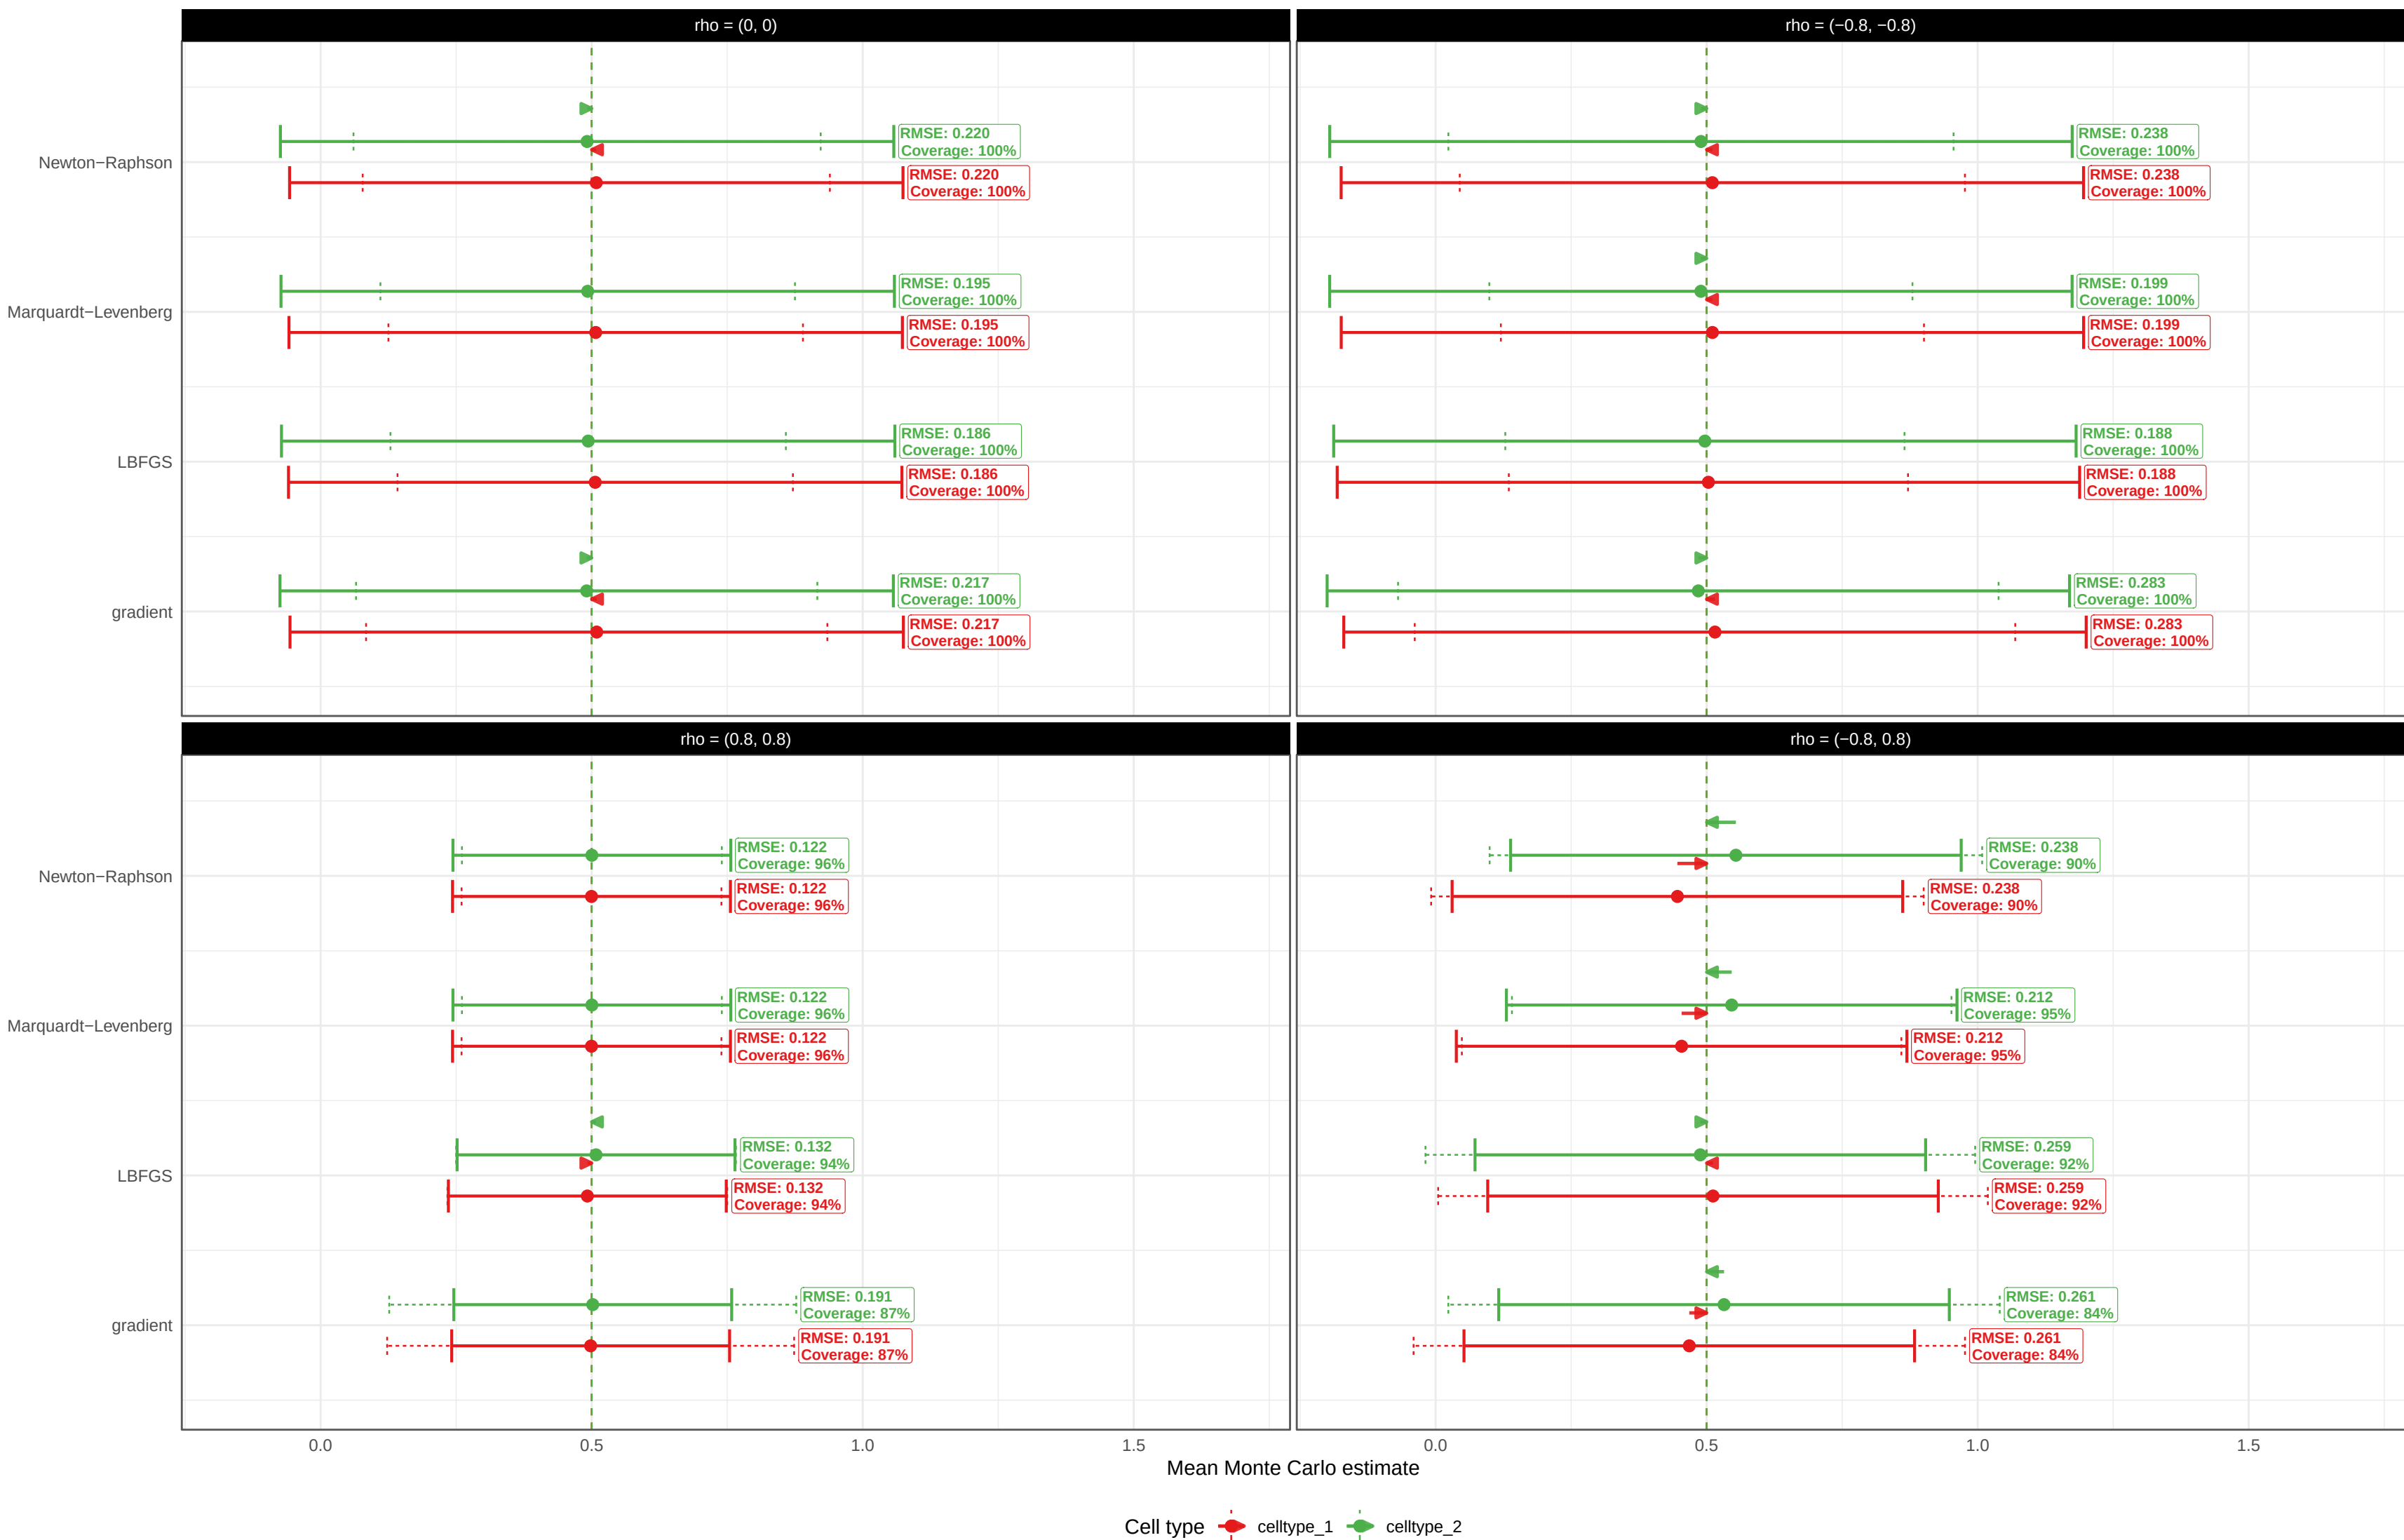

Solid whiskers: mean estimate plus or minus 1.96 times the expected-Fisher Wald SE at the true composition (confint.decovart_fit / vcov_illr_delta). Dashed whiskers: plus or minus 1.96 times the empirical Monte Carlo SD. Horizontal arrows: bias toward the true proportion. Labels (one per cell type): RMSE and coverage of those Wald intervals.

small_CLD / homoscedastic / highly unbalanced

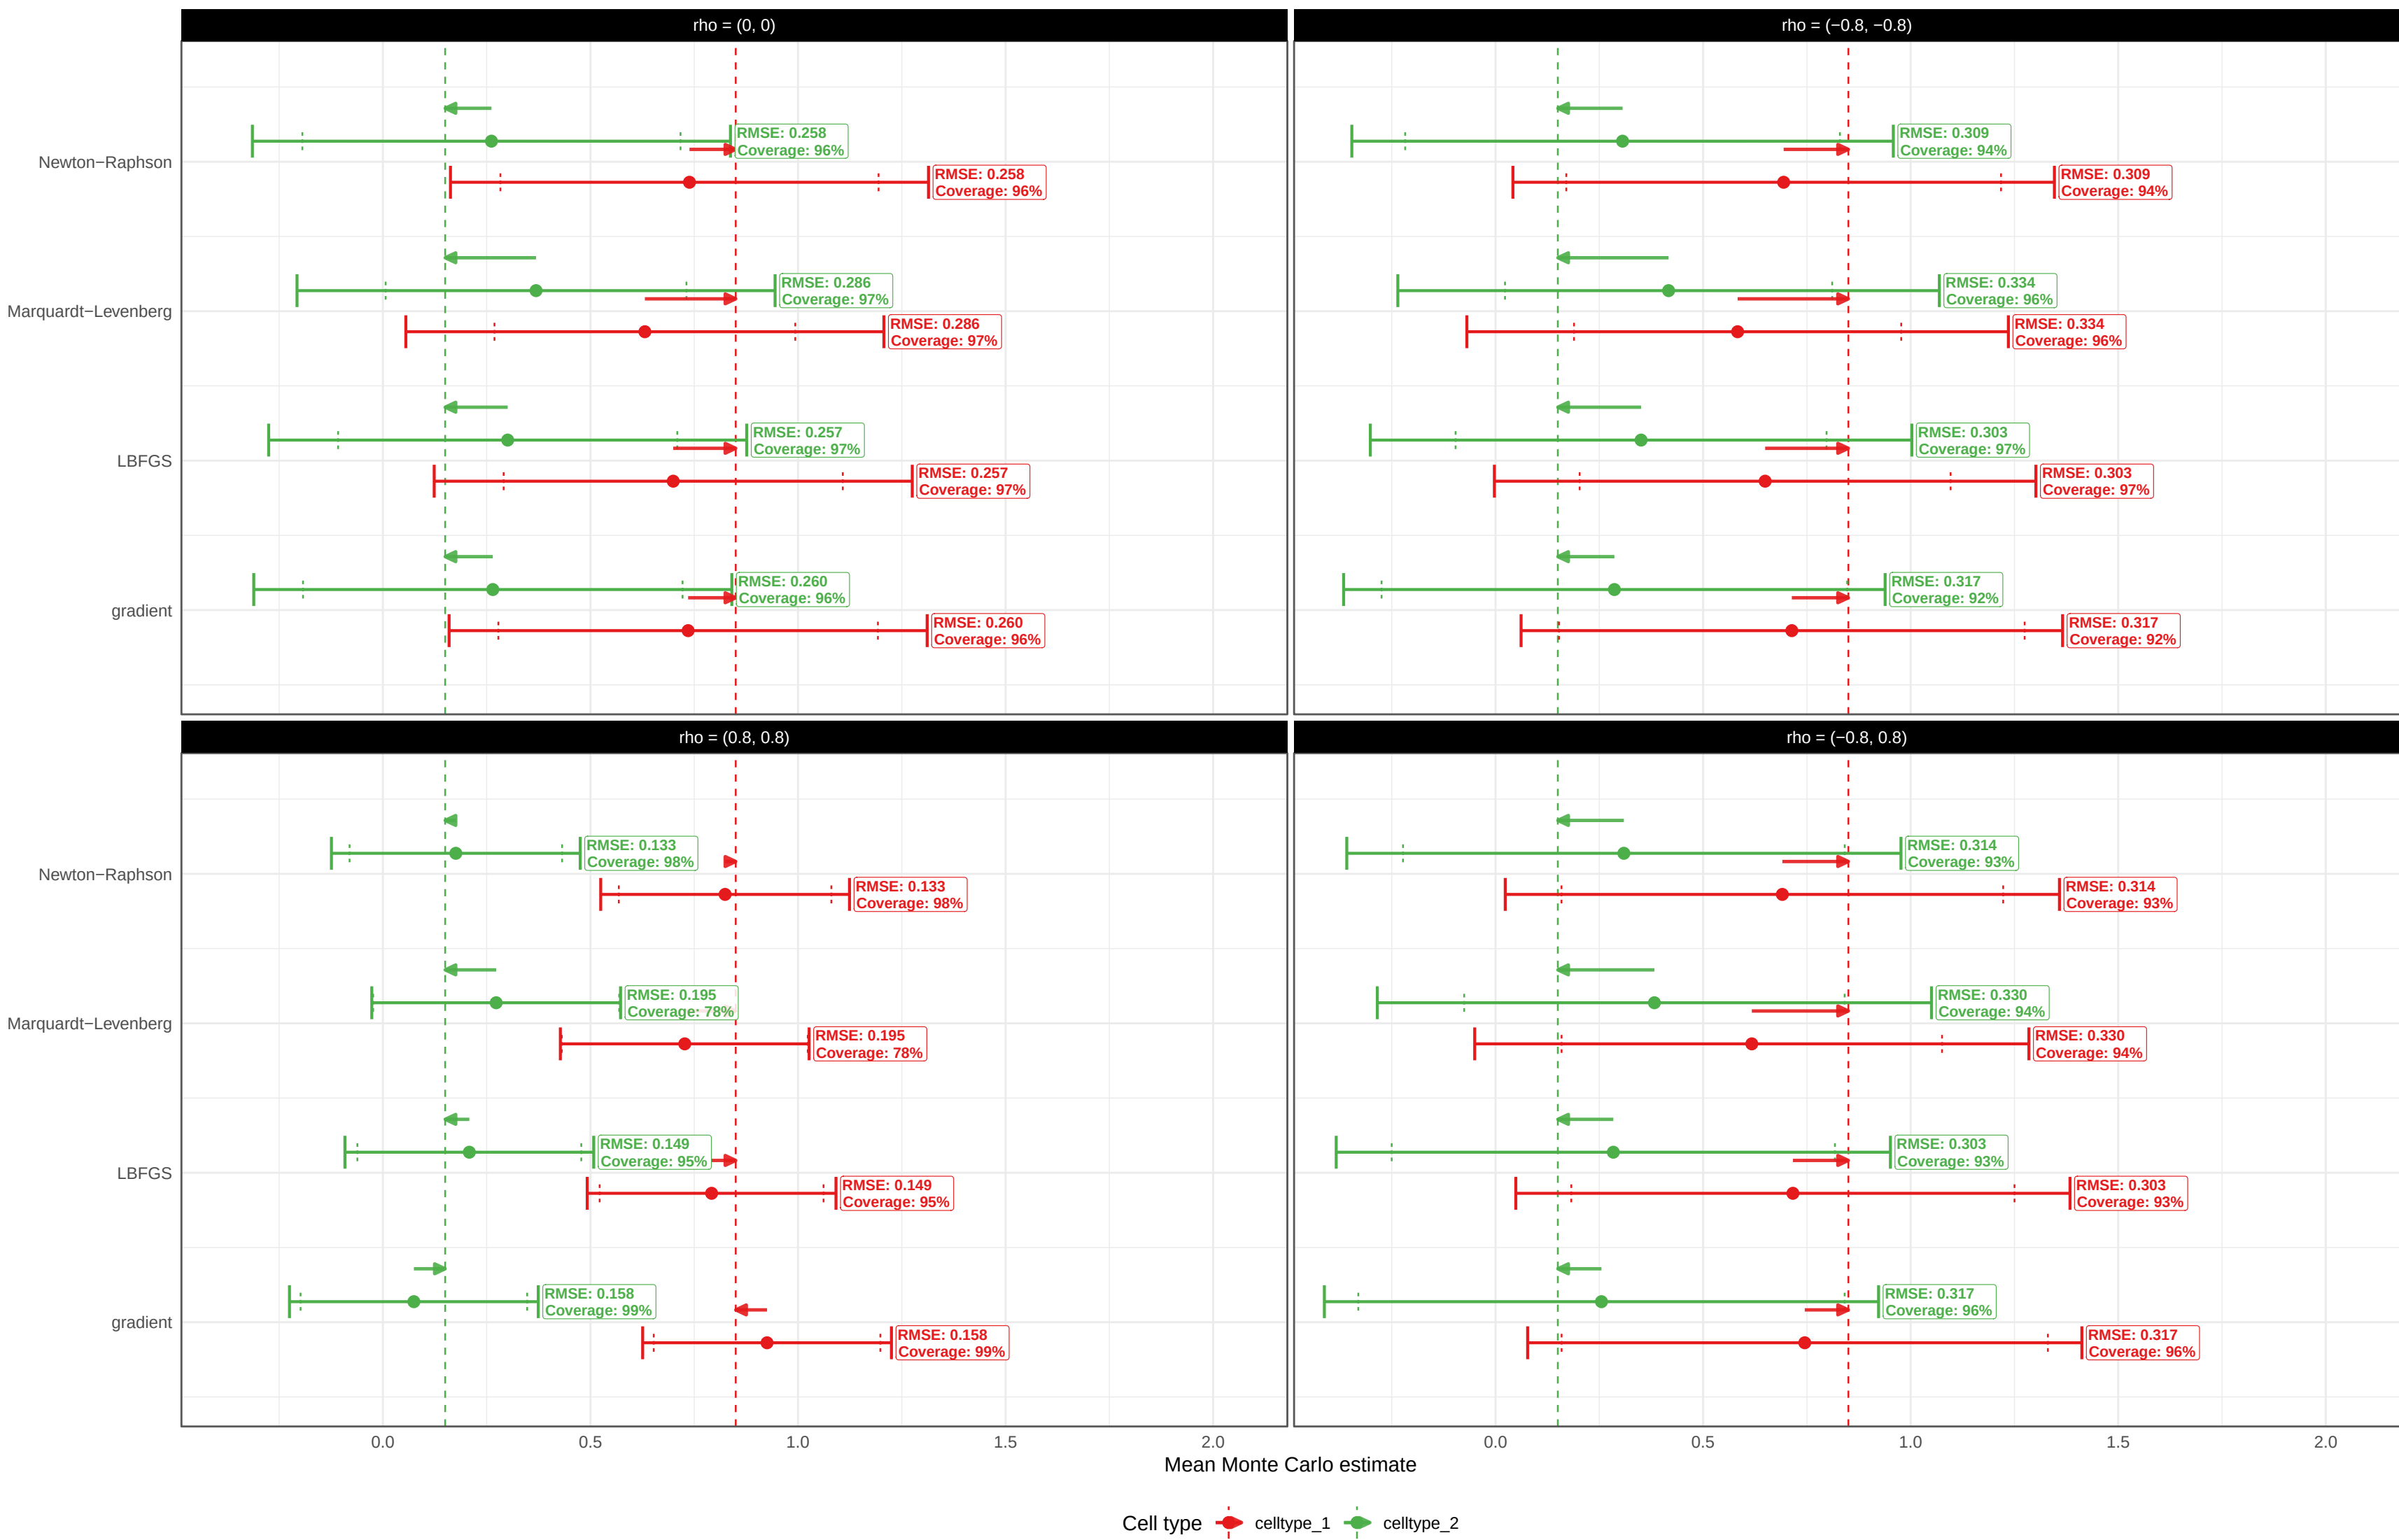

Solid whiskers: mean estimate plus or minus 1.96 times the expected-Fisher Wald SE at the true composition (confint.decovart_fit / vcov_illr_delta). Dashed whiskers: plus or minus 1.96 times the empirical Monte Carlo SD. Horizontal arrows: bias toward the true proportion. Labels (one per cell type): RMSE and coverage of those Wald intervals.

small_CLD / heteroscedastic / balanced

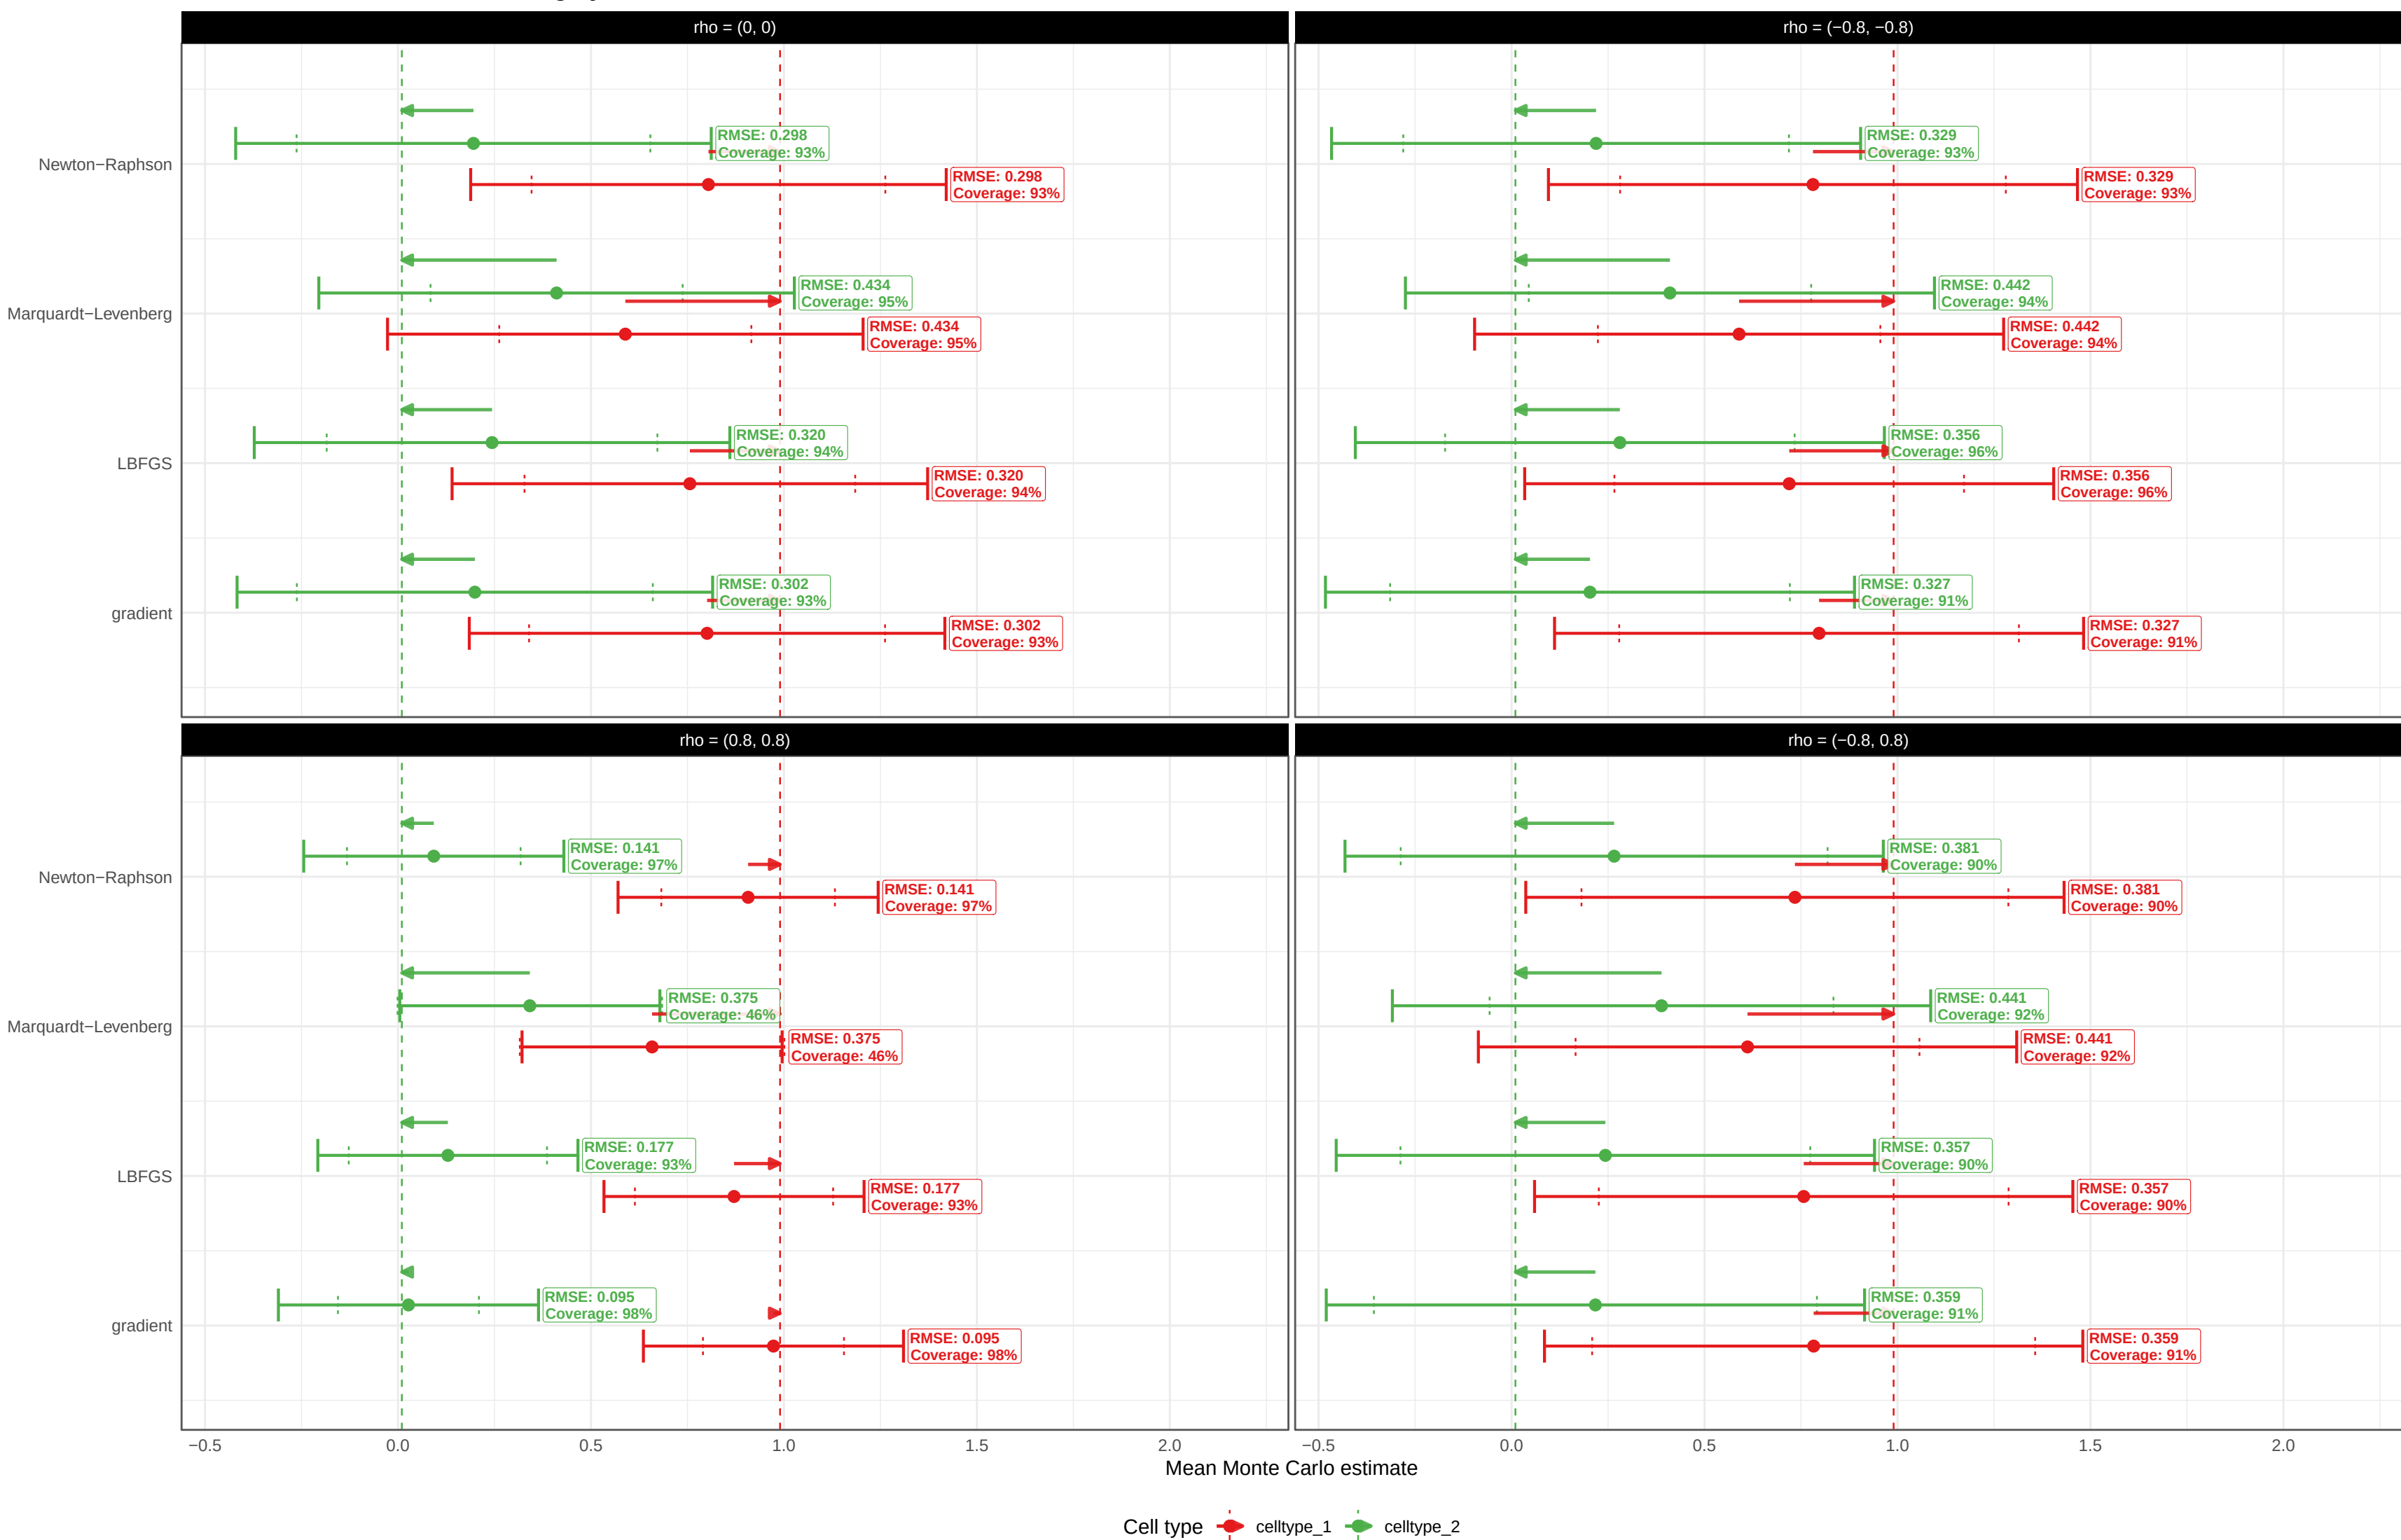

Solid whiskers: mean estimate plus or minus 1.96 times the expected-Fisher Wald SE at the true composition (confint.decovart_fit / vcov_illr_delta). Dashed whiskers: plus or minus 1.96 times the empirical Monte Carlo SD. Horizontal arrows: bias toward the true proportion. Labels (one per cell type): RMSE and coverage of those Wald intervals.

small_CLD / heteroscedastic / moderately unbalanced

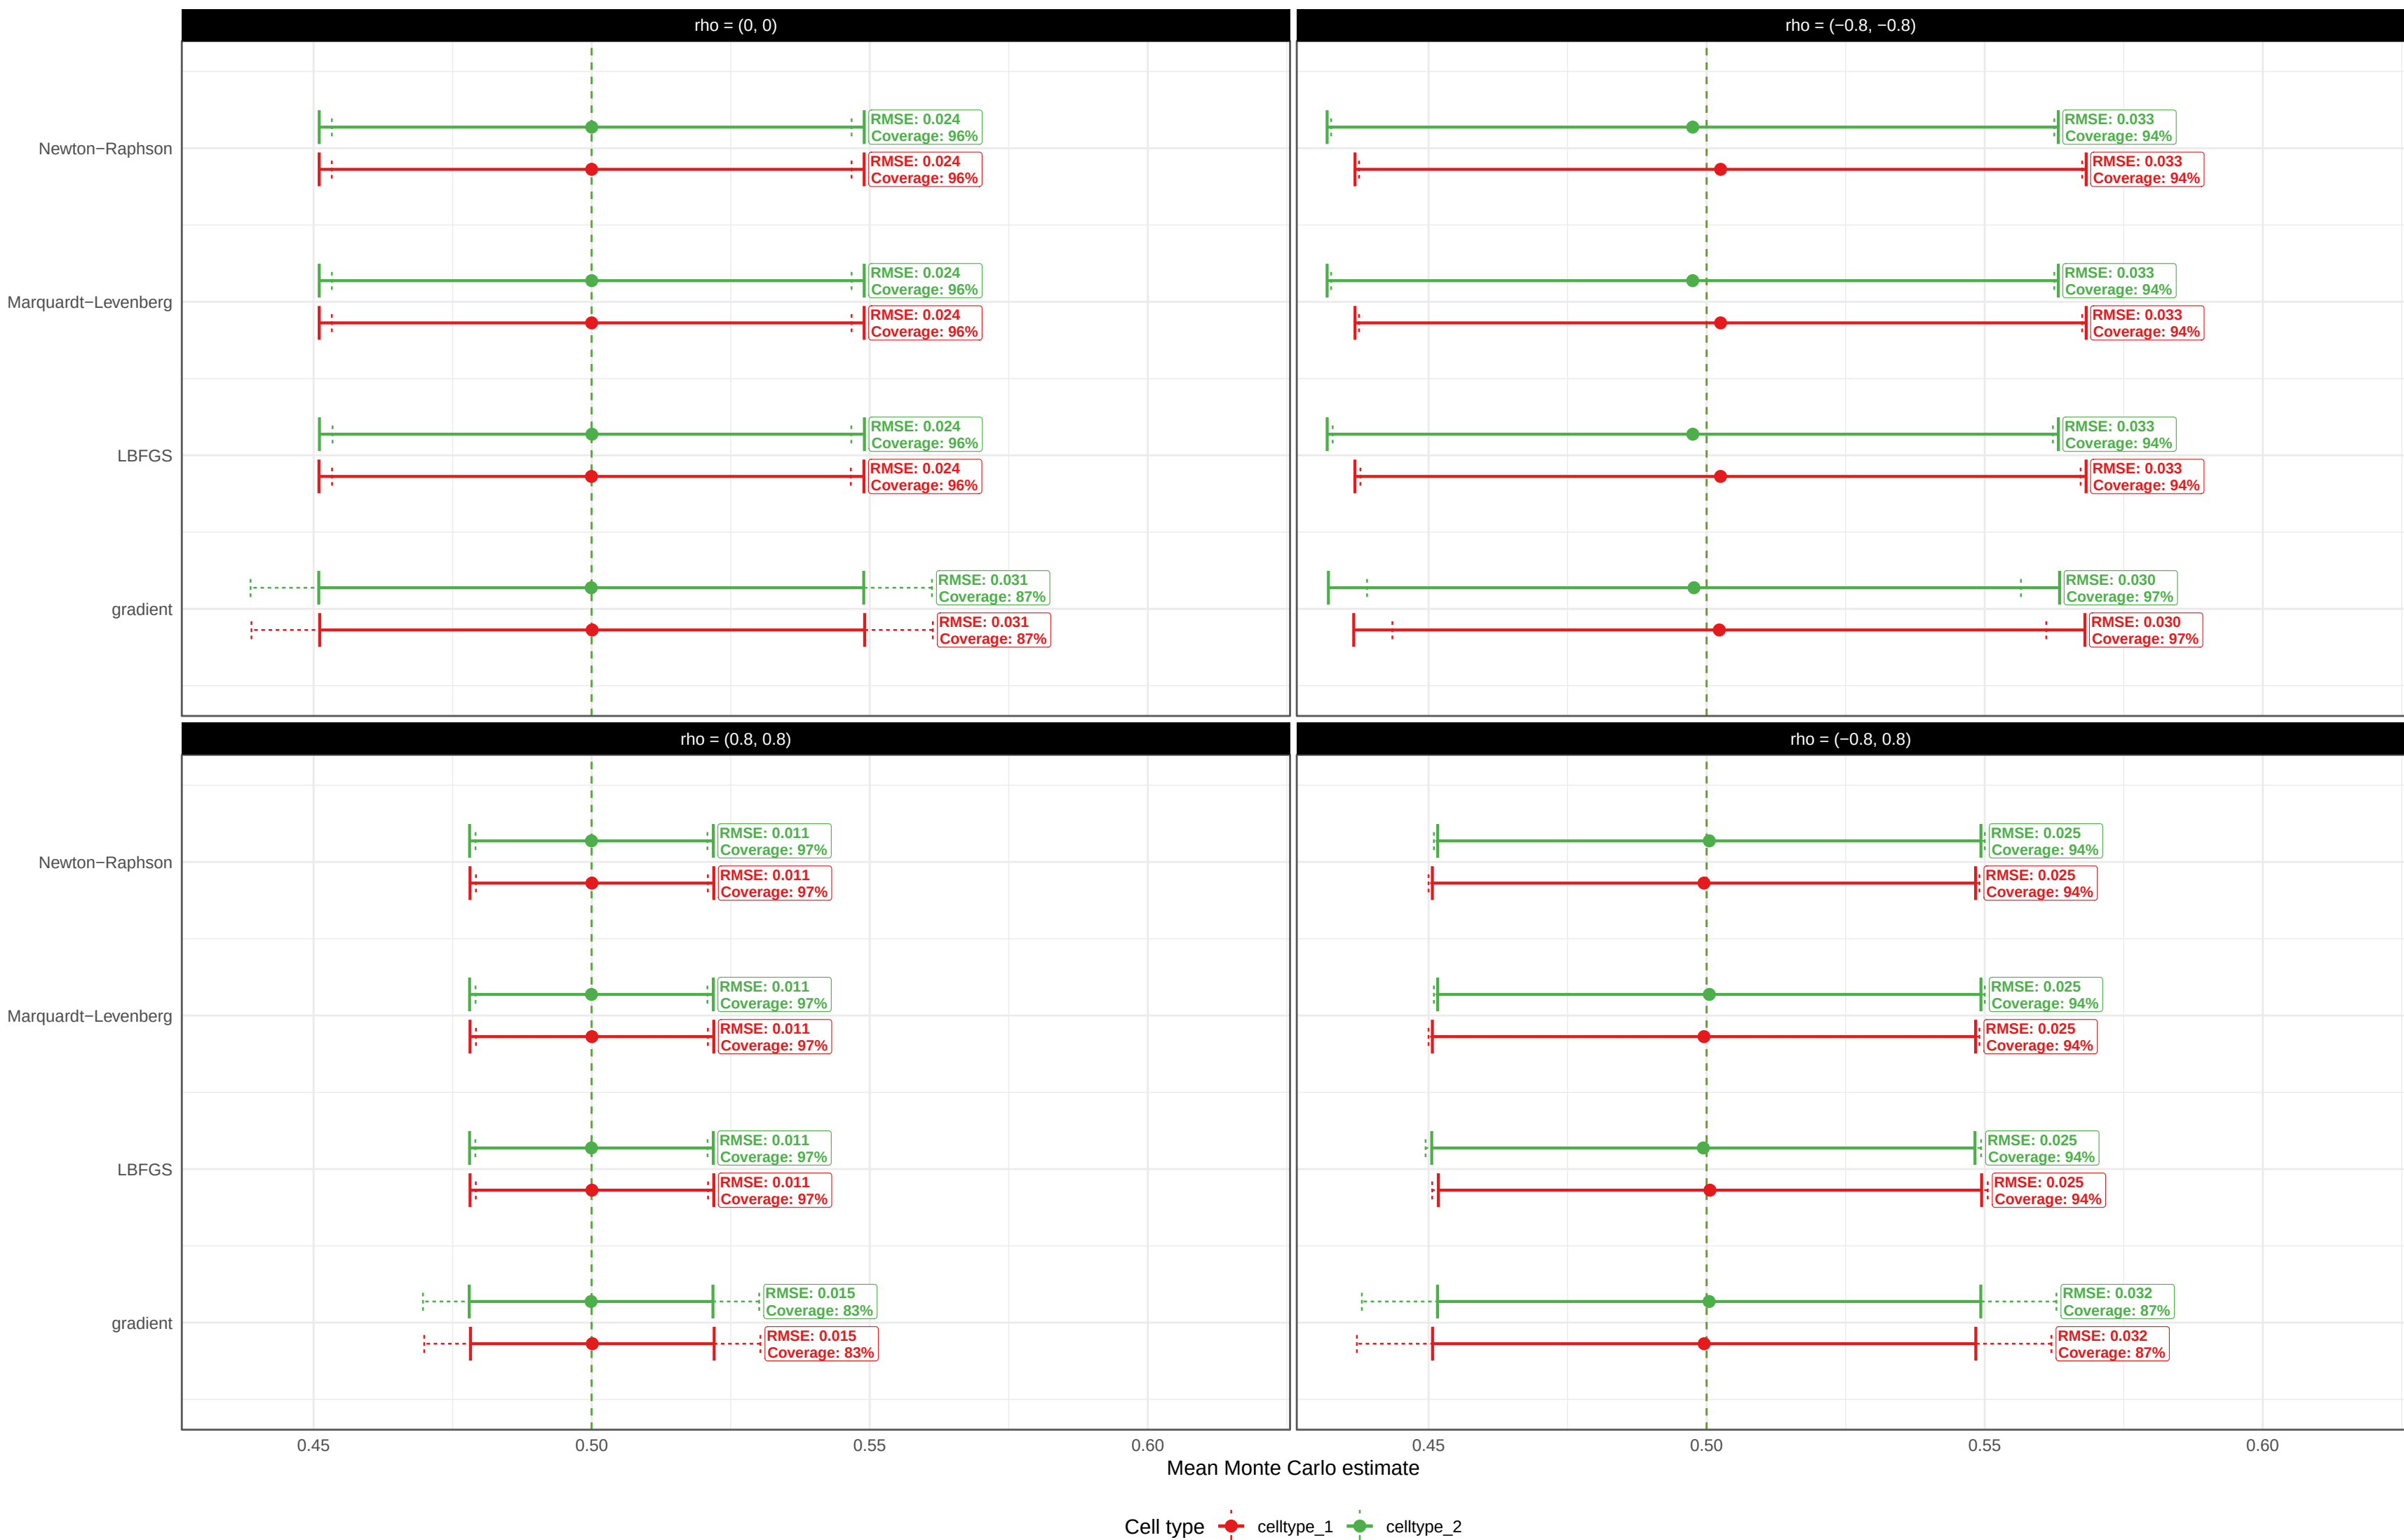

Solid whiskers: mean estimate plus or minus 1.96 times the expected-Fisher Wald SE at the true composition (confint.decovart_fit / vcov_illr_delta). Dashed whiskers: plus or minus 1.96 times the empirical Monte Carlo SD. Horizontal arrows: bias toward the true proportion. Labels (one per cell type): RMSE and coverage of those Wald intervals.

small_CLD / heteroscedastic / highly unbalanced

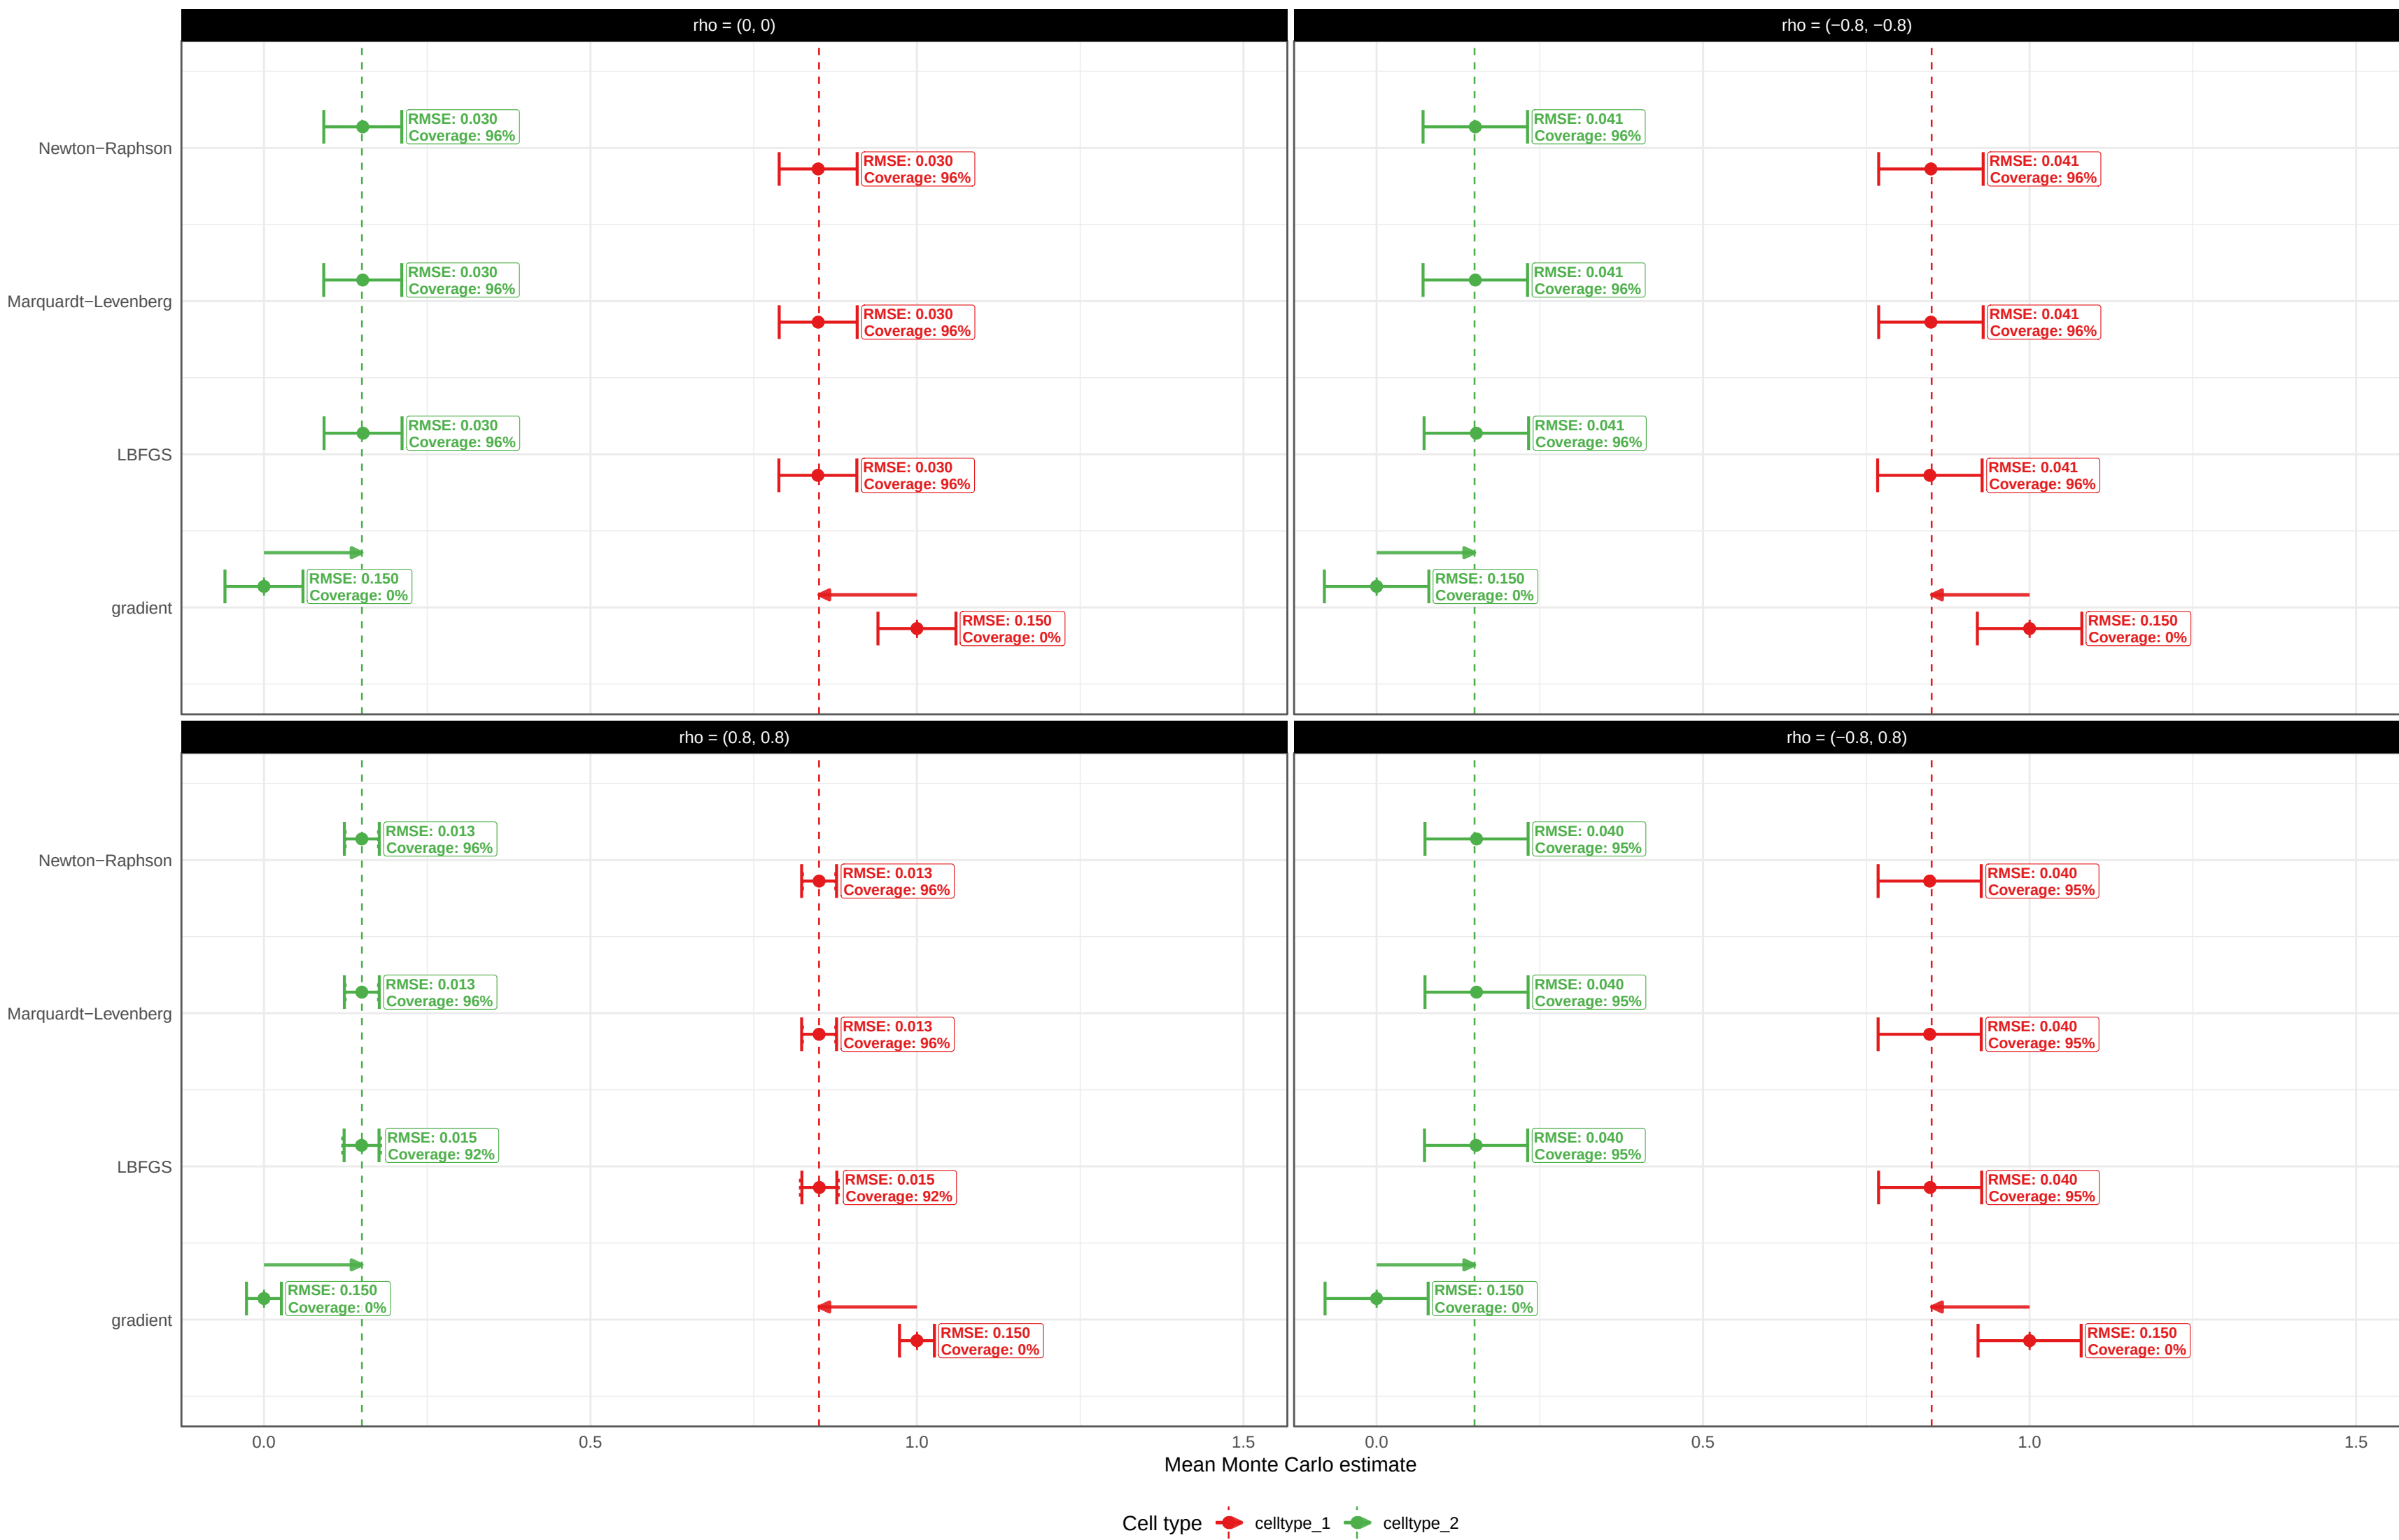

Solid whiskers: mean estimate plus or minus 1.96 times the expected-Fisher Wald SE at the true composition (confint.decovart_fit / vcov_ill_delta). Dashed whiskers: plus or minus 1.96 times the empirical Monte Carlo SD. Horizontal arrows: bias toward the true proportion. Labels (one per cell type): RMSE and coverage of those Wald intervals.

large_CLD / homoscedastic / balanced

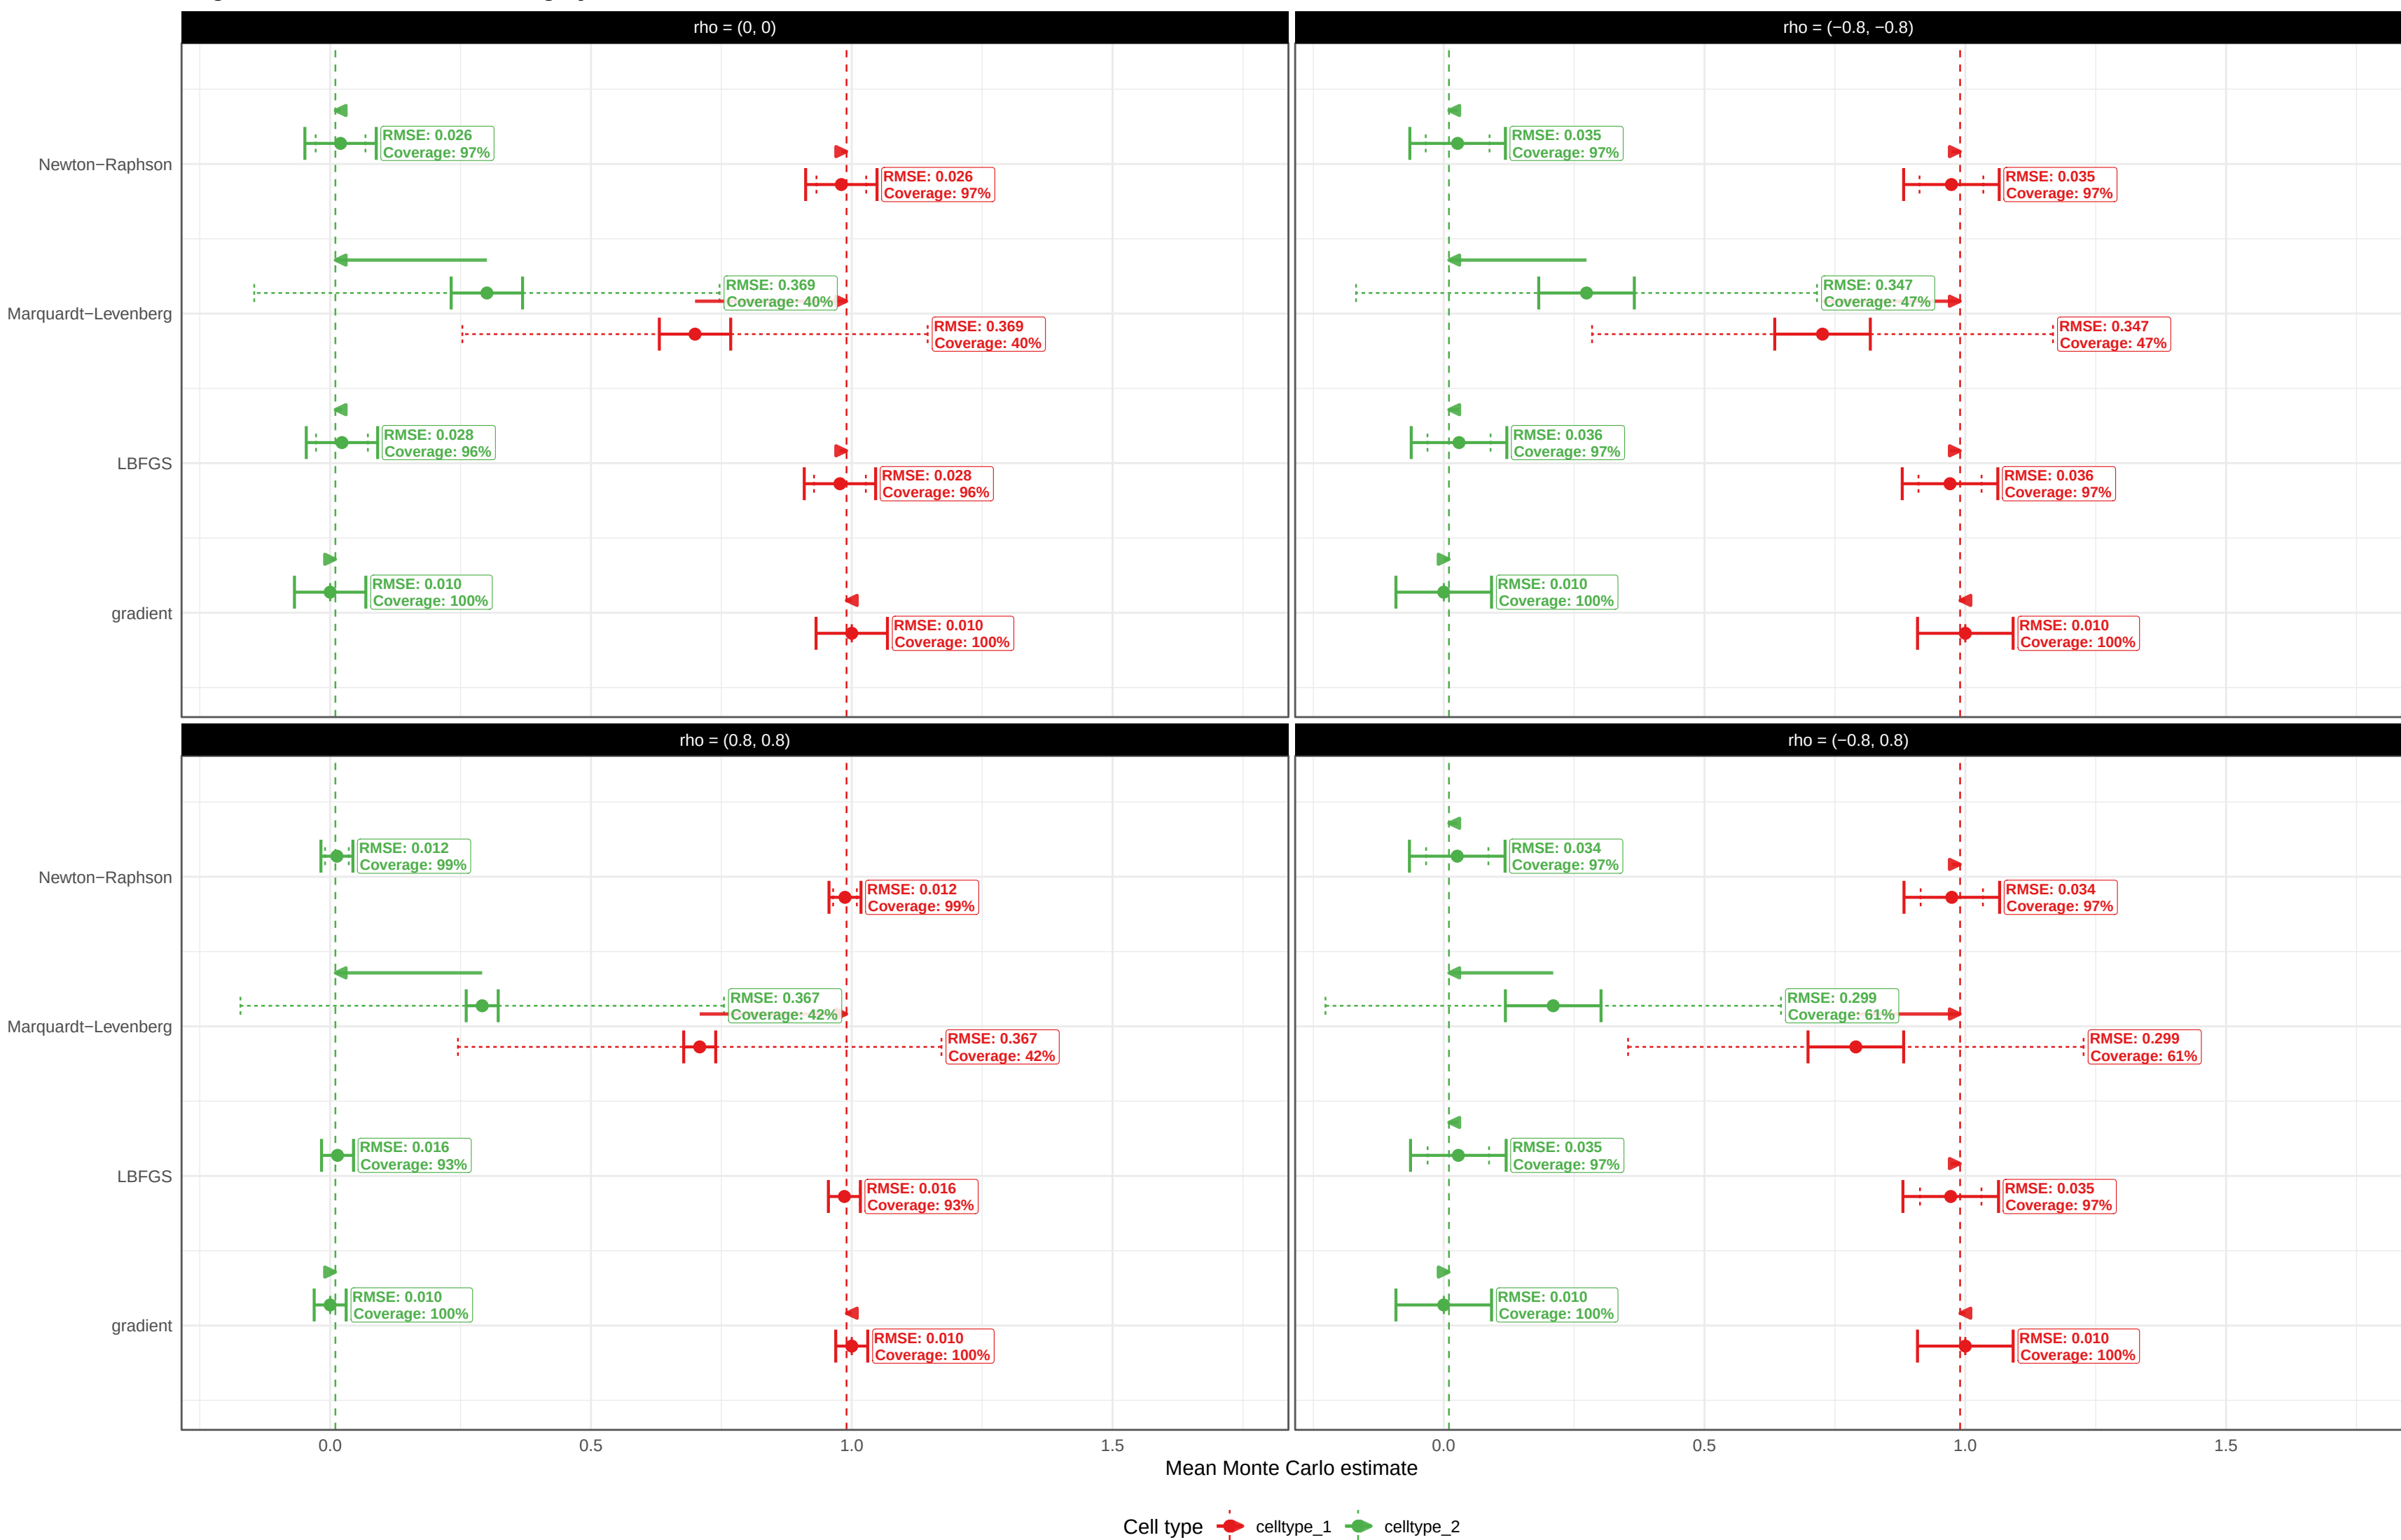

Solid whiskers: mean estimate plus or minus 1.96 times the expected-Fisher Wald SE at the true composition (confint.decovart_fit / vcov_illr_delta). Dashed whiskers: plus or minus 1.96 times the empirical Monte Carlo SD. Horizontal arrows: bias toward the true proportion. Labels (one per cell type): RMSE and coverage of those Wald intervals.

large_CLD / homoscedastic / moderately unbalanced

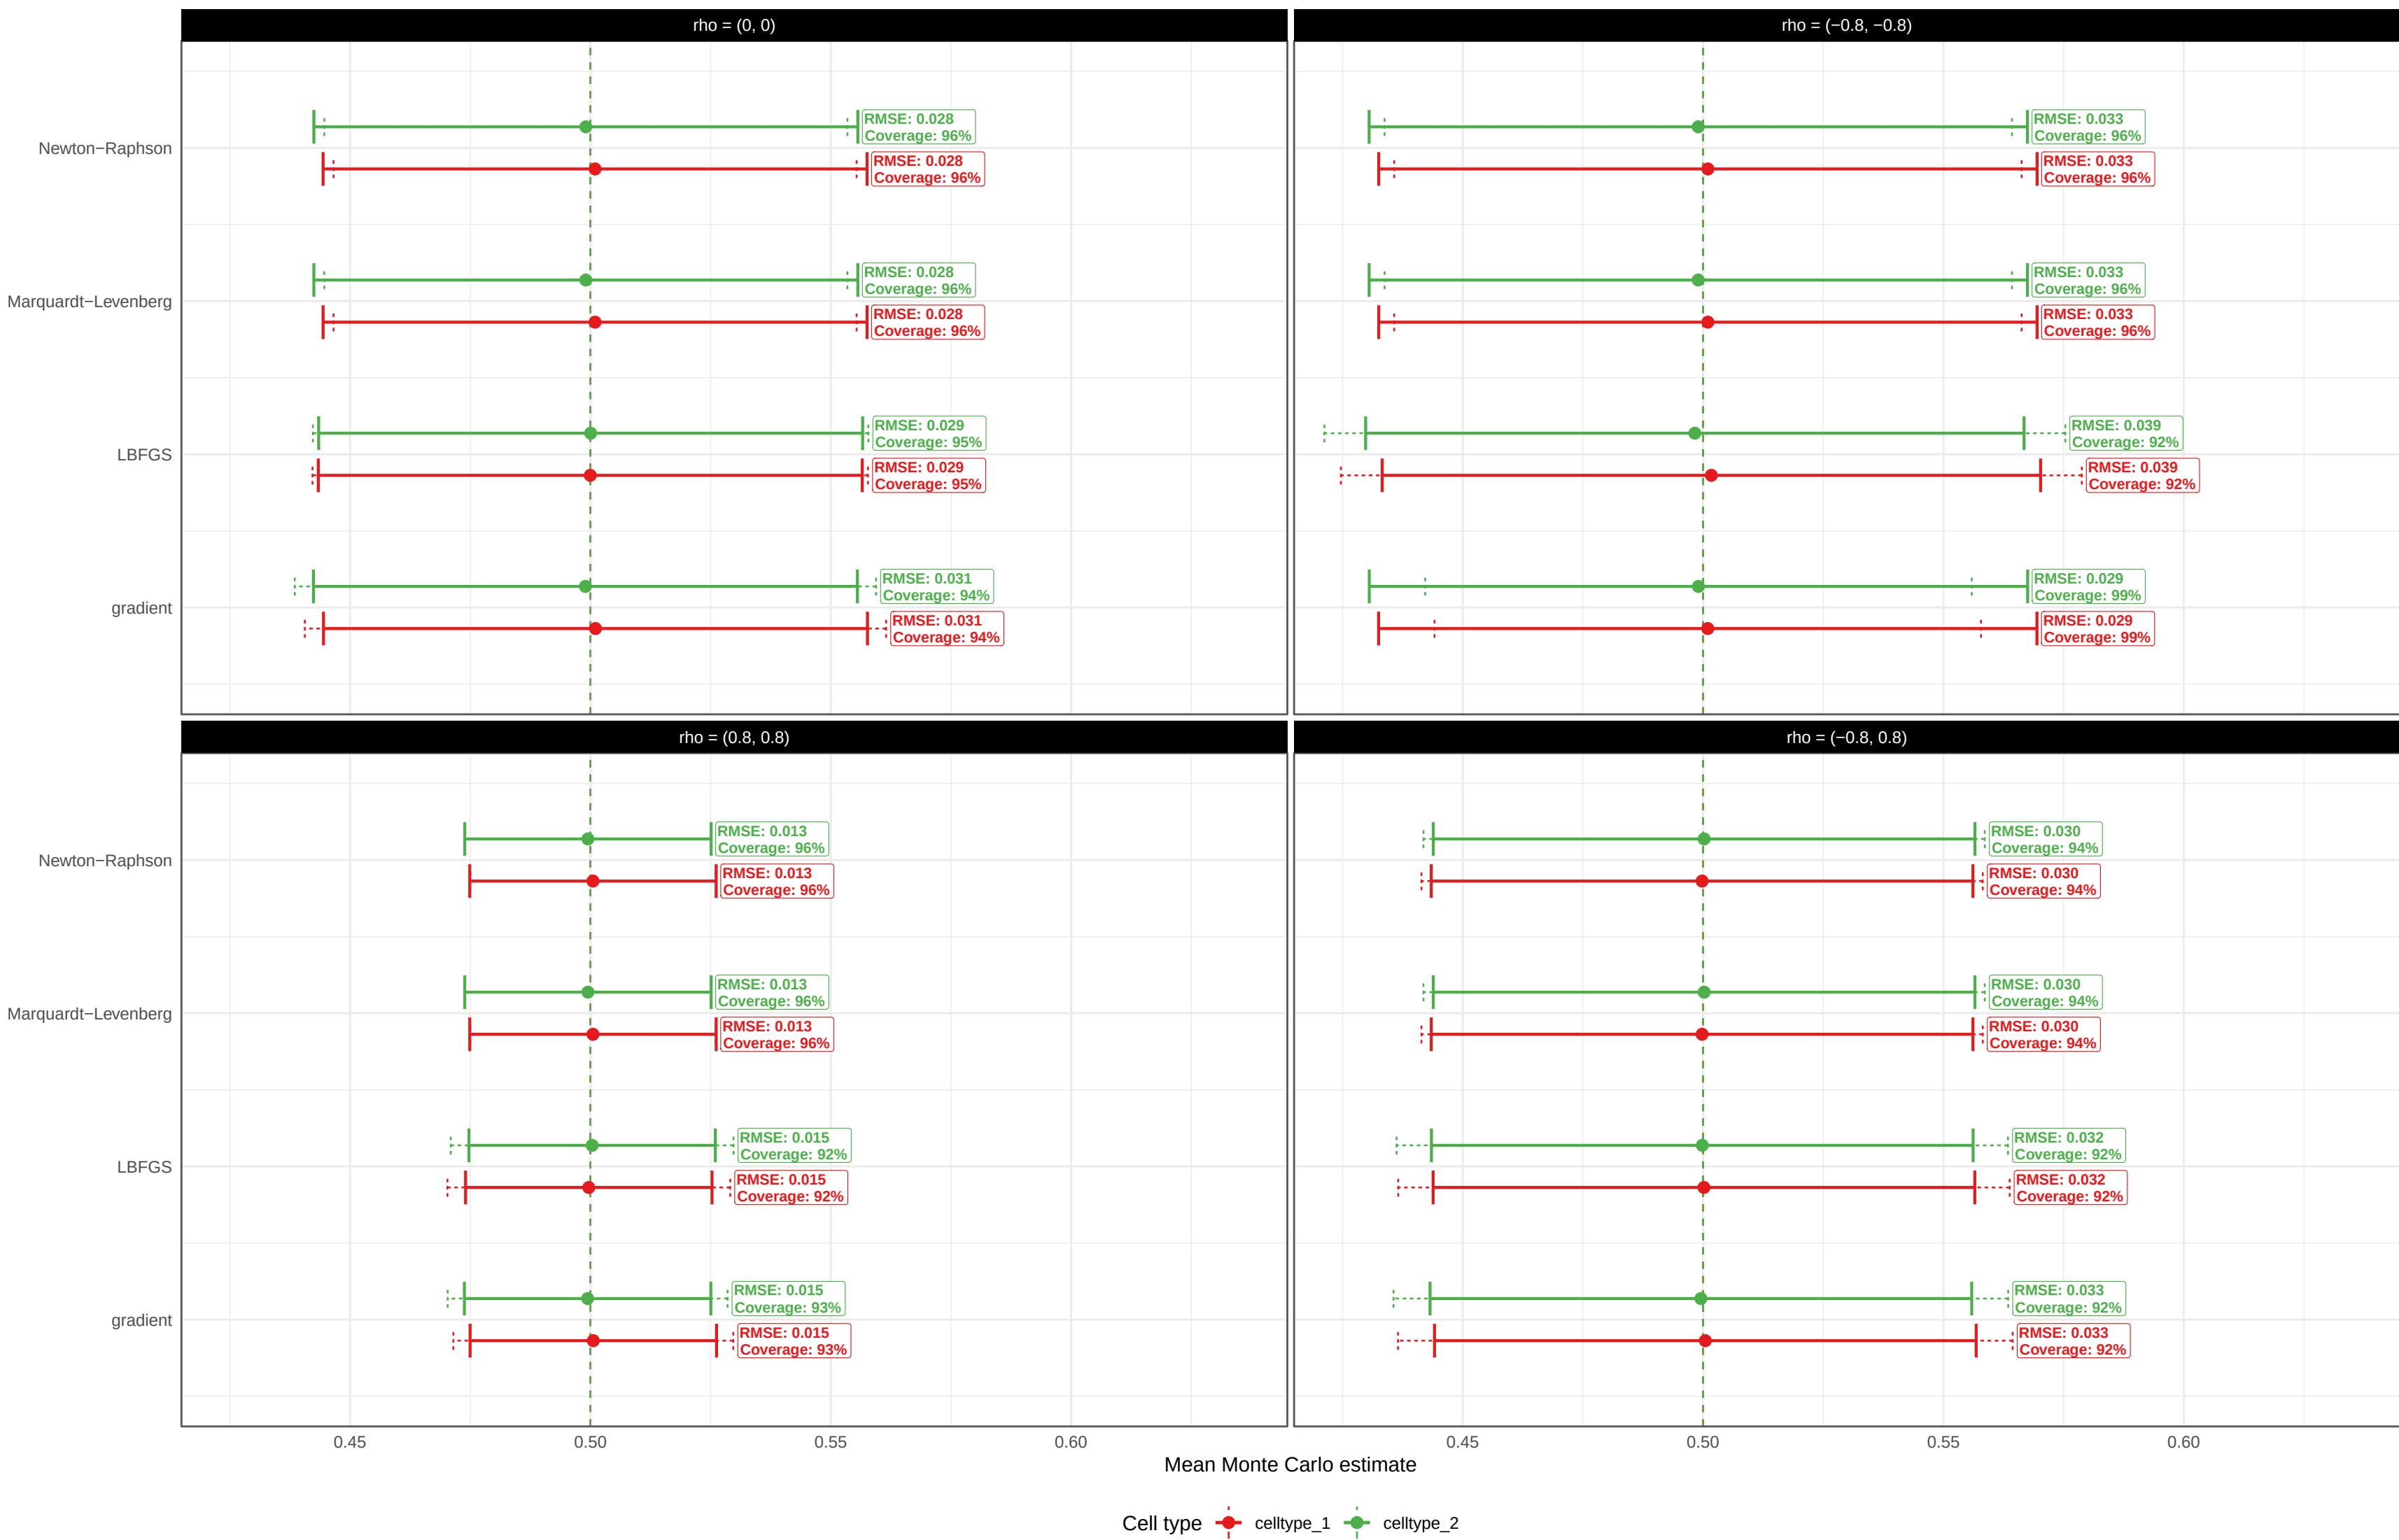

Solid whiskers: mean estimate plus or minus 1.96 times the expected-Fisher Wald SE at the true composition (confint.decovart_fit / vcov_illr_delta). Dashed whiskers: plus or minus 1.96 times the empirical Monte Carlo SD. Horizontal arrows: bias toward the true proportion. Labels (one per cell type): RMSE and coverage of those Wald intervals.

large_CLD / homoscedastic / highly unbalanced
